## Capital Improvement Program Summary

The Manatee County Comprehensive Plan (Objective 10.1.6) requires Manatee County to develop a Capital Improvement Program (CIP) that provides programming and funding of capital projects consistent with the goals, objectives and policies of the Comprehensive Plan and the Future Land Use Map, to maintain adopted level of service standards and to meet other public facility needs not dictated by level of service standards.

The Capital Improvement Program meets this requirement by providing a planned and programmed approach to utilizing the county's financial resources in the most responsive and efficient manner to meet its infrastructure, equipment and facility needs. The CIP serves as a "blueprint" for the future of the community's growth and development. It highlights the importance of capital maintenance and replacement so those needs are addressed in a timely and coordinated manner. The CIP provides a basis upon which the impact of new projects on future operating budgets can be determined. It is a dynamic tool, not a static accounting document. Under direction of the Financial Management Department, the CIP outlines an annual budget for the county's capital projects and a plan for the county's capital investments over the next five years. As defined by the Manatee County Comprehensive Plan, capital improvements include physical assets that are constructed or purchased to provide, improve, or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally non-recurring and may require multi-year financing. Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements. The review and revision of the CIP is consistent with the goals, objectives and policies of the Manatee County Comprehensive Plan.

The CIP differs from the Capital Improvement Element (CIE) of the Comprehensive Plan in that the CIE identifies projects and financing for projects that are required to provide services to areas of the county where growth is occurring, and in order to maintain levels of services that are required by the Comprehensive Plan. The CIP includes **all** capital projects, including many that are not related to service levels regularly required by the Comprehensive Plan.

The administration of the Five Year Capital Improvement Program and the revenue outlook establishes the guidelines for fiscal feasibility for any given project. The CIP identifies revenue sources for each planned project. Those projects for which revenues have not been identified are shown as projects of record. The CIP meets the debt financing policy

requirements contained in the county financial policies and integrates county government projects with state and other local governments when appropriate.

Manatee County's capital planning process begins in November. Departments provide capital project submissions which are reviewed and compiled in to the Recommended Budget. In the spring, the Recommended CIP is presented to the Board of County Commissioners in a public work session. After input from the community, the Board considers and adopts the Capital Improvement Program for five years and a capital budget for the ensuing year is integrated into the annual budget which is adopted after two public hearings. The CIP lists each proposed capital project, the year it will commence, the amount to be spent on the project each year until completion and the proposed sources of funding. Amounts represented in the CIP are estimated project costs and are not intended to serve as precise project budgets. Projects are financed with a combination of utility rate revenues, local gas taxes, impact fees, federal and/or state grants, user fees and general revenues. It is the policy of the Board of County Commissioners that growth pays for itself to the greatest extent possible.

The CIP provides adequate time for capital projects to be planned and designed carefully before funding is appropriated and actual construction begins. This process allows professional staff to develop and review the required plans, engineering surveys, and architectural drawings and proceed with purchasing bids and specifications in a timely manner. The lack of a capital program could result in inefficiencies in service provisions where development exceeds the ability of the government to meet infrastructure needs.

The capital improvement program serves as a valuable financial tool. It can be used to forecast future capital demands on current revenues. A CIP that includes a forecast of financial resources available for capital purposes will allow public officials and staff to match those requirements. If expected revenues are not realized, the CIP process enables the county to reevaluate project priorities and either reduce capital spending in a rational manner or defer certain projects until more funding is available. The ability to revise the capital program is particularly important when a significant portion of the capital budget is to be financed from current revenues.

Implementation of the Capital Improvement Program serves to enhance the quality of life for both present and future generations of Manatee County.

## **Administration of the Five Year Capital Improvement Program**

### **1. Purpose and Intent**

This section is established to provide for the applicability and effect of the Five Year Capital Improvement Program for the Manatee County Board of County Commissioners, and to set forth specific requirements and procedures related to the revision and update of the Capital Improvement Program. It is the intent of this resolution that its prescriptive provisions shall be implemented, in part, through the completion of the Capital Improvement projects as described herein.

### **2. Applicability**

The Five Year Capital Improvement Program shall apply to capital improvement and capital maintenance projects undertaken by the County of Manatee, Florida. For the purposes of this section, the term "capital improvement project" shall mean a non-recurring expenditure of \$250,000 or more from county funds for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

### **3. Review and Revision**

Each year the Five Year Capital Improvement Program shall be updated by resolution of the Board of County Commissioners. Such review and revision of the Capital Improvement Program shall be consistent with the goals, objectives, and policies of the Manatee County Comprehensive Plan.

### **4. Consistency of Governmental Development**

- A. For the purpose of the consistency requirement of the program, the first year of the Five Year Capital Improvement Program shall apply to all capital improvement projects undertaken by the County of Manatee for which funds were or will be appropriated in Fiscal Year 2018, except as provided in paragraph D of Section 5 Administrative Provisions, or in a prior year, if the project has not been started as of October 1, 2017.

- B. Year Two of the Five Year Capital Improvement Program shall apply to all capital improvement projects for which funds will be appropriated in Fiscal Year 2019. Projects for Year Two are subject to availability of funds and subsequent appropriation of funds by the Board of County Commissioners.
- C. Years Three through Five of the Five Year Capital Improvement Program shall represent general county policy with respect to capital improvements programming, subject to review and revision on a case by case basis during each of the succeeding budget years, and subject to availability of funds.
- D. Notwithstanding Paragraphs A, B, and C above, the County of Manatee may undertake other capital improvement projects not shown in the Five Year Capital Improvement Program as follows:
  - (1) Emergencies - Such projects found by the Board of County Commissioners to be of an emergency nature may be undertaken without amendment to the program.
  - (2) Other Projects - Or, if not so found to be of an emergency nature, such projects deemed by the Manatee County Board of County Commissioners to be of higher priority than capital projects shown in the CIP may be undertaken, providing the plan is amended by resolution of the Board of County Commissioners. Budget Amendment resolutions which identify such high priority projects as additions or changes to the CIP may serve as the required resolution to amend the plan.

Provided, however, that in all cases, such projects shall be otherwise consistent with the prescriptive provisions of the Plan.

## **5. Administrative Provisions**

- A. Capital improvements shall be deemed consistent with the Capital Improvement Program where they are consistent as to general location, scale and type of facility as provided in the CIP project description, although it need not be consistent in revenue sources or manner of operation.
- B. If funding for a project identified in the CIP as a future year project or a project of record becomes available in advance of the year for which it is planned, the Board of County Commissioners may proceed to implement that project when funding becomes available without an amendment to the Plan.

- C. Amounts shown in the CIP as estimated project costs are estimates and not intended to serve as precise project budgets. This also applies to initial appropriations for the capital projects. A precise project budget will be established for a project upon completion of the following:
- (1) Engineering and architectural plans and specifications upon which the project cost will be estimated.
  - (2) Adoption of budget amendments subsequent to completion of plans and specifications that may be necessary to properly fund the project.
- D. Budgets for projects shall be adopted by the Board of County Commissioners as provided in Resolution R-94-270 which establishes the Manatee County Budget Administration and Implementation Policy. Budget Administration Procedures as provided for under Resolution R-94-270 allow the Budget Officer or his designee to authorize the Purchasing Division to encumber items which require exception to the level of budget control established in the Budget Administration Procedures. This authorization can be given for approved projects, items previously approved for expenditure by the Board of County Commissioners, items required by law, or other expressed priorities of the Board of County Commissioners. Projects included in this CIP and previous CIP's are to be considered "approved projects" for the purpose of encumbering funds in anticipation of formal budget amendment in order to meet significant time constraints or provide for improved fiscal resource management.
- E. To the maximum extent possible, engineering and architectural plans and specifications prepared for roadway projects contained in the Capital Improvement Program will incorporate landscaping, pedestrian/bicycle facilities and other aesthetic design considerations that enhance the image of the community and reduce the impacts to adjacent land uses.
- F. This Five Year Capital Improvement Program is prepared to be consistent with the Capital Improvement Element of the Comprehensive Plan subject to any proposed amendments to the plan presented to the Board of County Commissioners. If any provisions of this resolution are not consistent with the Comprehensive Plan, then the Comprehensive Plan shall prevail over any provisions of this resolution. Projects in the Five Year Capital Improvement Element of the Comprehensive Plan may require subsequent adoption of ordinances and/or amendments to the Comprehensive Plan before the projects can be initiated.
- G. Debt service for projects funded from the proceeds of Transportation Revenue and Refunding Bonds may be

paid from Transportation Impact Fee Revenues if all applicable impact fee requirements are met.

## **6. Funding Sources**

- A. It is the intent of the Board of County Commissioners that any project included in this program may be financed and refinanced using bond proceeds. The language in sections 6.B and 6.C below is provided to ensure that the issuance of bonds to finance projects remains as a viable alternative, even if other funding sources are used to initially finance projects.
- B. This resolution is an affirmative action of the Board towards the issuance of bonds to finance or refinance the Capital Improvement Program of the County in accordance with the laws of the State and the applicable provisions of the Internal Revenue Code of 1986, as amended and the rules and regulations of the Internal Revenue Service applicable thereto.

C. There is hereby authorized to be issued and this Board hereby determines to issue, to the extent necessary to provide financing for projects identified herein, or refinancing for such projects funded from other sources, its general obligation and revenue bonds pursuant to the laws of the state of Florida and, if required by the laws of the state, or the Constitution, a referendum vote on such general obligation bonds, for the capital improvements described in "Exhibit B" hereto in the Five Year Capital Improvement Program in one or more series and issues in aggregate principal amount of up to \$544,293,819. The authority established herein shall be implemented by subsequent resolutions of the Board of County Commissioners.

<b>General Government</b>	Project# <b>6083202</b>	<b>911 Computer Aided Dispatch (CAD) Disaster Recovery System</b>
---------------------------	----------------------------	---

Status: Existing Initial Year: 2016 Countywide Location: Public Safety Center, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Robert Smith**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Implement disaster recovery system for the Computer Aided Dispatch (CAD) project so that if something happens to the Public Safety Center there would be a backup system.

**Project Map**

**Rationale**

The CAD system, located at the Public Safety Center, includes software to enter and dispatch 911 calls. It also includes many interfaces including alerting systems, protocols for answering 911 calls, mobile software in ambulances, fire trucks and Sheriff vehicles. The backup system will be located in the Manatee County Administration Building.

---------------------------	----------------------------	--

Status: Requested Initial Year: 2019 Countywide Location: Public Safety Center, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Robert Smith**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Upgrade the Computer Aided Dispatch(CAD) System. This includes many software packages and interfaces, server and client hardware, network and storage equipment and any other related hardware components.

**Project Map**

**Rationale**

The CAD software and all related software and interfaces should be upgraded every 3-5 years to stay up to date with the current vendor software versions. This keeps us on the most current technology and implements all software fixes and modifications necessary to run the system efficiently. The hardware should be replaced every 5 years to keep it up to date on the newest technology so the system does not fail from dated hardware.

Status: Existing Initial Year: 2015 Countywide Location: 1112 Manatee Ave. W., Bradenton

**Comprehensive Plan Information**

Project Mgr: **John Barnott**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Implementation of new software program to incorporate all Building and Development Services department divisions under one program. This will allow all permitting, planning, and code enforcement information to be shared between areas with information on permits, violations, land uses, and development plans to show on a parcel within the same screen.

**Project Map**

**Rationale**

Three different systems that do not interface are currently used to perform daily functions. Upgrading to one software system for all aspects of the department enable all divisions to work together, share information, and have access to the same information.

**Funding Strategy**

Building Fund

<b>General Government</b>	Project# <b>GG01643</b>	<b>Animal Services &amp; Sheltering Renovation</b>
Status: Requested Initial Year: 2020 District 2 Location: 25th Street West, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Deficiency</b>

**Scope**

Upgrade electrical power, air condition one kennel, repair fencing, painting, dog bowls, and parking lot improvements.

**Rationale**

The facility is outdated and requires multiple repairs, upgrades, and maintenance. The electrical power has reached capacity and can no longer sufficiently service the facility. At times the electrical power fails during critical operational times. There is one kennel that operates without air conditioning which creates liabilities during the summer for heat exhaustion. The property fencing is falling apart due to age requiring replacement with new fencing as it can no longer be repaired. The facility buildings need to be painted inside and out.

<b>General Government</b>	Project# <b>6005720</b>	<b>Beach Lifeguard Tower Replacements - Coquina</b>
---------------------------	----------------------------	---

Status: Requested Initial Year: 2018 District 3 Location: Coquina Beach, Longboat Key

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Replacement of all seven portable towers. Portable towers are preferred so they can be moved in the event of a storm or coastal topography change. Currently, the towers do not meet the State of Florida Wind Codes. A structural engineer would be required to evaluate and report replacement costs for each tower. Existing towers will be demolished and removed as new towers are constructed. New towers would be constructed to meet the current State of Florida codes.

**Rationale**

Currently there are six portable lifeguard towers located on Coquina Beach. These towers are used by our Public Safety Marine Rescue lifeguards to visually look over and protect our nearly 2.8 million visitors per year. The lifeguard towers are manned by trained professionals that are easily recognizable by all who visit our beaches. The six towers are approximately 20 years old and storms as well as the salt water environment have deteriorated the towers. The towers were manufactured with pressure treated wood to match the coastal community architecture.

<b>General Government</b>	Project# <b>6083201</b>	<b>CAD Expansion</b>
---------------------------	----------------------------	----------------------

Status: Existing Initial Year: 2015 Countywide Location: 2101 47th Terrace East, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Robert Smith**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Provide new Computer Aided Dispatch (CAD) hardware and software to our secondary Public Safety Answering Points (PSAP's) and Holmes Beach Police Department that is compatible with the CAD system the county and Sheriff's Office are currently using. Secondary PSAP's include the City of Bradenton, City of Palmetto, Longboat Key and the Public Safety backup center.

**Project Map**

**Rationale**

Currently, transferring of 911 calls from PSAP to PSAP results in delays of dispatching to emergency responders and the level of service to the public can vary. Consolidating the 911 call taking process to Manatee County's primary PSAP will provide consistent levels of service to both incorporated and unincorporated portions of Manatee County, improve interoperability, and provide overall cost savings.

**Funding Strategy**

<b>General Government</b>	Project# <b>6066700</b>	<b>County Financial System Upgrade</b>
Status: Existing Initial Year: 2015 Countywide Location: Countywide		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Paul Alexander</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Upgrade/replacement of current financial operating system. The current software application is used throughout the county by all departments and most constitutional offices (Clerk of Court, Property Appraiser and Sheriff). The upgraded application will process all financial transactions, including payroll, budgeting, fixed assets, purchasing, reporting, accounts payable, and billing/receivables.

**Rationale**

The current software system, IFAS, is no longer supported by the vendor. Updates, fixes and modifications are no longer available. Upgrading to a new system will enable better utilization of system technology and provide users with a more dependable software system with improved capabilities.

**Funding Strategy**

Debt Proceeds

<b>General Government</b>	Project# <b>6005219</b>	<b>ESCO: District Cooling Plant</b>
---------------------------	----------------------------	-------------------------------------

Status: Existing Initial Year: 2014 District 2 Location: 323 9th Street West, Bradenton

**Comprehensive Plan Information** Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

To provide a stand alone 1,000 ton water chiller plant in downtown Bradenton. Cooling towers will be located on the roof, and there will be an additional bay for a future 500 ton water cooled chiller.

**Project Map**

**Rationale**

A chiller generates chilled water used by many large buildings to provide air conditioning. A central chiller plant houses larger, efficient chillers and distributes chilled water to affected buildings through underground piping. This central chiller plant allows connected buildings to eliminate the need for individual chillers, decreases a significant amount of electrical loads on connected buildings, makes more space available, and offers more efficient operations.

<b>General Government</b>	Project# <b>GG01637</b>	<b>Emergency Medical Services (EMS) Bariatric Ambulance with Paramedic Training Unit</b>
---------------------------	----------------------------	--

Status: Requested Initial Year: 2020 Countywide Location: N/A

**Comprehensive Plan Information**

Project Mgr: **Robert Smith**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Procure a fully stocked ambulance with bariatric mounting capability. Procure one full body advanced multi-purpose patient simulator (mannequin) and two advanced multi-purpose airway and CPR trainers (mannequins).

**Project Map**

**Rationale**

The ambulance would be designed to store and use the mannequins while maintaining the ability to respond to real 911 calls involving bariatric patients. This unit would then be used for both bariatric calls and to allow our training division to expand its continuing education to create real-life patient scenarios with interactive mannequin responses and reduce call response times.

