Program Summary

The Manatee County Comprehensive Plan (Objective 10.1.6) requires Manatee County to develop a Capital Improvement Plan (CIP) that provides programming and funding of capital projects consistent with the goals, objectives and policies of the Comprehensive Plan and the Future Land Use Map, to maintain adopted level of service standards and to meet other public facility needs not dictated by level of service standards.

The Capital Improvement Plan meets this requirement by providing a planned and programmed approach to utilizing the County's financial resources in the most responsive and efficient manner to meet its infrastructure, equipment and facility needs. The CIP serves as a "blueprint" for the future of the community's growth and development. It highlights the importance of capital maintenance and replacement, so those needs are addressed in a timely and coordinated manner. The CIP provides a basis upon which the impact of new projects on future operating budgets can be determined. It is a dynamic tool, not a static accounting document. Under direction of the Financial Management Department, the CIP outlines an annual budget for the county's capital projects and a plan for the County's capital investments over the next five years. As defined by the Manatee County Comprehensive Plan, capital improvements include physical assets that are constructed or purchased to provide, improve, or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally non-recurring and may require multi-year financing. Physical

assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements. The review and revision of the CIP is consistent with the goals, objectives and policies of the Manatee County Comprehensive Plan.

The CIP differs from the Capital Improvement Element (CIE) of the Comprehensive Plan in that the CIE identifies projects and financing for projects that are required to provide services to areas of the county where growth is occurring, and in order to maintain levels of services that are required by the Comprehensive Plan. The CIP includes all capital projects, including many that are not related to service levels, such as fixing and maintaining infrastructure, regularly required by the Comprehensive Plan.

The administration of the five-year CIP and the revenue outlook establishes the guidelines for fiscal feasibility for any given project. The CIP identifies revenue sources for each planned project. Those projects for which revenues have not been identified are shown as projects of record. The CIP meets the debt financing policy requirements contained in the County's financial policies and integrates County government projects with state and other local governments when appropriate.

Manatee County's capital planning process begins each November. Departments provide capital project submissions which are reviewed and compiled into the

Recommended Budget. In the spring, the Recommended CIP is presented to the Board of County Commissioners in a public work session. After input from the community, the Board considers and adopts the five-year Capital Improvement Plan and a capital budget for the ensuing year is integrated into the annual budget which is adopted after two public hearings. The CIP lists each proposed capital project, the year it will commence, the amount to be spent on the project each year until completion and the proposed sources of funding. Amounts represented in the CIP are estimated project costs and are not intended to serve as precise project budgets. Projects are financed with a combination of utility rate revenues, local gas taxes, impact fees, federal and/or state grants, user fees and general revenues. It is the policy of the Board of County Commissioners that growth pays for itself to the greatest extent possible. The Clerk of Court requires project estimates to be fully funded prior to starting.

The CIP provides adequate time for capital projects to be planned and designed carefully before funding is appropriated and actual construction begins. This process allows professional staff to develop and review the required plans, engineering surveys, and architectural drawings and proceed with purchasing bids and specifications in a timely manner. The lack of a capital plan could result in inefficiencies in service provisions where development exceeds the ability of the government to meet infrastructure needs.

The capital improvement plan serves as a valuable financial tool. It can be used to forecast future capital demands on current revenues. A CIP that includes a forecast of financial resources available for capital purposes will allow public officials and staff to match those requirements. If expected revenues are not realized, the CIP process enables the county to reassess project priorities and either reduce capital spending in a rational manner or defer certain projects until more funding is available. The ability to amend the capital plan is particularly important when a significant portion of the capital budget is to be financed from current revenues. Implementation of the Capital Improvement Plan serves to enhance the quality of life for both present and future generations of Manatee County.

The FY24-28 Capital Improvement Plan (CIP) reflects \$2,189,456,681 of projects with activity within the five-year CIP and \$1,550,026,893 of projects already fully appropriated and underway for a total CIP of \$3,739,483,574. We have adjusted our CIP to identify two types of categories for our projects which are Governmental and Enterprise projects. To be reflective of the categories with our Infrastructure Sales Tax (IST) Projects, we have further subdivided the CIP projects categories similar to the IST projects. As a result, our CIP is divided into the following:

Governmental

Buildings and Renovations

General Government

- o Buildings and Renovations
- o Law Enforcement

General Government - Southwest Tax Increment Finance

Administration

1. Purpose and Intent

This section is established to provide for the applicability and effect of the Five-Year Capital Improvement Plan for the Manatee County Board of County Commissioners, and to set forth specific requirements and procedures related to the revision and update of the Capital Improvement Plan. It is the intent of this resolution that its prescriptive provisions shall be implemented, in part, through the completion of the Capital Improvement projects as described herein.

2. Applicability

The Five-Year Capital Improvement Plan shall apply to capital improvement and capital maintenance projects undertaken by the County of Manatee, Florida. For the purposes of this section, the term “capital improvement project” shall mean a non-recurring expenditure of \$250,000 or more from County funds for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

3. Review and Revision

Each year the Five-Year Capital Improvement Plan shall be updated by resolution of the Board of County Commissioners. Such review and revision of the Capital Improvement Plan shall be consistent with the

goals, objectives, and policies of the Manatee County Comprehensive Plan.

4. Consistency of Governmental Development

A. For the purpose of the consistency requirement of the plan, the first year of the Five-Year Capital Improvement Plan shall apply to all capital improvement projects undertaken by the County of Manatee for which funds were or will be appropriated in Fiscal Year 2024, except as provided in paragraph D of Section 5 Administrative Provisions, or in a prior year, if the project has not been started as of October 1, 2023.

B. Year two of the Five-Year Capital Improvement Plan shall apply to all capital improvement projects for which funds will be appropriated in Fiscal Year 2025. Projects for year two are subject to availability of funds and subsequent appropriation of funds by the Board of County Commissioners.

C. Years three through five of the Five-Year Capital Improvement Plan shall represent general County policy with respect to capital improvement programming, subject to review and revision on a case by case basis during each of the succeeding budget years, and subject to availability of funds.

D. Notwithstanding Paragraphs A, B, and C above, the County of Manatee may undertake other capital improvement projects not shown in the Five-Year Capital Improvement Plan as follows:

(1) Emergencies - Such projects found by the Board of County Commissioners to be of an emergency nature may be undertaken without amendment to the plan.

(2) Other Projects - Or, if not so found to be of an emergency in nature, such projects deemed by the Manatee County Board of County Commissioners to be of higher priority than capital projects shown in the CIP may be undertaken, providing the plan is amended by resolution of the Board of County Commissioners. Budget Amendment resolutions which identify such high priority projects as additions or changes to the CIP may serve as the required resolution to amend the plan. Provided, however, that in all cases, such projects shall be otherwise consistent with the prescriptive provisions of the Plan.

5. Administrative Provisions

A. Capital improvements shall be deemed consistent with the Capital Improvement Plan where they are consistent as to general location, scale and type of

facility as provided in the CIP project description, although it need not be consistent in revenue sources or manner of operation.

B. If funding for a project identified in the CIP as a future year project or a project of record becomes available in advance of the year for which it is planned, the Board of County Commissioners may proceed to implement that project when funding becomes available without an amendment to the Plan.

C. Amounts shown in the CIP as estimated project costs are estimates and not intended to serve as precise project budgets. This also applies to initial appropriations for the capital projects. A precise project budget will be established for a project upon completion of the following:

(1) Engineering and architectural plans and specifications upon which the project cost will be estimated.

(2) Adoption of budget amendments subsequent to completion of plans and specifications that may be necessary to properly fund the project.

D. Budgets for projects shall be adopted by the Board of County Commissioners as provided in Resolution

R-94-270 which establishes the Manatee County Budget Administration and Implementation Policy. Budget Administration Procedures as provided for under Resolution R-94-270 allow the Budget Officer or his designee to authorize the Purchasing Division to encumber items which require exception to the level of budget control established in the Budget Administration Procedures. This authorization can be given for approved projects, items previously approved for expenditure by the Board of County Commissioners, items required by law, or other expressed priorities of the Board of County Commissioners. Projects included in this CIP and previous CIP's are to be considered "approved projects" for the purpose of encumbering funds in anticipation of a formal budget amendment in order to meet significant time constraints or provide for improved fiscal resource management.

E. To the maximum extent possible, engineering and architectural plans and specifications prepared for roadway projects contained in the Capital Improvement Plan will incorporate landscaping, pedestrian/bicycle facilities and other aesthetic design considerations that enhance the image of the community and reduce the impacts to adjacent land uses.

F. This Five-Year Capital Improvement Plan is prepared to be consistent with the Capital Improvement Element of the Comprehensive Plan subject to any proposed amendments to the plan presented to the Board of County Commissioners. If any provisions of this resolution are not consistent with the Comprehensive Plan, then the Comprehensive Plan shall prevail over any provisions of this resolution. Projects in the Five-Year Capital Improvement Element of the Comprehensive Plan may require subsequent adoption of ordinances and/or amendments to the Comprehensive Plan before the projects can be initiated.

G. Debt service for projects funded from the proceeds of Transportation Revenue and Refunding Bonds may be paid from Transportation Impact Fee Revenues if all applicable impact fee requirements are met.

6. Funding Sources

A. It is the intent of the Board of County Commissioners that any project included in this plan may be financed and refinanced using bond proceeds. The language in sections 6.B and 6.C below is provided to ensure that the issuance of bonds to finance projects remain as a viable alternative, even if other funding sources are used to initially finance projects.

B. This resolution is an affirmative action of the Board towards the issuance of bonds to finance or refinance the Capital Improvement Plan of the County in accordance with the laws of the State and the applicable provisions of the Internal Revenue Code of 1986, as amended and the rules and regulations of the Internal Revenue Service applicable thereto.

C. Whereby, it is hereby authorized to be issued and this Board hereby determines to issue, to the extent necessary to provide financing for projects identified herein, or refinancing for such projects funded from other sources, its general obligation and revenue bonds pursuant to the laws of the State of Florida and, if required by the laws of the state, or the Constitution, a referendum vote on such general obligation bonds, for the capital improvements described in "Exhibit B" hereto in the Five-Year Capital Improvement Plan in one or more series and issues in aggregate principal amount of up to \$2,189,456,681. The authority established herein shall be implemented by subsequent resolutions of the Board of County Commissioners.

*These figures reflect FY24-28 and future, budget is not included in these calculations.

Governmental Projects

In the FY24 Governmental Capital Improvement Plan (CIP) overall projects total \$207,331,097, of which \$46,983,775 is funded with Infrastructure Sales Tax (IST). The Governmental FY24-28 and future CIP totals \$732,726,683, or 33.47 % of the total CIP.

Noteworthy highlights in the governmental section of the CIP consist of the following:

- General Government category projects are funded in the amount of \$34,753,354 in FY24. Within the FY24-28 CIP projects are funded for \$42,753,354 which consists of 1.95% of the total projects. The County Parking Garage project consists of \$28,659,085 of which \$12,209,085 is appropriated and in the budget. In FY24 an additional \$8,450,000 will be funded and FY25 for \$8,000,000.
- Sports and Leisure Services projects total \$26,618,000 in FY24. The remaining funding of \$51,386,307 is scheduled for projects throughout the Plan with \$9,634,382 being funded with Infrastructure Sales Tax funds. A few Sports and Leisure Services projects within the FY24-28 CIP are as follows:
 - Braden River Park Baseball Field Improvements is funded in FY24 in the amount of \$2,245,000 utilizing the Parks and Recreation fund.
 - Lakewood Ranch Parking Expansion is being funded in the amount of \$936,500 in FY25 with the Parks and Recreation fund.

- Lincoln Park Parking Improvements is funded in FY24 in the amount of \$1,213,000 to complete the park.
- GT Bray Water Facility - New Pump Room is funded in FY24 in the amount of \$3,600,000 which utilizes Infrastructure Sales Tax funding.
- East Bradenton (Clemons) Pool & Pump Room is funded in the FY24 CIP in the amount of \$5,150,000 with General Revenue funding.
- Premier Sports Complex Swimming Pool is currently appropriated in the amount of \$8,075,600 utilizing Debt Proceeds and Parks Impact Fees. An additional \$10,861,900 is in the plan to be funded in FY25.

➤ Natural Resources investment of \$43,974,386 within the Plan is comprised of new funding in the amount of \$2,343,691 and prior appropriations of \$41,241,695. A few Natural Resources projects within the FY24-28 CIP are as follows:

- Washington Park Phase II project is funded in FY24 in the amount of \$1,634,190 utilizing General Revenue funding for a project total of \$2,415,483.
- Washington Park Phase III project is funded in FY25 in the amount of \$287,500.
- Robinson Preserve - Boardwalk Repair & Replacement is funded in the amount of \$222,500 in FY24 for a project total of \$925,000.

➤ Public Safety funded projects in FY24 total \$29,155,111, of which \$8,775,250 is from Infrastructure Sales Tax and \$2,925,840 is utilizing Impact Fees. Additionally, the remaining funding in the amount of \$7,347,200 is programmed within the Plan. A few of the highlighted projects are:

- MCSO - Fleet Facility project is funded in the amount of \$12,967,271 in FY24, for a project total in the amount of \$15,171,271.
- MCSO - New Property Evidence Building project is currently appropriated for \$1,693,000 with additional funding in FY24 in the amount of \$5,087,000.
- Lake Manatee EMS Base project to be funded in FY24 in the amount of \$4,500,000 as a Generational Impact project to meet the growing needs in this area of the County.
- North County EMS Base Station to be funded in the amount of \$995,000 in FY24 with the \$750,000 ARP funding and \$245,000 General fund.

➤ Transportation FY24 CIP projects total \$108,760,041, which is comprised of \$34,244,024 of funding with Infrastructure Sales Tax. In addition, \$39,354,789 of Transportation Impact Fees are being applied to fund projects. As well as, Debt Proceeds of \$4,932,211, Gas Taxes of \$23,930,517, Grants of \$5,500,000 and Southwest TIFF of \$798,500 provide the remaining

sources of FY24 funding within the Plan. Whereas, in its entirety, the FY24-28 Transportation CIP amounts to \$556,668,183.

Noteworthy transportation Road Improvement projects are:

- Canal Road Corridor (US 301 - US 41) projects are appropriated in the amount of \$26,372,022 and are underway. An additional \$23,030,949 is being funded in FY24, for a total project budget of \$49,402,971.
- Moccasin Wallow Corridor projects are funded in the Plan in the amount of \$70,996,185, with \$117,106,256 in the current budget for a combined total of \$188,102,441 for the corridor.
- Lena Road – South of 44th Ave East to Landfill Road project in FY24 is funded in the amount of \$5,108,291, for a total project of \$12,022,471 scheduled within the Plan.
- Lorraine Road – SR 64 to 59th Ave East project has a current appropriation of \$11,201,773. Additional funding for this project is scheduled for FY25 and FY26 for \$13,447,551 and \$13,447,550 respectively in the Plan.
- 59th Street West from Cortez to Manatee Ave project has current appropriation of \$8,137,955 with an additional \$1,371,300 to be funded in FY24 and \$24,420,836 additional funding in the Plan.

