## CAPITAL IMPROVEMENT PROGRAM SUMMARY

The Manatee County Comprehensive Plan (Objective 12.1.6) requires Manatee County to develop a Capital Improvement Program (CIP) that provides programming and funding of capital projects consistent with the Goals, Objectives and Policies of the Comprehensive Plan and the Future Land Use Map, to maintain adopted Level of Service Standards and to meet other public facility needs not dictated by Level of Service Standards.

The Capital Improvement Program meets this requirement by providing a planned and programmed approach to utilizing the County's financial resources in the most responsive and efficient manner to meet its infrastructure, equipment and facility needs. The CIP serves as a "blueprint" for the future of the community's growth and development. It highlights the importance of capital maintenance and replacement so that those needs are addressed in a timely and coordinated manner. The CIP provides a basis upon which the impact of new projects on future operating budgets can be determined. It is a dynamic tool, not a static accounting document. Under direction of the Financial Management Department, the CIP outlines an annual budget for the County's capital projects and a plan for the County's capital investments over the next five years. The review and revision of the CIP is consistent with the Goals, Objectives and Policies of the Manatee County Comprehensive Plan.

The CIP differs from the Capital Improvement Element (CIE) of the Comprehensive Plan in that the CIE identifies projects and financing for projects that are required to provide services to areas of the County where growth is occurring, and in order to maintain levels of services that are required by the Comprehensive Plan. The CIP includes **all** capital projects, including many that are not related to service levels regularly required by the Comprehensive Plan.

The Administration of the Five Year Capital Improvement Program and the revenue outlook establishes the guidelines for fiscal feasibility for any given project. The Capital Improvement Program identifies revenue sources for each planned project. Those projects for which revenues have not been identified are shown as projects of record. The CIP meets the debt financing policies contained in the County Financial Policies and integrates County government projects with state and other local government when appropriate.

Manatee County's capital planning process begins in the fall. Departments provide capital project submissions which are reviewed by the CIP coordinating committee representing various departments including Project Management, Utility Operations, Transportation, Parks and Recreation, Community Services (Mass Transit), Planning, Agriculture and Natural Resources, and Financial Management. In early spring, the proposed CIP is presented to the Board of County Commissioners in a public work session. After input from the community, the Board considers and adopts the Capital Improvement Program for five years and a capital budget for the ensuing year is integrated into the annual budget which is adopted after two public hearings. The CIP lists each proposed capital project, the year it will commence, the amount to be spent on the project each year until completion and the proposed sources of funding. Amounts represented in the CIP are estimated project costs and are not intended to serve as precise project budgets. Projects are financed with a combination of utility rate revenues, local gas taxes, impact fees, federal and/or state grants, user fees and general revenues. It is the policy of the Board of County Commissioners that growth pays for itself to the greatest extent possible.

The CIP provides adequate time for capital projects to be planned and designed carefully before funding is appropriated and actual construction begins. This process allows professional staff to develop and review the required plans, engineering surveys, architectural drawings and proceed with purchasing bids and specifications in a timely manner. The lack of a capital program, especially in high growth areas such as Manatee County, could result in inefficiencies in service provisions where development exceeds the ability of the government to meet infrastructure needs.

The capital improvement program serves as a valuable financial tool. It can be used to forecast future capital demands on current revenues. A CIP that includes a forecast of financial resources available for capital purposes will allow public officials and staff to match those requirements. If expected revenues are not realized, the CIP process enables the County to reevaluate project priorities and either reduce capital spending in a rational manner or defer certain projects until more funding is available. The ability to revise the capital program is particularly important when a significant portion of the capital budget is to be financed from current revenues.

Implementation of the Capital Improvement Program serves to enhance the quality of life for both present and future generations of Manatee County.

## ADMINISTRATION OF THE FIVE YEAR CAPITAL IMPROVEMENT PROGRAM

### **1. PURPOSE AND INTENT**

This section is established to provide for the applicability and effect of the Five Year Capital Improvement Program for the Manatee County Board of County Commissioners, and to set forth specific requirements and procedures related to the revision and update of the Capital Improvement Program. It is the intent of this resolution that its prescriptive provisions shall be implemented, in part, through the completion of the Capital Improvement projects as described herein.

### **2. APPLICABILITY**

The Five Year Capital Improvement Program shall apply to capital improvement and capital maintenance projects undertaken by the County of Manatee, Florida. For the purposes of this section, the term "capital improvement project" shall mean a non-recurring expenditure of \$50,000 or more from County funds for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

### **3. REVIEW AND REVISION**

Each year the Five Year Capital Improvement Program shall be updated by resolution of the Board of County Commissioners. Such review and revision of the Capital Improvement Program shall be consistent with the Goals, Objectives, and Policies of the Manatee County Comprehensive Plan.

### **4. CONSISTENCY OF GOVERNMENTAL DEVELOPMENT**

- A. For the purpose of the consistency requirement of the Program, the first year of the Five Year Capital Improvement Program shall apply to all capital improvement projects undertaken by the County of Manatee for which funds were or will be appropriated in Fiscal Year 2011-2012, except as provided in paragraph D of Section 5 Administrative Provisions, or in a prior year, if the project has not been started as of October 1, 2011.
- B. Year Two of the Five Year Capital Improvement Program shall apply to all capital improvement projects for which funds will be appropriated in Fiscal Year 2012-2013. Projects for Year Two are subject to availability of funds and subsequent appropriation of funds by the Board of County Commissioners.

- C. Years Three through Five of the Five Year Capital Improvement Program shall represent general County policy with respect to capital improvements programming, subject to review and revision on a case by case basis during each of the succeeding budget years, and subject to availability of funds.
- D. Notwithstanding Paragraphs A, B, and C above, the County of Manatee may undertake other capital improvement projects not shown in the Five Year Capital Improvement Program as follows:
  - (1) Emergencies - Such projects found by the Board of County Commissioners to be of an emergency nature may be undertaken without amendment to the Program.
  - (2) Other Projects - Or, if not so found to be of an emergency nature, such projects that are deemed by the Manatee County Board of County Commissioners to be of higher priority than capital projects shown in the CIP may be undertaken, providing that the plan is amended by resolution of the Board of County Commissioners. Budget Amendment resolutions which identify such high priority projects as additions or changes to the CIP may serve as the required resolution to amend the plan.

Provided, however, that in all cases, such projects shall be otherwise consistent with the prescriptive provisions of the Plan.

## **5. ADMINISTRATIVE PROVISIONS**

- A. Capital improvements shall be deemed consistent with the Capital Improvement Program where they are consistent as to general location, scale and type of facility as provided in the CIP project description, although it need not be consistent in revenue sources or manner of operation.
- B. If funding for a project identified in the CIP as a future year project or a project of record becomes available in advance of the year for which it is planned, the Board of County Commissioners may proceed to implement that project when funding becomes available without an amendment to the Plan.
- C. Amounts shown in the CIP as estimated project costs are estimates and not intended to serve as precise project budgets. This also applies to initial appropriations for the capital projects. A precise project budget will be established for a project upon completion of the following:

- (1) Engineering and architectural plans and specifications, upon which the project cost will be estimated.
  - (2) Adoption of budget amendments subsequent to completion of plans and specifications that may be necessary to properly fund the project.
- D. Budgets for projects shall be adopted by the Board of County Commissioners as provided in Resolution R-94-270 which establishes the Manatee County Budget Administration and Implementation Policy. Budget Administration Procedures as provided for under Resolution R-94-270 allow the Budget Officer or his designee to authorize the Purchasing Division to encumber items which require exception to the level of budget control established in the Budget Administration Procedures. This authorization can be given for approved projects, items previously approved for expenditure by the Board of County Commissioners, items required by law, or other expressed priorities of the Board of County Commissioners. Projects included in this CIP and previous CIP's are to be considered "approved projects" for the purpose of encumbering funds in anticipation of formal budget amendment in order to meet significant time constraints or provide for improved fiscal resource management.
- E. To the maximum extent possible, engineering and architectural plans and specifications prepared for roadway projects contained in the Capital Improvement Program will incorporate landscaping, pedestrian/bicycle facilities and other aesthetic design considerations that enhance the image of the community and reduce the impacts to adjacent land uses.
- F. This Five Year Capital Improvement Program is prepared to be consistent with the Capital Improvement Element of the Comprehensive Plan subject to any proposed amendments to the plan presented to the Board of County Commissioners. If any provisions of this resolution are not consistent with the Comprehensive Plan, then the Comprehensive Plan shall prevail over any provisions of this resolution. Projects in the Five Year Capital Improvement Element of the Comprehensive Plan may require subsequent adoption of ordinances and/or amendments to the Comprehensive Plan before the projects can be initiated.
- G. Debt service for projects funded from the proceeds of the 2004 Transportation Revenue and Refunding Bonds may be paid from Transportation Impact Fee Revenues if all applicable impact fee requirements are met.

## 6. FUNDING SOURCES

- A. It is the intent of the Board of County Commissioners that any project included in this program may be financed and refinanced using bond proceeds. The language in sections 6.B and 6.C below is provided to ensure that the issuance of bonds to finance projects remains as a viable alternative, even if other funding sources are used to initially finance projects.
- B. This resolution is an affirmative action of the Board towards the issuance of bonds to finance or refinance the Capital Improvement Program of the County in accordance with the laws of the State and the applicable provisions of the Internal Revenue Code of 1986, as amended and the rules and regulations of the Internal Revenue Service applicable thereto.
- C. There is hereby authorized to be issued and this Board hereby determines to issue, to the extent necessary to provide financing for projects identified herein, or refinancing for such projects funded from other sources, its general obligation and revenue bonds pursuant to the laws of the State of Florida and, if required by the laws of the State, or the Constitution, a referendum vote on such general obligation bonds, for the capital improvements described in "Exhibit B" hereto in the Five Year Capital Improvement Program in one or more series and issues in aggregate principal amount of up to \$283,046,771. The authority established herein shall be implemented by subsequent resolutions of the Board of County Commissioners.

<b>General Government</b>	Project# <b>GG01010</b>	<b>AFIS (Automated Fingerprinting Information System)</b>
---------------------------	----------------------------	---

Status: Requested Initial Year: 2012 County-wide Location:

**Comprehensive Plan Information**

Project Mgr: **W. Brad Steube**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Other Need**

**Scope**

Purchase of new automated fingerprinting system for the Manatee County Sheriff Department, as part of a joint cooperative effort between Manatee and Sarasota Counties.

**Rationale**

The AFIS system used by both Manatee and Sarasota counties has extended past the system's useful lifecycle and requires an upgrade of both hardware and software components to ensure reliable identification of individuals in the pursuit of homeland security and crime fighting efforts. The Sheriff's offices in both counties maintain the only AFIS system, and provide this service to all of the law enforcement entities in both counties. The upgrade to the new AFIS will allow the counties to comply with all Federal mandates related to the submission of fingerprints and allow continued authorization by the counties to be the recipient of the enormous database maintained by the National Crime Information Center.

**Funding Strategy**

General Revenues  
 Law Enforcement Impact Fees

Note: Federal C.O.P.S. grant for this project has been requested.

Manatee and Sarasota Counties will each pay 1/2 of the total cost of the system.

Provide dual power supply lines from the generator to the data center server racks. Provide stand alone A/C units in the Data Center's ceiling space connected to the Admin generator.

**Rationale**

The 7th floor Data Center continues to be below industry standards in A/C and electrical functionality. A safe and secure power supply system is needed. This project will bring the 7th floor Data Center up to present standards for electrical and A/C services. The present electrical service is single source and had numerous single points of failure for this critical function. The A/C source is from the roof top chillers and both chillers have failed at the same time in the past. The result has been critical overheating.