**Funding Strategy**

Infrastructure Sales Tax - PSCJ014

<b>General Government</b>	Project# <b>6005226</b>	<b>Jail Management Software System</b>
Status: Existing Initial Year: 2015 District 1 Location: Manatee County Detention Facility		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Neil Unruh</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Replace aging jail management system with new system that provides an efficient way to track and report on all aspects of an inmate's confinement. The new software system will improve jail operations, inmate tracking and data collection by including tracking tools such as bar coding, mug shot integration, and the utilization of hand held devices for information recording and other observations, which will automatically download in to the databases.	
<b>Rationale</b>	
Increase efficiency by making critical information and data accessible across all public safety software. Powerful technology keeps information connected, corrections officers informed and inmates secure.

<b>General Government</b>	Project# <b>6005214</b>	<b>MCDF - Ameresco - AC Units Replacement at Stockade</b>
---------------------------	----------------------------	---

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Ameresco proposes to conserve energy while maintaining acceptable levels of relative humidity conditions at the Manatee County Stockade Building A. The opportunities include replacing two 10 ton constant volume package rooftop units with variable speed compressor-variable air volume package rooftop units. Ameresco proposes to replace two aging 10 tons package units with new variable compressor-variable air volume rooftop package units.

**Rationale**

The proposed air conditioning system is extremely efficient at part load conditions, where the Stockade Building A load actually functionally operates. Additionally, the proposed system is very good at maintaining a very tight temperature and relative humidity control, as both, compressor and supply air fans adapt to the right amount of load capacity demanded by the space. The proposed unit model has an EER of 12.5 and SEER above 17.

<b>General Government</b>	Project# <b>6005217</b>	<b>MCDF - Ameresco - Air Handling Unit Replacement</b>
---------------------------	----------------------------	--

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Ameresco proposes to reduce energy and maintenance costs at the Manatee County Government Detention Facility by replacing 33 rooftop air handling units. Ameresco proposes to replace 33 rooftop air conditioning systems at the Manatee County Main Jail with equivalent new units, replace chilled water control valves and install new relative humidity and Carbon Dioxide (CO2) sensors. The new units will have 2 inch, double wall, 6 inch integral base frame and new curve adaptors. Additionally, the new air handling units will be provided with premium efficiency motors, with an estimated motor efficiency at 90%.

**Project Map**

**Rationale**

The new units will dramatically reduce equipment down time and repair costs for Manatee County, along with allowing maintenance personnel to be utilized for preventive, reactive, and scheduled repair and maintenance activities at the Jail. New chilled water control valves will provide better control of the chilled water loop and the conditioned space. Strategies to reset discharge air temperature and supply air blower reset will be implemented, resulting in energy consumption optimization and better relative humidity control of the conditioned space.

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
<p>Installation of an existing county-owned emergency power generator, providing all electrical connections and equipment required to operate the new 200 ton chiller on emergency power. Install an existing county-owned 500 kW emergency generator at the Manatee County Central Detention Facility. Provide new concrete block building or concrete pad for proper installation of generator. Provide and install all necessary connections including electrical and diesel fuel. Provide and install 500 kW Automatic Transfer Switch (ATS). Provide and install new motor control center to be connected to new transfer switch (all 480V equipment) 200 ton (150 kW chiller), Primary Chilled Water Pump (CHWP), Secondary CHWP on VFD, Condenser Water Pump (CWP), and Cooling Tower Fan on VFD. Provide and install all wiring and conduit from the generator area to the existing electrical panel serving loads described. Provide any electrical gear and/or devices needed for proper switching to/from emergency power for electrical loads described.</p>	
<b>Rationale</b>	
<p>Ameresco will provide all necessary electrical equipment to operate the smallest of the three chillers in order to provide partial cooling to the main Jail. Provide emergency power to selected portions of the chiller plant equipment.</p>

<b>General Government</b>	Project# <b>6005209</b>	<b>MCDF - Ameresco - Chiller Plant Retrofit and Modification</b>
---------------------------	----------------------------	--

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replace 3 existing chillers and cooling towers with higher efficiency units, and perform significant piping modifications at the MCG Detention Facility.

**Rationale**

Reduce the chiller plant bypass and install an automatic control valve to avoid over pumping through the primary loop, thereby minimizing the energy used by the primary chilled water pumps. Additional pressure ports will be added at two points on the chilled water secondary loop (at rooms J-210 and G1-210), in order to relocate the secondary loop differential pressure control away from the secondary pumps. These new port locations will be advantageous for sensing the actual need for chilled water. A main header will be installed outside of the mechanical room, such that any chiller will be able to operate with any other cooling tower. Installation of a temporary chiller connection outside of the chiller mechanical room will facilitate quick connection of mechanical piping and electrical service.

---------------------------	----------------------------	---

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Add control points and changing sequences of operation of the existing air conditioning control system. Upgrading the existing controls system for the chiller plant from a constant volume primary-variable volume secondary to a variable volume primary-secondary configuration. Replace the cooling tower motor control to variable speed, providing isolation valves for the chillers and cooling towers to function in a parallel configuration. Retrofit selected air handling units and add variable frequency drives to allow for better control of the humidity and quality of indoor environment. Exhaust fans will be controlled to allow individual air handling units to be turned off during unoccupied hours.

**Project Map**

**Rationale**

The county has many old non-energy efficient fixtures, and it is in our best interest to replace with new energy-efficient devices to realize the maximum cost savings while minimizing our environmental impact.

<b>General Government</b>	Project# <b>6005212</b>	<b>MCDF - Ameresco - Institutional Water Conservation Controls</b>
---------------------------	----------------------------	--

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Install automatic water conservation controls. Retrofit toilets with low flow flush valves and modify lavatory faucets with low flow aerators. Replace existing showerheads with low flow shower heads. Install an Intelligence Conservation Systems (I-CON) control system to monitor and control the duration, flow and frequency of use of water-consuming fixtures. By activating or deactivating showers, lavatories and toilets with electronic devices the plumbing fixtures can be controlled by the facility staff.

**Rationale**

The county has many old non-energy efficient fixtures, and it is in our best interest to replace with new energy-efficient devices in order to realize the maximum cost savings while minimizing our environmental impact. I-CON plumbing control products provide greater control of the plumbing fixtures to those correctional officers operating the facility and less control to the inmates by replacing existing standard plumbing components with externally controllable components.

<b>General Government</b>	Project# <b>6005210</b>	<b>MCDF - Ameresco - Outdoor Lighting</b>
---------------------------	----------------------------	---

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information** Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Comprehensive upgrade of the existing outdoor lighting systems at the Detention Center and Stockade facilities. Replace/retrofit existing fixtures with high efficiency new T5 fluorescent fixtures, LED fixtures or ceramic metal halides with high frequency ballasts (excludes interior lighting system already updated). Upgrades will comply with Illuminating Engineering Society of North America Lighting (IESNA) standards.

**Project Map**

**Rationale**

The county has many old non-energy efficient fixtures, and it is in our best interest to replace with new energy-efficient devices in order to realize the maximum cost savings while minimizing our environmental impact. The LED color rendition index is superior to the existing technology. Overall, the new LED fixtures will provide better illumination and improved safety. The ceramic metal halide technology has a much higher color rendition index, which means a much better quality of light. The ceramic metal halide lamps with high-frequency ballasts will provide an increase in lumen maintenance (a less steep/flatter depreciation curve) compared to the traditional Probe Start Metal Halide technology, which means the light levels will remain higher for a longer period of time.

<b>General Government</b>	Project# <b>6005215</b>	<b>MCDF - Ameresco - Power Transformers Replacement</b>
---------------------------	----------------------------	---

Status: Existing Initial Year: 2014 District 1 Location: Manatee County Detention Facility

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replace several existing step-down transformers with new energy-efficient transformers that step-down (transform) 480 volt power to 208Y/120 volt power.

**Rationale**

The county has many old non-energy efficient fixtures which should be replaced with new energy-efficient devices to realize the maximum cost savings while minimizing environmental impact. The Powersmiths E-SAVER model C3L transformers proposed for this energy conservation measure are designed to increase efficiency of the electricity transformation. They have been independently validated at Oak Ridge National Lab, a US Department of Energy test facility, to run at 98% efficiency under a single-phase nonlinear load profile, which is a dramatic improvement over traditional transformers. The new transformers reduce losses by 55% to 85%, and are more efficient than existing transformers. They are designed using advanced CAD (Computer Aided Design) software that permits tuning of the transformers for best performance. They utilize Nomex based insulation with epoxy copolymer for better adhesion, longer life, and more long term insulation value.

**Project Map**

<b>General Government</b>	Project# <b>6005230</b>	<b>MCSO - Jail - Detention Center Pod Water Heater Replacement</b>
---------------------------	----------------------------	--

Status: Requested Initial Year: 2018 District 1 Location: MCSO Jail - Detention Facility, Bradenton

**Comprehensive Plan Information**

Project Mgr: **David Thompson**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency, Maintenance**

**Scope**

Replace all the InstaHot type water heaters in each pod for standard water heaters capable of handling the load of such a facility. The standard water heaters installed will be between 80 to 100 gallon tanks.

**Rationale**

The equipment is well past useful life, costly maintenance and highly inefficient. InstaHots for water heaters in such a high use facility are not practical, requiring many change orders, and are not as efficient as a standard water heater.

**Funding Strategy**

Infrastructure Sales Tax - PSCJ006

<b>General Government</b>	Project# <b>GG01663</b>	<b>MCSO - Jail - New Medical Wing</b>
Status: Requested Initial Year: 2021 District 1 Location: MCSO Jail Facility, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Deficiency</b>

<b>Scope</b>	<b>Project Map</b>
<p>If it is not possible to add a second story, it may be necessary to build a wing onto the east end of the building to accommodate additional medical bed space. At the Female Pod/G-1 end of the building, there is the capability to allow for expansion. Any new facility on the current Jail compound would be acceptable.</p>	
<b>Rationale</b>	
<p>The original POD was built for a bed capacity of 24; our normal medical population is 50 to 60 inmates. The original 1995 building plan for only 24 medical beds was an oversight, based on a jail population of 600. Currently the jail population is between 950 and 1,050 inmates. Additionally, we need to create a mental health ward. There are increasing numbers of inmates with mental health issues, drug abuse and detox needs. Inmates threatening, or indicating attempting suicide are housed in with the medical POD inmates. When juvenile females are brought to jail, they must be housed in Medical because we do not have bed space for them to house them separately from adult inmates as required.</p>

<b>General Government</b>	Project# <b>6070402</b>	<b>Next Generation 911</b>
Status: Existing Initial Year: 2015 Countywide Location: 2101 47th Terrace East		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Robert Smith</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: <b>Maintenance</b>

**Scope**

Provide an Emergency Services Network (ESInet) locally, regionally, and statewide, which is critical to emergency communication architecture and will connect Manatee County Public Safety Answering Points (PSAP's) to each other and all PSAP's in the state. GIS data will be prepared and addressing applications updated, and Manatee County's portion (working with Hillsborough, Pasco, Pinellas, Polk and Sarasota counties) of a Regional Internet Protocol (IP) routing solution will be procured.

**Rationale**

Next Generation 911 (NG911) next step in the development of the emergency communications system in place since the 1970's. Converting to the NG911 will provide enhanced access to emergency services from all sources and provide multimedia data capabilities for emergency service organizations.

Status: Existing Initial Year: 2015 Countywide Location: Countywide

**Comprehensive Plan Information** Project Mgr: **Paul Alexander**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Replace current emergency radio system, including radio towers and equipment to support radio communications for Public Safety, Public Works, Utilities, Manatee County Sheriff's Office, Fire Departments, Port Manatee, and other municipal and emergency related agencies.

**Rationale**

Current radio technology and regulation by the FCC has made much of the existing system obsolete with most of the current equipment not able to operate in the new environment. This is a joint venture with Sarasota County to create a system with current technology with improved service provision throughout the two counties.

<b>General Government</b>	Project# <b>6048106</b>	<b>P-25 Radio Replacements</b>
---------------------------	----------------------------	--------------------------------

Status: Existing Initial Year: 2017 Countywide Location: Countywide

**Comprehensive Plan Information** Project Mgr: **Paul Alexander**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope** **Project Map**

Purchase approximately 2,300 radios for the BCC and MSO, for use with the P-25 Radio Project. The new radios will be fully capable of utilizing all capabilities of the P-25 Radio System. This project will not provide radios for other users - each entity will be responsible for the purchase of their own radios.

**Rationale**

Manatee and Sarasota Counties have partnered under an Interlocal Agreement for the implementation of a Regional P25 Public Safety Radio System. Specific to Manatee County, this system will be used by a wide variety of governmental entities including Law Enforcement, Emergency Medical Services, Fire Departments, BOCC Agencies, and Port Manatee. Currently, approximately 70% of the radios in use are at end-of-life; some will support the P25 standards, some require an upgrade, and some won't support the standards at all.

**Funding Strategy**

Debt Proceeds  
Radio Fund Program Revenues

<b>General Government</b>	Project# <b>6049809</b>	<b>Public Safety Communication System Upgrades - AV Enhanced Technology</b>
---------------------------	----------------------------	---

Status: Requested Initial Year: 2018 Countywide Location: County wide

**Comprehensive Plan Information**

Project Mgr: **Robert Smith**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

This project is being requested to evaluate the existing AV needs of Public Safety and initiate a plan to replace/upgrade and install new technology. A phased approach over a number of years is suggested to include at a minimum the following: \*Evaluation and examination of existing equipment \*Evaluation and examination of current and forecast needs \*Review of existing and future direction of technologies \*Design and construction phase \*Maintenance and refresh plan

**Project Map**

**Rationale**

The Public Safety Center (PSC) audio visual (AV) equipment was installed in 2006. The existing ten year old system is an analog system that is quickly becoming obsolete. Recent maintenance and repair costs have increased causing concerns for its future viability. Brighthouse has also given us notice that they are phasing out their analog system and going fully digital. The Marine Rescue Center is in need of AV and other technology to support their activities.

**Funding Strategy**

<b>Parks &amp; Natural Resources</b>	Project#	<b>Beach: Longbat Pass Impl (Jetty) Study 17ME3</b>
<b>Beaches/Waterways</b>	<b>6003413</b>	

Status: Existing Initial Year: 2017 Countywide Location: Anna Maria Island

**Comprehensive Plan Information**

Project Mgr: **Charlie Hunsicker**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need:

**Scope**

Design, permitting, construction and monitoring of the Longboat Pass Jetty.

**Rationale**

The Longboat Pass Jetty has deteriorated and poses a threat to public safety and no longer performs as an erosion control structure. A new structure needs to be built to prevent the loss of sand along the shore and building up in the pass, which creates a navigation hazard.

**Funding Strategy**

<b>Parks &amp; Natural Resources</b>	Project#	<b>Erosion Control Groins</b>
<b>Beaches/Waterways</b>	<b>6029601</b>	

Status: Existing Initial Year: 2011 District 2 Location: Anna Maria Island

**Comprehensive Plan Information**

Project Mgr: **Charlie Hunsicker**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Repair three erosion control groins at Cortez Beach. Construct one ADA compliant dune walkover.

**Project Map**

**Rationale**

The repair of three erosion control groins at Cortez Beach is required to maintain Gulf Drive and to prevent road damage during a storm event. Erosion control structures are eligible expenses for the dedicated Beach Tourist Development Tax.

**Funding Strategy**

Tourist Development Tax  
 Florida Department of Environmental Protection (FDEP)

<b>Parks &amp; Natural Resources</b>	Project#	<b>Passage Key Inlet Management Study</b>
<b>Beaches/Waterways</b>	<b>6003411</b>	
Status: Existing Initial Year: 2017 District 3 Location:		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Charlie Hunsicker</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need: <b>Maintenance</b>		

<b>Scope</b>	<b>Project Map</b>
Development of Inlet Management Plan Study for Passage Key and adjacent beaches. The study will focus on evaluation strategies and provide recommendations for ongoing management of the Key and surrounding areas.	
<b>Rationale</b>	
Florida Department of Environmental Protection permit requires the county to provide FDEP an inlet management plan. The management plan will provide an understanding of the coastal dynamics of the Passage Key Inlet system and adjacent beaches.	
<b>Funding Strategy</b>	
Beach Erosion Control fund

<b>Parks &amp; Natural Resources</b>	Project#	<b>Coquina North Boat Ramp (Bayside)</b>
<b>Boat Ramps</b>	<b>6005714</b>	
Status: Existing Initial Year: 2010 District 3 Location: Coquina Beach - Bayside at North End		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need: <b>Maintenance</b>		

**Scope**

Reconfigure, expand and pave existing parking lot, replace seawall, ramp and docks, add launch lanes, perform maintenance dredging of the access channel, construct a pavilion restroom building, and install security lighting.

**Rationale**

Periodic renovations are necessary to keep dock facilities up to acceptable standards. Seawall replacement is necessary to prolong the life of the seawall system. Reconfiguration of parking area will increase ramp capacity and provide a safer, better-defined circulation for increased efficiency of this facility.