- 63rd Ave East from US 301 to Tuttle project is funded in FY24 & FY25 for \$5,856,883 and \$5,856,882 respectively for a total project cost of \$26,575,848 in the Plan.
- 75th St W from 20th Ave W to Manatee Ave W project is currently funded for \$11,008,723 with an additional \$8,901,857 scheduled over the next three years of the Plan.
- Upper Manatee River Road North of SR64 to Fort Hamer Bridge project is currently funded for \$8,150,269 with additional funding in FY24 and FY25 for \$7,661,813 and \$9,924,804 respectively in the Plan.

Noteworthy transportation Intersection projects are:

- 26th Ave E at 27th St E Intersection project is currently appropriated for \$1,124,463 with an additional \$519,059 scheduled in FY24 for a total project budget of \$1,643,522.
- 60th Ave E (Buffalo Rd) - 69th St E Intersection Improvements project is programmed FY24 in the amount of \$1,876,584 for a total project budget in the amount of \$2,038,003.
- Ellenton Gillette Rd - Mendoza Rd (37th St E) Intersection Improvements project is programmed in FY24 for \$732,435 for a total project budget of \$1,500,000.

Noteworthy transportation Sidewalk projects are:

- 59th Street West from Manatee Ave West to 6th Ave Northwest sidewalk project is scheduled to begin in FY25 for \$58,950 with additional funding in FY26 in the amount of \$334,050.
- Ballentine Manor Sidewalk and Curb Replacement project is underway and funded in the amount of \$1,080,000 in the Plan.
- Buffalo Road Sidewalk - Imperial Cir to Bobby Jones Ct was funded FY23 in the amount of \$153,161 with the remaining \$379,112 being funded in FY24.
- Cape Vista Drive - Cortez Road - 36th Avenue West project is funded in the CIP in the amount of \$25,650 in FY24 and \$145,350 in FY25.
- Erie Road East – West Sidewalk – Phase II project is fully funded in the Plan in the amount of \$4,411,558 to provide safe multi-modal connectivity for pedestrians along this corridor.
- Memphis Neighborhood Sidewalks projects are underway and funded in the amount of \$3,560,534 in the Plan.
- Whitfield Ave - 15th St E - 9th Ave E project is currently appropriated in the amount of \$230,104 with additional funding in FY24 in the amount of \$170,000.
- Wilmerling Ave (65th Ave E) from 5th St E to End of Road sidewalk project is scheduled to be funded in the Plan in the amount of \$153,000.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Deficiency, Other Need

Project Location

District 2 605 39 th St E, Palmetto

Description and Scope

Construct a 4,000 -5,000 sq ft Community Center at Washington Park that would give residents the area for the opportunity for fellowship and support at the park.

Rationale

Washington park area residents do not have a facility where they can gather in large groups for celebrations, learning activities and after school activities.

Capital Improvement Plan

FY2024-FY2028

Category: General Government **Subcategory:** Building and Renovations
Project Title: Convention Center - Multi-purpose Room
Department: Convention and Visitors Bureau
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6111901 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 2 1 Haben Blvd, Palmetto

Description and Scope

With a convention center headquarters' hotel under construction, the following improvements and enhancements to the existing Convention Center are needed. An approx. 15,000 sq. ft. multi-purpose room added to the southeast side of the Convention Center and interior/exterior upgrades to existing convention center-conference area. In conjunction with project 6111900.

Rationale

The convention center opened in January 1985 and was renovated in 2011 at a cost of \$6.5 million paid in full by the Tourist Development Tax. With a convention center hotel in construction adjacent to the facility, it is recommended to expand the current convention center by adding an approx. 15,000 sq. ft. multi-purpose room and interior/exterior upgrades to the existing facility. As well as, with project 6111900, air conditioned connector corridor to the hotel, and a 100 vehicle parking deck and the renovation of the existing parking lot that includes a landscape plan. This recommended expansion program would allow us to leverage in small conferences and conventions that would generate approximately \$20 million in economic impact annually that would allow us to fully diversify our branding in the marketplace. Without the expansion model of the convention center, the CVB would not have the amenities to attract small conferences/conventions, even though we will have a full-service adjacent hotel open for business.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency, Maintenance

Project Location

District 3 1112 Manatee Ave W., Bradenton

Description and Scope

To raze and construct a new county parking garage that is larger and more efficient for both the public and county employees. There will be a developed Maintenance of Traffic (MOT) prior to demolition and parking spaces will be located for all displaced users that park daily in the facility.

Rationale

The County parking garage is showing signs of deterioration due to aging and continuous water intrusion. Property Management engaged a professional engineer to perform a complete inspection for the entire structure. The inspection report confirmed there are massive areas requiring repair within the next 18 to 24 months. The estimate to perform only repairs to the aged facility is in excess of \$8 million. Property Management suggests to not perform repairs to the structure, but rather raze the entire facility and construct a larger more efficient parking garage for county employees and the general public.

Project Title: Florida Maritime Museum Building Renovations
Department: Property Management
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6107000 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 4415 119th St W, Cortez

Description and Scope

To engage a structural engineer to evaluate a comprehensive building structure status. This is required to be completed prior to any type of repair or renovation due to the facilities age and compliance with all National Historic Preservation Society regulations. Depending upon what is delineated within the structural engineer's findings will drive additional costs for the actual repairs. Other pre-liminary evaluation expenses include retaining a roofing vendor to evaluate the roof and it's underlying structure, material testing, geothermal testing and engaging a construction contractor to provide pre-construction costs. Total cost of this project is unknown until actual repair and other construction upgrade costs are determined at a later date after all pre-liminary findings are reviewed.

Rationale

The Florida Maritime Museum has significant roof leaks, damaged bricks, stucco filled weep holes, standing water around building, buckling floors, soft floor joist issues, parapet caps rotted, scupper drains clogged and damaged beyond repair and the high probability of many more construction issues beyond these items. Any renovations must comply with the National Historic Preservation Society.

Category: General Government **Subcategory:** Building and Renovations
Project Title: GT Bray Administration Building - Generator Installation
Department: Property Management
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6113403 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 5502 33rd Ave Dr W, Bradenton

Description and Scope

To install the previously purchased generator for permanent generator functionality. The imperative equipment at the GT Bray Administration facility remains operable. Manatee County will install the generator to connection to an already existent transfer switch. Installation includes all applicable requirements for functionality for a secondary power supply including but not limited to fuel pump, electrical switch gear and other related electrical components.

Rationale

The generators were purchased with Cares Act grant funding, but were not installed due to time frame eligibility with the Cares Act deadline. This project is to only install the previously purchased generator to the GT Bray Administration Building.

Installation includes all applicable requirements for functionality for a secondary power supply including but not limited to fuel pump, electrical switch gear and other related electrical components.

Rationale

The generators were purchased with Cares Act grant funding, but were not installed due to time frame eligibility with the Cares Act deadline. This project is to only install the previously purchased generator to the GT Bray Gymnasium.

Category: General Government **Subcategory:** Building and Renovations
Project Title: MSO Juvenile Justice Building Purchase
Department: Property Management
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6106900 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 1 14494 Harlee Road, Palmetto

Description and Scope

Purchase DJJ building knowing future, substantial renovations/remodeling will be necessary. Anticipated renovations are mechanical, electrical, plumbing, sprinkler/fire changes, general repairs, kitchen repairs, and roof repairs. The Manatee County Sheriff's Office intends to use this facility to house programming staff, add class time for juveniles transported from the main jail allowing more efficiency of time by eliminating the process of separating juveniles from adults, and flexibility for new inmate intake for 14 days for COVID quarantine before main jail induction.

Rationale

On July 7, 1997, Manatee County (County) entered into a ground lease with the State of Florida Department of Juvenile Justice (DJJ) for a 3.5 tract of land located in the Manatee County Jail Complex. Under the terms of the agreement, the DJJ was allowed to construct a facility to house juvenile offenders and staff. The lease required that any facilities constructed by DJJ would be surrendered to County at the end of the lease term. The lease provides a formula to utilize in determining the price County will pay for the facilities if the county terminates the lease and indicates that if the DJJ terminates the lease, the purchase price for the facilities will be negotiated.

FY2024-FY2028

Category: General Government **Subcategory:** Building and Renovations
Project Title: New Memphis Indigent Cemetery
Department: Neighborhood Services
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6106600 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 201 25th St West, Palmetto

Description and Scope

Manatee County Neighborhood Services Department administers an Indigent Burial program. Part of this program entails paying for the cremation of those who have deceased and have no family/friends etc. to claim the body, make arrangements, and burying ashes at the New Memphis Cemetery. There is not enough room to continue this practice and there is a need to create a scatter garden which will solve this problem and along with it a parking area and wall to list the names of those whose ashes will be scattered there.

Rationale

This project will confirm the location of remains. Replacing the markers/plots will allow for families to easily locate their loved ones remains. The project will involve a survey of the ground to find out where there are burials and replace current plot markers so that they are more visible. Once complete a scatter garden will be developed and a wall built to house names of those scattered along with a parking area. A parking area currently does not exist and the property borders animal services and due to the poor condition of the plot markers, volunteer dog walkers are not aware where they are walking.

FY2024-FY2028

Category: General Government **Subcategory:** Building and Renovations
Project Title: Pat Glass Chambers Audio/Video Upgrade
Department: County Administration
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6108700 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 1112 Manatee Ave W, Bradenton

Description and Scope

It is recommended that a professional assessment of the A/V system equipment, room use and application be performed. This will determine an overall solution to meet the immediate and future needs of the County to provide the best user experience for all participants and attendees. Phase 1: Engage a consultant to perform a professional assessment of the existing A/V system equipment and room use. This consultant, working with County staff, will determine an overall design to meet the immediate and future needs of the County to provide the best user experience for all participants and attendees.

Rationale

The primary use of the Pat M. Glass County Commission Chambers is to host Board of County Commission Meetings and other public meetings. The current audio/visual system is comprised of microphones, speakers, televisions, cameras, production equipment and control panels, with most components being in excess of 15 years old. The majority of the equipment is at manufacturer end of life and support. The system has reached maximum capacity in regard to audio and video inputs and outputs. Any changes that are required, such as adding a remote virtual attendee, comes at a sacrifice of another device or function. The system is prone to malfunction and requires constant oversight by the production vendor for meeting support.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

To construct a pre-engineered building with cement pad to store and protect all the new maintenance equipment purchased since the Premier property acquisition.

Rationale

Since the County has owned the Premier property, several high-end grounds maintenance apparatuses have been purchased. However, there does not exist a facility to store the new equipment or any other maintenance equipment required to maintain the athletic fields and grounds. Not having an enclosed maintenance building accelerates the equipment's age and performance.

FY2024-FY2028

Category: General Government **Subcategory:**
Project Title: Piney Point Deep Injection Well
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6107400 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 1 3105 Buckeye Road, Palmetto

Description and Scope

Construction of a Class I industrial injection well (+/- 3200 ft. bls) to dispose of remnant process wastewater at the former Piney Point phosphate facility. Includes permitting, design, and construction of the well, associated monitoring well(s), piping, valves, flow meter, Supervisory Control and Data Acquisition (SCADA) telemetry, pretreatment system, and other required appurtenances.

Rationale

The Florida Department of Environmental Protection (FDEP) has requested Manatee County to design, permit, construct and ultimately operate the well for the disposal of the remnant process wastewater at the Piney Point site. FDEP has agreed to fund the majority of the costs to do so. This well will provide a long term plan for disposing of the millions of gallons of wastewater currently stored in the phosphogypsum stacks and the 30-50 years of seepage that will continue after stack closure.

FY2024-FY2028

Category: General Government **Subcategory:** Law Enforcement
Project Title: Manatee County Mosquito District Facility Property Purchase for MCSO
Department: General Governmental
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6117100 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 2 2317 2nd Avenue West, Palmetto

Description and Scope

The scope includes the purchase of the land currently housing the Manatee County Mosquito District Facility. Manatee County Mosquito District Facility is moving from their current location 2317 2nd Avenue West, Palmetto, FL 34221 to Ellenton, FL. This is ideal spot for MCSO helicopter, as the hangars and helicopter landing areas are already in place.

Rationale

Currently, Manatee County Sheriff's Office (MCSO) leases a space at Sarasota-Bradenton International Airport (SRQ) for their helicopter. SRQ has increased ridership and requires additional space due to growth and demand. SRQ will repurpose the lease space forcing the MCSO to find their own space offsite. MCSO does not have a spot for helicopter, and it has been leasing space since the beginning. Manatee County Mosquito District Facility location is adjacent to Memphis subdivision which is in the area that needs MCSO presence to better service the needs of the local residents and visitors. Also, this proposed site borderlines with Memphis cemetery another Manatee County Property This property is in ideal location.

FY2024-FY2028

Category: General Govt - SWTIFF **Subcategory:**
Project Title: Holiday Heights Stormwater Improvement
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: ST02297 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 4 51st Avenue West from 21st Street West to 24th Street West, Bradenton

Description and Scope

This project will consist of upgrades/improvements to the existing stormwater system collection and conveyance system within Holiday Heights, 2nd Addition Subdivision, which ultimately drains into West Branch Cedar Hammock. This project will consist of upsizing existing stormwater pipelines; improvements or replacement of existing grate inlet and curb inlet structures; and, if warranted, the installation of a flap-gate at the outlet into West Branch Cedar Hammock Drain. Acquisition of Drainage Easements as warranted for the upgrades/improvements to the existing stormwater pipelines as necessary. Design and permitting associated with referenced improvements. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvements where possible.

Rationale

Maintenance staff repeatedly receives stormwater drainage related service requests in the Holiday Heights community. The area has significant street flooding and some claims of home flooding during extreme rain events. Stormwater Operations has flushed out this stormwater system in the past based upon repeated complaints. The next step is to analyze the drainage system and determine if upsizing the stormwater pipelines, installation of a flap gate and/or inlet improvements would be most effective to improve the system. Note that there is a limit to what can be accomplished without additional storage being created in this system.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 3 Palma Sola Boulevard/Senrab Drive, Bradenton

Description and Scope

This project will consist of upgrading the existing stormwater system from Senrab Drive west towards Palma Sola Boulevard and ultimately draining into Palma Sola Bay. This project will consist of upsizing existing stormwater pipelines; improvements or replacement of existing grate inlet and curb inlet structures; and, if warranted, the installation of a flap-gate at the outlet into Palma Sola Bay. Acquisition of drainage easements as warranted for the upsize of existing stormwater pipelines as necessary. Design and permitting associated with referenced improvements. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvements where possible.

Rationale

This is a flood mitigation project to improve the Level of Service (LOS) for the local roads and reduce flooding on private properties that regularly occurs during typical summer rain events. Additionally, the stormwater system east of Palma Sola Blvd in Senrab Park has reached the end of its life span. Maintenance staff are constantly repairing failing joints, pipe collapses, and blockages due to root intrusion.