<b>General Government</b>	Project# <b>6081800</b>	<b>Administration Building Air Handlers &amp; Cooling Tower</b>
Status: Requested Initial Year: 2010 District 2 Location: COUNTY ADMIN BLDG: 1112 MANATEE AVENUE .W, BRADENTON		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Howard J Leyo</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Replace 16 air handlers in the County Administration Building and replace cooling tower.

**Rationale**

All Administration Building cooling equipment is nearing its projected life span. The equipment has been in full use for 23 years. As a result of building reconfigurations throughout the life span and added heat load due to computers and associated equipment, the effectiveness of the existing equipment is limited. The present system does not meet current Outside Air intake requirements.

Result if Project is Not Constructed: Continued and more expensive equipment failures will increase.

---------------------------	----------------------------	---

Status: Existing Initial Year: 2010 District 1 Location: DETENTION FACILITY: 14470 HARLEE RD., PALMETTO

**Comprehensive Plan Information**

Project Mgr: **Howard J Leyo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Replacement of the chillers, cooling towers, pumps and variable speed pumps.

**Rationale**

The existing chiller system is approximately 21 years old. The mechanical system is aging and operates continuously. As the equipment ages, frequency of failure, down time and costs for repairs and maintenance will continue to increase. Emergency chiller may need to be rented due to this decline. New systems will operate using new technology to increase efficiency at a cost savings with minimal maintenance.

**Fiscal Year 2012- 2016 Adopted Capital Improvement Program**

<b>General Government</b>	Project# <b>6049806</b>	<b>Hensley Wing (Old MSO) - 5th Floor Renovation</b>
Status: Requested Initial Year: 2011 County-wide Location: 1051 MANATEE AVENUE WEST, BRADENTON		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need _____

**Scope**

Renovation of unoccupied office space on the 5th floor of the Hensley Wing (Old MSO) for use by the Probation Division, moving them from the Administration Building, 3rd floor. The renovation will include HVAC repair/renovation, fire alarms, drywall, electrical, lighting, ceilings, plumbing, restrooms, paint and carpet. The smoke evacuation system will not be included, as it was constructed during renovation of the 3rd floor, as required by the Fire Marshal.

**Rationale**

The space will house Probation Division personnel and allow them to operate in a secure facility, since all visitors will be required to pass through the bailiff's security checkpoint in the Judicial Center. It will also house Probation closer to the Judicial Center courtrooms where much of their business is conducted.

Result if Project is not done: County will continue to operate the Probation offices in an unsecure facility and be removed from the Judicial Center courtrooms.

**Funding Strategy**

<b>General Government</b>	Project# <b>60062..</b>	<b>Historic Courthouse</b>
Status: Summary Initial Year: 2010 County-wide Location: 1115 MANATEE AVE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Frank J. Monhart III</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need:		

**Scope**

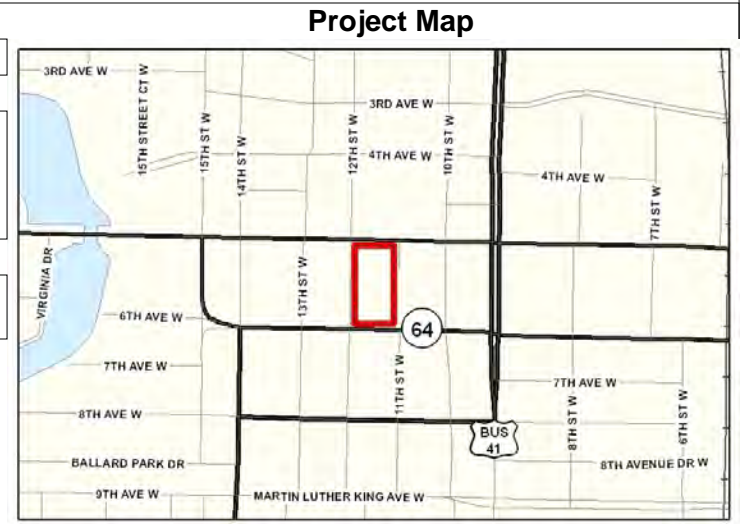

Energy upgrades including replacement of windows, roof top chillers and related HVAC equipment.

**Rationale**

Based on a consultant report, the windows and caulking allow heated or cooled air to escape the building, thereby increasing costs. When the new Judicial Center was being designed, the original plans were to connect the new system with the Historic Courthouse, but at the time of construction this was not completed. The current system was installed in 1965 and is not energy efficient.

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Frank J. Monhart III</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need:

**Scope**

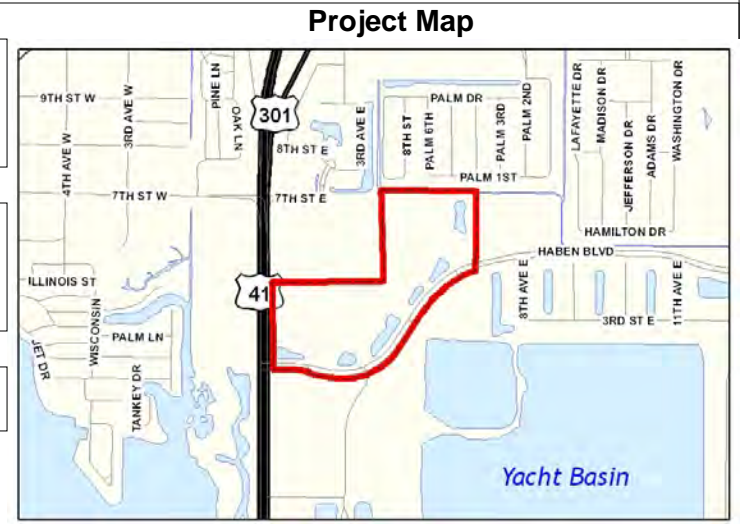

Renovation and replacement project at the Manatee County Convention Center (MCCC) to include: HVAC system replacement, roof replacement, arena renovation, lobby, restroom and food service area remodel, exterior building renovation, and improvements to parking lot, sidewalks and landscaping.

**Rationale**

Roof and HVAC system have deteriorated and need to be replaced. Interior and exterior improvements are necessary to update the facility to attract rental customers and event attendees, and to comply with current ADA requirements.

**Funding Strategy**

General Revenues  
 Interfund Loan

<b>General Government</b>	Project# <b>6026350</b>	<b>Manatee Convention &amp; Civic Center - Roof Replacement</b>
Status: Existing Initial Year: 2010 District 1 Location: MANATEE CONVENTION & CIVIC CENTER - ONE HABEN BLVD., PALMETTO		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Frank J. Monhart III</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need: _____

<b>Scope</b>
Phase 1: Replacement of the roof with a rubber membrane base style system. Phase 2: Coat existing sloping metal roof, repair eaves, repaint metal eaves, provide new gutter and downspouts.
<b>Rationale</b>
The existing roof of this facility is over 20 years old. Certain sections leak and after numerous patch repairs, it has been determined that replacement is the best option. A new roof will last 15 to 20 years. Delay of the project will result in severe leaks causing interior damage.

<b>General Government</b>	Project# <b>6071901</b>	<b>Merrill Lynch Building - 2nd Floor Renovation</b>
---------------------------	----------------------------	--

Status: Requested Initial Year: 2012 District 2 Location: 1002 MANATEE AVENUE WEST, BRADENTON FL, 34205

**Comprehensive Plan Information** Project Mgr: **Al Meronek**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Demolition of the existing non-load-bearing walls and renovation to office space for County or Elected Official use. Renovations to include Architectural and Engineering design for fire suppression, ceilings, flooring, paint, lighting, HVAC, data, phone, ADA Access, an elevator and security.

**Rationale**

The second floor is unusable in its current condition due to deterioration and a lack of ADA accessibility. Renovation of the 2nd floor would provide office space for Employee Health Benefits staff. Results if Project is NOT Constructed: The space will continue to deteriorate and will not be useable as office area.

**Funding Strategy**

General Revenues.  
 Note: \$600,000 comes from FY10 Sheriff carryover funds.

<b>General Government</b>	Project# <b>6081401</b>	<b>Rocky Bluff Branch Library</b>
Status: Existing Initial Year: 2012 District 1 Location: 6750 US 301 N, ELLENTON, FL		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Frank J. Monhart III</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Project involves acquisition of two parcels, totaling 9.75 acres, which includes a 10,317 sq ft building, previously occupied by the Roaring 20's Restaurant. The existing building will be renovated as a branch library facility for the Ellenton/Parrish area of Manatee County. The library will replace the current leased facility at Ridgewood Shopping Plaza.

**Rationale**

The current Rocky Bluff Library is an undersized, leased facility.

**Funding Strategy**

<b>General Government</b>	Project# <b>MT00697</b>	<b>Transit/Fleet Facility</b>
Status: Requested Initial Year: 2012 District 4 Location: LOCATION TO BE DETERMINED		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Howard J Leyo</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need: <b>Growth</b>		

**Scope**

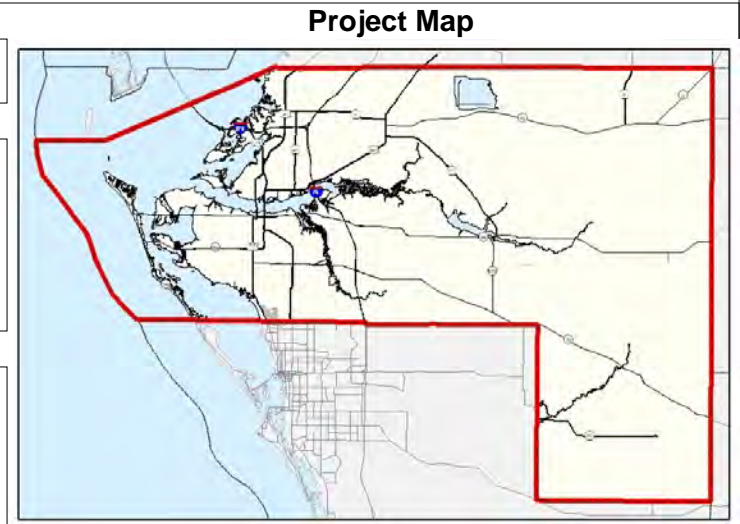

Construct new transit administration facility, Manatee County Area Transit (MCAT) bus wash, fueling and fleet maintenance facility on land to be acquired for this purpose.

**Rationale**

Current facilities are inadequate with no room for projected expansion. Current facility has three (3) service bays. Proposed facility will provide seven (7) bays to perform maintenance efficiently and safely. The current shortfall in service bays necessitates using parking areas for maintenance activity, which creates an unsafe and inefficient work environment.

**Funding Strategy**

Federal Transit Administration (FTA) Grant  
 Fleet Fund Reserves  
 Fuel Fund Reserves

<b>Natural Resources</b>	Project# <b>60069..</b>	<b>Emerson Point Park Development</b>
--------------------------	----------------------------	---------------------------------------

Status: Summary Initial Year: 2007 County-wide Location: 5801 17TH STREET WEST, PALMETTO, FL 34221

**Comprehensive Plan Information** Project Mgr:

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope** **Project Map**

Installation of an environmental classroom; construction of multi-use pedestrian trail from the Manatee County Fairgrounds to Amberwynd Circle W., which will include the Snead Island Bridge; renovations to existing internal boardwalks, towers and parking lots and construction of restroom facility.

**Rationale**

Manatee County has no indoor environmental classroom which can be used during inclement weather or the summer months in conjunction with the many educational programs offered at the Park. The multi-use trail will provide pedestrian access from Palmetto. The existing boardwalks and towers are 10+ years old and are need of restoration. There are no permanent restroom facilities which are needed to meet the sanitary and safety needs of the public.