**Funding Strategy**

Florida Boating Improvement Program  
 West Coast Inland Navigation District grant

<b>Parks &amp; Natural Resources</b>	Project#	<b>Coquina South Boat Ramp (Bayside)</b>
<b>Boat Ramps</b>	<b>6005715</b>	
Status: Existing Initial Year: 2010 District 3 Location: Bayside - South End Across From Coquina Beach		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Install sheet pile cap along outside of piers, survey erosion and parking lot expansion.

**Rationale**

Periodic renovations are necessary to meet acceptable standards and to provide better loading and unloading facility. Sheet piling and cap along the piers is necessary to minimize sedimentation within the area needed for maintenance dredging. Reconfiguration of parking area will increase capacity of ramp and provide a safer, better defined circulation resulting in increased efficiency of this facility.

<b>Parks &amp; Natural Resources</b>	Project#	<b>Ft. Hamer Park - Boat Ramp and Dock Improvements</b>
<b>Boat Ramps</b>	<b>6034610</b>	

Status: Existing Initial Year: 2012 District 1 Location: 1605 Ft. Hamer Road, Parrish

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Construction of a new boat ramp to replace the old ramp and approach. Improvements to the wooden docking facility to include debris removal, design, survey, permitting and ADA access requirements.

**Project Map**

**Rationale**

The existing ramp is narrow, steep and deteriorated beyond simple repair and is in need of replacement. The wooden docks are also old and not configured to provide safe, adequate staging areas for vessels as they wait to load and unload people and equipment.

**Funding Strategy**

<b>Parks &amp; Natural Resources</b>	Project#	<b>East Bradenton Park - Restroom Replacement &amp; Community Space</b>
<b>Parks</b>	<b>NR01502</b>	<b>Space</b>

Status: Requested Initial Year: 2019 Countywide Location: 1119 13th Street East, Bradenton, FL 34208

**Comprehensive Plan Information** Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Replace park restroom facility to include community indoor activity area. Replace parking lot to include ADA compliance, striping, enclosed dumpster pad, and safety lighting. Parking lot size may be adjusted after further review.

**Project Map**

**Rationale**

During previous renovations, the community space was not replaced. The park is in need of restroom facilities. The half-cent sales tax provides opportunity to address these two needs by the construction of a multi-purpose building. This will also provide the opportunity for the county to run a year-round community outreach program from the facility.

<b>Parks &amp; Natural Resources</b>	Project#	<b>John H. Marble Park - Repave Parking Lot</b>
<b>Parks</b>	<b>NR01478</b>	

Status: Requested Initial Year: 2018 District 4 Location: 3675 53rd Avenue East, Bradenton, FL 34203

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Repave existing parking lot.

**Project Map**

**Rationale**

John Marble facility has deteriorated over the years. The county took ownership of the facility in the mid 1990's. The park requires significant infrastructure upgrades and facility replacement. The upgrade to this facility will enable the county to provide after-school and health and wellness programming that was offered by the YMCA, but was discontinued due to the economic downturn.

<b>Parks &amp; Natural Resources</b>	Project#	<b>John H. Marble Pool Renovations Phase I</b>
<b>Parks</b>	<b>6031102</b>	

Status: Existing Initial Year: 2017 District 5 Location: 3675 53rd Ave E., Bradenton

**Comprehensive Plan Information**

Project Mgr: **Charlie Hunsicker**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Install gas lines and separate gym and pool electric and water meters, purchase and install two gas pool heaters, overhead lighting, and starting blocks.

**Project Map**

**Rationale**

Local high schools, private community competitive teams, and out of state colleges and universities have shown interest in using this facility, if the pool was heated, and starting blocks and shade structures were available. Heating and lights are needed for winter and evening operations. Splitting utility meters will separate pool consumption from the rest of the park, isolating the true pool operating costs.

<b>Parks &amp; Natural Resources</b>	Project#	<b>Lincoln Park Pool</b>
<b>Parks</b>	<b>NR01440</b>	
Status: Requested Initial Year: 2018 District 1 Location: Lincoln Park, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Charlie Hunsicker</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Growth</b>

**Scope**

Design and build a 25 yard competitive swimming pool with lane markers, lane lines, starting blocks, a separate zero depth entry recreation pool, locker rooms, restrooms, parking, shaded pool deck, picnic pavilions. Both pools will have pool and deck lighting. Project will include water treatment items including filtration, aeration, heating and cooling equipment for both pools. The setting will dovetail into the existing splash pad area. Relocation of existing basketball courts to Sylvan Oaks Park and Lincoln Tunnel upgrades.

**Rationale**

Currently, there is not a public pool facility in the North County area. This facility would provide opportunities for recreational and competitive swimming, swim lessons and other aquatic activities not currently available in this area.

<b>Preserves</b>	<b>6006505</b>	

Status: Existing Initial Year: 2015 District 1 Location: 2649 Rawls Road, Duette

**Comprehensive Plan Information**

Project Mgr: **Charlie Hunsicker**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Other Need**

**Scope**

Ecological restoration and enhancement of approximately 100 acres of wetland and upland areas impacted by historical agricultural uses at Duette Preserve. The project will include removal of ditches and re-grading to restore wetland hydroperiods and restoration of wetland and upland habitats.

**Project Map**

**Rationale**

FDOT is required to provide mitigation for wetland impacts associated with planned interchanges improvements at various intersections. The habitat restoration will benefit water quality and wildlife by greatly improving the ecological value of the habitat.

**Funding Strategy**

<b>Parks &amp; Natural Resources</b>	Project#	<b>Perico Preserve Seagrass Mitigation Area</b>
<b>Preserves</b>	<b>6071302</b>	
Status: Existing Initial Year: 2012 District 3 Location: Perico Preserve, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Charlie Hunsicker</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: Project Need: <b>Other Need</b>

**Scope**

Create an approximate 15 acre seagrass mitigation area with access trail and boardwalk at the Perico Preserve on land owned by Manatee County.

**Rationale**

The seagrass mitigation project will provide two primary benefits. The first benefit will be to provide mitigation credits to Port Manatee (or possibly to another user of the credits, such as FDOT) to allow permitting for a future berth expansion at the Port, and the second benefit will be to provide 140,000 cubic yards of clean fill for the refurbishment of reclaimed water ponds at the Southwest Regional Wastewater Treatment Plant.

**Funding Strategy**

Interfund Loan Proceeds (To be repaid from Mitigation Credits)  
 Utilities Funding

<b>Parks &amp; Natural Resources</b>	Project#	<b>Robinson Preserve Expansion Kayak Launch &amp; Storage Units</b>
<b>Preserves</b>	<b>6085211</b>	

Status: Existing Initial Year: 2014 District 3 Location: 1704 99th St NW, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Tom Yarger**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Construction of a beach compatible sand surface canoe/kayak launch and kayak storage rental units, parking lot and restroom.

**Project Map**

**Rationale**

Provide visitors additional access to the waterways in the preserve. The kayak storage rental units are very popular. There is a long waiting list for the units. Additional units are needed as some people have been on the list for 3 years.

**Funding Strategy**

Florida Boating Improvement Program  
 West Coast Inland Navigation District  
 Impact Fees

<b>Potable Water</b>	Project#	<b>Potable Water Line Extensions &amp; Participation Agreements</b>
<b>Potable Water Distribution</b>	<b>PW01220</b>	
Status: Existing Initial Year: 2015 Countywide Location: Countywide		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

<b>Scope</b>	<b>Project Map</b>
Participate in development of the potable water transmission system infrastructure by oversizing any component to the system to increase capacity above required for a particular development or project when such increase in size supports the Master Plan for system capacity.	
<b>Rationale</b>	
It is more effective to increase the size of potable water infrastructure as it is being developed, rather than replacing it with a larger capacity system. The systems will be sized to serve the planned customer population.

<b>Potable Water</b>	Project#	<b>US 301 at Ellenton Gillette Road</b>
<b>Potable Water Distribution</b>	<b>6035171</b>	
Status: Existing Initial Year: 2014 District 2 Location: US 301-Ellenton Gillette Road, Ellenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need: <b>Maintenance</b>		

**Scope**

Replace existing water line as part of existing CIP project - US301 at Ellenton Gillette Road Intersection Improvements.

**Rationale**

The water line under the roadway is close to the end of its useful life and in need of replacement. The replacement will coincide with roadway construction.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>45th Street East - Water Main Lowering</b>
<b>Potable Water Renewal/Replacement</b>	<b>PW01403</b>	
Status: Existing Initial Year: 2017 District 3 Location: 45th Street East, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>Yes</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Install approximately 2,400 linear feet of 8" HDPE water main and 300 linear feet of 6" water main, three fire hydrants, six 6" gate valves, nine services, and one blowoff. Services and valves will be installed to county and Ten State Standards.

**Rationale**

Install water main line to proper depth to meet Utilities Standards and for protection and fire flow. Existing water main has a shallow depth and is 50 years old. There is an increased threat of breakage and there is less resistance to external and internal forces due to pipe material being brittle. Pressure surges from nearby Elwood I Booster Pump Station and water hammer are making issues worse.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>69th Avenue Water Main Loop from 63rd Avenue West to US 41</b>
<b>Potable Water Renewal/Replacement</b>	<b>6078070</b>	

Status: Existing Initial Year: 2014 District 4 Location: 5th St-63rd Ave W-US 41-69th Ave, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Mike Sturm**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replacement of aged (1965) failing pipe with approximately 6,600 feet of 12 inch water main, fire hydrants, 6 inch gates valves, and 12 x 6 tee services interconnecting between 63rd Avenue East to US 41. Hydrants, services and valves will be installed to county and Ten State Standards.

**Project Map**

**Rationale**

The existing lines have aged and are in poor condition. Access and fire protection are limited and water quality suffers.

<b>Potable Water</b>	Project#	<b>Distribution Building / Annex Rehab (66th Street Complex)</b>
<b>Potable Water Renewal/Replacement</b>	<b>6019208</b>	
Status: Existing Initial Year: 2012 District 3 Location: 66th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tom Yarger</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Demolition of two existing buildings and construction of a new 17,000 square foot building to include a work/storage shop.

**Rationale**

Existing structure has outlasted its expected life use and has become a maintenance issue. The new 17,000 square foot building will replace two existing buildings currently used by the Utility Distribution section. No Southwest Florida Water Management District issues are anticipated, as the county will be matching the existing square feet for pervious versus impervious surface.

Status: Existing Initial Year: 2014 Countywide Location: Countywide		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Replace older, failing or targeted distribution system lines based on age and predicted service life to be determined by the 2012 Distribution System Master Plan, subsequent KANEW (database software) model runs and field investigations.

**Rationale**

Utilities will use the model results from the KANEW analysis that Utility Engineering performed in conjunction with the Distribution Master Plan. The KANEW analysis predicts when pipe elements will reach the end of their service lives based on life-expectancy parameters, and identifies those lines that should be replaced, before they fail.

<b>Potable Water</b>	Project#	<b>Flamingo Cay Water Main Replacement</b>
<b>Potable Water Renewal/Replacement</b>	<b>6088970</b>	
Status: Existing Initial Year: 2014 District 3 Location: Manatee Ave & Flamingo Cay Dr W, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Eric Shroyer</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: <b>Maintenance</b>

**Scope**

Construction of 6 and 8 inch water mains to replace the 2, 3, 4, and 6 inch water mains that are currently asbestos cement or galvanized iron. This includes approximately 10,000 feet of water main, fire hydrants, gate valves and services. Hydrants, services and valves will be installed to county and Ten State Standards.

**Rationale**

This upgrade would provide fire protection and increased water pressure to the development.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>US41 Manatee River Crossing Water Main Replacement</b>
<b>Potable Water Renewal/Replacement</b>	<b>PW01023</b>	

Status: Existing Initial Year: 2014 District 2 Location: US 41-DeSoto Bridge

**Comprehensive Plan Information**

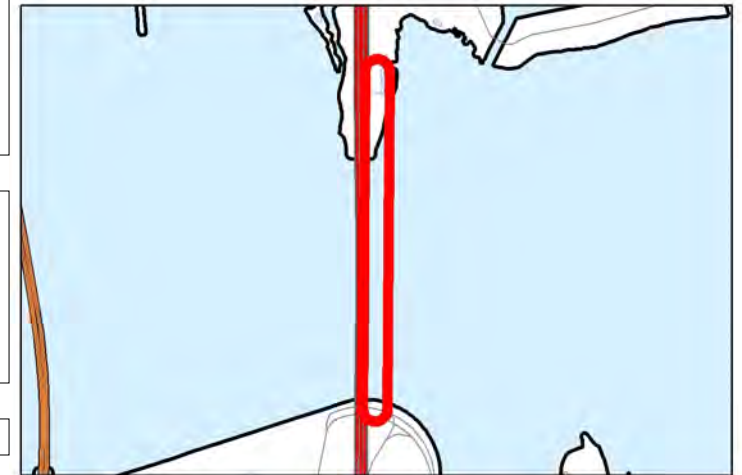

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replace existing 16 inch water main. Directional bore of 2,800 feet with two in-line valves. Hydrants, services and valves will be installed to county and Ten State Standards.

**Project Map**

**Rationale**

The 30 plus year old main is laying on the riverbed across the Manatee River and is vulnerable in its current location from boat anchors and tide erosion. Annual inspections show a continued deterioration of the external walls of the main.

**Funding Strategy**

Utility Rates

<b>Potable Water</b>	Project#	<b>Lake Manatee Dam Repairs</b>
<b>Potable Water Supply</b>	<b>6026075</b>	

Status: Existing Initial Year: 2014 District 1 Location: Dam Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Tony Russo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Phase I - Reestablishment of seepage control of dam core requiring 300 linear feet of jet grout columns and 3,100 linear feet of Trench Remixing Deep (TRD) cut off wall to depths between 95 and 105 feet below dam crest as per plans. Jet grout section will extend south from primary spillway 80 linear feet and north from primary spillway 100 linear feet and will be installed beneath the flooded spillway approach apron. TRD wall will extend 1,050 linear feet south from southern end of jet grout wall and 2,050 linear feet north from northern end of jet grout wall. Installation of TRD wall will require construction of work platform along dam crest for the TRD machines.

Phase II - Repair of void areas underneath downstream concrete structures of primary spillway, densification of soil outside of downstream training walls and establishment of a pressure relieving drain system.

**Project Map**

**Rationale**

Emergency repairs needed due to identified failures at the dam.

**Funding Strategy**

<b>Potable Water Transportation Related</b>	<b>6086970</b>	

Status: Existing Initial Year: 2016 District 5 Location: 44th Avenue-45th St-44th Ave Plaza E

**Comprehensive Plan Information**

Project Mgr: **Eric Shroyer**

CIE Project: **Yes** LOS/Concurrency: **Yes** Plan Reference: Project Need: **Growth**

**Scope**

Replacement and relocation of current 36" water main. The road is being widened from two lanes to four lanes divided with a new bridge over the Braden River. In addition to the utility relocations required due to the roadway expansion, the county has requested a new 36" water main to be installed crossing the Braden River.

**Project Map**

**Rationale**

The current water main was installed in 1965, with the addition of 44th Avenue, this water main is necessary and will now cross the Braden River.

<b>Potable Water</b>	Project#	<b>SR70-I-75 Interchange Water Main &amp; Facility Relocations</b>
<b>Potable Water Transportation Related</b>	<b>6053671</b>	
Status: Existing Initial Year: 2016 District 5 Location: SR 70 - I-75 Interchange, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Other Need</b>

**Scope**

Relocate existing potable water mains and facilities along SR70 at the I-75 interchange. Add 12" water main at Ranch Lake Boulevard for future looping of water main to improve distribution system and bypass existing private water main system. Relocations include the addition of protective concrete pads over mains, addition of split steel casings around water transmission mains, and relocation and/or extensions of water lines to right-of-way lines for future extensions.

**Rationale**

Utility relocations are part of the FDOT SR70 - I-75 Interchange Improvement project.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>SCADA Replacement</b>
<b>Potable Water Treatment</b>	<b>6042370</b>	

Status: Existing Initial Year: 2019 District 1 Location: 17915 Waterline Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replace existing SCADA equipment at the Water Treatment Plant, to include hardware and software upgrades. Current equipment is more than 20 years old.

**Project Map**

**Rationale**

SCADA equipment is run by HSQ, which is a proprietary, closed platform system. This is good for security, but a replacement system is necessary for data retrieval and reporting.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>Water Treatment Plan Raw Water #2 Motor Control Component Replacement</b>
<b>Potable Water Treatment</b>	<b>6025974</b>	

Status: Existing Initial Year: 2016 District 1 Location: 17915 Waterline Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Tony Russo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replacement of the Motor Control Center (MCC) that runs and controls the three pumps located at the Raw Water #2 pumping station. Removal of the existing MCC, including three 400 amp contactors and replacement with most currently available hardware and replacement of each cable run.