Category: General Govt - SWTIFF **Subcategory:**
Project Title: Pearce Drain Watershed Flood Mitigation
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6115800 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 4 63rd Ave E and 33rd St E, Sarasota

Description and Scope

Survey, design, permit, and construct an approximate 50 ac-ft stormwater and water quality storage facility at 6525 33rd St E (PID 1876210004). Scope to include geotechnical explorations and a Environmental Site Assessment (ESA) for the parcel. Excavated material is to be utilized where applicable for County benefit allowed by the ESA. Excavated material will be hauled to receiving stockpile facility or CIP in need of fill material.

Rationale

The County recently purchased a vacant parcel located at 6525 33rd St E which is adjacent to the Pearce Drain within the Pearce Drain Watershed, which historically is prone to flooding. The parcel has been identified as a proposed regional flood mitigation facility from a recently completed Pearce Drain Watershed Management Plan. The parcel will provide additional flood volume storage and water quality treatment to the watershed. Additionally, the excavated soil material may be able to be utilized for ongoing Capital Improvement Plan (CIP) projects, landfill cover material, or elsewhere in the County. The property is located within the Southwest Tax Increment Financing District (SWTIF).

FY2024-FY2028

Category: General Govt - SWTIFF **Subcategory:**
Project Title: Wares Creek Flood Mitigation
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: ST02301 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

Multi-district 301 Blvd E at US 41, Bradenton

Description and Scope

Evaluate, survey, design, permit, and construct stormwater and water quality storage facilities at applicable County-owned properties to allow preemptive stage drawdown of existing stormwater facilities in advance of a forecasted storm/flood event. Improvements to include modification of existing facilities, new improvements, and automated out outfall structures. Scope to include geotechnical explorations and a Environmental Site Assessments (ESA). Phasing the project is to be considered. Excavated material is to be utilized, where applicable, for County benefit allowed by the ESA. Material is to be hauled to receiving stockpile facility or to a capital improvement project in need of fill material.

Rationale

DeSoto Square Mall's parking lot, residential and commercial properties along 9th Street Extension, 9th Street West, 30th Avenue West, and other local streets in East Branch Cedar Hammock/Wares Creek watershed are prone to flooding from high intensity rainfall or daily rainfall totals exceeding 2-3 inches. This project will utilize existing County-owned properties and stormwater facilities to create additional stormwater/floodplain storage to alleviate flooding.

Comprehensive Plan Information

CIE Project: Y Plan Reference: LIBRARY MASTER PLAN
 LOS/Concurrency: Y Project Need: Growth, Deficiency

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Phase I to construct a new library facility location East of I-75 which will accommodate the tremendous growth in the East County. Specific library construction elements include ADA required restrooms and parking, study rooms, tutoring rooms, makerspace, meeting space, performative space, life learning space, inspirational space, and staff work area.

Rationale

The newly constructed branch would serve the growing population in the east county from I-75 to Myakka City and the county line. This library would provide library and public facility amenities for residents south of Manatee river and north of the Sarasota Manatee county line.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

Countywide 1301 Barcarrota Ave, Bradenton

Description and Scope

To purchase a specialty vehicle to utilize as a Book Mobile to better serve the citizens of Manatee County with more accessible library services.

Rationale

Manatee County's library services infrastructure is at 56% of state recommended levels. Rapid population growth has underlined the deficiency. This project will add a Book Mobile to existing service delivery methods and practices. The Book Mobile will enable the library staff to provide services to residents living in areas of the County that do not currently have services or cannot readily travel to existing Library locations.

Category: Libraries **Subcategory:**
Project Title: Rocky Bluff Library Expansion
Department: Neighborhood Services
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6081402 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference: LIBRARY MASTER PLAN
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 6750 US 301 N, Ellenton

Description and Scope

One of three Library projects in the Infrastructure Sales Tax (IST), this request is to expand the facility up to 8,000 square feet to the north of the teen and children's area. The expansion is needed to accommodate tremendous growth in the north part of the county. Project elements included; replacement heating, ventilation (Cafe area) and air conditioning (HVAC) systems, a friend's meeting room, youth STEAM lab, exterior windows and doors to allow natural light to enter the building and enhancements to the technology area. The project uses both Library Impact Fees and IST funds.

Rationale

The first Rocky Bluff Library was established in a small 4,570 sq. ft. storefront space in Ellenton. In 2013, the County acquired The Roaring Twenties restaurant out of foreclosure and began renovations to the 10,470 sq. ft. structure. To save cost, surplus shelving from the Historic Court House was repurposed. Library staff & Property Management moved books on rolling carts across the parking lot to the new building. Portions of the old restaurant were preserved and still used in the Library today such as; light fixtures, counter tops, and the old bar which is now the "Storybook Cafe".

 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 R-33 to R-41+305 100 Ft S of Bridge St to N end of Longboat Pass, AMI

Description and Scope

The project scope includes the preparation of bid documents, agency coordination and construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for three years.

Rationale

The Coquina Beach Nourishment project extends from south of bridge street to the southern end of Anna Maria Island in the City of Bradenton Beach (FEMA reference monuments R-33 to R-41+305). The FEMA (Federal Emergency Management Agency) has identified that the Coquina Beach Nourishment project is eligible for funds to replace storm losses from Hurricanes Hermine and Irma. The County is currently coordinating with FEMA on securing those funds. The County currently holds joint permit authorizations with the Town of Longboat Key for the use of sediment from Longboat Pass for beach nourishment on the adjacent shorelines. The County intends to utilize this sand source to replace the FEMA eligible storm losses from Hurricanes Hermine and Irma in FY 2019/2020.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 (R-12-to R-36) 77th street to approximately 360 feet south of 13th Street South

Description and Scope

Project scope includes Construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for three years.

Rationale

The federally-authorized Manatee County Shore Protection Project area extends from about 77th Street in the City of Holmes Beach south of 13th Street South in the City of Bradenton Beach (FDEP R-Monuments R-12 to R-36) and was nourished originally in 1992/1993, again in 2002/2003, 2005/2006, and 2013/2014. Through supplemental federal funding, the Central Beach Nourishment project has been provided \$14.3 million, with a 30-year period for cost-share reimbursement, to refill the beach template to the maximum extent possible within that budget. The County intends to place additional sand needed to fully refill the template. The USACE must construct the project on their expedited schedule, currently set for 2019/2020, or risk losing the funding. The project is currently authorized under an existing FDEP permit; however, a request needs to be made for another one-time use of the Passage Key sand source borrow area. Also, construction plans, and specifications need to be prepared for the USACE to advertise the project. Engineering studies are conducted prior to permitting to gain a full understanding of the existing coastal environment and any potential impacts the proposed project may cause. These studies are typically required by the FDEP prior to submitting a funding application.

Project Location

District 3 (R-33 to R-41+305) 100 Ft S of Bridge St to N end of Longboat Pass, AMI

Description and Scope

The nourishment project requires design, permitting and construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for three years.

Rationale

The Coquina Beach project area which extends from south of Bridge Street to the southern end of Anna Maria Island in the City of Bradenton Beach (reference monuments R-33 to R-41). Manatee County is seeking to obtain permits for the Coquina Beach Nourishment Project and mitigative reef. The permits include the Florida Department of Environmental Protection (FDEP) Joint Coastal Permit (JCP) and U.S. Army Corps of Engineers (USACE) Department of the Army (DA) permit to authorize the renourishment of the Coquina Beach project area using sand from the Passage Key Inlet ebb shoal and the construction of a mitigative artificial reef adjacent to Coquina Beach. At the request of the County, the USACE plans to incorporate the Coquina Beach project into the construction event of the Federal Central Beach project. The intent of combining the projects is to reduce costs by \$4M - \$5M, eliminating a separate dredge mobilization cost. The County must forward fund both the local and State share of construction costs to the Corps. The State share of 50% is fully reimbursable subject to appropriations from the Florida Legislature, competitively awarded. Monitoring and maintenance costs are not forward funded.

Capital Improvement Plan

FY2024-FY2028

Category: Natural Resources **Subcategory:** Beaches/Waterways

Project Title: Coquina Beach Stabilization Structures

Department: Natural Resources

Project Mgr: Charlie Hunsicker

Infra.Sales Tax:

Project #: 6003418

Status: Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 R-36 to R-41 360 Ft S of 13 St to N end of Longboat Pass, AMI

Description and Scope

The project scope includes completion of a feasibility study, planning, design, permitting, construction phase services, and construction. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for a period of three years.

Rationale

The Coquina Beach groins are located along Coquina beach (FDEP R-monuments R-36 to R-41) and with 18 groins approximately 100 ft in length. The groins protect the beach fronting Gulf Dr S of 13 St S. The present condition of the existing groins is poor; the structures are degrading and pose a hazard to the beach going community. Manatee County is conducting a feasibility study utilizing numerical modeling to evaluate the effects of rehabilitating, removing and/or replacing the Coquina Beach groins and considering alternative structural stabilization options to assist in reducing erosion on Coquina Beach. The Coquina Beach Structural Alternatives Analysis includes conducting a site visit to document the current condition of the existing groins, a literature and coastal processes review, development and screening of options, preliminary engineering and numerical modeling to evaluate alternatives, and recommendation of the most feasible and effective design for implementation. Once the alternatives have been considered, they will be presented to FDEP for support of the permitting process. Wherein, the final engineering design can be completed with state and federal permitting and construction administration services in support of the project.

Project #: 6081504

Status: Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 3 Gulf of Mexico - 4.5 nautical miles off Anna Maria Island

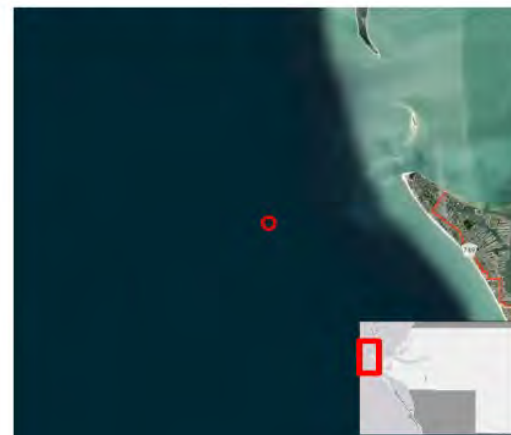

Description and Scope

Manatee County enjoys wide support for the artificial reef program. Funding for the creation of these important habitat structures are provided by grants and donations. These projects create an area of quality habitat for marine fish, crustaceans and encrusting organisms that are naturally restricted to relatively scarce areas of sea bottom that have suitable substrate for colonization; enhance recreational fishing and diving opportunities in area waters and in turn, stimulate sectors of the local economy tied to these activities; and reduce user group conflicts (i.e. divers and fishermen). Funding will be used to transport and deploy 350 tons of culvert material donated by East and North County Public Work's and FPL at the 40-acre Bridge artificial reef site located 4.5 nautical miles from Passage Key and 7.9 nautical miles from Longboat Pass Bridge in the Gulf of Mexico.

Rationale

In 2015, PNR received State and Federal permits to create the Bridge artificial reef, a 40- acre site located 4.5 nautical miles from Passage Key at a heading of 230 degrees and 7.9 nautical miles from Longboat Pass Bridge at a heading of 315 degrees in the Gulf of Mexico. It is located in 35-40 feet of water. The Florida Fish and Wildlife Commission (FWC) has awarded funding to improve/create hard bottom habitat on the County permitted Bridge Artificial Reef site.

Category: Natural Resources **Subcategory:** Beaches/Waterways
Project Title: Longboat Pass Jetty Rehabilitation
Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra.Sales Tax:
Project #: 6003419 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 (R-41+405) the north end of Longboat Pass, AMI

Description and Scope

The project scope includes feasibility, design, permitting and construction. It is anticipated that the permit will require environmental, physical and biological monitoring for a period of three years post construction.

Rationale

The jetty on the north side of Longboat Pass reconstruction is required to implement a long-term solution for sand-tightening the structure. As a result, sand from the south end of AMI at Coquina Beach migrates over the top of and through the structure and contributes to shoaling in the inlet. FDEP's response indicated that since sand tightening of the deteriorating jetty would allow the beach north of the jetty to retain sand and stabilize the beach, this would potentially require less fill volume for Coquina Beach. The County agreed to place a temporary geotextile tube adjacent to the jetty at Longboat Pass, which was subsequently installed in 2012. Since then, annual physical monitoring was performed, and the geotextile tube has proven to be effective in trapping sand and preventing losses through the jetty into Longboat Pass. The geotextile tube has been in place for about five years and is at the end of its design life. The current Longboat Pass feasibility study is intended to expand upon previous effort and provide further engineering analysis in support of a permit application.

LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 offshore of R-36 - R-40 360Ft S of 13 St to 2,200Ft N of Longboat Pass, AMI

Description and Scope

The scope for this project will include field work to investigate suitable areas for placement of an artificial reef. Additionally, the reef structure will be designed and state and federal permits obtained for construction of the reef. Following construction, it is anticipated that the permit will require environmental, physical and biological monitoring for a three year period.

Rationale

Manatee County is seeking to obtain permits to construct the mitigative artificial reef associated with the Coquina Beach Nourishment Project, to construct approximately 2 acres of artificial reef which will provide enough acreage to offset potential hardbottom impacts from Coquina Beach Nourishment Project, the federally authorized Central Beach Nourishment Project as well as additional advance mitigation acreage for unanticipated future impacts. In addition a sum less than \$50K will be set aside to allow construction of a small recreational/snorkeling reef in the swim zone of Coquina Beach in conjunction with the mobilization and construction of the off-shore mitigation reef.

Project Mgr: Charlie Hunsicker
Infra.Sales Tax:
Project #: 6108400 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 5350 Lakewood Ranch Blvd, Bradenton

Description and Scope

Improve drainage of the soccer, football, softball, T-Ball, Little League fields and playground. Complete parking lots.

Rationale

The funding will complete the four-phased project to address the ongoing drainage issue effecting all youth play along the north side of Lakewood Ranch Park and provide adequate parking for all attendees. Over the past 15 years, Lakewood Ranch Park users have experienced multiple field closures due to rain, often causing fields to be closed for multiple days, even weeks. With East County seeing a substantial growth in families moving in, the ability to relocate leagues to "open" fields is no longer a option and the voices of frustration have begun to increase.

As a result, we are seeking the funds needed for public works to address the drainage issues, prevent water from sitting on the fields for extended periods of time and pave the projected parking lots (football, softball and playground).

Design, permit, and removal of existing seawall and construction of living shoreline.

Rationale

This project consists construction of public use improvements including replacement of a failing section of seawall with a living shoreline at Portosueno Park. A living shoreline will be designed, permitted, and constructed along the northern shore of the boat basin, between the stormwater weir to the east and Palma Sola Boulevard Bridge to the west. The existing seawall is failing in some sections and public access is currently prohibited due to safety concerns. The project also consists of improved native landscaping upslope of the proposed living shoreline and improved user amenities. This will lead to lower long-term maintenance costs, ecological/natural resources improvements and increased sea level rise resilience.