**Funding Strategy**

General Fund - Reserves  
 Gas Taxes

<b>Natural Resources</b>	Project# <b>6053502</b>	<b>Manatee Beach Pier - Removal &amp; Replacement</b>
Status: Existing Initial Year: 2010 District 3 Location: 4000 GULF DRIVE, HOLMES BEACH		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Darin D. Cushing</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need: _____

**Scope**

Demolition of existing pier has been completed. The rebuilding of a replacement pier is on hold due to funding constraints.

**Rationale**

While the Manatee Beach pier was been damaged beyond repair and has been removed, there is some question about whether its reconstruction is eligible for funding with beach erosion control monies. Consequently, a permit for replacement is being obtained, but reconstruction of the pier should be postponed. It is recommended that funding currently programmed for the pier instead be used for the Cortez Beach groins, which are needed to protect Gulf Drive and the beach at Cortez Beach from storm damage and/or erosion.

**Funding Strategy**

Tourist Development Tax

**MANATEE COUNTY GOVERNMENT**  
**Fiscal Year 2012- 2016 Adopted Capital Improvement Program**

<b>Natural Resources</b>	Project# <b>6051201</b>	<b>Moody Branch Preserve</b>
Status: Existing Initial Year: 2010 District 1 Location: 13041 TAYLOR GRADE ROAD, DUETTE		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Michael C. Sosadeeter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need: _____

**Scope**

Construction of a parking lot, picnic pavilion, playground, nature trail/fitness trail, wildlife observation platform and interpretative signage.

**Rationale**

Florida Communities Trust (FCT) provided approximately \$2.5 million and the Florida Fish and Wildlife Conservation Commission (FFWCC) provided \$3.5 million for the acquisition of this property. The only obligation Manatee County has is to provide public access and minimal recreational improvements including a playground, picnic pavilion, trail, interpretative signage and boardwalk access to a wetland observation platform.

**Funding Strategy**

General Fund - Reserves

<b>Natural Resources</b>	Project# <b>6071300</b>	<b>Perico Preserve Environmental Restoration</b>
Status: Existing Initial Year: 2009 District 3 Location: 11700 MANATEE AVENUE W, , BRADENTON		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>C Hunsicker</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need _____

<b>Scope</b>
Construction of tidal wetlands and restoration of uplands, along with public access provisions including a parking lot, access trail and pole barn shelter.
<b>Rationale</b>
Restoration accomplishes goals of the Sarasota Bay Estuary Program, the Tampa Bay Estuary Program, and Southwest Florida Water Management District by creating habitats to offset impacts from the adjacent residential development.
<b>Funding Strategy</b>
General Fund - Reserves Southwest Florida Water Management District Grant
Southwest Florida Water Management District grant will pay for the restoration and access trail. The County must fund the shell parking lot with paved access driveway from Manatee Avenue and the pole barn shelter with local funding.

<b>Natural Resources</b>	Project# <b>6003404</b>	<b>Port Dolphin Extraction</b>
Status: Existing Initial Year: 2012 County-wide Location: ANNA MARIA ISLAND		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>C Hunsicker</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:	Project Need: <b>Maintenance</b>	

**Scope**

Extraction of 400,000 cubic yards of sand from the area impacted by the proposed Port Dolphin natural gas pipeline in the Gulf. Placement of approximately 200,000 cubic yards on the City of Anna Maria beaches (North Shore Drive area). Placement of approximately 200,000 cubic yards to replenish the permitted offshore sand borrow site adjacent to Anna Maria Island.

**Rationale**

Construction of the offshore natural gas pipeline will preempt future beach compatible sand sources. Port Dolphin has agreed to pay \$5.5 million towards permitting, excavation and placement of beach sands on Anna Maria Island.

**Funding Strategy**

Contribution - Port Dolphin \$5,500,000

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Darin D. Cushing</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need: _____

**Scope**

Furnish and install a portable classroom obtained from the School Board at Rye Preserve. Including moving costs, foundation and structural support, water, electricity, septic system, interior refurbishing for environmental classroom purposes and landscaping.

**Rationale**

The Natural Resources Department's mission is to provide conservation land management services to all environmental preserves and to create educational opportunities for upland habitat restoration projects. In addition Manatee County is contractually committed to create and furnish an environmental center with funding from Mosaic Phosphate Corporation as set forth in the development order and operating permit for expansion of mining for the 4 corners mine into the Altman Track. Mosaic will provide education materials and also make volunteers periodically available on a pre-arranged basis to assist in the educational programs.

**Funding Strategy**

General Fund - Reserves  
 Developer contribution - \$75,000

<b>Parks and Recreation</b>	Project# <b>60057..</b>	<b>Coquina Beach</b>
-----------------------------	----------------------------	----------------------

Status: Summary Initial Year: 2010 County-wide Location: COQUINA BEACH BAYSIDE

**Comprehensive Plan Information**

Project Mgr: **Michael C. Sosadeeter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Improvements to include: construction of two picnic pavilions, restoration of additional picnic pavilions, concession stand replacement, playground equipment, restrooms, signage and site amenities. Also included in the project was the construction of the Marine Rescue Headquarters and docking facilities for the Sheriff, which was completed in 2011.

**Rationale**

Improvements are needed to provide additional amenities for the public due to heavy usage.

**Funding Strategy**

General Revenues  
 Contribution from Manatee County Sheriff Office.

<b>Parks and Recreation</b>	Project# <b>6078700</b>	<b>Countywide Ballfield Light Management System</b>
-----------------------------	----------------------------	---

Status: Existing Initial Year: 2010 County-wide Location: COUNTYWIDE BALLFIELDS

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Charles H Bishop</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Deficiency</b>

**Scope**

Install a light management system, control link controls, and monitors.

**Project Map**

**Rationale**

The department maintains sixty-six (66) athletic fields. The estimated annual cost to light sixty-six (66) athletic fields is \$400,000. Staff has been working with the FPL's governmental liaison to determine the hourly cost to light our athletic fields. It has been determined each field is lit an average of 350 hours annually, at an estimated hourly cost of \$18.00 - \$20.00. We are proposing to bill the youth and adult leagues for the use of lights for night time play. In turn, the leagues will not be required to pay League Fees (team and player fees). FY09 actual totaled \$226,313. In order to bill the youth and adult leagues for the use of lights, a lighting management system would be required. Control Link controls, monitors and manages facility lighting twenty-four (24) hours per day. It reduces energy usage by operating lights only when needed. Total cost of equipment (\$108,500) and installation (\$28,250), including service for ten (10) years totals \$136,750. After ten (10) years, the annual cost for service and maintenance would be approximately \$6,800.  
 Annual Cost Savings: \$173,687

**Funding Strategy**

General Fund - Reserves

<b>Parks and Recreation</b>	Project# <b>603461</b>	<b>Fort Hamer Rowing Storage Facility, 2nd Floor</b>
Status: Requested Initial Year: 2012 District 1 Location: 1605 FT. HAMER ROAD, PARRISH, FL, 34219		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Construction of a second floor in the existing, newly-constructed 8,000 SF rowing storage facility to include meeting/exercise rooms, office and Ranger residence, fire protection, HVAC, ADA requirements, electrical, hot water, ceilings, flooring, paint, lighting, data, phone, security, windows, insulation and fuel storage.

**Rationale**

The facility was designed to allow for future construction of a second floor. It has been determined that use of the site would require 24-hour county presence for security purposes. It has also been determined that meeting, storage and office space would help market the facility to additional users.

IF NOT CONSTRUCTED: Costs for outside security will continue and the full potential for increase in marketability/facility use may not be realized.

**Funding Strategy**

<b>Parks and Recreation</b>	Project# <b>60399..</b>	<b>Lakewood Ranch Park</b>
Status: Summary Initial Year: 2008 County-wide Location: 5350 LAKEWOOD RANCH BLVD., BRADENTON, FL 34202		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Eric A. Angersoll</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need:		

**Scope**

Development of updated site plan for additional improvements including football and soccer concession stands, two T-ball fields, sidewalks, security lighting, new irrigation system and lighting for football practice field and soccer field.

**Rationale**

The current football and soccer leagues concession stands do not have restrooms or adequate storage space, therefore new facilities are needed. Additional parking and the extension of the sidewalks is needed due to the volume of usage. Lighting of the football and soccer fields will allow for expanded hours of operation. The addition of two T-ball fields and the playground will enhance the recreational activities.

<b>Parks and Recreation</b>	Project# <b>6039911</b>	<b>Lakewood Ranch Park Softball Parking Lot</b>
Status: Existing Initial Year: 2009 District 5 Location: 5350 LAKEWOOD RANCH BLVD., BRADENTON		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Michael C. Sosadeeter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Growth</b>

**Scope**

Addition of 110 parking spaces with lighting adjacent to the softball fields.

**Rationale**

There is currently a shortage of parking spaces at the facility. Team members and families park on the road, in the undeveloped fields and anywhere they can find space. There are approximately 165 youth teams along with County run leagues. All of this activity combined with the high schools' use of the 600 space parking lot and the unimproved areas are a safety concern.

**Scope**

Installation of fencing and lighting for two existing softball fields.

**Rationale**

The two (2) existing softball fields in Myakka Community Park have backstops but no outfield fencing. Construction of such fencing would enhance the games played on these fields, and accommodate organized softball leagues. Fencing would also prevent players on the field from running into other park visitors who are using the adjacent multi-purpose trail. Finally, the installation of lights at these fields will maximize their use.

<b>Parks and Recreation</b>	Project# <b>6081100</b>	<b>Portosueno Park</b>
Status: Existing Initial Year: 2011 District 3 Location: 1206 ALCAZAR DR., BRADENTON, FL 34209		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Construct a six (6) foot wide walk around the basin with six (6) benches, landscaping, and bollards.

**Rationale**

The Manatee basin needs dredging due to soil erosion from the sloping shoulders encircling it. Construction of a walkway around the basin would curtail this erosion, and would provide a pleasant viewing area of the basin for park visitors.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>Whispering Pines / Palma Sola Woods Water Main</b>
<b>Potable Water Distribution</b>	<b>PW00984</b>	
Status: Requested Initial Year: 2014 District 3 Location: WHISPERING PINES & PALMA SOLA WOODS		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need:

**Scope**

Replace 6" water main

**Rationale**

Extending 6" water main and eliminate existing water main through an easement. Install +/- 375 feet of 6" HDPE Water main, fire hydrants, 6 gates valves, short services, blowoff, including grouting abandon main. Hydrant's services and valves should be installed to County and Ten State Standards.

Note: HDPE (High-density polyethylene)

<b>Potable Water</b>	Project#	<b>Distribution Building/ Annex Rehab (66th Street Complex)</b>
<b>Potable Water Renewal/Replacement</b>	<b>PW00985</b>	

Status: Requested Initial Year: 2012 District 3 Location: 66TH STREET WEST

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Demolition of existing Distribution buildings (2) and construction of a new 17,000 sq. ft. building. New building will include a work/storage shop. Some site work will be required.

**Rationale**

Existing structure has out lasted its expected life use and has become a maintenance issue. The new 17,000 sq. ft. will replace two existing buildings currently used for the utility Distribution section. No SWFWMD issues are anticipated, as the County will be matching the existing sq. ft. for pervious vs. impervious surface.

Project Need:

**Maintenance**

**Scope**

Design and construction of 8,200 linear feet of 6" and 3,650 linear feet of 8" water mains to replace existing 1-1/2", 3", 4" and 6" water mains.