**Project Map**

**Rationale**

Contactors currently in use in the MCC are obsolete and repair/replacement equipment is not available as the unit is 33 years old. The three pumps controlled by this MCC are used as the primary and/or secondary stations to supply raw water to the Water Treatment Plant.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>Water Treatment Plant Alum Sludge Drying Bed</b>
<b>Potable Water Treatment</b>	<b>PW01405</b>	
Status: Existing Initial Year: 2019 District 1 Location: 17915 Waterline Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Deficiency</b>

**Scope**

Add additional alum sludge drying bed to five lagoons currently in operation. This drying bed will increase capacity, versatility, and reliability to ensure adequate facilities are in place to allow required operation and maintenance during wet years, treatment upsets and significant basin rehabilitation.

**Rationale**

Existing beds are sufficient to handle typical conditions, but are limited in handling treatment plant upsets or extended weather that is wetter than normal. As WTP implements the new Biological Treatment Unit and Membrane Upgrade, conventional treatment upsets could affect new processes.

**Funding Strategy**

<b>Potable Water</b>	Project#	<b>Water Treatment Plant Biological Treatment Unit</b>
<b>Potable Water Treatment</b>	<b>6085870</b>	
Status: Existing Initial Year: 2014 District 1 Location: 17915 Waterline Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tony Russo</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Design and construction of a raw water biological treatment unit.

**Rationale**

Remove the taste and odor causing compounds from surface water from Lake Manatee Water Treatment Plant. Bench and pilot scale tests over the past three years have shown the process to be effective, reliable and robust throughout the year as a biological roughing filter on raw water (pre-treatment) and requires no chemical addition. Recent research has shown the process to be effective in the post settling stage of treatment but requires the addition of nutrients to optimize bacterial growth.

<b>Potable Water</b>	Project#	<b>Water Treatment Plant Motor Control Center "A" Replacement</b>
<b>Potable Water Treatment</b>	<b>6025973</b>	

Status: Existing Initial Year: 2014 District 1 Location: Waterline Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Tony Russo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replacement of motor control center at the Water Treatment Plant (WTP). This unit was installed with the original plant in 1965. A newer section of the motor control center was added in 1974 with the expansion of the WTP. This motor control center distributes power to mixers, chemical feed pumps, sludge pumps, surface and back wash pumps, transfer pumps and control systems.

**Rationale**

Due to the age of the unit, new repair parts are no longer inventoried by the manufacturer. A failure of this unit would result in back-up temporary operation in order to continue to treat surface water.

**Funding Strategy**

Utility Rates

Design, permit and construct 3,600 sq. ft. (120' x 30') building for storage, and an area for welding.

**Rationale**

Building will be used for general repairs to equipment, which are currently done outdoors, including welding. The building will also be used to store supplies, some of which cannot be stored in the Landfill Operations building due to fire regulations. The building will enable staff to store spare equipment, tires and other supplies currently stored outdoors and exposed to the weather.

**Funding Strategy**

<b>Solid Waste</b>	Project# <b>SW01399</b>	<b>Lena Road Stage II Gas Expansion Phase I</b>
Status: Existing Initial Year: 2019 District 5 Location: Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Design the landfill Gas Expansion in Stage II Phase I, which includes 50 gas wells, along with 18" HDPE header line, 12" sub headers, and 6" HDPE laterals and valves.

**Rationale**

As buried refuse deteriorates, the gas collection system collects and controls the emission of methane in to the piping system, which reroutes the gas to be used as energy. This eliminates odor and keeps the landfill in compliance with Title V air permit requirements.

**Funding Strategy**

<b>Stormwater</b>	Project# <b>6044400</b>	<b>CR675 Canal Piping</b>
Status: Existing Initial Year: 2015 District 1 Location: CR675 , Parrish		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

<b>Scope</b>	<b>Project Map</b>
<p>Pipe canal located on the south side of CR675, beginning east of the Foxbrook subdivision and continuing west approximately 2,000 feet then curving southwest and crossing under Rye Road. The proximity of the canal to CR675 in addition to the depth and sandy soils on the canal bank cause erosion to the canal banks.</p>	
<b>Rationale</b>	
<p>Repairs are difficult to complete, as equipment works directly from the road surface and over a guardrail. Piping the canal would reduce maintenance costs and improve drainage in to the piped system.</p>

<b>Stormwater</b>	Project# <b>6005719</b>	<b>Coquina Beach Drainage Improvements</b>
Status: Existing Initial Year: 2015 District 3 Location: Coquina Beach		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Identify site specific flood alleviation alternatives and water quality best management practices within the Coquina Beach public parking areas. The project extends from the landward side of Longboat Pass to north of the beach restroom facility parking area (approximately 4,200 feet), with location specific internal site improvements to be determined during the conceptual design alternatives evaluation.

**Rationale**

The Coquina Beach public parking areas gradually drain south toward Longboat Pass, but periodically flood to depths of 6" to 18" during prolonged or high intensity rainfalls. This creates a nuisance to the public utilizing the beach and associated facilities, creates additional maintenance issues due to shell parking wash-outs, reduces access to available parking spaces and creates unsightly conditions.

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Growth</b>

<b>Scope</b>	<b>Project Map</b>
Current stormwater piping has demonstrated failures due to leaking joints, which allows groundwater and soil intrusion in to the pipe. Holes are created, creating a hazardous environment for the park. Cure In Place Piping (CIPP) will be performed to replace the piping, which provides a jointless lining.	
<b>Rationale</b>	
Continuing issues with groundwater intrusion and leaking joints have made parts of the park potentially hazardous; the piping needs to be replaced.

<b>Stormwater</b>	Project# <b>ST01629</b>	<b>Stormwater Pipe Replacement - Countywide</b>
Status: Requested Initial Year: 2018 Countywide Location:		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

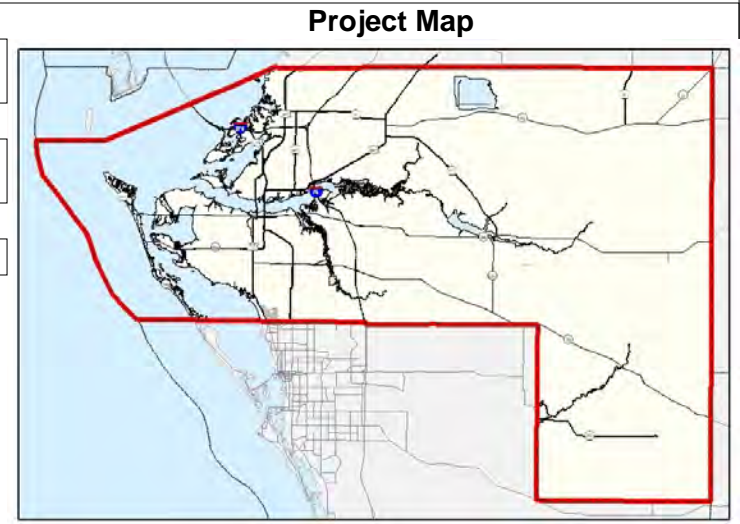

Replacement of deteriorated stormwater pipe. Excavation, replacement and restoration of stormwater pipes with concrete pipe replacing corrugated metal pipe.

**Rationale**

Pipes have deteriorated to a condition which necessitates replacement. Work is beyond the scope of normal maintenance, pipes have exceeded useful life.

**Funding Strategy**

Stormwater Capital Improvements

<b>Stormwater</b>	Project# <b>ST01296</b>	<b>Tallevast Road Storm Pipe Replacement</b>
-------------------	----------------------------	--

Status: Existing Initial Year: 2019 District 4 Location: Tallevast Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Complete a detail subsurface investigation, storm pipe inspection and rehabilitation of 2,400 linear feet of 60" storm drain on Tallevast Road from Prospect to the terminus of the pipe.

**Project Map**

**Rationale**

This section of four lane road is served by a 60" diameter storm pipe running the length of the roadway on the south side of the road. Since construction, settlement and/or leaking pipe joints have caused voids under the road surface and issues with the integrity of the road surface. This project will investigate the settlement of the pipe, integrity of the pipe joints and soil, voids existing under the road, and identify repair options. Repair methods may include removal and replacement of storm pipe, point repair of joints and/or lining of the pipe.

**Funding Strategy**

<b>Stormwater</b>	Project# <b>6028801</b>	<b>Wares Creek - Canal Dredging</b>
Status: Existing Initial Year: 1995 Countywide Location: Manatee Avenue-US 41, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Sherri Robinson</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Dredge from the mouth of Wares Creek to 9th Avenue West, clear and snag debris from 9th Avenue West to 17th Avenue West, and excavate for widening the creek from 17th Avenue West to 21st Avenue West. Also, widen seawall from 1st Avenue West to 30th Avenue West, and widen with trapezoidal channel from 30th Avenue West to near Cortez Road.

**Rationale**

To accomodate expanded peak stream flow capacity, better accomodate heavy rainfall events and limit flood occurrences.

**Funding Strategy**

**Fiscal Year 2018 - 2022 Capital Improvement Program**

<b>Transportation</b>	Project# <b>6092860</b>	<b>17th Street East (Memphis Road) at 28th Avenue East Railroad Improvements</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2014 District 2 Location: 17th St East- 28th Av E, Palmetto

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Design, permitting and construction of a replacement railroad crossing surface for 17th Street East.

**Project Map**

**Rationale**

The current crossing condition is deteriorating to the point where it will be needing replacement. The crossing will be replaced with a concrete wearing surface with an estimated life of 50 years.

**Funding Strategy**

Gas Taxes

<b>Transportation</b>	Project# <b>6086960</b>	<b>44th Ave E - 45th Street - 44th Avenue Plaza East</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2014 District 5 Location: 44th Ave E - 45th Street - 44th Avenue Plaza East, Bradenton

**Comprehensive Plan Information** Project Mgr: **Eric Shroyer**

CIE Project: **Yes** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Includes construction of 1.3 miles of roadway improvements from 45th Street East to 44th Avenue Plaza East, to include a four-lane divided roadway with sidewalks, bike lanes, street lighting, and a bridge crossing the Braden River. This section will include four 12-foot lanes, a 22-foot median, curb and gutter, 4-foot bike lanes, and 5-foot sidewalks in each direction. Morgan Johnson Road and Caruso Road will be realigned to connect at a single intersection on 44th Avenue East.

**Rationale**

To provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

**Fiscal Year 2018 - 2022 Capital Improvement Program**

<b>Transportation</b>	Project# <b>6045662</b>	<b>44th Avenue East - 44th Ave Plaza E - Lakewood Ranch Boulevard</b>
-----------------------	----------------------------	---

Status: Existing Initial Year: 2015 District 5 Location: 44th Ave E-44th Ave Plaza E - Lakewood Ranch Blvd, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Eric Shroyer**

CIE Project: **Yes** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Includes construction of 2.8 miles of roadway improvements from 44th Avenue Plaza East to Lakewood Ranch Boulevard. Includes a four-lane divided roadway with sidewalks, bike lanes/multi-use path, and street lighting, an overpass over I-75, and a crossing over a reclaimed water storage lake. This section will include four, 12-foot lanes, a 22-foot median, curb and gutter, 4-foot bike lanes, and 5-foot sidewalks in each direction.

**Project Map**

**Rationale**

Provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

**Funding Strategy**

Debt Proceeds

<b>Transportation</b>	Project# <b>6092960</b>	<b>67th Avenue East - 18th Street East Railroad Improvements</b>
Status: Existing Initial Year: 2017 District 4 Location: 67th Avenue East -18th Street East, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
This project covers the design, permitting and construction of a replacement railroad crossing surface for 67th Avenue East.	
<b>Rationale</b>	
The roadway railroad crossing has deteriorated and rehabilitation and upgrade to the existing facility is required to facilitate crossing safety. The crossing will be replaced with a concrete wearing surface with an estimated life of 50 years.	
<b>Funding Strategy</b>	
Gas Taxes

**Fiscal Year 2018 - 2022 Capital Improvement Program**

<b>Transportation</b>	Project# <b>6012609</b>	<b>CDBG Funded Sidewalk - 21st St E-US 41N-12th Ave E - Palmetto</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2015 District 2 Location: 21st St E-US 41N-12th Ave, Palmetto

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Construct 2,700 linear foot concrete sidewalk on 21st Street East from US 41 North to 12th Avenue East, Palmetto.

**Project Map**

**Rationale**

Provide continuous sidewalk network in this area that contains Palmetto Elementary, Tillman Elementary and Buffalo Creek Middle schools. This sidewalk will increase safety and reduce obstacles students face when walking and/or biking to and from school.

**Funding Strategy**

CDBG Funding

<b>Transportation</b>	Project# <b>6084560</b>	<b>Ellenton Gillette Road - US 301 / Moccasin Wallow Road</b>
Status: Existing Initial Year: 2013 District 2 Location: Ellenton Gillette Road, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Roadway functional improvements to include widening of existing roadway to 24', roadside ditch piping, and shoulder enhancement where necessary. Incorporate ATMS and signal upgrades at Moccasin Wallow Road and 17th Street. The project will replace existing water main located under existing pavement with new 12" PVC water main located outside of pavement along with hydrants and services.

**Rationale**

To enhance utilization of existing roadway facility and upgrade to current Florida Department of Transportation (FDOT) design standards.

**Funding Strategy**

Gas Taxes

Status: Existing Initial Year: 2010 District 1 Location: Upper Manatee River Road - River Crossing - Ft. Hamer Road

**Comprehensive Plan Information** Project Mgr: **William Lorenzo**

CIE Project: **Yes** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope** **Project Map**

Design, permitting, land acquisition, and construction of a two lane bridge facility and connector roadways.

**Rationale**

To accomodate future growth and traffic capacity needs in the eastern area of the county. Will also enhance emergency services response, both north and south, depending upon resource availability. The project, when complete, will provide a parallel reliever roadway for I-75. The bridge will also enhance the ability of area residents to evacuate (north and south depending on storm track).

<b>Transportation</b>	Project# <b>6036360</b>	<b>Greenbrook Underdrain Replacement</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2016 District 5 Location: Greenbrook Boulevard, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Brian Martineau**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

The Greenbrook neighborhoods of the Ravines and the Preserve are located on the south side of Greenbrook Blvd, east of Lorraine Road. These two neighborhoods have subdrains to facilitate the drainage of groundwater away from the road base. The subdrain limits the volume of ground water wicking into the base and potentially damaging the base and road surface. In both neighborhoods, the subdrain is failing, causing damage to residential driveways, sidewalks, and the road shoulder. Additionally, the subdrain is not functioning as designed or intended, potentially allowing groundwater to move into the road base. The effected area includes over 2.5 miles of county owned and maintained roadway and approximately 300 single family homes.

**Project Map**

**Rationale**

Manatee County Public Works has repaired numerous areas in these neighborhoods with spot repairs as necessary, which is labor intensive and inefficient. The project is intended to address the problem as a single repair project and remedy the deficiencies in one season with this project. This will provide relief to the maintenance staff as well as residents who continue to have settlement issues in their front yards and driveways.

<b>Transportation</b>	Project# <b>6092760</b>	<b>Lakewood Ranch Boulevard ATMS</b>
-----------------------	----------------------------	--------------------------------------

Status: Existing Initial Year: 2016 District 5 Location: Lakewood Ranch Boulevard, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Install four miles of fiber communication backbone to provide a redundant network path to support the countywide ATMS communication network. Install two CCTV cameras, three Bluetooth and one Microwave Vehicle Detection System device.

**Project Map**

**Rationale**

The project will connect the traffic signals within the project limit to the Regional Traffic Management Center (RTMC) and will also provide a redundant fiber communication network east of the interstate. In addition, this project will also add traffic monitoring devices such as CCTV cameras, bluetooth based travel time measurement devices and MVDS devices. Together, these devices will provide a variety of information to the county's traffic engineering staff and will aid in improving/maintaining the overall traffic flow.

<b>Transportation</b>	Project# <b>6049960</b>	<b>Lakewood Ranch Boulevard Re-Base</b>
Status: Existing Initial Year: 2016 District 5 Location: Lakewood Ranch Boulevard, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Brian Martineau</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Rebase large section of Lakewood Ranch Boulevard between SR64 and SR70. This area was constructed in phases where the outside two lanes were first constructed more than 15 years ago and the inside two lanes five years ago. The original two lanes are showing significant base failures in the asphalt. Simple resurfacing will not work because the failure areas will reflect through and return in a short period of time. These areas requires significant over excavation to remove the base and possibly sub-base material and replace with suitable material. This level of work is beyond typical scale of standard maintenance resurfacing. The final step will be to resurface the entire roadway to unify the age and structural integrity and preserve the investment of the base repairs.

**Rationale**

Lakewood Ranch Boulevard was constructed in two phases and the road is not wearing consistently. This project will unify the age and structural integrity and preserve the investment of the base repairs.