Category: Natural Resources **Subcategory:** Parks & Aquatics
Project Title: Washington Park Phase II
Department: Natural Resources
Project Mgr: Charlie Hunsicker
Infra.Sales Tax: Y
Project #: 6012610 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

Site restoration including placement and contouring of approximately 850,000 cubic yards of dredged material from Port Manatee for filling approximately 30 acres of marsh land, enhancement of an additional 46 acres of marsh land to create a community asset for passive recreation, hiking, biking, and stormwater quality improvements. Washington Park is designed to be completed in three phases. This project is for Phase II which consists of permitting, final design, storm water infrastructure, contouring of fill placement, and site stabilization for in-filling the abandoned borrow pit project, trail construction, pedestrian bridges, and landscaping in partnership with the US Army Corps of Engineers (ACOE) who are supplying and placing a total of 1 million cubic yards in the borrow pit for an equivalent market value exceeding 14 million dollars.

Rationale

The County is required to fund permitting associated environmental mitigation and enhancement inside the property associated with the Army Corp Infill project. The County will perform restoration activities such as final grading and contouring requiring an additional one foot of topsoil covering for stabilization, landscape plantings, construction of trails, and a trail bridge linking Washington Park Phase I recreational area to the Phase II restoration area.

Project Location

District 1 2649 Rawls Road, Duette

Description and Scope

Ecological restoration and enhancement of approximately 100 acres of wetland and upland areas impacted by historical agricultural uses at Duette Preserve. The project will include removal of ditches and re-grading to restore wetland hydroperiods and restoration of wetland and upland habitats.

Rationale

FDOT is required to provide mitigation for wetland impacts associated with planned interchanges improvements at various intersections. The habitat restoration will benefit water quality and wildlife by greatly improving the ecological value of the habitat.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 1 2649 Rawls Road, Duette

Description and Scope

Project activities include site-specific surveys, watershed study and drainage model, collecting baseline vegetation and wildlife data, environmental permitting, construction plans and bid documents and community education.

Rationale

In October 2016, Manatee County received a grant from the Florida Department of Environmental Protection for restoration of wetland hydrology and surface water flow to a tributary of the Manatee River at Duette Preserve. The improvements included back filling agricultural ditches, creating stormwater treatment areas, redirecting water flow and addressing trail crossings. This project, funded by Restore America's Estuaries, continues the project and will focus on run-off from specific agricultural sources and formulates a restoration design for water quality and wildlife habitat improvements.

Category: Natural Resources **Subcategory:** Preserves
Project Title: Johnson Preserve at Braden River Recreation Amenities
Department: Natural Resources
Project Mgr: Michael Elswick
Infra.Sales Tax:
Project #: 6094601 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Johnson Preserve at Braden River

Description and Scope

- Survey of portions of property boundary where possible encroachments exist.
- Design & permitting of trail, parking lot and pavilion
- Construction of Picnic Pavilion, Parking lot, kiosk, trail system
- Construction of select portion of perimeter and parking lot fence
- Installation of parking landscaping

Rationale

In 2018, The remaining portions of the planned Johnson Preserve at Braden River totaling 32+/- acres were acquired using parks impact fees and donations from a grass roots initiative coordinated by Keep Woods and the Conservation Foundation of the Gulf Coast. The Conservation Foundation donated the adjacent Bergstressor Parcel on the condition that all parcels making up the preserve would be subject to a conservation easement. This increased total site acreage to just over 44 acres protected in perpetuity. In well attended public meetings leading up to the property's purchase and shortly after acquisition, public input was received and a broad consensus emerged requesting limited development of amenities and requesting access as soon as possible. These preparations and minimal amenities are herein proposed to include property boundary and easement survey, boundary fencing, creation of trails, benches, gates, parking lot, up to 4 interpretive signs & picnic pavilion.

Project #: 6071302 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 Perico Preserve, Bradenton

Description and Scope

Create an approximate 15 acre seagrass mitigation area with access trail and boardwalk at the Perico Preserve on land owned by Manatee County. Transplant sea grass extracted from Perico Bayou into the sea grass mitigation area and monitor for success for a period of 5 years.

Rationale

The seagrass mitigation project will provide two primary benefits. The first benefit will be to provide mitigation credits for a fee paid to Manatee County from the City of Sarasota ,Port Manatee or possibly to another user of the credits, such as Florida Department of Transportation (FDOT), and the second benefit will be to provide 50,000 cubic yards of clean fill for the refurbishment of reclaimed water ponds at the Southwest Regional Wastewater Treatment Plant.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 1704 99th St, Bradenton

Description and Scope

Repair or replace all wood and hardware components of bridges, boardwalks, overlooks, piers and observation tower at Robinson preserve as well as replenishing aggregate materials on trails approaching these assets to address erosion as needed/identified in annual inspections.

Rationale

Many of the existing boardwalk, bridge, and tower components have deteriorated over time due to weather, salt water, and general wear and tear. The project will address damage identified in annual inspections by replacing these components with an effort to minimize the inconvenience to patrons. Proactive replacement of these components as they approach the end of their useful lifespan will prevent closures due to developing safety issues/failures of critical structural elements.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth

Project Location

District 3 1704 99th St NW, Bradenton

Description and Scope

Restoration of approximately 118.2 acres of disturbed coastal habitat by creating hydrologic connections and providing a more natural hydrologic regime within portions of the preserve. Project activities include restoration and creation of wetland, subtidal and coastal upland habitats, monitoring and public outreach and constitutes the entirety of phase IIB.

Rationale

The Robinson Preserve Coastal Habitat Restoration, is a component of the Robinson Preserve Expansion Project occurring on approximately 150 acres. The Robinson Preserve Expansion Project is being conducted in Phases: Phase I -The Nature, Exploration, Science and Technology (NEST) and accompanying amenities on the Reasoner Tract (6085201, 6085202). Phase IIA -Initial Exotic Species Removal, Initial Terraforming, Trails and Parking (6085203, 6085208, 6085209). Phase IIB -Hydrological Connections and Final Terraforming (6085219). Phase III - Upland Habitats Restoration Establishment (6085220). As of January 2023, Phase I, IIA, and III are complete, Phase IIB is ongoing.

Project Location

District 3 1704 99th St NW, Bradenton

Description and Scope

Ecological function of the approximate 14.8-acre portion of the 150-acre site will be achieved by implementing a four-year system that consists of pre-planting adaptive management, intensive re-planting with habitat specific plants and post planting habitat establishment period adaptive management (HEPAM). Successful implementation of this system will result in target habitats established to the extent they are at a relatively stable state and capable of self-sufficiency with normal land management maintenance. The habitat to be restored is as follows: Live Oak Hammock, Pine Flatwoods, Coastal Shrub Hammock and Coastal Tree Hammock.

Rationale

The Tampa Bay Estuary Program (TBEP) has been awarded federal money from the Gulf Coast Ecosystem Restoration Council which administers RESTORE Act. TBEP has identified local coastal restoration projects to improve habitat, of which one is Robinson Preserve. This agreement provides funding to restore over approximately 14.8-acres through a restoration plan that was developed by Manatee County staff and approved by TBEP. No Match Required.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference: PARKS MASTER PLAN, GREENWAYS
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 905 Rye Wilderness Trail, Parrish

Description and Scope

Design, permit, and construct three (3) pedestrian bridges and kayak launch, to include wetland impact mitigation costs (ideally on-site wetland habitat improvement). Also, install campground host site, to include design, permit and construction of concrete R.V. pad with water, sewer and electric connections.

Rationale

This project is needed to address increased demands for East County residents to enjoy passive nature-based recreation closer to the shifting population center. Improvements include upgrades to the canoe/kayak launch and pedestrian bridges to allow for scenic overlooks of the Upper Manatee River, as well as new campground sites. While all county residents will ultimately benefit, we anticipate central and east county residents north and south of the river will be the chief beneficiaries, with area population numbers exceeding 100,000.

Capital Improvement Plan

FY2024-FY2028

Category: Sports & Leisure Services **Subcategory:** Athletic Fields
Project Title: Blackstone Park Shade Structure
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6113503 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency, Other Need

Project Location

District 2 2112 14th Ave W, Palmetto

Description and Scope

Estimated need based on the status of shade in the respective park. A full study, should be completed to evaluate the conditions of any current shade systems, the fabric or hardtop and the associated cables, along with accurate bleacher counts and sizes. The numbers provided reflect the number of bleachers present and do not reflect the specific number of shade structures requested as there may be instances where 1 canopy could cover 2 bleachers, with cost savings. Add (6) Shade Structures on the three Baseball Fields. Add (6) Shade Structures on the three Softball Fields. Add (6) Shade Structures on the three Soccer Fields.

Rationale

At night, the Parks flow with excited parents and family members crowded around the fields, filling the uncovered bleachers as they cheer on the children. On the weekends, those same bleachers sit empty as families seek shelter from the hot Florida sun any way they can. Shade is important and it is also missing throughout much of Manatee County Park systems. The Shade Structures currently in place were purchased many years ago and are in need of repairs or replacements, leaving the youth leagues to choose between player scholarships or funding for shade structures.

Category: Sports & Leisure Services **Subcategory:** Athletic Fields
Project Title: Braden River Park Baseball Field Improvements
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6004016 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Maintenance

Project Location

District 5 5201 51st St E, Bradenton

Description and Scope

Braden River Park Baseball Field 6 Improvements project includes removal and salvage of natural turf grass, and removal of irrigation. Installation of synthetic turf, re-grading of entire field, installation of proper drainage, installation of synthetic turf irrigation system, fill replacement, replacement of LED lights, removal and replacement of existing backstop, installation of the scoreboard and all appurtenances and amenities required for a functional baseball facility.

Rationale

Braden River Park is a closed landfill that has been repurposed for athletic fields. Baseball field 6 has become unusable due to uneven settlement of landfill material below the field. Repeated efforts to re-grade the field into usable condition have been unsuccessful. Therefore, a synthetic turf system including the enhanced base material is necessary to stabilize the field.

Status: Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 7550 69th St E, Palmetto

Description and Scope

Convert current dog park area into soccer fields by removing oak trees and root systems, dog park amenities to be relocated to Ola Mae Sims park and adding sod to create playing fields. Split rail fence to create a parking area. Netting system for soccer field to be included. Electrical to be rerouted for security lighting.

Rationale

With the increase of population in Manatee County and the over usage of athletic fields, finding more effective and efficient use of property is a must to serve our community and youth. One area that has been identified is at Buffalo Creek Park. By utilizing the current dog park area and surrounding parking lots and paths, additional soccer fields can be added to the serve the community.

Project Location

District 1 7550 69th St E, Palmetto

Description and Scope

Design and construct up to four additional soccer fields depending on site conditions, including synthetic turf system to stabilize the fields. A synthetic turf system including the enhanced base material provides cost-effective solutions for fields of any size and purpose. This project also includes solar lighting for paths and walkways, LED sports lighting for the new soccer fields; paved parking lot; parking lot lighting; expanded access road to accommodate access needs with overflow grass parking along the drive; restroom building; maintenance/storage building or shed; site utility improvements including potable water supply, sanitary sewer/stormwater conveyance and site electrical improvements; installation of proper drainage, installation of synthetic turf irrigation system, landscaping; bleachers and shade structures, site furnishings, and all appurtenances and amenities required for a functional facility.

Rationale

With the increase of population in Manatee County and the over usage of athletic fields, Buffalo Creek Park needs additional athletic fields to meet the demand of the growing leagues.

Project #: 6113502 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency, Other Need

Project Location

District 1 7550 69th St E, Palmetto

Description and Scope

Estimated need based on the status of shade in the respective park. A full study, should be completed to evaluate the conditions of any current shade systems, the fabric or hardtop and the associated cables, along with accurate bleacher counts and sizes. The numbers provided reflect the number of bleachers present and do not reflect the specific number of shade structures requested as there may be instances where 1 canopy could cover 2 bleachers, with cost savings. Add (8) Shade Structures on the three Soccer Fields. Add (4) Shade Structures on the Football Field.

Rationale

At night, the Parks flow with excited parents and family members crowded around the fields, filling the uncovered bleachers as they cheer on the children. On the weekends, those same bleachers sit empty as families seek shelter from the hot Florida sun any way they can. Shade is important and it is also missing throughout much of Manatee County Park systems. The Shade Structures currently in place were purchased many years ago and are in need of repairs or replacements, leaving the youth leagues to choose between player scholarships or funding for shade structures.

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: 6109901 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 7550 69th St E, Palmetto

Description and Scope

This project is dedicated to expanding and improving the parking areas at Buffalo Creek Park. Area of focus will be to increase parking at the entrance of the park near the water tower. This will include moving the water tower entrance with fencing and automated gates, adding field parking of around 75 parking spaces, and include material, fencing, and signage. The project also incorporates a sidewalk into the park from the new parking lot. Next, parking lot would be renovated at Big Baseball with TruGrid to include material, leveling, TruGrid, Fencing and Signage. The final parking area would be to incorporate new parking around new soccer field that is being build on Dog Park Site. This will include parking spots, fencing, road base and signage.

Rationale

The Parks Master Plan identifies a need at Buffalo Creek Park for additional athletic fields to meet the demand of the growing leagues. Phase I has been identified as expanding the current soccer fields with restrooms and parking (Prj #6004520). Phase II includes renovating the baseball/softball fields (Prj #6109900, #6109901 and #6109902).

Project #: NR02261 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

District 5 7300 Belleisle Glen, Lakewood Ranch

Description and Scope

Conversion of the existing multipurpose field at Country Club East to accommodate up to 3 fully equipped little league baseball fields with expanded parking. Other improvements include: bleachers, dugouts, backstops, bases, perimeter fencing.

Rationale

Little league baseball play in eastern Manatee County is growing along with the population in the area. The demand for little league fields have surpassed capacity currently at six fields serving developments east and south of the Manatee River.

Project Title: G.T. Bray Little League Fields

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: NR02250

Status: Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 3 5502 33rd Ave Dr W, Bradenton

Description and Scope

Complete removal of current tee ball area and installation of little league sized baseball fields in its place, this includes all backstops, benches, bleachers, bases, clay and grass from area. Install irrigation, fencing, clay, proper turf, bases, dugouts and bleachers. Install LED lighting.

Rationale

GT Bray Park is host to one of the largest little leagues (Manatee West Little League) in the County with the least number of regulation little league fields. However, in place of little league fields the County does provide access to two tee ball fields consisting of a skinned infield, backstop, team benches, and bleachers. These fields often lack proper maintenance and consist of weeds due to lack of irrigation or fertilization. In addition to the poor quality, these fields lack a perimeter fence and are therefore isolated to use by the tee ball teams causing increased use and demand for the three little league fields at GT Bray Park. Note: No other Little League Baseball fields exist to serve west Bradenton. It is believed renovating the two existing tee ball fields will allow for further growth within the Manatee West Little League program and expanded opportunities for tournaments. Use will expand from those under 5 years of age to 12 year old's.