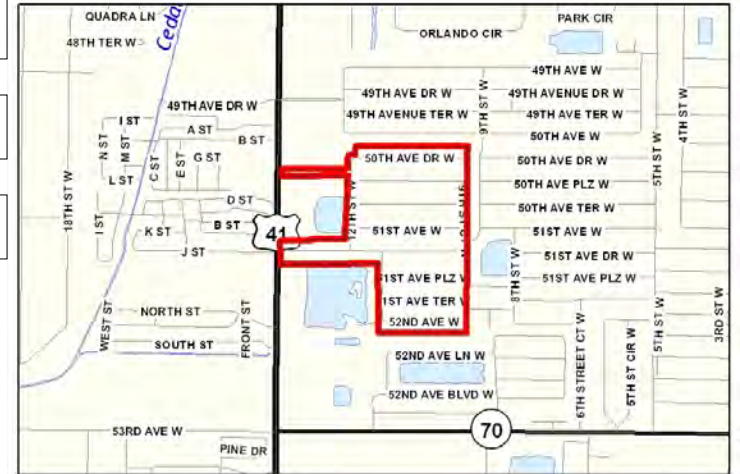

**Rationale**

Current potable water system is deteriorated, under sized and has inadequate fire protection and is located within an existing easement where maintenance accessibility is limited.

**Funding Strategy**

Utility Rates  
Proposed Debt

<b>Potable Water</b>	Project#	<b>Suburban System - Water</b>
<b>Potable Water Renewal/Replacement</b>	<b>6074770</b>	

Status: Existing Initial Year: 2009 District 4 Location: 58TH AVE WEST NORTH TO 53RD AVENUE WEST BETWEEN 26TH STREET WEST AND 14TH STREET WEST

**Comprehensive Plan Information**

Project Mgr: **Charles Froman**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Design and construction to replace existing 2", 3" and 6" water mains with approximately 38,600 linear feet of 6" water main and 10,100 linear feet of 8" water main.

**Rationale**

Existing lines are either asbestos cement or galvanized iron. Replacement of the aged water mains will improve fire protection and increase distribution pressure to the existing development, eliminate rear water line easements for some of the existing properties, and provide service access from the road right-of-way.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>Water Facility - Tainter Gates - Water</b>
<b>Potable Water Renewal/Replacement</b>	<b>6026073</b>	
Status: Existing Initial Year: 2009 District 1 Location: WATER FACILITY - WATERLINE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Repairs to the three tainter gates including repair voids under seal plates, structural upgrades, and repair of coating. Repairs to the surface of submerged concrete surfaces of spillway. Repairs to stop-log, new stop-log storage support system, to scoured areas. Repairs to sheet pile retaining wall and repair.

**Rationale**

The three tainter gates are critical to controlling water levels in Lake Manatee. Periodic maintenance to gates and spillway are essential to gate/spillway operations.

**Funding Strategy**

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

This project is for the replacement of motor control center (MCC) A at the Water Treatment Plant (WTP). This unit was installed with the original plant in 1965. A newer section of the MCC was added in 1974 with the expansion of the WTP. This MCC distributes power to mixer, chemical feed pumps, sludge pumps, surface/back wash pumps, transfer pumps and control systems.

**Rationale**

Due to the age of the unit, new repair parts are no longer inventoried by the manufacturer. A failure of this unit would result in back-up temporary operation in order to continue to treat surface water.

**Funding Strategy**

Utility Rates  
Proposed Debt

<b>Potable Water</b>	Project# <b>6059970</b>	<b>State Road 64 At Carlton Arms To Interstate 75 - Water Relocation</b>
----------------------	----------------------------	--

Status: Existing Initial Year: 2006 District 1 Location: STATE ROAD 64 AT CARLTON ARMS TO INTERSTATE 75

**Comprehensive Plan Information** Project Mgr: **Walter Sowa**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope** **Project Map**

Relocation of approximately 14,150 linear feet of water main.

**Rationale**

Florida Department of Transportation (FDOT) intends to improve a portion of State Road 64 from Carlton Arms Boulevard toward Interstate 75. The project will consist of six (6) lanes (2.502 miles in length) to include lighting, sidewalks, and 4' bike lanes. Due to County owned utility facilities within the limits of the project, the County is required to relocate the existing water main.

**Funding Strategy**

<b>Solid Waste</b>	Project# <b>SW00990</b>	<b>Landfill Main Haul Road Resurfacing</b>
Status: Requested Initial Year: 2014 District 5 Location: STATE ROAD 64 AND LENA ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Resurface Lena Road from State Road 64 to the entrance of the landfill to include fill material and sod on both sides of the length of the roadway.

**Rationale**

Lena Road has not been resurfaced for many years and by 2014, given all the heavy truck usage will fail. Because of the heavy equipment traffic, once the roadway begins to fail, the deterioration occurs very quickly and will need to be addressed prior to this happening.

**Funding Strategy**

<b>Solid Waste</b>	Project# <b>6008202</b>	<b>Lena Road Landfill Gas Electric Generation Project - Phase I</b>
--------------------	----------------------------	---

Status: Existing Initial Year: 2011 District 5 Location: LENA ROAD LANDFILL

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: Other Need

**Scope**

Purchase and installation of an electrical generator and building to collect gas which naturally occurs in the landfill. Gas will be moved from landfill through the installation of gas lines and a collection system to the electrical generator thereby producing electricity. The Southeast Wastewater Treatment Plant will use the power generated from this project to offset their electrical cost.

**Project Map**

**Rationale**

Net Metering Program offered thru Florida Power & Light (FPL) Company for continued connection to the grid while self generating, the plant can remain on the FP & L grid, eliminating any risk of ever being without power.

**Funding Strategy**

Status: Existing Initial Year: 1995 District M Location: MANATEE AVENUE SOUTH TO BUSINESS 41		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Walter Sowa</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____

**Scope**

Dredge from the mouth of Wares Creek to 9th Ave W, clear and snag debris from 9th Ave W to 17th Ave W, and excavate for widening the creek from 17th Ave W to 21st Ave W. Also, widen with seawall the section from 1st Ave W to 30th Ave W, and widen with trapezoidal channel from 30th Ave W to near Cortez Road.

**Rationale**

To accomodate expanded peak stream flow capacity, better accomodate heavy rainfall events and limit flood occurrences.

**Funding Strategy**

Dredging Capital Projects Fund  
 Stormwater Capital Improvements Funding

<b>Transportation</b>	Project# <b>6045661</b>	<b>44th Avenue East From 15th Street East To 19th Street Court East</b>
Status: Existing Initial Year: 2002 District 5 Location: 44TH AVENUE EAST FROM 15TH STREET EAST TO 19TH STREET COURT EAST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Steve Serbaty</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Construction of a four lane divided roadway with bike lanes, sidewalks and street lights.

**Rationale**

To provide a future east to west thoroughfare to support anticipated increase in capacity and to relieve demands on State Road 70 and State Road 64. This project opens up access from 15th Street East into the Manasota Industrial Park to 19th Street Court East, and creates a crossing over the CSX railroad.

<b>Transportation</b>	Project# <b>6076960</b>	<b>Cortez Road At 59th Street West Intersection</b>
Status: Existing Initial Year: 2009 District 4 Location: CORTEZ ROAD AT 59TH STREET WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Steve Serbaty</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>
Replacement of the existing concrete signalization poles with up to three upgraded mast arm signals for a three-way intersection.
<b>Rationale</b>
New signals will have optical controls to meet current FDOT standards.
<b>Funding Strategy</b>
Gas Taxes - New FDOT Grant
Note: FY12 funding will actually occur during FY11 through a Budget Amendment once the grant agreement with FDOT is executed.

CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:	Project Need: <b>Growth</b>	

**Scope**

Construction of intersection improvements including realignment, and turn lanes for left turn on US 301 southbound and right turn on US 301 northbound directions; and add cul de sacs to 60th Street East and Doris Road to include connector roadway to the proposed relocation of Fort Hamer to provide an expanded intersection and accommodate increased capacity.

**Rationale**

To enhance safety and access onto US 301, and to provide for anticipated increased capacity. This project is associated with the upcoming Fort Hamer / Upper Manatee River Road bridge crossing.

**Funding Strategy**

Impact Fees  
Gas Taxes

<b>Wastewater</b>	Project#	<b>57th Avenue East - Sewer</b>
<b>Wastewater Collections</b>	<b>6075680</b>	
Status: Existing Initial Year: 2011 District 4 Location: 57TH AVENUE E.		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Vince Canna</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Disconnect the existing 6" force main from the existing 20" force main, construct new 8" force main from the manifold to Pump Station 428, connect pre-existing 6" force main to the newly installed 8" force main.

**Rationale**

This project was identified as part of the hydraulic analysis performed by McKim & Creed for the Southeast Service Area. Pressure from a lift station in the area is too high for the existing collection system. This replacement is part of a group of changes that will allow for additional flow in the area.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Force Main 14 Replacement North Shore Drive to Palm Avenue</b>
<b>Wastewater Collections</b>	<b>6079980</b>	<b>(Anna Maria Island)</b>

Status: Existing Initial Year: 2012 District 3 Location: NORTH SHORE DRIVE TO PALM AVENUE, ANNA MARIA ISLAND

**Comprehensive Plan Information**

Project Mgr: **Chuck Froman**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Replacement of approximately 3,000 linear feet of 8" cast iron force main with high density polyethylene (HDPE) directional drill force main and all ancillary piping, valves and connections.

**Rationale**

The force main is in disrepair and requires replacement. The ductile iron pipe is fully corroded due to blow outs on an adjacent segment near the Bay.

**Funding Strategy**

2010 Utilities Taxable/Nontaxable Bonds

<b>Wastewater</b>	Project#	<b>Force Main Replacement 34A - 26th Street West from Heron</b>
<b>Wastewater Collections</b>	<b>6081280</b>	<b>Way to 53rd Avenue West</b>
Status: Existing Initial Year: 2012 District 4 Location: 26TH STREET WEST FROM HERON WAY TO 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Chuck Froman</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Replacement of approximately 7,200 linear feet of 10-inch, 16-inch and 18-inch ductile iron force main with high density polyethylene (HDPE) directional drill force main and all ancillary piping, valves and connections.

**Rationale**

The force main is in disrepair and requires replacement. During emergency repairs it was discovered that there are no valves on the force main that tie into this area causing problems for isolation purposes.

**Funding Strategy**

Proposed Debt

<b>Wastewater</b>	Project#	<b>Parrish Village Force Main And Master Lift Station</b>
<b>Wastewater Collections</b>	<b>6069180</b>	
Status: Existing Initial Year: 2008 District 1 Location: STATE ROAD 62 AT ERIE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Vince Canna</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

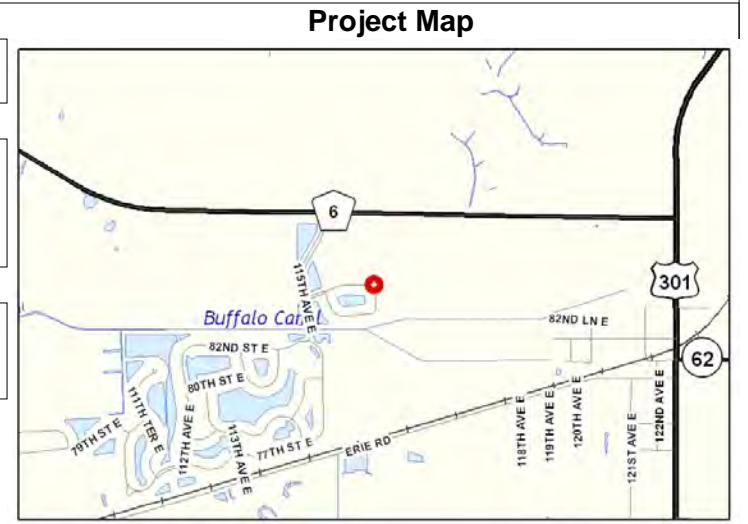

Construction of a new force main and master lift station to connect to the existing 16" force main on US 301 and Erie Road.