**Funding Strategy**

<b>Transportation</b>	Project# <b>6022960</b>	<b>Sunny Shores Mobile Home Park</b>
Status: Existing Initial Year: 2015 District 3 Location: Sunny Shores MHP, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Brian Martineau</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Remove and replace asphalt and base and address the drainage in the area. This process cannot raise the existing road elevation and will be difficult with larger construction equipment due to the trailer setbacks and narrow roadways. It is intended to utilize existing base material by mixing in place, if possible.	
<b>Rationale</b>	
Roads in the subdivision are 12' to 20' wide with no defined drainage. Currently roads are repaired with patching. The roads currently hold water during rain events and roads will continue to fail.	
<b>Funding Strategy</b>	
Gas Taxes

<b>Transportation</b>	Project# <b>6059361</b>	<b>Tallevast Road Railroad Crossing Replacement</b>
-----------------------	----------------------------	---

Status: Existing Initial Year: 2016 District 4 Location: Tallevast Road, Bradenton

<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

This project provides funding for the replacement of the rail crossing surface on Tallevast Road just east of US 301. The existing crossing is a segmented rubber material between the rails and on either side of the tracks. The project will replace the rubber material with a long lasting concrete material to provide an estimated 30-50 year life compared to the 10 years for the rubber materials.

**Rationale**

This project continues the proactive approach Manatee County has had with maintaining railroad crossings. The proposed concrete repairs will remove this crossing from a repair concern for the next 30 years or more.

**Funding Strategy**

Gas Taxes

<b>Transportation</b>	Project# <b>6044600</b>	<b>Tallevast Road Sidewalks</b>
Status: Existing Initial Year: 2016 District 4 Location: Tallevast Rd., 15th St E-Post Office, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Install concrete sidewalk on north side of Tallevast Road from 15th Street East to the Post Office. Widen, mill and overlay from railroad tracks to frontage of Manatee County Transit Fleet Facility.

**Rationale**

Provide safe pedestrian access from 15th Street East to the Post Office along Tallevast Road. Functional improvements will widen existing road from 21 to 24 feet from railroad crossing to Post Office.

**Funding Strategy**

Gas Taxes

<b>Transportation</b>	Project# <b>6083906</b>	<b>US 301 - Tallevast Road - Capacity Improvements</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2015 District 4 Location: US 301 - Tallevast Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **Yes** Plan Reference: Project Need: **Growth**

**Scope**

Capacity improvements related to turn lanes at the intersection of Tallevast Road. The improvements will include the east bound approach on Tallevast to provide dedicated left, through and right turn lanes as well as receive the south bound turn lane; lengthen the south bound to west bound right turn lane on US 301 and lengthen the north bound to west bound left turn lane on US 301. All improvements are required by FDOT as part of the construction of the Transit Fleet Facility on Tallevast Road.

**Project Map**

**Rationale**

The new facility requires access point on Tallevast Road. New turn lanes are required to minimize the impact of the new driveway on the existing roadway traffic. The right turn lane will be the addition of that lane and the left turn lane will require widening the roadway to the south to make room for the turn lane. All work is intended to be done concurrently with the Transit Fleet Facility construction and construction contract to keep control and coordination of the construction site.

<b>Transportation</b>	Project# <b>6021761</b>	<b>Wauchula Road Over Young's Creek Bridge Replacement</b>
-----------------------	----------------------------	--

Status: Existing Initial Year: 2018 District 1 Location: Wauchula Road - Young's Creek

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

The bridge over Young's Creek on Wauchula Road (FDOT# 134049) was constructed in 1951. Wauchula Road is the easternmost north-south connector between SR 64 and SR 70 in the Myakka area and is integral for local residential, commercial, and agricultural traffic. The detour around the bridge is 18 miles (35 miles when using roads in Manatee County). This structure is posted for loads that are 65% of the normal legal load. The structure currently has a low health index rating of 60 (out of 100) and sufficiency rating of 29 (out of 100) Scheduling this structure replacement in the next 5 years will save on maintenance costs over time and begin to reinvest in the critical infrastructure in the heart of our agriculture business area.

**Project Map**

**Rationale**

This project begins the philosophy of proactive infrastructure management rather than a purely reactive approach. This structure on Wauchula Road is a critical failure point in the road network of the Myakka City area. Designing and replacing this structure prior to an emergency allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance during the early part of anticipated 50 year life of the new structure.

<b>Transportation</b>	Project# <b>6068361</b>	<b>Whitfield Ave - Prospect Road</b>
Status: Requested Initial Year: 2018 District 4 Location: Whitfield Ave - Prospect Road		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Eric Shroyer</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>Yes</b> Plan Reference:		Project Need: <b>Deficiency</b>

<b>Scope</b>
Upgrade to mast-arm supports, add separate right turn lanes on all approaches.
<b>Rationale</b>
Upgrade signal installation and improve operations & safety at existing signalized intersection.
<b>Funding Strategy</b>
Infrastructure Sale Tax - TRII023

Status: Requested Initial Year: 2020 District 1 Location: Woodlawn Circle S - Erie - 79th Ave E		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Eric Shroyer</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference: Project Need: <b>Deficiency</b>		

<b>Scope</b>
Construct 5' sidewalk along with drainage improvements to accommodate sidewalk installation.
<b>Rationale</b>
Sidewalk has been requested from the School Board for safe route to school, multiple requests from general public, or infill project within an area that sidewalks already exist.
<b>Funding Strategy</b>
Infrastructure Sales Tax - TRSW082

<b>Wastewater</b>	Project#	<b>Force Main 1M 30" Gravity Main</b>
<b>Wastewater Collections</b>	<b>WW01589</b>	
Status: Requested Initial Year: 2019 District 3 Location: 8720 44th Ave W - 11859 Cortez Road West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>
Replace approximately 10,500 linear feet of 30" gravity main.
<b>Rationale</b>
Gravity main needs to be replaced due to age and potential for failure. This gravity main connects to Force Main 5 off of the Islands and is a critical main.
<b>Funding Strategy</b>
Utility Rates

<b>Wastewater</b>	Project#	<b>Force Main 41A Redirect to Tara 20</b>
<b>Wastewater Collections</b>	<b>6028388</b>	

Status: Existing Initial Year: 2014 District 5 Location: Whitfield Ave - Old Farm Road - Honore, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Eric Shroyer**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Install approximately 11,000 linear feet of 12 inch and 14 inch force main. Install 14 inch force main along Whitfield Avenue, Old Farm Road and Honore from Pump Station 454 to the existing 16 inch force main.

**Project Map**

**Rationale**

Divert wastewater flow from 41A to Tara 20 instead of 39A. This will allow for improved capacity through Master Lift Station 39A service area. As Tara 20 and 41A areas are currently built out, the combined systems with these added improvements will be able to handle the maximum peak flow demands combined between 41A and Tara 20. Lift Station Tara 20 has been previously upgraded.

**Funding Strategy**

Facility Investment Fees - Sewer

<b>Wastewater</b>	Project#	<b>Parrish Village Force Main and Master Lift Station</b>
<b>Wastewater Collections</b>	<b>6069180</b>	
Status: Existing Initial Year: 2008 District 1 Location: SR 62 - Erie Road, Parrish		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>Yes</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

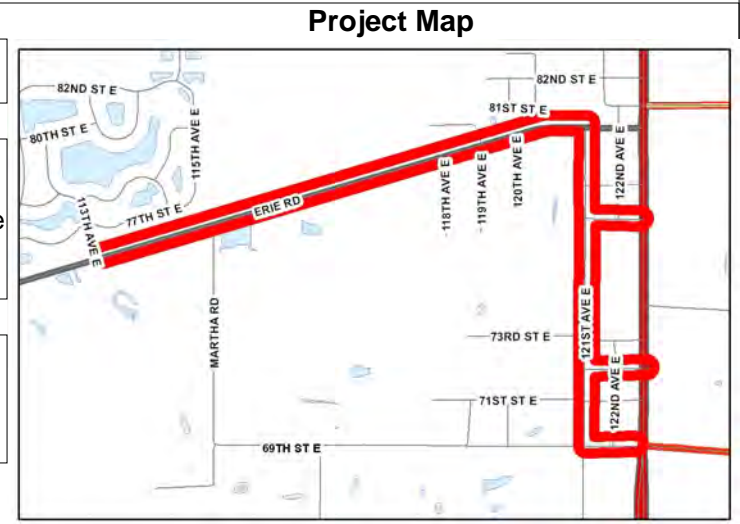

Construction of a new force main and master lift station to connect to the existing 16" force main on US 301 and Erie Road.

**Rationale**

New force main and lift station needed due to future population growth and usage. This project is related to the US 301 - Erie Road/Old Tampa Road to County Road 675 project. This system will provide wastewater service to the Village of Parrish and alleviate the potential future overload of the existing lift station. Project construction to be scheduled relative to corresponding future sewer system demand and requirements.

<b>Wastewater</b>	Project#	<b>Tara 20 Force Main Parallel to Lena Road</b>
<b>Wastewater Collections</b>	<b>6079881</b>	

Status: Existing Initial Year: 2014 District 5 Location: 85th Blvd East (Lena Rd) from SR 70 to 41st Avenue East, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jennifer Fehrs**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Install approximately 8,700 linear feet of 20 inch force main to parallel the existing 20 inch force main along 85th Boulevard East (Lena Road) from SR 70 to 41st Street East to the existing 30 inch force main. Force main cleaning includes running a manufactured "pigging" device through the line. Long force mains are typically equipped with "pig" insertion retrieval stations, the "pig" is a device sent through the pipe to ensure the pipe is clean of debris. This project would add "pig" stations to the Tara 20 Force main for easier access.

**Project Map**

**Rationale**

To allow for the diversion of wastewater flow currently from 41A to 39A, to flow from 41A to Tara 20. This will improve capacity through Master Lift Station 39A for future growth in this service area. As Tara 20 and 41A are currently built out, the combined systems with these added improvements will be able to handle the maximum peak flow demands combined with 41A and Tara 20.

<b>Wastewater</b>	Project#	<b>Mocassin Wallow Road - 12" Force Main Extension</b>
<b>Wastewater Growth Related Booster Stations</b>	<b>6066180</b>	

Status: Existing Initial Year: 2016 District 1 Location: US 41 - Mocassin Wallow Road, Palmetto

**Comprehensive Plan Information**

Project Mgr: **Tony Russo**

CIE Project: **Yes** LOS/Concurrency: **Yes** Plan Reference: Project Need: **Growth**

**Scope**

Installation of approximately 11,000 linear feet of 12" Force Main on Mocassin Wallow Road east of US41 to Artisan Lakes lift station.

**Project Map**

**Rationale**

There is a need to reroute wastewater flow from the N-1H force main serving Port Manatee from the N-1B Master Pump Station east on Mocassin Wallow Road . This section of the force main needs to be installed prior to the FDOT construction. This project will allow the future Mocassin Wallow 12" force main to be extended east to the Artisan Lakes Master Pump Station.

<b>Wastewater</b>	Project#	<b>SEWRF Storage Lakes &amp; Pump Back Station Improvements</b>
<b>Wastewater Growth Related Booster Stations</b>	<b>6088380</b>	
Status: Existing Initial Year: 2018 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>Yes</b> Plan Reference:		Project Need: <b>Growth</b>

<b>Scope</b>	<b>Project Map</b>
Reduce slope on the east and south lake II to 3:1 where necessary. Cut back berm overgrowth on all storage lakes, provide erosion control at existing pump stations and install pump stations outside of berms. Increase pump back capacity on each lake to 15 mgd. Install new energy dissipating inlets on both lakes, and install outfall structures. Install solar bees for lake recirculation and algae control. Included with this project would be all necessary electrical and SCADA work.	
<b>Rationale</b>	
Increase output capacity in moving water from storage lakes to keep up with growing reclaim demand. Removing land area between the east lake sections increases lake storage capacity. On previous FDEP reports it has been noted about our responsibility in preventing the berms from overgrowth of Brazilian pepper trees.

<b>Wastewater</b>	Project#	<b>12A Motor Control Center Rehabilitation</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01365</b>	
Status: Existing Initial Year: 2020 District 4 Location: 2007 Bay Drive, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Replace existing motor control center (MCC) and service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting and drywell lighting. Replace and upgrade all equipment as needed to bring the MCC and other components to current electrical standards. Improve electrical area to air conditioned space and configuration will include arc flash electrical safety standards, and will be OSHA and NFPA-70E compliant.

**Rationale**

The motor control center needs to be upgraded and brought to proper National Electrical Code standards and upgraded to proper safety codes. Many of the electrical components are obsolete and no longer serviceable. There are several components no longer in use and have become obsolete.

<b>Wastewater</b>	Project#	<b>13A Wet Well Rehabilitation</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01367</b>	
Status: Existing Initial Year: 2020 District 4 Location: 112 63rd Ave E., Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		
Project Need: <b>Maintenance</b>		

**Scope**

Remove existing fiberglass liner, make repairs to concrete structure where applicable, apply new fiberglass liner, repair or replace fiberglass platform/grating/stairs/handrail where necessary, replace stop gate channels and inspect aluminum stop gates, install new LED lighting system, inspect muffin monster for wear and determine replacement need, and install new flow meter and upgrade bypass piping.

**Rationale**

Due to the heavily corrosive atmosphere, the existing fiberglass liner is beginning to delaminate from the concrete structure, allowing hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The stop gate channels are becoming inoperable and need to be replaced to allow for the isolation of the flow channels. The lighting system is subpar and needs to be upgraded to make the area safer.

<b>Wastewater</b>	Project#	<b>51st Street Gravity Main Sewer Replacement</b>
<b>Wastewater Restore/Rehab</b>	<b>6035782</b>	
Status: Existing Initial Year: 2014 District 3 Location: 51st Street - 8th Avenue, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Replace approximately 3,300 linear feet of existing 30 inch gravity force main with 30 inch poly vinyl chloride (PVC) pipe. Replace 11 manhole locations along the route from 8th Avenue to Master Lift Station 1D, including reconnecting all laterals and associated appurtenances within the collection system. Remove out-of-service pipe and restore area including new asphalt pavement along 51st Street.

**Rationale**

Replacement is required due to recurring maintenance issues with the 30 inch ductile iron pipe (DIP) gravity main. The main is very deep and the latest emergency repairs caused sink holes. The line was assessed by in-house staff while exposed and it was determined the gravity main was corroded beyond repair.

<b>Wastewater</b>	Project#	<b>Artisan Lakes Master Flow Meter &amp; Wet Well Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01594</b>	
Status: Requested Initial Year: 2022 District 1 Location: 9760 Gillette Road, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Install new above ground flow through magmeter. Clean and inspect existing wet well fiberglass liner and repair as needed. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets and mounting plates, and remove/replace as necessary. Remove and replace submersible pumps.

**Rationale**

The flow meter at this station regularly requires maintenance and should be replaced. Due to the highly corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks. If the liner leaks, damage to concrete could cause the structure to become unsafe.

<b>Wastewater</b>	Project#	<b>Bayshore Yacht Basin (RTU 101) Relocation and Force Main Replacement</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01595</b>	

Status: Requested Initial Year: 2021 District 4 Location: 6735 26th St. West, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Deficiency**

**Scope**

Construct new master lift station for the Bayshore Yacht Basin in a new location outside of the gated property area. The MLS will contain pumps, wet well, VFD's, enclosure for electrical components, a backup power generator and/or auxiliary pump, flow meter and all piping and valving necessary to transfer service to the new MLS. The existing lift station will be demolished, and the county will conduct a gravity system inspection to determine areas for sewer rehabilitation. The existing force main will be replaced with a new alignment from the MLS to the tie-in with the MLS 12A Force Main.

**Project Map**

**Rationale**

Existing lift station is located within a private gated area, making access difficult, and is undersized for peak weather flows and needs additional capacity. The master lift station needs to have permanent standby power, and the force main needs to be upsized to increase transmission capacity.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Colony Cove 1 Phase III Gravity Sewer Replacement/Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>6005684</b>	
Status: Existing Initial Year: 2016 District 1 Location: Colony Cove, Ellenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		
Project Need: <b>Maintenance</b>		

**Scope**

Evaluate, design and rehab/replace sanitary gravity sewer system within Phase III of Colony Cove 1 subdivision. Rehab/replace approximately 1,050 linear feet of 8" gravity sewer main, over 30 manholes and about 20 lateral services. Project will also assess and replace as needed sewer connection point services, and over 20 manholes will be rehabbed and sewer main to be relocated from rear to front of properties.

**Rationale**

System is aging and experiencing a high infiltration rate. Additional concerns for potential spills and location adjacent to waterway. After reviewing the location of this infrastructure, it was determined that for constructability purposes and environment impact, the sewer main will be relocated to the street.

		Project Need: <b>Maintenance</b>

**Scope**

Replace approximately 325 linear feet of cast iron pipe with High Density Polyethylene (HDPE) pipe, and rehab 3 manholes associated with repair.