Project Location

District 3 5502 33rd Ave Dr W, Bradenton

Description and Scope

Install lighting (LED) for one football field, and skate park area lighting. Add three new lights at the south soccer field. The preceding lighting has been completed. While the following lighting is in progress: add lighting to the tennis courts and the new pickleball courts.

Rationale

GT Bray Park was built in the late 80's and much of its infrastructure and facilities have reached the end of its life-cycle. Staff has met with user groups to best determine what facilities need to be upgraded and/or replaced. The half-cent sales tax gives us the opportunity to aggressively address these assets that have deteriorated over time through heavy use.

Project Location

District 5 5350 Lakewood Ranch Blvd, Lakewood Ranch

Description and Scope

Expand parking for overflow near Malachite Dr, Mustang Alley, and Lakewood Ranch Blvd to increase capacity of parking spots.

Rationale

With athletic play at an all-time high, the Department is requesting full utilization of parking opportunities at Lakewood Ranch Park. With the addition to teams on leagues, high school play, and pick up games, parking is consistently a safety concern. Not only do we program the athletic fields at Lakewood Ranch Park, there is also pickleball, tennis, and basketball leagues.

Category: Sports & Leisure Services **Subcategory:** Athletic Fields
Project Title: Lincoln Park Improvements - Amenities
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6023508 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth, Deficiency

Project Location

District 2 715 17th St E, Palmetto

Description and Scope

Design and construct park improvements which include the Lincoln school tunnel upgrades to incorporate historic façade; build a bridge between the Sylvan Oaks development connecting to Lincoln Park; install a 6ft parameter chain link fence at the football field for crowd control; and a scoreboard.

Rationale

Lincoln Park currently has a playground, splash pad, trails, picnic pavilions, basketball courts, football field and a new pool under construction in 2021. Lincoln Park is surrounded by neighborhoods, such as Sylvan Oaks, and is adjacent to the Lincoln School tunnel. With the addition of the pool, the basketball courts were relocated closer to the football field. A new/additional restroom, centrally located on site, allows for the facility to better satisfy the increased capacity needs of the public. There is currently an insufficient amount of bleachers on site, which results in temporary bleachers being moved from one field to another. The new/additional bleachers, including a permanent pad, will allow the facility to better satisfy the increased capacity needs of the public. The other amenities are improvements that will greatly benefit the community.

Description and Scope

Design and construct a restroom at the center of the park north of the football fields (walk in restroom facilities to accommodate the basketball and football players; separate men and woman walk in facilities - up to 3 urinals and 2 stalls for the men and up to 5 stalls for the women).

Rationale

Lincoln Park in Manatee County current has a playground, splash pad, trails, picnic pavilions, basketball courts, football field and a new pool under construction in 2021. Lincoln Park is surrounded by neighborhoods, such as Sylvan Oaks, and is adjacent to the Lincoln School tunnel. This business case identifies park improvements such as the need for an additional restroom. With the addition of the pool, the basketball courts were relocated closer to the football field. The football and basketball players would have to walk all the way to entrance of the park to use the restroom which is quite the distance. Currently, the football players use the adjacent woods to use the restrooms which we are trying to avoid for the neighborhoods that surround the football field.

Status: Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

District 2 501 17th Street East, Palmetto

Description and Scope

Renovate parking lot near restrooms and playgrounds to include additional parking spots. Relocate pavilions to the outer boundary of the property to increase usage space, evaluate playground for removal or relocation.

Rationale

Lincoln Park has undergone a tremendous amount of improvements including a new aquatic center and basketball courts. These new additions are increasing the usage of the facilities causing a tremendous parking issue with swim meets, league play and general usage. When the athletic fields are in use for football, swim meets are occurring and the basketball courts are utilized by the community, parking becomes a safety hazard with no room for emergency vehicles to access facilities and those who may be in need. Evaluating the playground, relocating pavilions to the edge of the property, renovating the current parking lot opens up additional spaces would increase the safety, flow and accessibility to the amenities and ensuring all pertinent items are required to make a functional facility.

Category: Sports & Leisure Services **Subcategory:** Athletic Fields
Project Title: Lincoln Park Shade Structure
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6113507 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency, Other Need

Project Location

District 2 715 17th Street East Palmetto

Description and Scope

Estimated need based on the status of shade in the respective park. A full study, should be completed to evaluate the conditions of any current shade systems, the fabric or hardtop and the associated cables, along with accurate bleacher counts and sizes. The numbers provided reflect the number of bleachers present and do not reflect the specific number of shade structures requested as there may be instances where 1 canopy could cover 2 bleachers, with cost savings. Add (2) Shade Structures on the Soccer Field. Add (4) Shade Structures on the Football Field.

Rationale

At night, the Parks flow with excited parents and family members crowded around the fields, filling the uncovered bleachers as they cheer on the children. On the weekends, those same bleachers sit empty as families seek shelter from the hot Florida sun any way they can. Shade is important and it is also missing throughout much of Manatee County Park systems. The Shade Structures currently in place were purchased many years ago and are in need of repairs or replacements, leaving the youth leagues to choose between player scholarships or funding for shade structures.

Project #: 6071509 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Route 789, Gulf Drive South, Bradenton Beach

Description and Scope

Design and permitting of one double lane launch with extended armoring to prevent ramp scour from propeller wash, replacement of the launch ramp, minor dredging within the ramp area, replacement of both north and south accessory docks to increase docking capacity, addition of an ADA compliant walkway access and accessory lighting, and replacement of the concrete seawalls.

Rationale

The Coquina South Boat ramp is located bayside at the southern end of Anna Maria Island and consists of one double lane launch with associated docks and seawalls; this ramp provides direct access to Sarasota Bay and Longboat Pass. The waterside components of the facility: ramp, docks and seawalls have been in place for a significant amount of time and need an upgrade.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Maintenance

Project Location

District 3 5800 Riverview Boulevard, Bradenton

Description and Scope

This project includes the extension of the northern dock at the boat ramp incorporating a barrier wall to prevent sand deposition into the channel, replacement of sand along the shoreline and planting of native vegetation to stabilize the reconstructed shoreline.

Rationale

The County's Warner's Bayou boat ramp property includes a section of the southern shoreline of the Manatee River. The shoreline has been observed to be eroding and the current is transporting sand east to west towards the Warner's Bayou east navigational channel and boat ramp. This project involves the extension of the northern dock at the boat ramp to include a barrier to sand moving westward and the renourishment and stabilization of the river shoreline using living shoreline components.

Category: Sports & Leisure Services **Subcategory:** Parks & Aquatics

Project Title: Bennett Park FCT Site Development

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: NR02266 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

District 2 400 Cypress Creek Blvd, Bradenton

Description and Scope

Design, permit and construct the following amenities per the FCT Management Plan:

- Simple splash pad (i.e.: concrete pad dish shade with one waterspout) and related amenities, safety features and furniture, fixtures and equipment (FF&E).
- Amphitheater or hook up for Amphitheater - built in seating and small stage area for a portable screen; possible future add ons include covered seating and lighting; other appurtenances and FF&E.
- Corn Hole and/or Horseshoe area.

Rationale

Manatee County's Bennett Park is a Florida Communities Trust (FCT) grant project site that is not fully developed as required by the Special Management Conditions and Management Plan. Although many amenities that are cited in the Management Plan have been implemented and enjoyed by the community, there are still three amenities that need to be built in order to fulfill Manatee County's obligation to FCT.

Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6005723 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Coquina Beach, Anna Maria Island

Description and Scope

Identify site specific flood alleviation alternatives and water quality best management practices within the Coquina Beach public parking areas. The project extends from the landward side of Longboat Pass to north of the beach restroom facility parking area (approximately 4,200 feet), with location specific internal site improvements to be determined during the conceptual design alternatives evaluation.

Rationale

The Coquina Beach public parking areas gradually drain south toward Longboat Pass, but periodically flood to depths of 6 inches to 18 inches during prolonged or high intensity rainfalls. This creates a nuisance to the public utilizing the beach and associated facilities, creates additional maintenance issues due to shell parking wash-outs, reduces access to available parking spaces and creates unsightly conditions.

This Project represents 1 of 3 projects for Coquina Parking Drainage Improvements:
 Part 1 Project# 6005719 Coquina Beach Drainage Improvements
 Part 2 Project# 6086364 Coquina Beach Sidewalk-FDOT
 Part 3 Project# 6005723 Coquina Parking Drainage Improvements

Project Title: East Bradenton (Clemons) Pool & Pump Room

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: 6006706

Status: Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 1119 13th St E, Bradenton

Description and Scope

Replace the pool, splash pad, kiddie pool and pump room at Willie J. Clemons, Jr. park with other appurtenances, safety features, and FF&E.

Rationale

The existing Willie J. Clemons, Jr. facility dates back 20-30 years ago. The age and condition of the pool make it functionally and physically obsolete. Renovations to a pool of this age and condition often uncover unknown conditions such as structural issues that can impact costs. Additionally, such repairs often only extend the life of the pool for 10 years maximum whereas a new aquatic facility should last for another 30 years.

Project Mgr: Tom Yarger

Infra.Sales Tax: Y

Project #: 6006704 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Growth, Maintenance

Project Location

District 2 1119 13th St E, Bradenton

Description and Scope

The new East Bradenton Park Master Plan and Improvements will include the following: (1) Resurface, upgrade and expand the basketball courts from one to two courts in open space directly south of existing court (capacity issue), add 10' to outside dimensions of base pad to give more room between out of bounds line and fence installation, adding lights to both courts (will increase capacity with nighttime play), six goals in total, and fencing around courts; (2) add a 4-6 table picnic shelter with electric service and multiple BBQ grills installed on north side of shelter (water not needed but could be trenched to connect to existing line serving existing water fountain if affordable); (3) add a chilled water fountain; (4) add an extension of approximately .30 miles of the existing asphalt fitness walking trail desired by resident input. Add all appurtenances required for a functional facility.

Rationale

During previous renovations, the community space was not replaced. The park is in need of restroom facilities. The IST provides an opportunity to address these two needs by the construction of a multi-purpose building. This will also provide the opportunity for the County to run a year-round community outreach program from the facility. Establishment of a Master Plan will identify phases of improvements.

Project #: 6007523 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 5502 33rd Ave Dr West, Bradenton

Description and Scope

Construction of an ADA restroom facility, including sufficiently sized male, female and family facility and a chilled water fountain, within the Bright Outlook Pavilion/Playground area. Investigation into factory built and delivered modular rest-room facilities should be investigated for cost savings.

Rationale

The Bright Outlook Pavilion/Playground area is a heavily used space, by both the general public and our internal camp programs. The only restroom facilities nearby are in the Recreation Center. This creates a lot of additional foot traffic into the Recreation Center, which is a security concern for our patrons, staff and youth program participants. Additionally, outside of the Recreation Center hours, there are no restrooms within close proximity. This amenity is used well outside our operating hours. As our camp programs utilize this area frequently, campers must be sent inside to use the restroom. Having designated restrooms nearby would provide much safer controls for our camp participants and staff.

Project Title: G.T. Bray Park - Tennis Court Replacement
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6007517 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth, Maintenance

Project Location

District 3 5502 33rd Ave Dr W, Bradenton

Description and Scope

Refurbish, add subsurface irrigation, and resurface existing clay courts. Enlarge the footprint of the 4 southern linear clay courts to allow for seating and shade structures for the players and participants, resulting in meeting USTA standards over a larger four court footprint. Replace lighting, fencing and sidewalks that will be removed during construction.

Rationale

GT Bray Park was built in the late 80's and much of its infrastructure and facilities have reached the end of its life-cycle. Staff has met with user groups to best determine what facilities need to be upgraded and/or replaced. The half-cent sales tax gives us the opportunity to aggressively address these assets that have deteriorated over time through heavy use.

Project #: 6007507 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference: PARKS MASTER PLAN
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 3 5502 33rd Ave Dr W, Bradenton

Description and Scope

Pickleball has become one of the fastest growing sports in the nation. Its growth over the last 2 years since the original concept plan was prepared has surpassed that of the supply of courts needed to accommodate those who play the sport. With this growth in mind, there is a tremendous need to increase the number of pickleball courts throughout the County and especially at GT Bray. The plans at GT Bray to accommodate the public demand would be to convert the existing 8 hard tennis courts to 20 pickleball courts with covered shade structures over up to 20 courts with lighting, player seating and fans.

Rationale

GT Bray Park was built in the late 80's and much of its infrastructure and facilities have reached the end of its life-cycle. Staff has met with user groups to best determine what facilities need to be upgraded and/or replaced. The IST funding gives the County the opportunity to aggressively address these assets that have deteriorated over time through heavy use.

Project #: 6007522 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency, Other Need

Project Location

District 3 5502 33rd Avenue Drive West, Bradenton

Description and Scope

Hire a company to design the required repair strategy to remedy the structural failures and subsurface soil weakness, and prepare construction plans and specifications. Hire a Construction Manager to facilitate the repairs and incorporate with the dive well replacement project. Besides identifying and correcting the underground issues, we also want to replace the existing pool decks with new concrete and tile depth markers.

Rationale

According to a site audit performed in March 2020 the pool decks at the GT Bray Aquatics center are in poor condition. There are numerous areas where the decks have shifted and separated at joint locations due to shifting soils most likely caused by the pool leak that occurred for years. Other areas of the deck exhibit cracking and uneven surfaces. A second, follow-up inspection of the surrounding pool and dive well decking was completed in August 2020 to determine if there were any issues associated with minor leaks which continue to surface in and around the dive well and splash pad areas. The study concluded with a finding of structural failures associated with subsurface soil weakness that are expected to continue without removal/replacement of the existing soil and decking.

Project Title: GT Bray Dive Well - Learn to Swim Pool

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: 6007521 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 5502 33rd Avenue Drive West, Bradenton

Description and Scope

Remodel the pool to exclude it as a dive well and to convert it to a shallow, learn to swim pool (lesson pool). Work off of the conceptual plan which includes shade structures, lounge chairs, basketball goals or volleyball goals.

Rationale

The Dive Pool at the GT Bray Aquatic Center was originally designed in 1982 and is approaching 40 years old. The Dive Pool has been in a state of disrepair for an extended period of time. Although repairs have been made the pool is still leaking and is in desperate need of additional repairs. As a result, the dive well pool has been shut down for years. It was concluded that the existing dive pool is both functionally and physically obsolete and should be replaced with more family-friendly uses such as lesson programming, a recreational depth swim lagoon, spray and play features, more shade for UV protection, and a variety of seating (chaise lounges, umbrellas, tables, and group picnic table to increase the recreation value and length of stay.