**Rationale**

New force main and lift station needed due to future population growth and usage. This project is related to the US 301 - Erie Road/Old Tampa Road to County Road 675 project. This system will provide wastewater service to the Village of Parrish and alleviate the potential overload of the existing lift station.

<b>Wastewater</b>	Project#	<b>Tara 20 Force Main Parallel to Lena Road</b>
<b>Wastewater Collections</b>	<b>WW00979</b>	
Status: Requested Initial Year: 2014 District 5 Location: 85TH BLVD EAST (LENA ROAD) FROM STATE ROAD 70 TO 41ST AVENUE EAST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need:

**Scope**

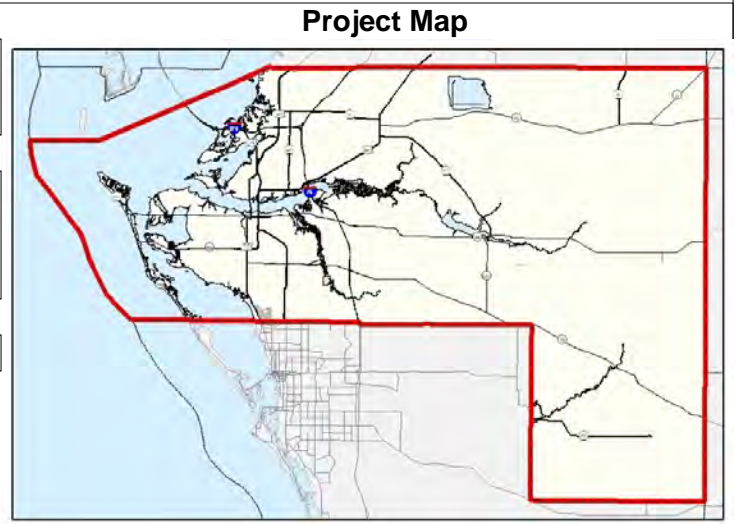

Install approximately 8,700 linear feet of 20 inch force main to parallel the existing 20 inch force main along 85th Boulevard East (Lena Road) from State Road 70 to 41st Street East to the existing 30 inch force main.

**Rationale**

To allow for the diversion of wastewater flow currently from 41A to 39A, to flow from 41A to Tara 20. This will improve capacity through Master Lift Station 39A for future growth in this service area. As Tara 20 and 41A are currently built out, the combined systems with these added improvements, will be able to handle the maximum peak flow demands combined with 41A and Tara 20.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>North Water Reclamation Facility Expansion, Phase I</b>
<b>Wastewater Growth Related Booster Stations</b>	<b>6011283</b>	
Status: Existing Initial Year: 2010 District 3 Location: BUFFALO CREEK GOLF COURSE AND ERIE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Interim improvements to enhance the biological treatment and improve the reclaimed system water quality and reliability. Modifications include new dissolved oxygen probes in the existing aeration basins, replacement of the internal recirculation pumps, and system automation for automatic dissolved oxygen control of the blowers for improved nitrogen removal. The lake filtration work includes lake intake structure improvements, new lake gravity filters, yard piping and appurtenances to increase the lake filtration capacity from 1.5 million gallons per day to 15 million gallons per day and improve water quality and system reliability.

**Rationale**

Influent nitrate loading has increased over the years resulting in biological process limitations and incomplete reduction of nitrates which may cause the facility not to operate correctly. The existing lake filtration system is insufficient to meet current demands resulting in poor water quality and reduced reliability for the end user.

<b>Wastewater</b>	Project#	<b>Pump Station 428 Force Main</b>
<b>Wastewater Growth Related Booster Stations</b>	<b>6055480</b>	
Status: Existing Initial Year: 2006 District 3 Location: 44TH AVENUE AND 65TH STREET E.		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Sal Bordonaro</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:	Project Need: <b>Growth Maintenance</b>	

**Scope**

Installation of a booster pump station along 44th Avenue East between 65th Street and 67th Street East

**Rationale**

Increased capacity requirements are producing higher system pressures which in turn increases the existing pump workload. This results in potential system failure. Installing a booster station will release the system pressures and increase system reliability.

<b>Wastewater</b>	Project#	<b>Colony Cove 1 And 2 - Gravity Sewer Rehabilitation</b>
<b>Wastewater Restore/Rehab</b>	<b>6005680</b>	
Status: Existing Initial Year: 2011 District 1 Location: US 301 AND COLONY COVE DRIVE (ELLENTON)		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Chuck Froman</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>
Replacement of 4,100 linear feet of 8" sewer pipe and manholes including relocation to the front right-of-way.
<b>Rationale</b>
These lines were installed in the 1960's and are no longer adequate to manage the flow, creating backups. Manholes are located under trailers which impedes equipment access for repairs.

<b>Wastewater</b>	Project#	<b>Force Main 27A Rehabilitation</b>
<b>Wastewater Restore/Rehab</b>	<b>WW00978</b>	
Status: Requested Initial Year: 2015 District 4 Location: 24TH STREET WEST TO 34TH STREET WEST ALONG 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:	Project Need: <b>Maintenance</b>	

**Scope**

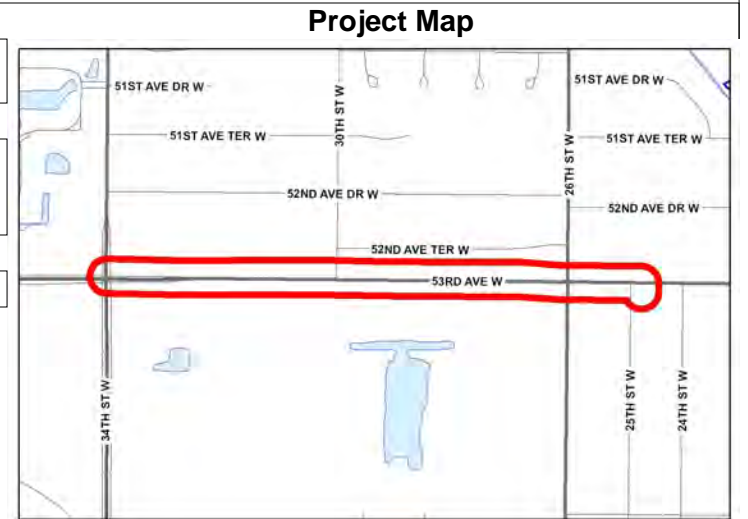

Replacement of approximately 3,200 linear feet of 20-inch ductile iron pipe force main with 24-inch high-density polyethylene (HDPE) force main.

**Rationale**

Replacement is due to the advanced age of this force main which was installed around 1975. Issues related to heavy gas problems have been experienced in this line. To avoid potential force main breaks, spills and high maintenance-related costs, replacement is needed.

**Funding Strategy**

Proposed Debt

<b>Wastewater</b>	Project#	<b>North Water Reclamation Facility Automatic Backwash Filter</b>
<b>Wastewater Restore/Rehab</b>	<b>WW00956</b>	<b>Rehabilitation</b>
Status: Requested Initial Year: 2013 District 1 Location: BUFFALO CREEK GOLF COURSE AND ERIE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Remove the existing filter media, inspect the under-drains, rails and bridge equipment, make necessary repairs, and fill the filter basins with new media.

**Rationale**

The lake water returned from the reclaim storage ponds to the existing automatic backwash filters contains high concentrations of algae and solids resulting in particulate breakthrough reducing filter performance and shortening the life span of the filter media. During this maintenance operation when the filter basins are empty, it is beneficial to inspect and repair the media grating, the traveling bridge rails and the mechanical bridge equipment. Without regular maintenance the mechanical equipment loses calibration, resulting in greater or emergency repair costs.

**Funding Strategy**

Proposed Debt

**Project Map**

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility Internal Recycle Pumps</b>
<b>Wastewater Restore/Rehab</b>	<b>WW00963</b>	

Status: Requested Initial Year: 2013 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Construction of a new internal recycle pump station and aeration control system to include removal of the valve and piping inside the existing oxidation ditches, installation of a new isolation valve outside of the tank, installation of new internal recycle pumps and piping, and the addition of dissolved oxygen probes and system programming to control the aerator speed.

**Project Map**

**Rationale**

The existing internal recycle pump and valve system predates the 2000 Southeast Water Reclamation Facility (SEWRF) expansion. The age and configuration of the system is resulting in operational issues with consequential increased maintenance costs. The SEWRF is replacing these pumps in the same configuration as being completed at the North Water Reclamation Facility to resolve these issues and to move the isolation valve outside the tank. The replacement of this system will result in better internal return flows, improved nitrogen removal and improved ability to maintain the equipment.

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility Sludge Holding Tank</b>
<b>Wastewater Restore/Rehab</b>	<b>WW00961</b>	<b>Improvements</b>
Status: Requested Initial Year: 2013 District 5 Location: STATE ROAD 64 AND LENA ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: Project Need: <b>Maintenance</b>

**Scope**

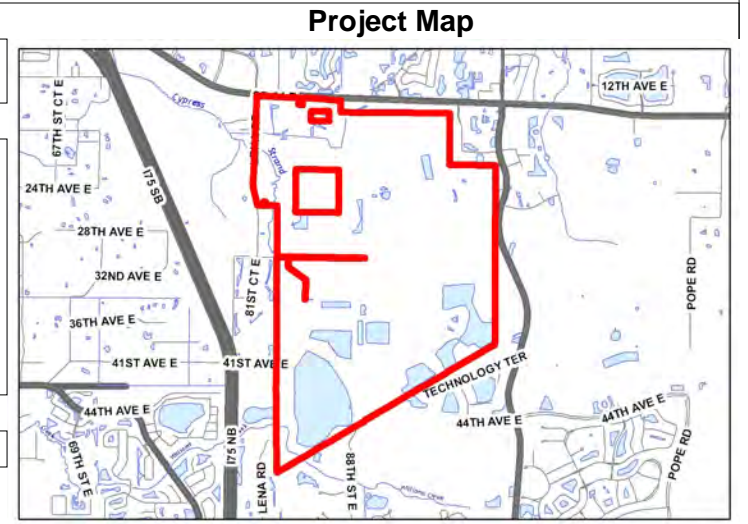

Removal of the existing centrifugal aeration system and course bubble diffusers and replace them with jet aeration in both tanks along with adding an additional gravity belt thickener.

**Rationale**

To reduce drying costs, the sludge holding operation was changed to thicken the waste activated sludge to 5% solids. The current course bubble aeration and centrifugal blowers were not designed for this type of operation resulting in the inability to decant the tanks because the aeration system cannot be turned off or the course bubble diffuser header will become plugged with solids and the centrifugal blowers cannot dislodge them. These improvements will reduce energy usage and polymer consumption providing greater operational flexibility and control over the sludge holding process and be compatible with the sludge requirements for processing Class AA biosolids at the Dryer Facility.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Effluent Storage Tank 2</b>
<b>Wastewater Restore/Rehab</b>	<b>6036083</b>	
Status: Existing Initial Year: 2012 District 3 Location: 66TH STREET AND 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Installation of a 10 million gallon ground storage tank and appurtenances, including associated valves, pipes, Supervisory Controls and Data Acquisition (SCADA) and appurtenances to connect to the Southwest Water Reclamation and Manatee Agricultural Reuse Supply (MARS).