**Rationale**

Constructed in 1976, due to age and condition assessment, this force main is in need of replacement.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>MLS 1D Electrical Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01412</b>	
Status: Existing Initial Year: 2021 District 3 Location: 18th Ave - 51st St., Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		
Project Need: <b>Maintenance</b>		

**Scope**

Upgrade existing service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting, and drywell lighting. Replace and upgrade equipment to bring all electrical components to current standards, and air condition electrical space. New design and electrical system configuration will include arc flash electrical safety improvements for OSHA and NFPA-70E compliance.

**Rationale**

Main breaker needs to be upgraded and brought to code. Many components are obsolete and no longer serviceable.

<b>Wastewater</b>	Project#	<b>MLS 39A Emergency Generator Replacement</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01233</b>	
Status: Existing Initial Year: 2019 District 4 Location: 5621 39th Street East, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>		<b>Project Map</b>	
Remove existing emergency power generator from inside lift station building and install larger generator outside with sound attenuating enclosure and replace the automatic transfer switch.			
<b>Rationale</b>			
Current generator is reaching life expectancy, and replacement is needed to prevent downtime due to catastrophic failure. Portable emergency generators would not be able to power all three pumps in this lift station, which could cause a sanitary sewage overflow. The generator also needs to be moved outside to reduce excessive heat in the building where electronics and control equipment are located.

<b>Wastewater</b>	Project#	<b>MLS 5 Electrical Improvements</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01413</b>	
Status: Existing Initial Year: 2021 District 3 Location: 4300 Gulf Drive, Holmes Beach		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		
Project Need: <b>Maintenance</b>		

**Scope**

Upgrade existing service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting, and drywell lighting. Replace and upgrade equipment to bring all electrical components to current standards, and air condition electrical space. New design and electrical system configuration will include arc flash electrical safety improvements for OSHA and NFPA-70E compliance.

**Rationale**

Main breaker needs to be upgraded and brought to code. Many components are obsolete and no longer serviceable.

<b>Wastewater</b>	Project#	<b>MLS Lakewood Ranch Emergency Generator Replacement</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01237</b>	
Status: Existing Initial Year: 2019 District 5 Location: 11600 Clubhouse Drive, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Remove existing motor control center (MCC) and service entrance breaker, remove transformer, distribution center, lighting panel and equipment room lighting. Replace and upgrade generator to match recently replaced variable frequency drive and electrical improvements for energy efficiency and proper sizing. Electrical areas will be improved to air conditioned space, and the new design and configuration will include arc flash electrical safety improvements, which is OSHA and NFPA-70E compliant.

**Rationale**

The generator has reached the end of its useful life and needs to be replaced. The MCC needs to be upgraded and brought to National Electrical Code standards and safety codes. Many current electrical components are obsolete and no longer serviceable. Several components are no longer in use as other equipment has been upgraded during previous projects.

<b>Wastewater</b>	Project#	<b>MLS Lakewood Ranch Wet Well Rehabilitation</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01238</b>	
Status: Existing Initial Year: 2019 District 5 Location: 11600 Clubhouse Drive, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Install new above-ground flow-through Magmeter and remove and replace existing fiberglass liner. Clean, prep and make necessary repairs to concrete structure before application of new liner system. Install new in-line grinder system and replace discharge piping, guide rails, pipe bracing, base ells, and/or mounting plates. Replace influent force main pipe restraints.	
<b>Rationale</b>	
Due to the heavily corrosive atmosphere, existing fiberglass liner is beginning to delaminate from the concrete structure, allowing hydrogen sulfide to deteriorate the concrete. Base elbows are worn and need to be replaced to prevent leaks or blow-by from causing additional damage. Pipe restraints are corroded and pipe needs to be replaced with current standard piping.

<b>Wastewater</b>	Project#	<b>Pope Road Master Flow Meter and Wet Well Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01604</b>	
Status: Requested Initial Year: 2022 District 5 Location: 12405 44th Avenue East, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Install new Magmeter. Clean and inspect existing wet well fiberglass liner and repair as needed. Clean, prep and repair concrete structure. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets and/or mounting plates for corrosion damage and remove and replace as necessary. Remove and replace submersible pumps.

**Rationale**

The flow meter at this station requires consistent maintenance and needs to be replaced. Due to the highly corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks which deteriorates concrete. Additionally, pumps have reached their useful life.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Sewer Screening System for Detention Center</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01411</b>	
Status: Existing Initial Year: 2020 District 1 Location: 14470 Harlee Road, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Replace existing screening system at Manatee County Detention Center. Retrofit existing structure and replace existing bar screen with new screening system.

**Rationale**

Existing screen has issues handling debris coming from the Detention Center, particularly large objects such as clothing, bed sheets, shoes, and other objects that are being put in the collection system. These objects cause the clogging of the current screen, which causes bypassing of the screening system and does not permit the capture of these large objects. This causes issues with the lift station pumps and force main system.

<b>Wastewater</b>	Project#	<b>Southeast Master Flow Meter &amp; Wet Well Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01606</b>	
Status: Requested Initial Year: 2022 District 5 Location: 14700 Master Avenue, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>
Install new Magmeter. Clean and inspect existing wet well fiberglass liner and repair as needed. Clean, prep, and make repairs to concrete structure as needed. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage and remove and replace as necessary. Remove and replace submersible pumps.
<b>Rationale</b>
The flow meter requires continuing maintenance and repair and needs to be replaced. Due to the highly corrosive atmosphere, the existing fiberglass liner needs to be inspected for delamination and leaks, which can damage the concrete.

<b>Wastewater</b>	Project#	<b>Tidevue Electrical Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>WW01415</b>	
Status: Existing Initial Year: 2021 District 1 Location: US301 - Ft. Hamer Road, Parrish		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Upgrade existing service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting, and drywell lighting. Replace and upgrade equipment to bring all electrical components to current standards, and air condition electrical space. New design and electrical system configuration will include arc flash electrical safety improvements for OSHA and NFPA-70E compliance.

**Rationale**

Motor Control Center needs to be upgraded and brought to code. Many components are obsolete and no longer serviceable.

<b>Wastewater</b>	Project#	<b>Trailer Estates Restore &amp; Rehab</b>
<b>Wastewater Restore/Rehab</b>	<b>6018082</b>	
Status: Existing Initial Year: 2017 District 4 Location: Canada Avenue, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Sherri Robinson</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Repair and replace infrastructure, including service lateral locations connecting to trailers. Service lateral and connection points are a potential groundwater access point. Inspection and design of the system is required to determine the best and most cost efficient method of rehab required. Project costs shall include evaluation of existing system.

**Rationale**

System is aging and experiencing a high infiltration rate in the area. Additionally, there are concerns for potential spills, sinkholes, line breaks, stoppages and locations adjacent to the waterway. After reviewing the location of this infrastructure, it was determined that the materials originally installed and quality of installation has created unfavorable maintenance conditions.

CIE Project: **Yes** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Replacement and upsizing of approximately 11,500 linear feet of 6" force main with 8" force main, and replacement and upsizing of approximately 2,000 linear feet of 8" force main with 18" force main.

**Project Map**

**Rationale**

Replacement and upsizing necessary to accommodate area growth and to accommodate new 6" - 8" force main planned from the Water Treatment Plant.

**Funding Strategy**

Facility Investment Fees - Sewer

<b>Wastewater</b>	Project#	<b>SR70 @ I-75 Interchange Wastewater Main &amp; Facility Relocations</b>
<b>Wastewater Transportation Related</b>	<b>6053681</b>	
Status: Existing Initial Year: 2016 District 5 Location: SR70 @ I-75 Interchange, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Mike Sturm</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Other Need</b>

**Scope**

Relocate existing wastewater mains and facilities along SR70 at the I-75 interchange. Add 12" water main at Ranch Lake Boulevard for future looping of water main to improve distribution system and bypass existing private water main system. Relocations include the addition of protective concrete pads over mains, addition of split steel casings around water transmission mains, and relocation and/or extensions of water lines to right-of-way lines for future extensions.

**Rationale**

Utility relocations are part of the FDOT SR70 - I-75 Interchange Improvement project.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Cortez Road DIW Booster Station</b>
<b>Wastewater Treatment</b>	<b>WW01410</b>	
Status: Existing Initial Year: 2020 District 3 Location: 11900 Cortez Rd. W., Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Other Need</b>

**Scope**

Install booster station with redundant pumps to deliver maximum flow at maximum pressure. Booster station will be dedicated to the Cortez Road DIW in close proximity to the well head. Appurtenances will be included such as flow metering, pressure monitoring, and telemetry for SCADA control to be modified and augmented at the SWWRF. Well head shall be improved per SWWRF Recharge well design.

**Rationale**

Reclaimed water disposal may be increased in the rainy season, and maintenance events such as well acidation may be minimized. With more reliable reclaimed water disposal, may be able to dispose of less reclaimed water as it will be less risky to maintain higher inventories.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Manatee Agricultural Reclaimed System Chlorination at Southwest Water Reclamation Facility</b>
<b>Wastewater Treatment</b>	<b>6082190</b>	
Status: Existing Initial Year: 2015 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Install a sodium hypochlorite storage and feed system to chlorinate water supplied from the existing 10 million gallon storage tanks to MARS. This should include storage tank with containment, feed pumps, chlorine residual monitoring and control, roof-over, truck unloading, eyewash and any other necessary appurtenances. The system is to operate automatically and be programmed in to SCADA.

**Rationale**

After the second reclaimed water storage tank is added all MARS water will flow through the storage tanks prior to entering the MARS system, allowing for possible chlorine dissipation. Chlorination is necessary to minimize biological growth in the MARS distribution system and prevent possible fouling and odor issues.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>Manatee Agricultural Reuse Supply - Management</b>
<b>Wastewater Treatment</b>	<b>6082091</b>	<b>Improvements</b>
Status: Existing Initial Year: 2014 Countywide Location: Countywide		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Installation of meters between services areas, control valves for remote operation and redirection of flow, adding telemetry and control at the water reclamation facilities and Manatee Agricultural Reuse Supply (MARS) pump stations. Develop a central Supervisory Control and Data Acquisition (SCADA) control network to operate MARS independent of plant operations.

**Rationale**

Currently, MARS system's master meters do not provide adequate detail for tracking flows within or between the service areas. This project will build on the existing MARS and SCADA systems to improve reporting of reclaimed water usage and will provide the county with the ability to remotely manage and monitor the reclaim water system independent of plant operations.

<b>Wastewater</b>	Project#	<b>NWRF 10MG Reclaimed Water Storage Tank and High Service Pump Station</b>
<b>Wastewater Treatment</b>	<b>WW01422</b>	

Status: Existing Initial Year: 2021 District 1 Location: 8500 69th St. E., Palmetto

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Other Need**

**Scope**

Install new 10 MG reclaimed water storage tank with a high service pump station (HSPS) to feed the Manatee Reuse System (MRS) and plant reuse water from the new tank/pump station. Conversion of the existing effluent pump station to a low pressure transfer station to feed effluent to the storage lakes and new tanks. Project shall include necessary appurtenances, including valves, piping EI&C and SCADA programming modifications and additions. Demolition of old tank and grouting and/or removal of old piping also included.

**Project Map**

**Rationale**

Existing 0.75 MG storage tank is in poor condition and the size is not adequate for the flows currently experienced and projected for the future in the North service area. The existing effluent pump station currently does not produce enough head at times to supply MRS adequately. The new tank and HSPS will allow for better supply of MRS, and provide a potential energy savings.

<b>Wastewater</b>	Project#	<b>NWRF 4th Belt Filter Press &amp; BFP Automation</b>
<b>Wastewater Treatment</b>	<b>WW01244</b>	
Status: Existing Initial Year: 2019 District 1 Location: 8500 69th Street East, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Install a fourth belt filter press (BFP), associated catwalk, two additional polymer and sludge feed pumps, one additional polymer mixing tank, and all other required appurtenances. Rehab the existing sludge conveyor and truck load-out system, and modify to accommodate the new BFP. Rehab existing BFP's and replace power, instrumentation and controls to facilitate automatic operations. Install cameras to monitor BFP's, conveyors and truck load-out areas from the Administration Building control room, and include SCADA programming for monitoring and control.

**Rationale**

Sludge production is increasing at the NWRF. This addition will enhance system redundancy to facilitate proper preventive maintenance and shorten down time. Sludge trailers will be able to filled faster, enhancing dryer/landfill logistics.

<b>Wastewater</b>	Project#	<b>NWRF Class I Deep Injection Well</b>
<b>Wastewater Treatment</b>	<b>6079480</b>	
Status: Existing Initial Year: 2010 District 1 Location: Buffalo Creek Golf Course - Erie Road, Parrish		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Tony Russo</b>
CIE Project: <b>Yes</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Growth</b>

**Scope**

Construction of a Class I Deep Injection Well system for the disposal of excess reclaimed water during wet weather seasons, and for brine concentrate from the future Reverse Osmosis facility. Includes permitting, design, and construction of injection wells and associated monitoring wells, piping, valves, flow meters, and connection to existing Supervisory Control and Data Acquisition (SCADA) system, and all other required appurtenances.

**Rationale**

During wet weather seasons, supply of reclaimed water exceeds demand. Without additional disposal options during these circumstances, unauthorized discharge to surface bodies of water is the only strategy that can be utilized to avoid damage to existing infrastructure (lake berms, etc.). Unauthorized discharges put the county at risk for enforcement actions by regulatory agencies that can include consent orders, fines, etc.

<b>Wastewater</b>	Project#	<b>NWRF Equalization Tank</b>
<b>Wastewater Treatment</b>	<b>6088490</b>	

Status: Existing Initial Year: 2014 District 1 Location: Buffalo Creek Golf Course - Erie Road, Parrish

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Engineer, design, specify and construct a 3 Million Gallon (MG) equalization tank to regulate inflows. The project will include a 3 MG tank with piping, valves, return pumps, mixing system, level control, odor control system, SCADA, and platform with stairway. To accomplish the construction, the electrical services currently in the old headworks will be relocated to a new motor control center. The project will also include demolition of the existing headworks structure and yard piping modifications to existing piping.

**Project Map**

**Rationale**

The project will provide a balanced inflow throughout a 24 hour day. The benefit of a balanced flow is stabilization of the process through the plant operation over a 24 hour period. With a stabilized flow, the plant will be able to consistently meet permitted regulatory compliance obligations and provide cost savings on electric usage and bleach consumption. The stabilized flow will provide for a consistent pressure and volume of reuse water sent to the MARS system. The demolition of the old headworks has to be accomplished to place the tank in an advantageous location to the existing influent lines. The old headworks currently serves as a junction box for the existing electric for the area, necessitating the relocation of these electric components to a new motor control center.

<b>Wastewater</b>	Project#	<b>NWRF Headworks Second Grit Removal System</b>
<b>Wastewater Treatment</b>	<b>6091380</b>	
Status: Existing Initial Year: 2018 District 1 Location: 8500 69th Street East, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Add second grit removal unit, grit pumps, slurry cup, and grit snail to match existing equipment. Provide all gates, liners, and piping needed to complete second independent system and install all electrical panels and SCADA connections to match first system. Provide additional mechanical slide gates to isolate north and south flow.	
<b>Rationale</b>	
Second grit removal system needed to comply with Class 1 Reliability and System Redundancy standards. The second system will facilitate repairs and preventive maintenance of each system, and will eliminate time when the facility is without grit removal capabilities. Slide gates are needed for continued operations during maintenance shutdown.

<b>Wastewater</b>	Project#	<b>NWRF Reclaimed Water Storage Lake Improvements</b>
<b>Wastewater Treatment</b>	<b>WW01421</b>	
Status: Existing Initial Year: 2020 District 1 Location: 8500 69th St E., Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Reduce slope to 3:1 where necessary on golf course lake. Remove the peninsula in the golf course lake and level berm to a slightly higher elevation than the wetlands south of the lake. Install outfall structures capable of metering and discharging adequate volumes to maintain berm safety during a storm on both golf course and east lakes. Upgrade existing emergency outfall structure and include manual slide gates for better flow control.

**Rationale**

A 3:1 slope has been determined to be the optimum erosion in lakes. Leveling the berm and removing the peninsula in the golf course lake will increase reclaimed water storage capacity, which is needed to support system growth.