FY2024-FY2028

Category: Sports & Leisure Services **Subcategory:** Parks & Aquatics
Project Title: GT Bray Water Facility - New Pump Room
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6039501 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 3 5502 33rd Avenue Drive West, Bradenton, FL 34209

Description and Scope

Replace the existing pump and filtration equipment with new equipment to be located outside underneath an open-air structure. The existing surge tanks and abandoned motor pits will be filled and a new slab will be poured within the pump house. The pump house will be converted to a storage building. Existing pool piping servicing the lap pool and existing dive well will be cut-off outside of the existing pump house and covered roof enclosure west of the pump house. Pool piping for the new pump and filtration equipment will be routed to connect to the existing pool piping connections. Existing electrical service located will be relocated outside to a new panel located near the new pump equipment. The current electrical service will be shortened by placing the new equipment outside. The existing fenced in area southeast of the existing pump house will be the location for the new pump and filtration equipment.

Rationale

The Dive Pool at the GT Bray Aquatic Center was originally designed in 1982 and is approaching 40 years old. The old dive well which is now obsolete will be replaced with a learn-to-swim pool which will require new pumps and filtration equipment. Since the current pump room is almost 40 years old and has had recent issues with major leaks, Manatee County will replace the existing lap pool pump and filtration equipment at the same time. The new equipment will be covered by a prefabricated open-air structure as the current pump structure needs to be demolished.

Infra.Sales Tax:

Project #: 6067406 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Hidden Harbor, Parrish

Description and Scope

Development/construction to include restoration of drainage ditches; landscaping and irrigation; utilities; entry and circulation road; maintenance access shell drive; entrance sign; parking lot (+/- 50 spaces); up to 3 pavilions which should include picnic tables, electrical service and lightning protection; restrooms; fishing/nature observation pier with boardwalk; interpretive signs; site amenities; sidewalks connecting recreational amenities; multi-use nature trail (+/- 2.8 miles) with trail benches and shelters with lightning protection, bike racks, and trash receptacles; exotic plant removal and site work and stormwater ponds; ADA-compliant playground with safety surfacing; shade canopy; up to 3 sand volleyball courts; skate park and pump track; south road extension with approx. 5-space shell parking with a kayak launch facility at Ft Hamer Bridge/Manatee River; FF&E; open play field area for future development to include a performance pavilion with festival infrastructure and shaded shelter.

Rationale

These park elements are either a requirement of the Florida Communities Trust (FCT) grant award agreement or necessary to make the park accessible to the public and expand their recreational opportunities.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Reconstruct existing pool deck and tie-into the new facility decking and construct a picnic pavilion.

Rationale

John Marble facility has deteriorated over the years. The county took ownership of the facility in the mid 1990's. The park requires significant infrastructure upgrades and facility replacement. The upgrade to this facility will enable the county to provide after-school and health and wellness programming that was offered by the YMCA, but was discontinued due to the economic downturn.

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Design and construct necessary off-site roadway improvements required by Manatee County Public Works Transportation. Roadway improvements to provide a widened road with new turn-lanes are required due to the increase to the facility building size and parking lot, and to reduce vehicular stacking at the intersection of State Road 70 and 37th Street East to enter or exit the parking lot. To design this off-site work as required by Manatee County during the Pre-Application meeting, additional scope was required; civil engineering, traffic engineering, topographic surveying and sub-surface utility surveying.

Rationale

Roadway improvements are required due to the increase of the facility building size and parking lot.

Project Title: John H. Marble Splash Pad

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: 6031106

Status: Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference: PARKS MASTER PLAN

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

The splash pad will be approximately 4,000 sq. ft. and it will require the appropriate piping and electrical run throughout the site, in order for the construction to be fully completed, including FF&E.

Rationale

A splash pad is both visually appealing (from a distance) and also interactive. As such, they are designed to allow access at ground level, making it accessible to those with special needs and young children. By having a feature with no standing water it will eliminate the possibility of a drowning. One employee will be needed during the operational hours to ensure the safety of all splash pad participants.

This project is for permit, site preparation, and construction of a new pavilion and other appurtenances needed for a functional facility including FF&E.

Rationale

There has been a formal request for a neighborhood park next to King Middle School. Currently there are tennis courts on this property that are in disrepair. These tennis courts will be removed and replaced by the Neighborhood Park.

Infra.Sales Tax: Y
Project #: 6042401 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference: PARKS MASTER PLAN
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 4 7510 Prospect Rd, Sarasota

Description and Scope

Tentative construction of a fitness trail, small dog park with one small shelter, two pickleball courts with shade structure, and parking lot (less than 12 cars and ADA) with improved access to trail and dog park, based upon a final site design and environmental constraints.

Rationale

With the new 911 communication tower at Kinnan Park, this is a great opportunity to utilize the green space for a fitness trail, shade structures, dog park, parking, etc. for the surrounding communities. Kinnan Elementary school is located in front of the property and will provide additional green space for heavy trafficked area. As a result of public input, two pickleball courts with shade structure has been added as potential amenities, budget dependent.

Category: Sports & Leisure Services **Subcategory:** Parks & Aquatics

Project Title: Lakewood Ranch Park Improvements

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: NR01778 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference: PARKS MASTER PLAN

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 5350 Lakewood Ranch Blvd, Bradenton

Description and Scope

Establishment of a Lakewood Ranch Park Master Plan will provide the structure for development of several phases. Phases will include lighting, ADA restroom, removal of existing handball courts and replacement with pickleball courts, and dog park. Additional LED lighting will provide for a more efficient cost effective way for lighting soccer fields. An additional ADA restroom closer to the soccer fields is planned. A destination playground will be included in the overall concept. However, it is recognized within the different category of Recreational Buildings & Playgrounds (NR01492).

Rationale

Lakewood Ranch Youth Soccer Club and soccer in general have grown to a point that additional field lighting is required in order to avoid temporary lighting solutions that aggravate neighboring communities. The LED lighting will provide for a more efficient cost effective way for lighting the soccer fields. An additional ADA restroom closer to the soccer fields is needed to accommodate park patrons with disabilities. Tennis and handball courts have reached their life-cycle and will be replaced with pickleball. An additional dog park is needed in the area to provide for a safe environment where park patrons can bring their dogs.

Project Title: Lincoln Park Basketball Courts Replacement
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6034503 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 2 Lincoln Park - 17th Street East, Palmetto

Description and Scope

Construct two regulation basketball courts at Lincoln Park. Courts should mirror the existing courts in terms of size, fencing, lighting, benches, trash cans and more, as determined during the design phase. Please consider additional amenities that would add greater value to the overall facility, such as improved backboards, padding, water fountains, parking, LED lights, and more. With the scheduled expansion to the aquatics components at Lincoln Park with a new community pool, the existing basketball courts will need to be removed and replaced at a different location. To minimize those effected, we are requesting the replacement of two basketball courts with lighting be constructed to the Southwest corner of the Lincoln Park property near the tunnel and next to the existing pavilion.

Rationale

With the scheduled expansion to the aquatics components at Lincoln Park with a new community pool, the existing basketball courts will need to be removed and replaced at a different location. To minimize those effected, we are requesting the replacement of two basketball courts with lighting be constructed to the Southwest corner of the Lincoln Park property near the tunnel and next to the existing pavilion.

Category: Sports & Leisure Services **Subcategory:** Parks & Aquatics
Project Title: Parrish Community Park
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6105800 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference: PARKS MASTER PLAN
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 1 12214 US 301 N, Parrish

Description and Scope

Plan, design and construct a park to include a performance pavilion, picnic pavilions, restrooms, parking, walking trails, 20 fitness stations with equipment, boardwalk in wetland and observation platforms, festival seating infrastructure, innovative design park playground for youth and adults, splash pad, site grading and prep, landscaping/turf irrigation, field electrical outlets. Successfully negotiate the land swap/purchase of the Florida Department of Transportation (FDOT) owned property in Parrish (adjacent to the County owned property) for the Parrish Community Park.

Rationale

The Parrish community has expressed interest in adding a large community gathering shelter and grounds for recreation and community events to be paired with Ft. Hamer Road. This project will include the development of the festival grounds with multiple partners and several public/private partnerships.

Project Title: Parrish Community Park - Phase II

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: NR02126 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Parrish Area, Parrish

Description and Scope

Plan, design, and construct Phase II of the Parrish Community Park to include some or all of the following: two youth multi-purpose play fields with natural turf and lighting, irrigation, fencing, parking lot with lighting, disc golf, pump track/skate park, pavilion/restrooms, maintenance building, young adult activity zone, various shade structures, continuation of fitness trail, walk bridges, connectivity from parking lot to school parking lot, perimeter fencing, site grading and prep, stormwater and utilities, landscaping. Also, a competitive lap pool, a separate shallow splash pad with water features. The pool and splash pad may include associated facilities and accoutrements to include locker rooms with showers and restrooms, first aid and lifeguard office, starting blocks, lane lines, lighting, geothermal heating and cooling system, filtration system, deck seating, shade structures, parking lot. FF&E and other appurtenances and amenities required for a functional facility.

Rationale

The need was identified for additional park facilities in north County to provide services to the area residents. With the increase of population in Manatee County and the over usage of parks, pools, and fields, the Parrish Community Park needs are to add a swimming pool, splash pad, youth play fields and other amenities to meet the demand of the growing population.

Capital Improvement Plan

FY2024-FY2028

Category: Sports & Leisure Services **Subcategory:** Parks & Aquatics

Project Title: Premier Sports Complex Swimming Pool

Department: Sports & Leisure Services

Project Mgr: Tom Yarger

Infra.Sales Tax:

Project #: 6093307

Status: Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 5895 Post Blvd, Lakewood Ranch

Description and Scope

Design, permit, and construct three swimming pools: one 25-meter X 50 meter, one 25-yard x 25 meter, and one therapy pool. The pools will also include associated facilities and appurtenances to have a functional facility to include locker rooms with showers and restrooms, first aid and lifeguard office, starting blocks, lane lines, in pool and deck lighting, water heating and cooling system, filtration system, pump house, parking lot, deck seating and shade structures, safety equipment, and FF&E.

Rationale

In a Board of County Commissioners work session in FY18, a need for additional facilities was identified in East County to provide services to area residents. In addition, with a lack of competitive swim lanes throughout the county, this will provide the resources currently lacking. The 127 acre Premier Sports Complex was acquired by the County in FY18. An additional 75 acres on the north side of Premier was approved by the Board and for purchase by the County in FY18 to facilitate this new County complex. The concept of this project is to provide accessible amenities in the east county that will accommodate large group programming and competitive level swimming meets, as well as supplement the Premier Sports Campus.

Project #: 6012629

Status: Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **Y** Project Need: Other Need

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

The project is located on County owned property that was historically used as a borrow-pit and roadway construction debris disposal. The only alternative to the proposed action is to not construct the park. This parcel was initially developed as a golf course that served the community until US 41 divided the neighborhood in half. The surrounding communities have asked for a park at this location and would be disappointed if one could not be developed on this site.

Rationale

The purpose of the project is to construct a public park for the residents of Manatee County. This proposed park is located in one of the County's target areas and will provide recreational facilities for the surrounding low to moderate income communities. This involves the construction of an approximately 11.5-acre park on County owned property located near the intersection of 30th Street East and 8th Avenue East in Palmetto. The park elements include but are not limited to shell trails, playground, play field, pavilions, restrooms, parking, and stormwater ponds.

Project #: 6012626 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

A Community Development Block Grant was previously approved for \$600,000 towards the construction of Phase I. Phase I includes design, permitting, and construction of park amenities including playground equipment, parking lot, pavilion-restroom combination and a recreational trail. Additional CDBG funding (from the 2019/20 Substantial Amendment) in the amount of \$250,000 has been secured which will be used to help fund Phase I as escalating costs have resulted in this project being over budget, as well as fund the removal and replacement of unsuitable material. CDBG funds cannot be used to purchase the playground.

Rationale

The Washington Gardens community has been working for many years to convert the area into a neighborhood park. This is a three phase project to complete construction of a community park serving regional needs over a 88 acres County owned property to be developed as a passive park and environmental preserve. Phase I is for the design, permitting and construction of Park Amenities; Phase II includes environmental mitigation and restoration activities; Phase III (future project) includes development of trails, boardwalks and observation platforms.

Description and Scope

Construction of a playground, two pavilions, parking lot and other park amenities including sidewalks, bike racks, and landscaping. This is the first phase of a three phase project which includes design, permitting, and construction of playground equipment, parking lot, pavilion-restroom combination and a recreational trail. This includes a Community Development Block Grant (CDBG) approved for \$600,001 towards construction of the playground, Shade structure, two picnic shelters, and restrooms as identified in the following projects: 6012618,6012619,6012620,6012621,6012622,6012623,6012624,6012625.

Rationale

The local community has been working for many years to convert this area in to a neighborhood park. This is the first phase of the Washington Park development. The Master Plan identifies the need to provide additional interpretive environmental recreation experiences.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:

LOS/Concurrency: **N** Project Need: Growth

Project Location

Multi-district 605 39th St E, Palmetto

Description and Scope

This project, which is funded with a Community Development Block Grant (CDBG), is in conjunction with the first phase of the three phase Washington Park project. This project includes design, permitting, and construction of a playground as identified in Washington Park Phase I - Park Amenities project 6012611. The Community Development Block Grant (CDBG) was approved for a total of \$600,001 towards construction of the playground, shade structure, two picnic shelters, and restrooms as identified in the following projects:

6012618,6012619,6012620,6012621,6012622,6012623,6012624,6012625.

Rationale

The local community has been working for many years to convert this area into a neighborhood park. This is the first phase of the Washington Park development. The Master Plan identifies the need to provide additional interpretive environmental recreation experiences.

Category: Sports & Leisure Services **Subcategory:** Preserves
Project Title: Robinson Preserve Improvements - Pavilions
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6085216 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 3 1704 99th St NW, Bradenton

Description and Scope

Design, permit and build picnic pavilions following the construction means and methods utilized in the construction of the picnic pavilion installed at the Jiggs Landing Preserve. Fixtures include electrical outlets, overhead ceiling fans (timers), LED lights (timers) and a spigot. Capable of holding picnic tables.

Rationale

The 150 acre expansion to Robinson Preserve will more than double available parking and lead to an associated increase in visitation. To support this visitation the Robinson Preserve currently has only one screened pavilion to host individual and family picnics and retreats. We anticipate a significantly increased demand for this amenity. We are requesting funds to construct new pavilions similar in design to the large picnic pavilion installed at the Jiggs Landing Preserve, with the options of cement flooring, structural screened walls, electric and water service for maintenance.

Project Title: Volunteer/Education Division Pre-Engineered Building
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6085221 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 3 1704 99th St NW, Bradenton

Description and Scope

A pre engineered building to be used as an office for the Volunteer & Education Division, including HVAC, water, electric & utility hook-ups. This office will house the division's 6 full time staff members, and 2 part time staff/interns and will include sufficient office space as well as restrooms, storage and meeting areas. Additional equipment requested includes a shower to allow staff to rinse after aquatic programs, washer/dryer and hookup to wash program supplies, and staff kitchen. The office would need to be connected to the County fiber, present at the Environmental Center, with phone jacks in each office. Communication equipment including PCs, phones, and copier are currently owned by the Division and would need to be relocated to the new office.