**Project Map**

**Rationale**

At present off-peak times, a portion of the Southwest Water Reclamation Facility's effluent is discharged to a deep injection well due to limited alternate storage facilities resulting in Part III (meets reclaimed water standards) public access reuse quality water not being utilized. This project will add system storage increasing the operational efficiency of the reclaimed water system to peak demands.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Generator Switchgear Replacement</b>
<b>Wastewater Restore/Rehab</b>	<b>WW00965</b>	

Status: Requested Initial Year: 2015 District 3 Location: 66TH STREET AND 53RD AVENUE WEST

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Replacement of the generator switchgear at the Southwest Water Reclamation Facility to include providing temporary backup power, removing and replacing the existing switchgear and reconnecting the generators.

**Project Map**

**Rationale**

The switchgear is aged and is reaching the end of its useful life. Staff has experienced increased maintenance, some operational issues and difficulty getting parts for the antiquated switchgear. This project will remove the existing standby power switchgear for the combined 2000kW and 1875kW generators and replace it with state of the art switching technology.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Lake Filtration, North Pond Lining &amp; Reject Pond</b>
<b>Wastewater Restore/Rehab</b>	<b>6079180</b>	
Status: Existing Initial Year: 2011 District 3 Location: 66TH STREET AND 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:	Project Need: <b>Maintenance</b>	

**Scope**

Conversion of the existing unlined north effluent storage pond to a lined reject holding pond and a lined effluent holding pond, separated by a lined interior berm. Construction will include earth work, lining, pipes, valves, and automation. Renovation of the lake filtration system including a new lake gravity filter system and the associated piping, valves, chemical feed and automation modifications.

**Rationale**

The existing facility currently has no storage specifically designated only for reject water or Part III reclaimed water storage. The Florida Department of Environmental Protection(FDEP)2010 operating permit renewal requires that separate lined storage ponds be constructed in order to comply with current regulatory requirements and ensure the reliable functioning of the facility to manage these flows. The existing lake filtration system is insufficient to meet current reclaim water demands due to algae and inadequate pressure for backwashing, resulting in poor water quality and reduced reliability for the end user. As such, this water is diverted through the automatic backwash filters for treatment, commingling Part III water with the process stream resulting in increased filter maintenance, backwashing and turbidity diversions.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Process Modifications for Nitrogen Removal - Phase 1</b>
<b>Wastewater Restore/Rehab</b>	<b>6079080</b>	
Status: Existing Initial Year: 2011 District 3 Location: 66TH STREET AND 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Chuck Froman</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

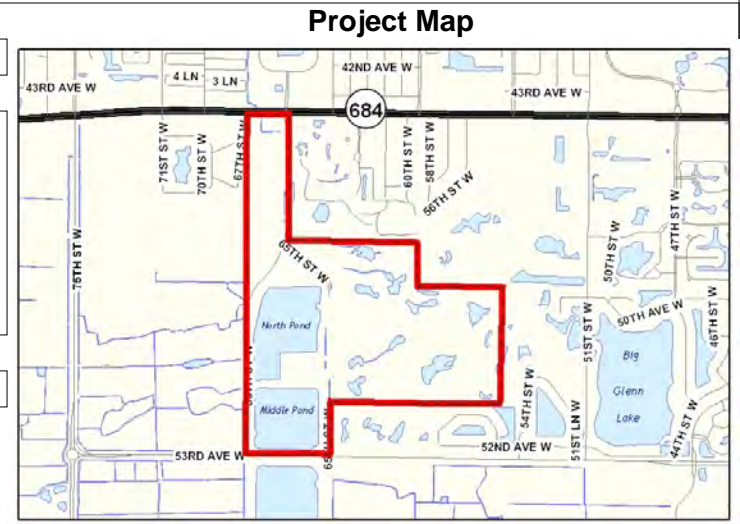

Phase 1 will consist of completing the study and modifying the digester process.

**Rationale**

Florida Department of Environmental Protection (FDEP) has expressed concern over the conventional activated sludge process (Ammonia Process) at the Southwest Water Reclamation Facility and based on conversation with the FDEP it is anticipated that they will impose nitrogen limits on the facility in the near future. Implementing an Advanced Activated Sludge process (Modified-Ludzak Ettinger or MLE) similar to the other facilities will enhance nitrogen removal and have the side benefit of minimizing the algal food source going to the wet weather storage ponds helping to reduce algae production and improving the reclaimed water quality.

<b>Wastewater</b>	Project#	<b>Force Main 41A Redirect to Tara 20</b>
<b>Wastewater Treatment</b>	<b>WW00980</b>	
Status: Requested Initial Year: 2015 District 5 Location: ALONG WHITFIELD AVENUE, OLD FARM ROAD & WINSLOW AVENUE		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need:

**Scope**

Install approximately 21,000 linear feet of 16-inch and 20-inch force main. Install 20-inch force main along Whitfield Avenue, Old Farm Road and Winslow Avenue, from Pump Station 454 to the existing 16-inch force main. Install 16-inch force main from the proposed 20-inch connection to Pump Station 323.

**Project Map**

**Rationale**

Divert wastewater flow from 41A to Tara 20 instead of 39A. This will allow for improved capacity through Master Lift Station 39A service area. As Tara 20 and 41A areas are currently built out, the combined systems with these added improvements, will be able to handle the maximum peak flow demands combined between 41A and Tara 20. Lift Station Tara 20 was previously upgraded.

<b>Wastewater</b>	Project#	<b>Manatee Agricultural Reclaimed System Booster Pump Station</b>
<b>Wastewater Treatment</b>	<b>WW00968</b>	

Status: Requested Initial Year: 2017 District 5 Location: COUNTY WIDE MANATEE AGRICULTURAL RECLAIMED SYSTEM

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction of pump improvements at each of the County's three reclaim water transfer pump stations; Rye Road, 63rd Avenue, and Spencer Parrish Booster Pump Stations, include additional pumps or upsizing the existing pumps to continue to maintain adequate pressure throughout the system.

**Project Map**

**Rationale**

To date most of the development has been in the northern portion of the County creating a need to be able to transfer water from the three water reclamation facilities to help meet these demands. In addition, with the installation of a second deep injection well in the north, it will be beneficial to be able to manage the reclaimed water and move it through the County for either disposal or wet weather demands as needed. This transfer of reclaim water between the County's three wastewater service areas is an integral part of the Reuse Water Management Plan. This will allow the system to maximize distribution of the resource, minimize storage and flows to the injection well, and provide for future system expansion.

**Scope**

Construct reclaim water line from Harrison Ranch Boulevard to Copperstone Phase 1 using approximately 7,776 linear feet of 16-inch ductile iron pipe.

**Rationale**

Install reclaim water line to complete a major looped system for Erie Road and the already built Copperstone. This project was originally planned further in out years but will be constructed at the same time as the water line to be more cost effective.

**Funding Strategy**

Proposed Debt

<b>Wastewater</b>	Project#	<b>Manatee Agricultural Reuse Supply - Forest Creek &amp; Lakeside</b>
<b>Wastewater Treatment</b>	<b>WW00992</b>	<b>Preserve Dry Line Connect</b>
Status: Requested Initial Year: 2014 District 1 Location: 301 BOULEVARD AND RED ROOSTER ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need:

**Scope**

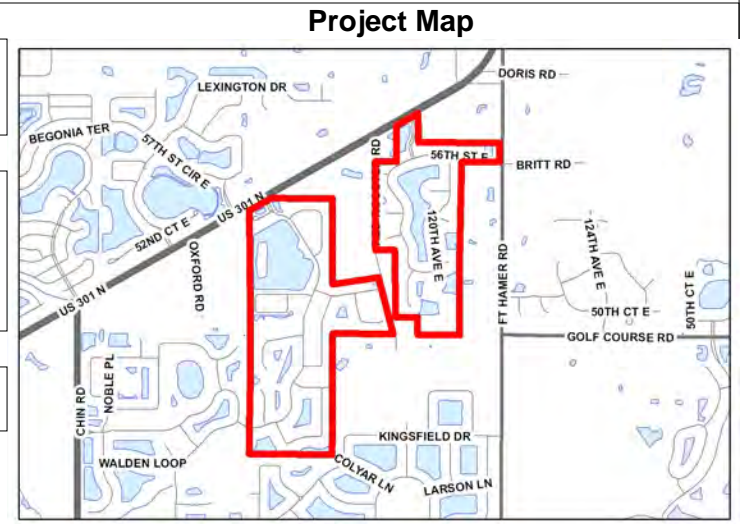

Construction of reuse line extension to an existing dry line system, including approximately 15,400 linear feet of 8-inch, 10-inch, 12-inch and 24-inch lines to Forest Creek and Lakeside Preserve subdivisions in the north service area.

**Rationale**

Manatee County ordinances stipulate that new developments will provide irrigation lines to accommodate reclaim water service to the residents. This ordinance has left several completed communities with reclaim water systems, but no reclaim water service. Connecting these communities will assist with the beneficial reuse of reclaim water during the dry season and management of this resource during wet weather due to transfer, storage and disposal limitations.

<b>Wastewater</b>	Project#	<b>Manatee Agricultural Reuse Supply Management Improvements</b>
<b>Wastewater Treatment</b>	<b>WW00967</b>	

Status: Requested Initial Year: 2013 District 5 Location: COUNTY WIDE MANATEE AGRICULTURAL REUSE SUPPLY

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Installation of meters between the services areas, control valves for remote operation and redirection of flow, adding telemetry and control at the water reclamation facilities and Manatee Agricultural Reuse Supply (MARS) pump stations. Develop a central Supervisory Control and Data Acquisition (SCADA) control network to operate MARS independent of plant operations.

**Rationale**

Currently, MARS system's master meters do not provide adequate detail for tracking flows within or between the service areas. This project will build on the existing MARS and SCADA systems to improve reporting of reclaimed water usage and will provide the County with the ability to remotely manage and monitor the reclaim water system independent of plant operations.

<b>Wastewater</b>	Project#	<b>North Water Reclamation Facility Deep Injection Well</b>
<b>Wastewater Treatment</b>	<b>6079480</b>	
Status: Existing Initial Year: 2011 District 1 Location: BUFFALO CREEK GOLF COURSE AND ERIE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Construction of a Class I Deep Injection Well including but not limited to installation of the well, piping, valves, valve automation, Supervisory Control and Data Acquisition system (SCADA) connections and required appurtenances.

**Rationale**

Florida Department of Environmental Protection (FDEP) requires the County to have wet weather disposal volumes available for the disposal of effluent that are equal to or greater than the combined plant permitted volumes. Currently the County is permitted for approximately 42 million gallons per day and the current wet weather disposal is approximately 13.5 million gallons per day necessitating an additional well.

<b>Wastewater</b>	Project#	<b>North Water Reclamation Facility Plant Headworks Second Screen</b>
<b>Wastewater Treatment</b>	<b>WW00957</b>	

Status: Requested Initial Year: 2013 District 1 Location: BUFFALO CREEK GOLF COURSE AND ERIE ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction to include installation of a second screen, screenings screw conveyor, drop chute, second grit removal unit, grit slurry pumps, electrical, controls, and channel coatings.

**Rationale**

A new headworks was constructed at the North Water Reclamation Facility in 2010. The North Water Reclamation Facility Plant expansion has been pushed back and the plant is experiencing some warranty and dependability issues with the new equipment. By providing a second unit, the facility will have the ability to take one unit offline for maintenance while continuing to operate.

<b>Wastewater</b>	Project#	<b>North Water Reclamation Facility Sludge Holding Improvements</b>
<b>Wastewater Treatment</b>	<b>WW00955</b>	
Status: Requested Initial Year: 2014 District 1 Location: BUFFALO CREEK GOLF COURSE AND ERIE ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: <b>Maintenance</b>

**Scope**

Removal of the existing two steel holding tanks, centrifugal blowers and air piping and replace with two glass lined steel tanks with decant manifolds, two new gravity belt thickeners and jet aeration systems.