<b>Wastewater</b>	Project#	<b>NWRF Secondary Clarifier 1 &amp; 2 Refurbishment</b>
<b>Wastewater Treatment</b>	<b>6091480</b>	
Status: Existing Initial Year: 2018 District 1 Location: 8500 69th Street East, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Secondary Clarifiers #1 & #2 need to be resealed and grouted, and the drive units and rakes replaced. Launderers will structural repair and replacement of "V" notch weirs. Replace inlet and slide gates, and gate control mechanisms. Repair existing suction tubes, and upgrade ducking skimmers, control panels and alarm controls to SCADA standards as needed. Replace existing scum ejection system with progressing cavity pump system and install a system to intercept scum from the secondary clarifiers and separate "rags" from liquids.	
<b>Rationale</b>	
Clarifiers have been in service since 1987 and internal parts are failing, and replacement parts are no longer available. Clarifiers are structurally sound but all mechanical parts are corroded and in need of replacement. Parts of rakes are missing and there is a hydraulic short circuit at the weir baffles and launders. Scum ejector system does not work, and replacement parts are no longer available.

<b>Wastewater</b>	Project#	<b>NWRF Sludge Holding Improvements</b>
<b>Wastewater Treatment</b>	<b>6050581</b>	

Status: Existing Initial Year: 2013 District 1 Location: Buffalo Creek Golf Course - Erie Road, Parrish

**Comprehensive Plan Information** Project Mgr: **Tony Russo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Removal of the existing two steel holding tanks, centrifugal blowers and air piping and replace with two glass lined steel tanks with decant manifolds, two new gravity belt thickeners and jet aeration systems.

**Project Map**

**Rationale**

One tank was replaced with a new glass lined steel sludge digestion tank with a decant manifold and fine bubble aeration through a previous CIP. The remaining two steel tanks, sludge pumps and air lines have degraded and are in need of significant repairs or replacement. The new tanks will provide greater operational flexibility and control over the sludge holding process and will be compatible with the sludge requirements for processing Type A biosolids at the dryer facility. Once this project is complete, the sludge digestion will be re-designated as sludge holding as digestion will no longer be necessary at this facility. The sludge holding system was predicated by our transition to processing sludge at the dryer facility within the confines of the current Florida Department of Environmental Protection permit.

<b>Wastewater</b>	Project#	<b>NWRF South Chlorine Contact Chamber Refurbishment</b>
<b>Wastewater Treatment</b>	<b>6091580</b>	
Status: Existing Initial Year: 2018 District 1 Location: 8500 69th Street East, Palmetto		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Rehab the South Chlorine Contact Chamber including replacement of expansion strips and new seal coat. Replace inlet and slide gates and install isolation valve on 36" line. Replace inlet gates on North Chlorine Contact Chamber as the existing gates are too short, which allows water to flow over the top of the inlet gates. Replace existing blowers and aerators for mixing of Chlorine Contact Chambers and add fiberglass cover.	
<b>Rationale</b>	
Without isolation valve and working gates to the South Chlorine Contact Chamber, we cannot stop flow during high flows or when switching Contact Chambers during reject events. Without isolation, cleaning of contaminated chamber after reject event is nearly impossible. Class 1 reliability and system redundancy is required, and reject protocol is mandated. Replacement of inlet gates will allow for isolation of Chlorine Contact Chambers #3 & #4.

<b>Wastewater</b>	Project#	<b>SEWRF 10 Million Gallon Storage Tanks and Interconnection</b>
<b>Wastewater Treatment</b>	<b>6084880</b>	

Status: Existing Initial Year: 2013 District 5 Location: SR 64 - Lena Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Anthony Benitez**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Construction of one 10 million gallon reclaimed water ground storage tank, a high service reclaimed water pump station, and an interconnection between the Southeast Water Reclamation Facility reclaimed lakes and the Manatee Agricultural Reuse Supply (MARS) transmission line. Converting existing high service pump station to a transfer pump station.

**Project Map**

**Rationale**

With the integration of the MARS reclaimed water system, management of the reclaimed water has dynamically changed. Currently the operations staff is having difficulty meeting peak reclaimed water demands due to their inability to return lake water quickly enough to meet peak demands. This will be resolved in part by installing back pressure sustaining valves on the supply lines to control system pressure. The lake filtration project will improve lake water supply, but it is still necessary to have sufficient ground storage capacity to meet peak diurnal demands. This project will save energy costs by reducing the operating pressure of the onsite reclaimed water system and will provide the county the ability to transfer reclaimed water from one facility to another.

<b>Wastewater</b>	Project#	<b>SEWRF Anoxic Basin Mixer Replacement</b>
<b>Wastewater Treatment</b>	<b>WW01417</b>	
Status: Existing Initial Year: 2020 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Remove and replace existing anoxic basin mixers in Basins 1, 2, & 3 (6 total) with OVIVO mixers, including new power cables and breakers. Perform structural inspection of Basin 3 to determine necessary repairs or modifications. Replace existing fiberglass cover and liquor gate on Basin 3, and replace the sluice gates on Basins 1 & 2 and weir gates at the influent splitter box.

**Rationale**

Mixers have reached the end of their useful life and are in need of replacement. The NWRF recently replaced with OVIVO mixers and are working well, and the similar equipment at the SEWRF would improve continuity between the facilities and allow sharing of spare parts and knowledge. Basin 3 cover and gates are deteriorated and in need of replacement.

<b>Wastewater</b>	Project#	<b>SEWRF Automatic Backwash Filter Refurbishment</b>
<b>Wastewater Treatment</b>	<b>WW01418</b>	
Status: Existing Initial Year: 2020 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Removal and replacement of filter media, washwater troughs, porous plates and air diffusers for automatic backwash filter #3 & #4.

**Rationale**

Filter media should be replaced every 3-5 years in order for the material to be effective in reducing the turbidity level to an acceptable level. The underdrain porous plates, washwater troughs and air scour diffusers are in need of replacement as they are deteriorating to the point of affecting the efficiency and performance of the filters.

<b>Wastewater</b>	Project#	<b>SEWRF Dedicated Plant Drain Station</b>
<b>Wastewater Treatment</b>	<b>6092080</b>	
Status: Existing Initial Year: 2018 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Construct dedicated plant drain station for receiving cooling water from dryer facility and route water to plant headworks or EQ tank. Connect south plant drain station with north plant drain station by gravity and upgrade south plant drain station with higher capacity pumps. Install necessary SCADA connections and programming.

**Rationale**

Peak flows would be balanced, and added capability of processing water for entire plant if pumping capabilities are lost at one station.

**Funding Strategy**

<b>Wastewater</b>	Project#	<b>SEWRF Equalization Tank/Splitter Box Rehab</b>
<b>Wastewater Treatment</b>	<b>WW01625</b>	
Status: Requested Initial Year: 2021 District 5 Location: SR 64 - Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Replace all submersible pumps, including feed wire and controls. Install hoist for removing pumps and replace isolation valves. Clean and remove debris from both EQ tanks, inspect and repair as necessary. Clean and remove debris from submersible pump location. paint exterior walls on tanks and boxes, and replace all odor control piping. Upgrade lighting to LED's and redesign and replace the existing piping downstream of the headworks to increase hydraulic capacity.

**Rationale**

Equipment is due for replacement and debris has accumulated in the tanks and splitter box and needs to be removed. The current pump hoist has failed and is no longer in service. Hydraulic analysis has shown that existing headworks piping is undersized to accommodate future wastewater flows.

<b>Wastewater</b>	Project#	<b>SEWRF Headworks Rehabilitation</b>
<b>Wastewater Treatment</b>	<b>6083380</b>	
Status: Existing Initial Year: 2013 District 5 Location: SR 64 - Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Design and rehabilitate the headworks at the Southeast Water Reclamation Facility (SEWRF) to include a new grit system, a structural repair of the concrete channels including a concrete sealing application, replacement of the existing bar screens with new technology bar screens and rehabilitation of the current piping. Remove and relocate the existing electrical system to the existing motor control center (MCC).

**Rationale**

The existing headworks is approximately 23 years old. All of the influent coming into the plant is processed through this concrete and mechanical structure and influent water is a highly corrosive environment for both. Sections of the concrete structure and existing equipment are in need of rehabilitation and replacement. The corrosive atmosphere in the headworks building has corroded the electrical components necessitating their replacement. To avoid future problems with the new switchgear, the components will be moved to a less corrosive environment.

<b>Wastewater</b>	Project#	<b>SEWRF Internal Recycle Pumps</b>
<b>Wastewater Treatment</b>	<b>6083580</b>	

Status: Existing Initial Year: 2013 District 5 Location: SR 64 - Lena Road, Bradenton

**Comprehensive Plan Information**

Project Mgr: **William Lorenzo**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Construction of a new internal recycle pump station and aeration control system to include removal of the valve and piping inside the existing oxidation ditches, installation of a new isolation valve outside of the tank, installation of new internal recycle pumps and piping, and system programming to control the aerator speed.

**Project Map**

**Rationale**

The existing internal recycle pump and valve system predates the 2000 Southeast Water Reclamation Facility (SEWRF) expansion. The age and configuration of the system is resulting in operational issues with consequential increased maintenance costs. The SEWRF is replacing these pumps in the same configuration as being completed at the North Water Reclamation Facility to resolve these issues and to move the isolation valve outside the tank. The replacement of this system will result in better internal return flows, improved nitrogen removal and improved ability to maintain the equipment.

<b>Wastewater</b>	Project#	<b>SEWRF RAS &amp; WAS System Upgrade</b>
<b>Wastewater Treatment</b>	<b>6092180</b>	
Status: Existing Initial Year: 2018 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Replace three return activated sludge pumps, motors, and variable frequency drives, replace all piping, valves, and add piping interconnections with plant water system to provide capability to flush all three pumps with reclaim water. Construct scum removal system to remove solid debris. Remove sludge ejectors, compressors, pneumatic controls and piping and replace with slide gates equipped with electric actuators at the mixed liquor splitterbox; all to comply with SCADA work.	
<b>Rationale</b>	
System piping, valves, pumps and motors have deteriorated over time and are in need of replacement. Replacement will ensure a reliable system for wasting and returning the process stream. Scum removal system is necessary to eliminate floatable objects which could impact pump operations, sludge holding tanks, and sludge dryer operations.

<b>Wastewater</b>	Project#	<b>SEWRF Septage Receiving Station</b>
<b>Wastewater Treatment</b>	<b>6083480</b>	
Status: Existing Initial Year: 2013 District 5 Location: SR 64 & Lena Road		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>William Lorenzo</b>
CIE Project: <b>No</b> LOS/Concurrency: <b>No</b> Plan Reference:		Project Need: <b>Maintenance</b>

**Scope**

Construction of an automated septage receiving station to include an access terminal that would allow customers to deliver septage at an unmanned holding system using an access card to grant admittance, process charges, and record flows. Specific equipment would include septage conditioning tanks, a vacuum drum, dewatering system, ventilation system, piping, electrical, instrumentation and control work.

**Rationale**

The current practice is to receive privately transported shipments of septage at the Southeast Water Reclamation Facility, mix the septage with mulch and deposit it in the county landfill. This process is a labor intensive operation, performed outdoors and is a source of odors. The proposed septage process is fully automated, does not emit odors and will reduce processing labor.

<b>Wastewater</b>	Project#	<b>SEWRF Slide &amp; Sluice Gates Replacement</b>
<b>Wastewater Treatment</b>	<b>WW01416</b>	
Status: Existing Initial Year: 2020 District 5 Location: 3331 Lena Road, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference: _____ Project Need: <b>Maintenance</b>

**Scope**

Removal and replacement of sluice and slide gates, including actuators and handles, at the chlorine contact basins and mixing flocculation basins. Replace existing blowers and aerators and add fiberglass covers. Provide carrier pipe or concrete conduit system for protection of underground PVC chlorine feed lines.

**Rationale**

Gates have reached the end of their useful life and are in need of replacement. The gates are necessary to allow operations to direct the flow of water to the appropriate system for treatment. Gates are critical to the operation and require ongoing maintenance.

<b>Wastewater</b>	Project#	<b>SWWRF Automatic Backwash Filter Rehabilitation</b>
<b>Wastewater Treatment</b>	<b>6016681</b>	
Status: Existing Initial Year: 2014 District 3 Location: 66th Street - 53rd Avenue West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Remove the existing filter media, inspect the under drains, rails and bridge equipment, make necessary repairs, replace the media plates and fill the filter basins with new media.

**Rationale**

The lake water returned from the reclaimed storage ponds to the existing automatic backwash filters contains high concentrations of algae and solids resulting in particulate breakthrough reducing filter performance and shortening the life span of the filter media. During this maintenance operation when the filter basins are empty, it is beneficial to inspect and repair the media grating, the traveling bridge rails and the mechanical bridge equipment. Without regular maintenance the mechanical equipment loses calibration, resulting in greater or emergency repair costs.

<b>Wastewater</b>	Project#	<b>SWWRF Belt Filter Press Electrical Rehabilitation &amp; Monitoring</b>
<b>Wastewater Treatment</b>	<b>6091680</b>	
Status: Existing Initial Year: 2018 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Rehabilitate one existing belt filter press (BFP) and replace one existing BFP and polymer feed system. Modify and rehabilitate the existing sludge conveyor and truck load-out system (at least two points of load out for second truck position). Replace the electrics, instrumentation and controls on five BFP's to facilitate automatic operation. Install cameras to visually monitor BFP's, conveyors, and truck load out from the Administration Building control room. Replace BFP feed pumps and drives and improve sludge transfer pump piping, replacing pumps as needed. Improvements include SCADA programming for control and monitoring. Demolish existing equipment as necessary.

**Rationale**  
 Sludge production is increasing at the Southwest plant. This project will enhance system reliability and shorten down time. Sludge trailers will be able to be filled faster, enhancing dryer/landfill logistics. Replacement will decrease maintenance and improve reliability.

<b>Wastewater</b>	Project#	<b>SWWRF Bleach Tank Roofover</b>
<b>Wastewater Treatment</b>	<b>WW01256</b>	
Status: Existing Initial Year: 2018 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
Build a structure that will cover five bleach (sodium hypochlorite) storage tanks to limit exposure to sunlight and weather. Also includes installation of spill/tank containment a safety eyewash/shower (with flow alarm to SCADA), hose bibs, lighting and other necessary appurtenances and relocation of existing pumps. SCADA programming for monitoring and control shall be included.	
<b>Rationale</b>	
UV light/sunlight degrades bleach, which degrades disinfection capabilities. It also degrades tank materials, which can cause leaks. Additionally, containment needs to be added to minimize operational risk with the Modified Ludzack-Ettinger (MLE) process change.	
<b>Funding Strategy</b>

<b>Wastewater</b>	Project#	<b>SWWRF Chlorine Contact Chamber Rehab &amp; DIW Booster Station</b>
<b>Wastewater Treatment</b>	<b>6091780</b>	

Status: Existing Initial Year: 2018 District 3 Location: 11900 Cortez Road West, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Install booster station with redundant pumps to deliver maximum flow at maximum pressure as permitted. All appurtenances are to be included such as flow metering, pressure monitoring, SCADA telemetry/control, and surge valve control. Baffles or piping shall be added to stop lake water from short circuiting to the well. Remove old, unused gates and replace Chlorine Contact Chamber influent and effluent gates. Eliminate bypass channel and install pump system to drain Chlorine Contact Chambers for cleaning and maintenance. Inspect structures and walkways and repair as required. Build new Motor Control Center and Chlorine Contact Chamber mixing blower building close to the CCC/wetwell and demolish old buildings.

**Project Map**

**Rationale**

Reclaimed water disposal may be increased in the rainy season. Maintenance events such as well acidation may be minimized. With more reliable reclaimed water disposal, may be able to dispose of less reclaimed water as it will be less risky to maintain higher inventories. Energy savings may occur due to not maintaining the whole reclaimed water system to a high pressure water disposal.

<b>Wastewater</b>	Project#	<b>SWWRF Class V Recharge Well &amp; Aquifer Storage Recovery Well</b>
<b>Wastewater Treatment</b>	<b>6069081</b>	

Status: Existing Initial Year: 2014 District 3 Location: 5101 65th Street West, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Anthony Benitez**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Growth**

**Scope**

Construction of a Class V recharge well (+/- 1,200 feet) at the SWWRF to add additional wet weather disposal and to operate in conjunction with the existing Aquifer Storage Recovery (ASR) well at the SWWRF. Includes permitting, design, and construction of recharge well, associated monitoring wells, piping, valves, flow meters, SCADA telemetry and other required appurtenances. To also include necessary replacement piping for ASR well, new piping to accommodate existing infrastructure, valves, meters and SCADA telemetry.

**Project Map**

**Rationale**

This well will provide additional wet weather disposal capacity of up to 10 MGD, that will assist in avoiding unauthorized discharges during wet weather season. The well, operating in conjunction with the existing ASR well, will also improve management of the reclaimed water system.

<b>Wastewater</b>	Project#	<b>SWWRF Electrical Distribution System Rehab/Enhancement</b>
<b>Wastewater Treatment</b>	<b>WW01370</b>	

Status: Existing Initial Year: 2019 District 3 Location: 5101 65th Street West, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Replace/upgrade electrical distribution components to include air conditioning for electrical rooms, remove substations 1, 2, 9 & 10 replace motor control centers E1 & E2, replace switchboards 11 & 12, and replace main 5 kV switch gear, wiring, breakers and controls.