Rationale

Due to the increase of memberships at the GT Bray Recreation Facility, the fitness center space needs to be expanded. The Programming, Volunteer & Education Division currently occupies office space next to the fitness center. With the Division relocated to its own office, the fitness center can be expanded into that space to accommodate the increased usage.

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 2 400 Cypress Creek Blvd, Bradenton

Description and Scope

Purchase and install a shade structure over the donated BeStrong fitness equipment. Install turf surfacing, plastic curbing, excavation of existing grass/dirt and installation of the BeStrong equipment.

Rationale

BeStrong is a fitness equipment company based out of Hungary who is looking to expand their production in the US. The company is looking to open a facility in Bradenton and has donated 600-1,100 sq ft of outdoor equipment for one of our parks. The department is recommending this be installed at Tom Bennett Park. Part of the agreement is for Manatee County to provide turf surfacing, plastic curbing, excavation and installation of the BeStrong equipment as well as a shade structure to cover the new equipment.

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 5201 51st St E, Bradenton

Description and Scope

Construction of new restrooms with a concession/storage area. The civil side of this project will require new wet and dry utilities.

Rationale

Establishment of a Master Plan for Braden River to identify phases of improvement. Currently there is not a concession restroom facility to service the heavily used soccer facility at Braden River Park. This will provide the soccer groups with the needed concession and restroom facilities to support theirs and county run programs.

Project Location

District 3 2650 Gulf Drive, Bradenton Beach

Description and Scope

Demolish three and replace one pavilion at Coquina Beach with materials that can withstand the inclement weather and salty air.

Rationale

There are three steel framed pavilions at Coquina Beach. The integrity of the steel beams are compromised and a structural engineer determined that the pavilions are unsafe and are now closed to the public.

Project #: 6007524 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 3 5502 33rd Ave Dr West, Bradenton

Description and Scope

This designated area (approx. 3,500 sf) will be covered in synthetic turf with a rubber perimeter trail surrounding the space with benches and lighting. A large playground structure would be constructed in the center, that is either covered by the existing tree canopies or a shade structure installed to protect youth from the heat and sun.

Rationale

Due to increase use and concerns for safety, a separate playground and outdoor space is needed for internal programs, separate from the public. When not in use for our programs, the space would be available to rent for birthday parties and use by members and guests. Construction of this playground inside the gates of GT Bray has been recommended by Risk Management in support of public safety needs.

Capital Improvement Plan

FY2024-FY2028

Category: Sports & Leisure Services **Subcategory:** Recreational Buildings & Playgrounds
Project Title: John H. Marble Park - Gymnasium Removal/Replacement
Department: Sports & Leisure Services
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6031104 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth, Maintenance

Project Location

District 2 3675 53rd Ave E, Bradenton

Description and Scope

Design and construct a new double Gymnasium + Recreation Center to replace (demo) the existing recreation building. Demolition of existing structures to accommodate the master plan. Install new fencing and new ADA sidewalks to replace non-compliant pathways to provide connectivity of the site. Stormwater management/accommodation for new facility. FF&E as required.

Rationale

John Marble facility has deteriorated over the years. The county took ownership of the facility in the mid 1990's. The park requires significant infrastructure upgrades and facility replacement. The upgrade to this facility will enable the county to provide after-school and health and wellness programming that was offered by the YMCA, but was discontinued due to the economic downturn.

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Stadium locker rooms enhancements to include four (4) team and two (2) referees locker rooms that would include bathroom and shower.

Rationale

The project scope would no doubt fulfill the requests made by clients that bring in large signature tournaments to the county that helps sustain tourism year-round. There would be a substantial savings to clients on an annual basis on temporary facilities, and the county would save money related to special event operation costs. These enhancements would help support our hospitality industry, and appeal to residents since more than half of the events are for local athletes.

Project #: 6093306 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Construct up to 24 pickleball courts, and cover at least up to 10 courts, contingent on the design professionals. Construct a small administration office, with restrooms and the capability to operate a membership based racket facility and aquatics center with fee paying members checking in to use the courts and pool. Lighting, fencing, seating, water fountains, landscaping, sidewalks, a marquee and FF&E are also needed. A shade structure with fans and lighting over at least 10 of the pickleball pods is desired contingent on the design professionals.

Rationale

Premier Recreation Complex adjacent to the Premier Sports Complex. This racket center was envisioned to have a small admin office to accommodate registration of players. The full recreation center was to provide a central building access point providing entry access to recreation rooms for camps, exercise fitness and other social events, a basketball gymnasium and a pass-through entry access point to the competitive swimming pool aquatics center. Other Premier recreation campus amenities included multi-sport athletic fields, a concert or festival event stage and gathering lawn, a dog park and a skate park, and clay and hard tennis courts.

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Design and build out for a 200 space remote parking lot to be designed, permitted, and constructed ahead of the future planned park on the Premier Sports Complex property. This will include a topographic and tree survey for 200 space parking lot to be performed separate of the future planned park. Site lighting is also included for freestanding electrical services not conducive for natural gas utilities.

Rationale

Property Management requested the new remote parking lot to be designed and constructed through a change order to the contractor currently designing and building the new East County Library. This will produce construction mobilization savings by using the same contractor rather than waiting on the future park build out with another contractor.

Description and Scope

Capital Enhancement to include: Purchase and installation of an enclosed multi-purpose permanent framed tent for meetings, registration, dining room and EMT/training room. Included in this project would be climate controlled trailer restrooms, emergency backup generator, parking lot improvements with signage package and lighting, water/sewage, electric hook-up to the tent, fire suppression system.

Rationale

To be competitive with other major sports tourism facilities in Florida, traveling tournament teams require restrooms, storage, meeting and organizational space. This project would fulfill the requests made by our clients that bring in large signature tournaments to our county that helps sustain tourism year-round. These enhancements would help support the hospitality industry, and appeal to residents since events also include local athletes. The project would also add an additional revenue stream for our operation.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference: PARKS MASTER PLAN
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

Creation of an overall site plan for the entire 200 +/- acre County property which could include potential enhancements to the existing Premier Sports Complex, a new East County District park, library and a County Services Center. The site plan is to ensure the proposed uses complement each other, fit on the site and take advantage of potential shared infrastructure opportunities (e.g., stormwater, parking, maintenance facilities, etc.) to maximize the efficiency of the site. The plan will include construction of a portion of the recreation amenities.

Rationale

In a Board work session in FY18, County Administration identified the need for additional facilities in East County to provide services to area residents. The Board and voter approved Infrastructure Sales Tax committed monies for an East County library. The 127 acre Premier Sports Complex was acquired by the County in FY18. An additional 75 acres on the north side of Premier was approved by the Board and for purchase by the County in FY18 to facilitate this new County complex. A site plan is necessary to inform stakeholders, begin the financial planning and permitting process. The site plan will include a phasing plan as it may take many years to construct these facilities.

Project Location

Countywide 2101 47th Terr E, Bradenton

Description and Scope

Upgrade the Computer Aided Dispatch (CAD) System. This includes many software packages and interfaces, server and client hardware, network and storage equipment and any other related hardware components.

Rationale

The CAD software and all related software and interfaces should be upgraded every three to five years to stay up to date with the current vendor software versions. This keeps us on the most current technology and implements all software fixes and modifications necessary to run the system efficiently. The hardware should be replaced every five years to keep it up to date on the newest technology so the system does not fail from dated hardware.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth, Maintenance

Project Location

Countywide 2101 47th Terr E, Bradenton

Description and Scope

Provide an Emergency Services IP Network (ESInet) for 9-1-1 call routing. Assess and correct all GIS data for addressing errors within Manatee County to the National Emergency Number Association (NENA) i3 standards. Upgrade existing Telecommunicator furniture to larger work stations to handle additional CAD and call monitoring screens associated with Next Generation 911 data. Upgrade to existing 9-1-1 capable call handling equipment known as Vesta as technology advances occur for i3 NENA standards.

Rationale

The legacy infrastructure provided by the Local Exchange Carrier (LEC) Frontier is being phased out. Copper phone lines are at end of life and no longer serviceable due to aging technology. In addition, Manatee County upgraded its 9-1-1 call equipment to accept Next Generation 9-1-1 ESInet call routing in 2015.

Trends in personal communications technologies are accelerating the obsolescence of the current 9-1-1 system. The current circuit-switched infrastructure of the 9-1-1 network cannot receive digital data (e.g. text messages, photographs, and video) from the communications devices commonly used by the public. Because these outmoded networks cannot provide the public with access to 9-1-1 services from newer technologies and devices, 9-1-1 networks and call centers must change.

Category: Public Safety **Subcategory:** Building and Renovations
Project Title: PSD Emergency Medical Services Logistics Facility
Department: Public Safety
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6117300 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

District 2 Vicinity of Public Safety Center, Bradenton

Description and Scope

The desired solution includes the land located at the Public Safety Center and constructing a new Logistics Storage Facility/Warehouse Building in Phase II of the EOC Plans (attached). The facility would need to meet the functional needs and increased demands of the Public Safety Department, including the Emergency Medical Services, Emergency Management, Beach Patrol, and Code Enforcement Divisions.

Rationale

The Department of Public Safety requests a dedicated Logistics Facility for Public Safety Operations, including Emergency Management, Emergency Medical Services, Beach Patrol, and Code Enforcement. Emergency planning and response have been enhanced through better coordination and communication among agencies, increased use of technology, risk reduction measures, stakeholder partnerships, and improved training and exercises. Through the Capital Improvement Process, The Board of County Commissioners approved several ambulance additions of four BLS Ambulances and three ALS Ambulances to meet the increasing demand of the community. These additions increase the total daily frontline ambulances to 28.

Department: Public Safety
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: PS02280 **Status:** Requested

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 5 6615 Greenbrook Blvd, Lakewood Ranch

Description and Scope

Purchasing a 1250 KW permanent generator and two 2,500 gallon fuel tanks to be connected to the current Special Needs Shelter at Nolan Middle School. Connections are already in place due to the rental generator currently used.

Rationale

In order to meet the special needs of persons who need assistance during evacuations and sheltering because of physical, mental, or other disabilities, Emergency Management maintains a registry of such persons and, in coordination with the Department of Health in Manatee County, opens a Special Needs Shelter. This shelter is required to have accommodations to full power throughout the shelter. This requirement gives way to the need of a generator which is large enough to provide that power to the building. Currently, the Emergency Management Program contracts a rental agreement for delivery and setup of a generator at \$92,560 annual cost plus additional costs for each activation.

Project #: 6113700 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 2101 47th Ter E. Bradenton, FL 3403

Description and Scope

Phase 2 includes provision and installation of two (2) new 480 Volt UPS systems with total redundancy, per request of PSC and PMD staff for maintenance and testing. This proposal also includes all the electrical work required for installation of the of the UPS systems and new panel UPS-DPA to handle the new redundancy.

Rationale

Phase II of the Replacement of the UPS equipment at the Public Safety Center will allow for the building to become fully redundant prior to next hurricane season. At this time, equipment is being rented, but this would provide a permanent solution.

Project Title: EMS - AMBUbus Mass Patient Evacuation Unit (Bus Ambulance)
Department: Public Safety
Project Mgr: James Crutchfield
Infra.Sales Tax:
Project #: 6100000 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

Countywide Countywide

Description and Scope

This bus will be dispatched on all levels of mass casualty incidents (Levels 1-5) which takes the place of approximately three to eight ambulances. The AMBUbus is outfitted to transport 12 stretcher patients and 16 seated patients. The AMBUbus is deployed with a crew of six (current FTEs) which include an apparatus operator, command position, and four care providers. Additionally, this asset will be utilized to provide rehabilitation for fire fighters at the location of fires or other events. This asset can also be utilized to evacuate large facilities such as nursing homes, assisted living facilities, and hospitals should a life threatening event or disaster occur.

Rationale

As our community continues to grow, so does the demand on our 911 system. Incidents where a large number of patients exist become taxing to our 9-1-1-system and slows our service delivery to emergency calls for service during these times. In the last two years, there were 70 incidents where three or more ambulances were assigned to one event. Additionally, it will be used to rehabilitate firefighters during structure fires. Lastly, we learned from Hurricanes Irma and Harvey that there is a critical need to move large amounts of patients from facilities such as skilled nursing facilities, assisted living facilities, and hospitals. An AMBUbus is the proposed solution to this challenge.

Project Location

Countywide 2101 47th Terrace E, Bradenton

Description and Scope

Engage with the CAD Locution Server to implement the Locution Station Alerting System, which will bring advanced station alerting capabilities and emergency dispatch automation. The Locution server will connect to the new OnCall CAD system and connect via a closed public safety network to all EMS stations. The scope of this project is limited to the Locution server and its capabilities only for Manatee EMS stations.

Rationale

Existing EMS Station alerting systems is end of life, the new Locution Alerting System will replace and enhance current dated system. The scope of this project is limited to the Locution servers and components only for Manatee County EMS, additional compatible Locution receiving devices are at the discretion of fire stations/districts. Locution roughly estimates \$40,000 per station (17 Stations for 20 Ambulances, totaling \$680,000) to provide reliable alerting that is compatible with NFPA221.

Project #: PS01893 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

Countywide 1505 Dam Rd, Bradenton

Description and Scope

Existing EMS Station 5 (Quattlebaum Guest House 1505 Dam Rd) will be relocated to the New Lake Manatee EMS Base, with room for needed EMS expansion as outlined in the 2015 impact fee study. Requesting an Architect to design the EMS Base to house at least 2 Ambulances (covered inside apparatus bay) and room for medical equipment storage.

Rationale

Eastern Manatee County, has experienced significant growth in population due to an increase in approved residential housing. Station 5, the current EMS Station, is in need of drastic rehab, and there is no room for growth. Building a proposed Lake Manatee EMS Base (County acquired land, off Dam Rd) will provide living quarters which includes a dormitory, kitchen, garage (bay space), office (s), and equipment medical storage for the Eastern Manatee County Region. The Lake Manatee EMS Base will house 6-9 EMS employees (expansion) and will operate 24-hours a day 365 days a year, with room to add additional resources as growth occurs.

Project Title: MCSO - Jail - New Medical Wing
Department: Public Safety
Project Mgr: Tom Yarger
Infra.Sales Tax: Y
Project #: 6005233 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
LOS/Concurrency: N Project Need: Growth, Deficiency

Project Location

District 1 14470 Harlee Rd, Palmetto

Description and Scope

If it is not possible to add a second story, it may be necessary to build a wing onto the east end of the building to accommodate additional medical bed space. At the Female Pod/G-1 end of the building, there is the capability to allow for expansion. Any new facility on the current Jail compound would be acceptable.