**Rationale**

One tank was replaced with a new glass lined steel sludge digestion tank with a decant manifold and fine bubble aeration through a previous CIP. The remaining two steel tanks, sludge pumps and air lines have degraded and are in need of significant repairs or replacement. The new tanks will provide greater operational flexibility and control over the sludge holding process and will be compatible with the sludge requirements for processing Type A biosolids at the Dryer Facility. Once this project is complete, the sludge digestion will be re-designated as sludge holding as digestion will no longer be necessary at this facility. The sludge holding system was predicated by our transition to processing sludge at the Dryer Facility within the confines of the current Florida Department of Environmental Protection permit.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility - Lake Filtering System</b>
<b>Wastewater Treatment</b>	<b>6073780</b>	

Status: Existing Initial Year: 2009 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference:

Project Need:

**Maintenance**

**Scope**

Installation of lake filtration system, pump station upgrades, valves, flow meters, chemical feed system and appurtenances.

**Project Map**

**Rationale**

Following the treatment process, wastewater effluent is pumped to bulk storage lakes. When needed for irrigation, this water is filtered and pumped to the county's reuse system. The lake filters are designed to screen the water and help prevent clogging of irrigation system components. The lake filters are not functioning as required. This results in higher operational costs and impacts to the wastewater treatment plant process for filtration and treatment.

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility - Reclaimed Water</b>
<b>Wastewater Treatment</b>	<b>6013792</b>	<b>Automation</b>
Status: Existing Initial Year: 2010 District 5 Location: STATE ROAD 64 AND LENA ROAD		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Chuck Froman</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: Project Need: <b>Maintenance</b>

**Scope**

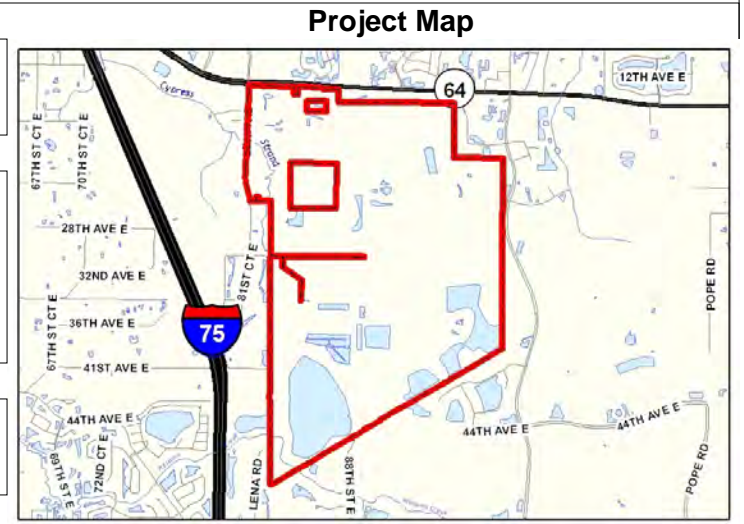

Installation of automated control valves and motor operators on valves, and a new network of pipes associated with the plant filters and pumping stations to provide the connectivity and integration with the Supervisory Control and Data Acquisition (SCADA) infrastructure.

**Rationale**

Reclaimed water must be remotely managed and moved between each wastewater plant, its storage facilities and the Manatee Agricultural Reuse Supply (MARS) reclaimed line. This project will allow the SCADA system to interface with the valves and pumping stations within the plant that control the flow of effluent. Plant operators in the control room at the plant will open and close valves and cue pumps as needed to move reclaimed water within the plant facility and out into the line.

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility 10 Million Gallon Storage Tanks and Interconnection</b>
<b>Wastewater Treatment</b>	<b>WW00971</b>	

Status: Requested Initial Year: 2013 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction of two 10 million gallon (MG) reclaim water ground storage tanks (GST), a high service reclaim water pump station (HSPS) and an interconnection between the Southeast Water Reclamation Facility reclaim lakes and the Manatee Agricultural Reuse Supply (MARS) transmission line.

**Project Map**

**Rationale**

With the integration of the MARS reclaim water system, management of the reclaim water has dynamically changed. Currently the operations staff is having difficulty at all the facilities meeting peak reclaim water demands due to their inability to return lake water quickly enough to meet peak demands. This will be resolved in part by installing back pressure sustaining valves on the supply lines to control system pressure. The lake filtration project will improve lake water supply, but it is still necessary to have sufficient ground storage capacity to meet peak diurnal demands. This project will save energy costs by reducing the operating pressure of the onsite reclaim water system and will provide the County the ability to transfer reclaim water from one facility to another.

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility Dedicated Reject Line</b>
<b>Wastewater Treatment</b>	<b>WW00962</b>	

Status: Requested Initial Year: 2015 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction of a dedicated reject line for the Southeast Water Reclamation Facility to include approximately 1,500 linear of 36 inch piping, associated valves, electrical, and Supervisory Control and Data Acquisition (SCADA) instrumentation and controls.

**Project Map**

**Rationale**

Currently the Southeast Water Reclamation Facility directs off-spec water to their east lined reject storage pond through their on-site reclaimed water system. This main also provides reclaimed water to Shroeder Manatee, Rosedale and the Manatee Agricultural Reuse Supply (MARS) system. In the case of a reject event, feed to these entities has to be suspended. The Florida Department of Environmental Protection requires facilities with reclaimed effluent lines serving dual purpose as reject lines to flush the lines until a clean sample is obtained prior to placing back in service. The addition of a dedicated reject line would resolve this issue, reduce down time due to off-spec events and allow continuous service to the reclaimed water system once the new ground storage tank and high service pump station is installed. A dedicated reject line will also isolate the reject system conserving resources and eliminating the potential for contamination of the MARS system.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility North Reject Pond Lining</b>
<b>Wastewater Treatment</b>	<b>WW00959</b>	

Status: Requested Initial Year: 2014 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction of the north aeration pond will include cleaning and filling the pond bottom to one foot above seasonal high water, raising the berms to reestablish the storage volume, modifying the inlet and intake structures, installing effluent pressure and gravity return lines, and lining the pond with a synthetic liner.

**Rationale**

In accordance with Florida Department of Environmental Protection requirements, the north reject pond at the Southeast Water Reclamation Facility needs to be raised and lined to assure one day storage reject quality water as dictated by regulatory requirements.

<b>Wastewater</b>	Project#	<b>Southeast Water Reclamation Facility Septage Receiving Station</b>
<b>Wastewater Treatment</b>	<b>WW00960</b>	

Status: Requested Initial Year: 2013 District 5 Location: STATE ROAD 64 AND LENA ROAD

**Comprehensive Plan Information**

Project Mgr: **Bruce Simington**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Construction of an automated septage receiving station to include an access terminal that would allow customers to deliver septage at an un-manned holding system using an access card to grant admittance, process charges, and record flows. Specified equipment would include septage conditioning tanks, a vacuum drum, dewatering system, ventilation system, piping, electrical, instrumentation and control work.

**Project Map**

**Rationale**

The current practice is to receive privately transported shipments of septage at the Southeast Water Reclamation Facility, mix the septage with mulch and deposit it in the County landfill. This process is a labor intensive operation, performed outdoors and is a source of odors. The proposed septage process is fully automated, does not emit odors and will reduce processing labor.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility - Reclaimed Water Automation</b>
<b>Wastewater Treatment</b>	<b>6016392</b>	
Status: Existing Initial Year: 2009 District 5 Location: 66TH STREET AND 53RD AVENUE W.		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Chuck Froman</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Installation of automated control valves and motor operators on valves, and a new network of pipes associated with the plant filters and pumping stations to provide the connectivity and integration with the Supervisory Control and Data Acquisition (SCADA) infrastructure.

**Rationale**

Reclaimed water must be remotely managed and moved between each wastewater plant, its storage facilities and the Manatee Agricultural Reuse Supply (MARS) reclaimed line. This project will allow the SCADA system to interface with the valves and pumping stations within the plant that control the flow of effluent. Plant operators in the control room at the plant will open and close valves and cue pumps as needed to move reclaimed water within the plant facility and out into the line.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Deep Injection Well</b>
<b>Wastewater Treatment</b>	<b>6077380</b>	
Status: Existing Initial Year: 2010 District 3 Location: 66TH STREET AND 53RD AVENUE W.		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need: _____

**Scope**

Construction of a Class I Deep Injection Well on the Southwest Wastewater Reclamation Facility property including but not be limited to installation of the well, piping, valves, valve automation, Supervisory Control and Data Acquisition system (SCADA) connections and required appurtenances to construct a complete Deep Injection Well system.

**Rationale**

Manatee County wastewater operations is required by Florida Department of Environmental Protection (FDEP) to have wet weather disposal volumes available for the disposal of effluent that are equal to or greater than the combined plant permitted volumes. Currently the county is permitted for approximately 42 million gallons per day and our wet weather disposal is approximately 13.5 million gallons per day through our only Deep Injection Well System.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Pipe Adjustment For</b>
<b>Wastewater Treatment</b>	<b>6077180</b>	<b>Filters</b>
Status: Existing Initial Year: 2010 District 3 Location: 66TH STREET AND 53RD AVENUE W.		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: _____ Other Need _____

**Scope**

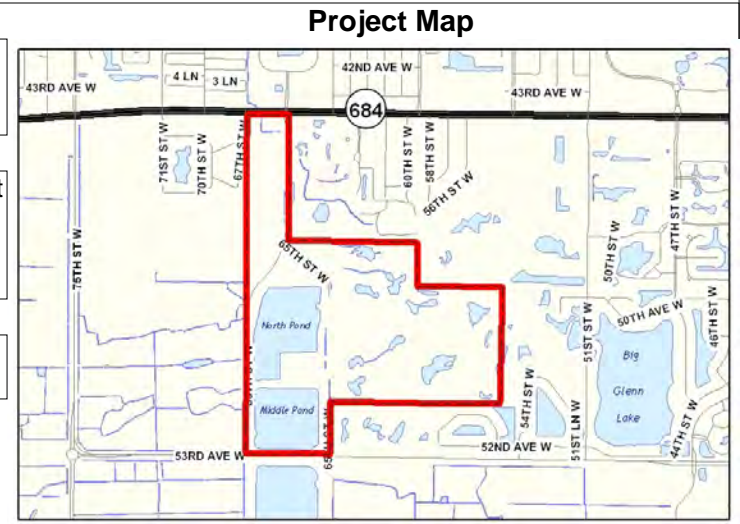

Upgrade the piping from the clarifiers to the automated backwash filters and then from the automated backwash filters to the chlorine contact chambers to provide adequate peak hour flow rates as required by the Ten States Standards.

**Rationale**

The current Florida Department of Environmental Protection permit renewal for the Southwest Plant requires the county to improve the flow into and out of the automated backwash filters. The requirement of the plant is to have the capacity to filter all influent running through the plant. Currently the piping restricts the flow and prevents the plants processing of the water as required.

<b>Wastewater</b>	Project#	<b>Southwest Water Reclamation Facility Process Modification for Nitrogen Removal Phase 2</b>
<b>Wastewater Treatment</b>	<b>WW00958</b>	
Status: Requested Initial Year: 2013 District 3 Location: 66TH STREET AND 53RD AVENUE WEST		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Bruce Simington</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need:

**Scope**

Construction includes retrofitting the existing four primary clarifiers, installing mixers, introduction of an internal recirculation pumping system in the end of the aeration tanks, installing jet aeration in the equalization tank, structural modifications, gates, and piping, valves, electrical and Supervisory Control and Data Acquisition (SCADA) automation to control the internal recycle return rate.