**Project Map**

**Rationale**

Much of the equipment at the SWWRF is more than 25 years old, some is obsolete, and most is nearing the end of it's useful life. Each of these factors make the whole system inefficient and unreliable, and this rehabilitation will increase the safety and productivity at the SWWRF.

<b>Wastewater</b>	Project#	<b>SWWRF Equalization System Rehabilitation &amp; Cover Addition</b>
<b>Wastewater Treatment</b>	<b>WW01254</b>	

Status: Existing Initial Year: 2019 District 3 Location: 5101 65th Street West, Bradenton

**Comprehensive Plan Information**

Project Mgr: **Jeff Streitmatter**

CIE Project: **No** LOS/Concurrency: **No** Plan Reference: Project Need: **Maintenance**

**Scope**

Install a permanent cover over the existing flow equalization (FEQ) tank and add jet aeration mixing to keep solids in suspension. Rehabilitate the existing return pump station including replacement of pumps, guide rails, piping and control panels, and reline the wet well if necessary. Structural inspection of the tank shall be performed and necessary repairs made, SCADA programming and appurtenances for ventilation/odor control included. New transformer and Motor Control Center will power existing and new loads.

**Project Map**

**Rationale**

The current FEQ cover has issues keeping the cover clear of vegetation and settling solids. The FEQ receives and stores raw influent during the day and returns it to the plant at night to equalize the incoming flow. The WRF receives odor complaints from the surrounding community and golf course. The installation of a permanent cover and odor control system would greatly reduce the odor. A mixing system is required to keep solids from settling in the tank which makes it easier to pump them back to the plant. The wet well for the pump station was modified for prior construction causing one of the pumps to be blocked from retrieval or repair, also the structure and discharge piping has been in constant use for over 25 years and may need to be upgraded or replaced.

<b>Wastewater</b>	Project#	<b>SWWRF New Headworks</b>
<b>Wastewater Treatment</b>	<b>6083381</b>	
Status: Existing Initial Year: 2017 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

<b>Scope</b>	<b>Project Map</b>
--------------	--------------------

Demolish old headworks, and construct a new headworks including piping, flow meters, mechanical screens, grit removal, scum screening/pumping, and odor control. Size grit removal system to handle peak grit loads during heavy rain events. Include an influent sampling system to eliminate side stream influences and allow sample collection without fouling the intake. Provide pH and temperature analyzers, and construct new MCC and SCADA panels at remote area from H2S gas. This includes new 5kV feeders for the aeration blowers and intercepting the 5kV feeders at the existing area and extending to the transformers for the anoxic basins.

**Rationale**

The headworks structure is over 25 years old and deteriorating due to concrete corrosion by hydrogen sulfide and water intrusion. The grit system is undersized and becomes clogged during heavy rain. Scum requires screening to remove floatable objects and prevent fouling of jet aeration mixing system in sludge holding tanks. Power for the headworks may be interconnected with electrical equipment at the anoxic basins electrical room.

<b>Wastewater</b>	Project#	<b>SWWRF Process Modifications for Nitrogen Removal</b>
<b>Wastewater Treatment</b>	<b>6079080</b>	
Status: Existing Initial Year: 2011 District 3 Location: 66th Street & 53rd Avenue West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Anthony Benitez</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Retrofitting primary clarifiers to an anoxic zone and introduction of an internal recirculation pumping system for return of nitrifying bacteria to the anoxic zone and ancillary improvements. Structural modifications, gates, piping, valves, electrical and automation to control the internal recycle return rate.

**Rationale**

The Florida Department of Environmental Protection (FDEP) has expressed concern over the conventional activated sludge process (Ammonia Process) at the Southwest Water Reclamation Facility and based on conversation with the FDEP it is anticipated they will impose nitrogen limits on the facility in the near future. Implementing an Advanced Activated Sludge process (Modified-Ludzak Ettinger or MLE) similar to the other facilities will enhance nitrogen removal and have the side benefit of minimizing the algae food source going to the wet weather storage ponds helping to reduce algae production and improving the reclaimed water quality.

<b>Wastewater</b>	Project#	<b>SWWRF Second Cloth Filter</b>
<b>Wastewater Treatment</b>	<b>WW01423</b>	
Status: Existing Initial Year: 2020 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>Yes</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Convert one existing sand filter to a cloth filter. This will include demolition of the existing sand filter components, installation of the equipment needed for the new cloth filter, and any modifications in piping and channels to ensure proper distribution of water between filters and chlorine contact chambers. SCADA modifications will be included. Provide canopy over Automatic Back Wash filters including hoists and trolleys for removal of filter equipment.

**Rationale**

Adding a cloth filter will increase total filter capacity and help maintain class one reliability.

<b>Wastewater</b>	Project#	<b>SWWRF Stormwater System Rehabilitation</b>
<b>Wastewater Treatment</b>	<b>WW01627</b>	
Status: Requested Initial Year: 2021 District 3 Location: 5101 65th Street West, Bradenton		
<b>Comprehensive Plan Information</b>		Project Mgr: <b>Jeff Streitmatter</b>
CIE Project: <b>No</b>	LOS/Concurrency: <b>No</b>	Plan Reference:
		Project Need: <b>Maintenance</b>

**Scope**

Re-establish plant yard and swales to historical grades per new design to convey stormwater for treatment and/or conveyance off-site. Re-establish pond volumes, littoral zones and banks to permit conditions. Eliminate ponding in roads, yard, and parking lots. Inspect North Lake toe drain and repair as necessary.

**Rationale**

Rehabilitation of stormwater system is necessary to maintain necessary operational and regulatory levels, especially during summer weather events.

# Manatee County

## FY18 – FY22 Capital Improvement Program

### Glossary of Terms

#### **Appropriation**

Legal authorization given by the County Commission to make expenditures and incur obligations using county funds.

#### **Arterial Road**

A route providing service which is relatively continuous and of relatively high traffic volume, long average trip length, high operating speed and high mobility importance. The primary purpose of arterials is to provide service to major traffic movements; access to abutting property is a subordinate purpose.

#### **Beginning Fund Balance**

The Ending Fund Balance of the previous period. (See Ending Fund Balance)

#### **Bond**

Written evidence of the issuer's obligation to repay a specified principal amount on a certain date (maturity date), together with interest at a stated rate, or according to a formula for determining that rate. Bonds are sometimes used as a source of financing for large scale or expensive projects to allow projects to proceed rather than wait until the funds can be accumulated.

#### **Capital Budget**

Financial plan of capital project expenditures for the fiscal year beginning October 1. It incorporates anticipated revenues and appropriations included in the first year of the five year Capital Improvement Program (CIP), and any anticipated unspent appropriation balances from the previous fiscal year. The capital budget is adopted by the Board of county Commissioners as a part of the annual county budget.

#### **Capital Improvement**

Physical assets constructed or purchased to provide, improve or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally nonrecurring and may require multi-year financing. Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements.

#### **Capital Improvement Element (CIE)**

The Capital Improvement Element of the Comprehensive Plan identifies projects and financing for projects that are required to provide services to the areas of the county where growth is occurring in order to maintain levels of service that are required by the Comprehensive Plan.

#### **Capital Improvement Program (CIP)**

A proposed plan, covering each year of a fixed period of years, for financing long-term work projects that lead to the physical development of county infrastructure. Manatee County develops a five year CIP.

# Manatee County

## FY18 – FY22 Capital Improvement Program

### Glossary of Terms

**Capital Project**

A non-recurring expenditure of \$250,000 or more for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

**Capitalized**

Term used to classify assets which have a useful life greater than one reporting period.

**Comprehensive Plan**

A document adopted by the Board of County Commissioners that sets forth goals, objectives and policies for future land use, and establishes level of service standards that will be needed to meet the infrastructure needs of the county.

**Collector Road**

A route providing service which is of relatively moderate average traffic volume, moderately average trip length, and moderately average operating speed. Traffic movement is a priority but there is a higher degree of land access than with an arterial road, allowing such a route to collect and distribute traffic between local roads or arterial roads and serve as a linkage between land access and mobility needs.

**Concurrency**

Level of service that is required to meet the specified level of service required by the Comprehensive Plan.

**Contingency Funds**

Monies set aside, consistent with statutory authority, which subsequently can be appropriated to meet unexpected needs.

**Community Redevelopment Areas (CRAs)**

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Tax Increment Funds (TIFs).

**Current Year Appropriation**

The current year adopted budget adjusted to reflect any budget amendments done during the current fiscal year.

**Debt Service**

Payment of interest and principal on an obligation resulting from the issuance of bonds.

**Deficit**

Excess of expenditures over revenues.

# Manatee County

## FY18 – FY22 Capital Improvement Program

### Glossary of Terms

**Department**

Manatee County's organizational structure groups programs or divisions into departments by functional similarities. Departments report to the County Administrator.

**Designated Funds**

Funds that are set apart for a specific purpose to fund on-going or one-time expenditures. Examples are bond proceeds, reserves or "pay-as-you-go" reserves for future facility renewal and replacement projects found mostly in the Enterprise Funds.

**Division**

Divisions are the units of government which provide services directly to the public and other agencies. Divisions are organized within departments by functional similarity.

**Ending Fund Balance**

Funds carried over at the end of the fiscal year. Within the fund, the revenue on hand at the beginning of the fiscal year, plus revenues received during the year, less expenses equals ending fund balance. The Ending Fund Balance becomes the Beginning Fund Balance in the next fiscal year.

**Enterprise Fund**

A fund which pays for its cost of operations from user fees and does not generally receive property tax or general revenue support. County Enterprise Funds include Manatee County Public Utilities, Landfill, Golf Course, Civic Center, Port Authority, Stormwater Utilities, and Mass Transit.

**Expenditure**

Decrease in net financial resources. Expenditures include current operating expenses which require the current or future use of net current assets, debt service and capital outlay.

**Fiscal Year**

A twelve-month period (October 1 through September 30) at the beginning of which the county implements a new budget based on expected revenues and expenditures, and at the end of which the county determines its financial position and the results of its operations.

**Fixed Assets**

Accounting classification of assets such as property, plant, and equipment which are capitalized.

**Fund**

A self-balancing set of accounts designated and accounted for separately for the purpose of restricting specific revenues that are then spent for specific activities.

# Manatee County

## FY18 – FY22 Capital Improvement Program

### Glossary of Terms

#### **Fund Balance**

Amount available within a fund at the close of a fiscal period which can be carried over as non-recurring revenue for the upcoming fiscal period.

#### **Funding Sources**

Type or origination of funds to finance ongoing or one-time expenditures. Examples of CIP funding sources include, but are limited to, user fees, general revenues, gas taxes, grants, impact fees, contributions and bonds.

#### **Generally Accepted Accounting Principles (GAAP)**

Uniform minimum standards and guidelines for financial accounting and reporting as authorized by the Governmental Accounting Standards Board (GASB). The standards and guidelines include details practices and procedures and broad guidelines of general application.

#### **General Revenue**

The revenues of a government other than those derived from and retained in a proprietary, special revenue, or trust and agency fund. In Manatee County, the majority of general revenues come from ad valorem taxes.

#### **Governmental Funds**

Funds used to account for the acquisition, use and balances of expendable financial resources and the related current liabilities – except those accounted for in proprietary funds and fiduciary funds.

#### **Impact Fees**

Fees charged to developers and individuals to cover, in whole or part, the anticipated cost of improvements that will be necessary as a result of the development.

#### **Interfund Transfers**

Transfers of cash between funds without requirement for repayment.

#### **Intergovernmental Revenues**

Revenues received from other governments including the federal, state, and other local governmental entities.

#### **Level of Service**

An indicator of extent or degree of service which is, or will be, provided by a facility. Level of service standards, as used in the comprehensive plan, are targets or objective with which compliance is required. Levels of service are established using one or more infrastructure standards and may also include use of one or more performance standards.

# Manatee County FY18 – FY22 Capital Improvement Program Glossary of Terms

## **Local Road**

A roadway providing service which is of relatively low traffic volume, short average trip length or minimal through traffic movements and high volume land access for abutting property.

## **Mandate**

A requirement imposed by a legal act of the federal, state or local government.

## **Mass Transit**

Passenger services provided by public, private or non-profit entities such as the following surface transit modes: commuter rail, rapid rail transit, light rail transit, light guideway transit, express bus and local fixed route or demand-response bus.

## **Operating Budget Impacts**

Expenditures directly related to the cost of operating and/or maintaining the capital improvement upon completion of the project.

## **Paratransit**

Transit service, including ridesharing, car or van pools, demand responsive buses, and other public transit services, which are characterized by their nonscheduled, non-fixed route nature.

## **Personal Services Expenditures**

Expenditures for county employees including regular wages, overtime, contributions to the State Retirement System, Social Security, health and worker's compensation insurance premiums, and unemployment compensation costs.

## **Potable Water**

Water which is satisfactory for drinking, culinary, and domestic purposes and which meets the appropriate requirements of the Florida Department of Environmental Regulation.

## **Potable Water Facilities**

A system of structures designed, constructed or used to collect, treat or distribute potable water, which includes water wells, treatment plants, reservoirs, and distribution mains.

## **Preserve**

Resource based preserve operated by the county for the primary purpose of environmental preservation and public enjoyment of environmentally sensitive lands.

# Manatee County FY18 – FY22 Capital Improvement Program Glossary of Terms

**Prior Year Appropriation**

Includes funds budgeted for projects in prior years or through a budget amendment done during the current year prior to the date of the Proposed CIP.

**Project**

See Capital Project.

**Property (Ad Valorem) Taxes**

Revenue which is collected on the basis of a tax rate applied to the taxable valuation of real property.

**Proposed Budget**

The budget submitted by the County Administrator to the Board of County Commissioners within 15 days after the certification of the ad valorem tax roll by the Property Appraiser.

**Proprietary Fund**

A set of segregated revenue and expenditure accounts, set up for the purpose of showing net income, financial position, and changes in financial position. Enterprise funds and internal service funds are proprietary funds.

**Reserves**

Included in this category are funds required to meet both anticipated and unanticipated needs; the balance of anticipated earmarked revenues not required for operation in the budget year; those required to be set aside by bond covenants, and accumulated funds set aside to finance capital construction on a pay-as-you-go basis.

**Revenue**

Taxes, fees, charges, special assessments, grants, and other funds collected and received by the county to support the services provided.

**Right of Way**

Land in which the state, county or municipality owns the fee simple title or has an easement dedicated or required for a transportation, utility or other use.

**Solid Waste**

Sludge from a waste treatment works, water supply treatment plant or air pollution control facility; or garbage, rubbish, refuse or other discarded material, including solid, liquid semisolid, or contained gaseous material resulting from domestic, industrial, commercial, mining, agricultural or governmental operations.

# Manatee County

## FY18 – FY22 Capital Improvement Program

### Glossary of Terms

#### **Solid Waste Facilities**

Structures or systems designed for the collection, processing or disposal of solid wastes, including hazardous wastes, and which includes transfer stations, processing plants, recycling plants and disposal systems.

#### **Special Revenue Fund**

A fund used to account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

#### **Stormwater**

The flow of water which results from a rainfall event.

#### **Stormwater Runoff**

Portion of precipitation which is not passed into the soil by infiltration, evaporated into the atmosphere, or entrapped by small surface depressions and vegetation, and which flows over the land surface during, and for a short duration following any rainfall.

#### **Surplus**

Excess of revenues over expenditures.

#### **Taxes**

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. Does not include user fees or special assessments.

#### **Tax Increment Fund (TIF)**

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Community Redevelopment Areas (CRAs).

#### **Tourist Development Tax**

A tax collected on hotel rooms and other lodging rentals of six months or less. In Manatee County, one penny of the five cents collected is reserved for beach renourishment and beach improvement projects. Tourist tax monies other than this cent may be used for other tourist related projects or facilities.

#### **Transfer**

A movement of monies from one fund to another fund for the purpose of accurately accounting for expenditures. Transfers are expenditures to the fund they are being transferred from and revenues to the receiving fund. Because transfers are again budgeted as expenditures in the receiving fund, they are not included in the net budget to avoid counting the monies as expended twice.

**Manatee County**  
**FY18 – FY22 Capital Improvement Program**  
**Glossary of Terms**

**User Fees**

The payment of a fee for direct receipt of a public service by the person benefiting from the service.

**Unincorporated Municipal Services Taxing Unit**

Unincorporated areas within Manatee County are within the Unincorporated Municipal Services Taxing Unit. Residents of the district are assessed a millage rate by the county to provide services which would be provided by a municipality if the areas were incorporated.

**Voted Millage**

Property tax levies authorized by voters within a taxing authority. Bond issues that are backed by property taxes are a common form of voted millage in the State of Florida. Such issues are called general obligation bonds and may be used to finance large capital projects.