**Rationale**

Florida Department of Environmental Protection (FDEP) has expressed concern over the conventional activated sludge process (Ammonia Process) at the Southwest Water Reclamation Facility and based on conversation with the FDEP it is anticipated that they will impose nitrogen limits on the facility in the near future. Implementing an Advanced Activated Sludge process (Modified-Ludzak Ettinger or MLE) similar to the other facilities, will enhance nitrogen removal and have the side benefit of minimizing the algal food source going to the wet weather storage ponds helping to reduce algae production and improving the reclaimed water quality.

## GLOSSARY OF TERMS

### **APPROPRIATION**

The legal authorization given by the County Commission to make expenditures and incur obligations using county funds.

### **ARTERIAL ROAD**

A route providing service which is relatively continuous and of relatively high traffic volume, long average trip length, high operating speed, and high mobility importance. The primary purpose of arterials is to provide service to major traffic movements; access to abutting property is a subordinate purpose.

### **BEGINNING FUND BALANCE**

The Ending Fund Balance of the previous period. (See Ending Fund Balance)

### **BOND**

Written evidence of the issuer's obligation to repay a specified principal amount on a certain date (maturity date), together with interest at a stated rate, or according to a formula for determining that rate. Bonds are sometimes used as a source of financing for large scale or expensive projects to allow projects to proceed rather than wait until the funds can be accumulated.

### **CAPITAL BUDGET**

The financial plan of capital project expenditures for the fiscal year beginning October 1. It incorporates anticipated revenues and appropriations included in the first year of the five year Capital Improvements Program (CIP), and any anticipated unspent appropriation balances from the previous fiscal year. The Capital Budget is adopted by the Board of county Commissioners as a part of the annual County Budget.

### **CAPITAL IMPROVEMENT**

Physical assets constructed or purchased to provide, improve or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally nonrecurring and may require multi-year financing. Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements.

### **CAPITAL IMPROVEMENT ELEMENT (CIE)**

The Capital Improvement Element of the Comprehensive Plan identifies projects and financing for projects that are required to provide services to the areas of the County where growth is occurring in order to maintain levels of service that are required by the Comprehensive Plan.

### **CAPITAL IMPROVEMENT PROGRAM (CIP)**

A proposed plan, covering each year of a fixed period of years, for financing long-term work projects that lead to the physical development of County infrastructure. Manatee County develops a five year CIP.

**CAPITAL PROJECT**

A non-recurring expenditure of \$50,000 or more for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

**CAPITALIZED**

Term used to classify assets which have a useful life greater than one reporting period.

**COMPREHENSIVE PLAN**

A document adopted by the Board of County Commissioners that sets forth goals, objective and policies for future land use, and establishes level of service standards that will be needed to meet the infrastructure needs of the County.

**COLLECTOR ROAD**

A route providing service which is of relatively moderate average traffic volume, moderately average trip length, and moderately average operating speed. Traffic movement is a priority but there is a higher degree of land access than with an arterial road, allowing such a route to collect and distribute traffic between local roads or arterial roads and serve as a linkage between land access and mobility needs.

**CONCURRENCY**

The level of service that is required to meet the specified level of service required by the Comprehensive Plan.

**CONTINGENCY FUNDS**

Monies set aside, consistent with statutory authority, which subsequently can be appropriated to meet unexpected needs.

**COMMUNITY REDEVELOPEMENT AREAS (CRAs)**

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Tax Increment Funds (TIFs).

**CURRENT YEAR APPROPRIATION**

The current year adopted budget adjusted to reflect any budget amendments done during the current fiscal year.

**DEBT SERVICE**

Payment of interest and principal on an obligation resulting from the issuance of bonds.

**DEFICIT**

The excess of expenditures over revenues.

**DEPARTMENT**

Manatee County's organizational structure groups programs or divisions into departments by functional similarities. Departments report to the County Administrator.

**DESIGNATED FUNDS**

Funds that are set apart for a specific purpose to fund on-going or one-time expenditures. Examples are bond proceeds, reserves or "pay-as-you-go" reserves for future facility renewal and replacement projects found mostly in the Enterprise Funds.

**DIVISION**

Divisions are the units of government which provide services directly to the public and other agencies. Divisions are organized within Departments by functional similarity.

**ENDING FUND BALANCE**

Funds carried over at the end of the fiscal year. Within the fund, the revenue on hand at the beginning of the fiscal year, plus revenues received during the year, less expenses equals ending fund balance. The Ending Fund Balance becomes the Beginning Fund Balance in the next fiscal year.

**ENTERPRISE FUND**

A fund which pays for its cost of operations from user fees and does not generally receive property tax or general revenue support. County Enterprise Funds include Manatee County Public Utilities, Landfill, Golf Course, Civic Center, Port Authority, Stormwater Utilities, and Mass Transit.

**EXPENDITURE**

Decrease in net financial resources. Expenditures include current operating expenses which require the current or future use of net current assets, debt service and capital outlay.

**FISCAL YEAR**

A twelve-month period (October 1 through September 30) at the beginning of which the county implements a new budget based on expected revenues and expenditures, and at the end of which the county determines its financial position and the results of its operations.

**FIXED ASSETS**

Accounting classification of assets such as property, plant, and equipment which are capitalized.

**FUND**

A self-balancing set of accounts designated and accounted for separately for the purpose of restricting specific revenues that are then spent for specific activities.

**FUND BALANCE**

The amount available within a fund at the close of a fiscal period which can be carried over as non-recurring revenue for the upcoming fiscal period.

**FUNDING SOURCES**

The type or origination of funds to finance ongoing or one-time expenditures. Examples of CIP funding sources include, but are limited to, user fees, general revenues, gas taxes, grants, impact fees, contributions and bonds.

**GENERALLY ACCEPTED ACCOUNTING PRINCIPLES – GAAP**

Uniform minimum standards and guidelines for financial accounting and reporting as authorized by the Governmental Accounting Standards Board (GASB). The standards and guidelines include details practices and procedures and broad guidelines of general application.

**GENERAL REVENUE**

The revenues of a government other than those derived from and retained in a Proprietary, Special Revenue, or Trust and Agency Fund. In Manatee County, the majority of general revenues come from ad valorem taxes.

**GOVERNMENTAL FUNDS**

Funds used to account for the acquisition, use and balances of expendable financial resources and the related current liabilities – except those accounted for in proprietary funds and fiduciary funds.

**IMPACT FEES**

Fees charged to developers and individuals to cover, in whole or part, the anticipated cost of improvements that will be necessary as a result of the development.

**INTERFUND TRANSFERS**

Transfers of cash between funds without requirement for repayment.

**INTERGOVERNMENTAL REVENUES**

Revenues received from other governments including the Federal, State, and other local governmental entities.

**LEVEL OF SERVICE**

An indicator of extent or degree of service which is, or will be, provided by a facility. Level of service standards, as used in the comprehensive plan, are targets or objective with which compliance is required. Levels of service are established using one or more infrastructure standards and may also include use of one or more performance standards.

**LOCAL ROAD**

A roadway providing service which is of relatively low traffic volume, short average trip length or minimal through traffic movements and high volume land access for abutting property.

**MANDATE**

A requirement imposed by a legal act of the federal, state or local government.

**MASS TRANSIT**

Passenger services provided by public, private or non-profit entities such as the following surface transit modes: commuter rail, rapid rail transit, light rail transit, light guideway transit, express bus and local fixed route or demand-response bus.

**OPERATING BUDGET IMPACTS**

Expenditures directly related to the cost of operating and/or maintaining the capital improvement upon completion of the project.

**PARATRANSIT**

Transit service, including ridesharing, car or van pools, demand responsive buses, and other public transit services, which are characterized by their nonscheduled, non-fixed route nature.

**PERSONAL SERVICES EXPENDITURES**

Expenditures for county employees including regular wages, overtime, contributions to the State Retirement System, Social Security, health and worker's compensation insurance premiums, and unemployment compensation costs.

**POTABLE WATER**

Water which is satisfactory for drinking, culinary, and domestic purposes and which meets the appropriate requirements of the Florida Department of Environmental Regulation.

**POTABLE WATER FACILITIES**

A system of structures designed, constructed or used to collect, treat or distribute potable water, which includes water wells, treatment

plants, reservoirs, and distribution mains.

**PRESERVE**

A resource based preserve operated by the County for the primary purpose of environmental preservation and public enjoyment of environmentally sensitive lands.

**PRIOR YEAR APPROPRIATION**

Includes funds budgeted for projects in prior years or through a budget amendment done during the current year prior to the date of the Proposed CIP.

**PROJECT**

See capital project.

**PROPERTY (AD VALOREM) TAXES**

A revenue which is collected on the basis of a tax rate applied to the taxable valuation of real property.

**PROPOSED BUDGET**

The budget submitted by the County Administrator to the Board of County Commissioners within 15 days after the certification of the ad valorem tax roll by the Property Appraiser.

**PROPRIETARY FUND**

A set of segregated revenue and expenditure accounts, set up for the purpose of showing net income, financial position, and changes in financial position. Enterprise funds and internal service funds are proprietary funds.

**RESERVES**

Included in this category are funds required to meet both anticipated and unanticipated needs; the balance of anticipated earmarked revenues not required for operation in the budget year; those required to be set aside by bond covenants, and accumulated funds set aside to finance capital construction on a pay-as-you-go basis.

**REVENUE**

The taxes, fees, charges, special assessments, grants, and other funds collected and received by the county to support the services provided.

**RIGHT OF WAY**

Land in which the State, County or Municipality owns the fee simple title or has an easement dedicated or required for a transportation, utility or other use.

**SOLID WASTE**

Sludge from a waste treatment works, water supply treatment plant or air pollution control facility; or garbage, rubbish, refuse or other discarded material, including solid, liquid semisolid, or contained gaseous material resulting from domestic, industrial, commercial, mining, agricultural or governmental operations.

**SOLID WASTE FACILITIES**

Structures or systems designed for the collection, processing or disposal of solid wastes, including hazardous wastes, and which includes transfer stations, processing plants, recycling plants and disposal systems.

**SPECIAL REVENUE FUND**

A fund used to account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

**STORMWATER**

The flow of water which results from a rainfall event.

**STORMWATER RUNOFF**

That portion of precipitation which is not passed into the soil by infiltration, evaporated into the atmosphere, or entrapped by small surface depressions and vegetation, and which flows over the land surface during, and for a short duration following any rainfall.

**SURPLUS**

The excess of revenues over expenditures.

**TAXES**

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit.

**TAX INCREMENT FUND (TIF)**

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Community Redevelopment Areas (CRAs).

**TAXES**

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. Does not include user fees or special assessments.

**TOURIST DEVELOPMENT TAX**

A tax collected on hotel rooms and other lodging rentals of six months or less. In Manatee County, one penny of the five cents collected is reserved for beach renourishment and beach improvement projects. Tourist tax monies other than this cent may be used for other tourist related projects or facilities.

**TRANSFER**

A movement of monies from one fund to another fund for the purpose of accurately accounting for expenditures. Transfers are expenditures to the fund they are being transferred from and revenues to the receiving fund. Because transfers are again budgeted as expenditures in the receiving fund, they are not included in the net budget to avoid counting the monies as expended twice.

**USER FEES**

The payment of a fee for direct receipt of a public service by the person benefiting from the service.

**UNINCORPORATED MUNICIPAL SERVICES TAXING UNIT**

Unincorporated areas within Manatee County are within the Unincorporated Municipal Services Taxing Unit. Residents of the district are assessed a millage rate by the county to provide services which would be provided by a municipality if the areas were incorporated.

**VOTED MILLAGE**

Property tax levies authorized by voters within a taxing authority. Bond issues that are backed by property taxes are a common form of voted millage in the State of Florida. Such issues are called general obligation bonds and may be used to finance large capital projects.