Rationale

The original POD was built for a bed capacity of 24; our normal medical population is 50 to 60 inmates. The original 1995 building plan for only 24 medical beds was an oversight, based on a jail population of 600. Currently the jail population is between 950 and 1,050 inmates. Additionally, we need to create a mental health ward. There are increasing numbers of inmates with mental health issues, drug abuse and detox needs. Inmates threatening, or indicating attempting suicide are housed in with the medical POD inmates. When juvenile females are brought to jail, they must be housed in Medical because we do not have bed space for them to house them separately from adult inmates as required.

Project Title: Moccasin Wallow Rd EMS Station w Ambulance
Department: Public Safety
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6105600 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 1 2950 - 3010 Moccasin Wallow Road, Palmetto

Description and Scope

Construct a new EMS Base to meet functional needs and increased demands of the emergency medical services division. The current EMS Station 10 can be utilized as a standard footprint for this station location. The EMS Base will need to have the ability to house 6 employees (2 ambulances) full time with sufficient parking for shift change (at least 12 parking spaces). This property must allow access for emergency vehicles 24-hours per day 365 days-per-year.

Rationale

Northern Manatee County has experienced a significant growth in population. Public Safety's Emergency Medical Services (EMS) Division continues to struggle to meet the demands of a rapidly growing community, despite the recent EMS System redesign. Adding a 24-hour ambulance and EMS Base to this area of the county will assist with the increasing call volume to ensure current level of service remains uninterrupted.

The current service area for Northern Manatee County is covered by two Ambulances

- Alpha 20 - at Parish Fire Department
- Alpha 18 - at North River Fire Station 2

Through a recent property management land purchase, the desire is to build a new EMS Base and add a 24-hour ambulance. The EMS Base will provide living quarters including a dormitory, kitchen, garage (bay space), office(s), and equipment medical storage for the North County Region.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth

Project Location

Countywide 11721 69th St E, Parrish

Description and Scope

Existing EMS Station 20 (Parrish Fire 12132 US 301 N. Parrish FL 34219) will be relocated to this facility, with room for future planned expansion. Certain internal renovations will be required to retrofit the existing facility to house EMS operations. Property Management will manage all construction renovation activities to include a parking pad for employee personal vehicles, covered parking for at least two ambulances and a supervisor vehicle, inside renovations for crew rest areas, office space and medical equipment/medication storage.

Rationale

Northern Manatee County has experienced a significant growth in population due to an increase in approved residential housing. The current service area for Northern Manatee County is covered by one Ambulance (Alpha 20), which is housed at Parrish Fire Department. The North County EMS Base will provide service coverage to Parrish both East of Highway 301 and North of State Rd 675. There are several approved new residential and commercial developments that will increase the future demand for EMS services. For this reason, it will become necessary to obtain space to add additional ambulances to this area of the County, and to ensure current level of service remains uninterrupted.

Department: Public Safety
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6098700 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 3 To be determined

Description and Scope

Purchase land and construct a new EMS Station or purchase an existing building and renovate the structure to meet functional needs of an EMS Station. If land is purchased, the acreage required will not exceed one acre. If constructing the station new, the structure shall be of similar size to a three bedroom two bath house. Attached to the structure, shall be three drive through bays. Parking shall be sufficient for three ambulances and associated crew. The location of this facility shall be within a one mile radius from the current station location. There must be suitable access for emergency vehicles 24 hours per day 365 days-per-year.

Rationale

EMS Station 10 is currently located at the City of Bradenton Fire Station, 2901 59th St W. Manatee County and the City of Bradenton entered a shared space agreement on May 11, 2010. The Public Safety Department was contacted in the month of October by the City of Bradenton Fire Department to provide notice of the reconstruction of their Station 3. The City has given a 12-18 month time estimate to vacate the existing station. EMS is required to find an alternative space to locate an ambulance. It is desired to purchase land and build, a 2nd alternative would be to purchase a building and renovate for EMS usage.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth, Deficiency

Project Location

District 2 SR64 at Lena Road, Bradenton

Description and Scope

Move MCSO Fleet Facility Operations upon locating a new site and construct a larger fleet maintenance facility than is currently being utilized.

Rationale

The current Fleet Services Facility is small, out dated and is uneconomical to continue to do more than minor repair to keep vehicles in operation. The property is also too small to allow expansion of the facility and there is not enough area to park vehicles staged for repair. Operations will be more cost effective once upgraded with centralized location.

Project Location

District 3 3500 9th Street West, Bradenton

Description and Scope

Construct a 45,000 square foot two story building adjacent to the Child Protection Investigation Division (CPID) office building located at 3500 9th Street West, Bradenton. The building should have freight elevator and ability to add floors in future and meet hurricane requirements. The building would also house the Crime Scene Unit, Fingerprint Unit and Chemistry Lab.

Rationale

The Manatee County Sheriff Office (MCSO) Operations Center facility currently has space allotted for the storing and preserving of property and evidence. Projections for future needs show the inability to store, maintain and process evidence. Construction of an additional building as requested is a priority to comply with Florida State Statutes.

Comprehensive Plan Information

CIE Project: Y Plan Reference:
LOS/Concurrency: Y Project Need: Growth

Project Location

District 5 5895 Post Blvd, Bradenton

Description and Scope

The building previously occupied in the Lakewood Ranch area had to be closed due to structural issues which impacted the citizens of the Lakewood Ranch area. The growth in the eastern and northern portions of Manatee County has been non-stop and calls for service in these areas continue to rise on a yearly basis due to said growth. The construction of a 5,000 sq ft substation in the Lakewood Ranch area will be of great service to the citizens who reside and work in that area of the county. A new office location in that area of the county would provide much needed MSO presence in the area.

Rationale

The building the Sheriff occupied in Lakewood Ranch became a structurally unsound and had to be vacated. The personnel housed in that building were relocated to various other MCSO locations throughout the county. The closing of this location impacted the Lakewood Ranch community whose residents regularly visited this location for various law enforcement matters. With the continuing growth of the northern and eastern portions of the county, more personnel are being assigned to these areas. The growth of the county has already justified the need of a 5,000 sq ft substation in this area to better service the needs of the county's citizenry.

Project Mgr: John Hamel
Infra.Sales Tax:
Project #: 6117500 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

Countywide 1801 5th Street West, Bradenton

Description and Scope

The downtown "Main" P25 Radio site next to the parking garage needs to be replaced and commissioned before the current site is decommissioned so construction can be performed on the existing parking garage. This project will include, but is not limited to engineering, permitting, fiber installation, construction and equipment necessary to support the new radio tower.

Rationale

When Manatee County's new Motorola P25 Public Safety Radio System was commissioned, which supports over 5,000 Public Safety subscriber radios spanning across 51 agencies with the majority of those users being emergency workforce personnel. The system is comprised of 10 radio tower sites strategically located across the County to provide optimum radio coverage to our end users. These sites consist of 200' to 250' free standing Cat 5 rated towers for our site antennas and microwave dishes. Cat 5 rated shelters to house the radio equipment along with a back-up generator at each site. The sites were designed for maximum uptime and/or accessibility. If a site would go down, we would lose Public Safety communications in that given area. The downtown "Main" tower site provides critical lifesaving communications for the City of Bradenton, City of Palmetto, EMS, MCSO, etc. in our downtown Bradenton area. This critical resource cannot be disrupted.

Project Location

Countywide Countywide

Description and Scope

The County's technology infrastructure relies on servers, storage and networking running in two data centers. There are more than 400 virtual servers, dozens of databases, and hundreds of applications and interfaces. This project upgrades the equipment that provides these services.

Rationale

To ensure reliable operation and expected performance levels, equipment must be replaced/upgraded at the end of its service life. Equipment will provide redundancy and performance to support continued growth and demand for resources.

Project Location

Multi-district Countywide

Description and Scope

Full Public Safety/Emergency redundant communications for North Link, South Link, West Link, Manatee County Jail and Port and Water Treatment Plant - including Bournside to have a seamless approach to emergency efforts.

Rationale

This project focuses on public safety by affording the county with dual-path connectivity between two operational Data Centers. The first is located within the Administration Building in downtown Bradenton while the second is with the Public Safety Center. By providing the missing links or spokes to the fiber loop, it postulates the safety and crucial communications during a declared event. The impact on our citizens could be a life-saving endeavor.

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

Countywide CountyWide

Description and Scope

The scope of this project will cross over between HR, Payroll, IT and each Department across the organization. HR and IT have been working with a consultant to identify the needs of the County for this technology and the next step in the process would be to move to an RFP where vendors would compete for our business. The project would then move towards implementation where work would be done to integrate the One Solution payroll system with the HRIS to allow for daily data interfaces between the 2 systems. The HRIS would be a cloud-based system and would not require hardware from our IT Department.

Rationale

The rationale for this project is that an HRIS system is the foundation of any mid-size to large employer organization. It is as critical to the functioning of an organization as a budget system and a payroll system. This project must be completed in order to support our current state of over 1800 employees and reduce threats and risks that exist today due to lack of integration with the Finance Enterprise solution (ERP).

Project Location

District 2 15th St E at 57th Ave E, Bradenton

Description and Scope

Design, permit and construct a roundabout at the intersection of 15th Street East and 57th Avenue East.

Rationale

The intersection, which is currently signalized, is part of 15th Street East Project Development and Environment (PD&E) study and has been identified as feasible location for a roundabout. The segment comprising this intersection has been the County's MPO priority project for several years. The project will improve intersection safety and efficiency.

Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax: Y
Project #: 6048561 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 2 17th St E at US 41, Palmetto

Description and Scope

Design and construct an eastbound right-turn lane at the US 41 and 17th Street East intersection, construct pedestrian ramps, crosswalks, and utility relocation. Relocate/modify traffic signal infrastructure and operations to accommodate these changes.

Rationale

This area of the County continues to experience steady growth and is expected to continue this trend in the future. Due to the continuing expected growth, the intersection of US 41 and 17th Street East is in need of additional capacity. Construction of an eastbound right-turn lane at the existing signalized intersection for operation and safety will increase intersection capacity and separate conflicts between right turning vehicles and through traffic.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: 43rd St W at Manatee Ave Intersection Improvement Project
Department: Public Works
Project Mgr: Marcenal Joseph
Infra.Sales Tax: Y
Project #: 6112460 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 3 43rd St W at Manatee Ave W, Bradenton

Description and Scope

Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. The design should account for the future 4 lanes of the south leg of the intersection. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.

Rationale

The operation of the intersection for northbound and southbound left turns is not ideal. This project will analyze the intersection operation; determine recommended improvements; and design, permit, and construct the recommended improvements. This project will improve the capacity and operational efficiency at the 43rd St W and Manatee Avenue signalized intersection.

Category: Transportation **Subcategory:** Intersections
Project Title: 44th Avenue E and Wood Fern Trail Intersection Improvements
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02279 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 44th Avenue E and Wood Fern Trail, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structure with pedestrian crossings on all legs, add/lengthen turn lanes, install non-intrusive detection system, CCTV camera, MVDS and install fiber-optic connection (from Lakewood Ranch Boulevard to White Eagle Boulevard) to establish communication with the Traffic Management Center.

Rationale

The intersection of 44th Avenue E and Wood Fern Trail currently operates under Stop-control for the side street approaches (Wood Fern Trail/Great Park Boulevard). With 44th Ave E now extended further east up to Bounneside Boulevard, combined with major developments near this intersection, including elementary and middle schools, there has been a steady growth of traffic in the area and this growth is expected to continue in the future. The traffic signal is expected to improve the overall operations and safety for all users. In addition, including ATMS infrastructure such as fiber, CCTV camera and MVDS to provide connection back to the Traffic Management Center and to enable better operational and monitoring capabilities.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 4 53rd Ave W and 30th St W, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structure with pedestrian crossings on two legs and implement Flashing Yellow Arrow (FYA) for EB movement, install non-intrusive detection system and a CCTV camera, resurface all approach lanes and install appropriate signing and pavement markings.

Rationale

53rd Ave W is a thoroughfare with an Average Annual Daily Traffic (AADT) of over 23,000 vehicles per day (vpd), and a designated Evacuation Route. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the area. This span-wire intersection is within the Mast-Arm Boundary Map defined by FDOT, which states that signals within this boundary are to be supported by galvanized mast-arm structure to withstand possible high winds from the coast. Staff recommends upgrading the signal with mast-arm supports along with pedestrian crossing features. In addition, this project includes upgrading the existing loop detection system to non-intrusive detection system and addition of a CCTV camera to enhance traffic operations and monitoring capabilities.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 4 53rd Ave W and 34th St W, Bradenton

Description and Scope

Traffic Signal and pedestrian upgrades to add separate ADA ramps in each corner, special emphasis crosswalks, implement LPI, upgrade intersection lighting, implement Flashing Yellow Arrow (FYA) for EB/WB movements, and RT overlap phasing for NB, SB, and EB movements.

Rationale

53rd Ave W is a designated Evacuation Route while 34th St W is thoroughfare that connects 53rd Ave W to two major arterials, Manatee Avenue and Cortez Road. As 53rd Ave W is one of the major routes providing connection to the beaches, this corridor experiences significant traffic through most part of the year, especially during weekends. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the vicinity. Staff recommends upgrading the traffic signal with the recommended safety enhancements including pedestrian ramps and crossing features.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: 53rd Ave W and 36th St W Intersection Improvements
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02273 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 4 53rd Ave W and 36th St W, Bradenton

Description and Scope

Traffic Signal and pedestrian upgrades to add separate ADA ramps in each corner, special emphasis crosswalks, Leading Pedestrian Interval implementation with overhead blank-out signs, upgrade intersection lighting, implement Flashing Yellow Arrow for all left-turn movements, and RT overlap phasing for exclusive right-turn movements. Construct current standard school zone flasher assemblies adjacent to this intersection. Additionally, traffic signal upgrades will include new internally illuminated signs with block numbers, upgrade detection to non-intrusive radar detection system, and provide Next Signal Guide Signs on 53rd Avenue W approaches.

Rationale

53rd Ave W is a thoroughfare with an Average Annual Daily Traffic of over 23,000 vehicles per day, and a designated Evacuation Route. As it is one of the major routes providing connection to the beaches, this corridor experiences significant traffic through most part of the year, especially during weekends. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the area.

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: 53rd Ave W at US 41
Department: Public Works
Project Mgr: Daniel Garner
Infra.Sales Tax: Y
Project #: 6048562 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 4 53rd Ave W at US 41, Bradenton

Description and Scope

Design and construct an eastbound right-turn lane at the US 41 and 53rd Avenue West intersection, construct sidewalk, pedestrian ramps, crosswalks, drainage and utility relocation. Relocate/modify traffic signal infrastructure and operations to accommodate these changes. This improvement has been identified as a background improvement needed to achieve adopted levels of Service (LOS) for development in west County.

Rationale

This area of the County continues to experience steady growth and is expected to continue this trend in the future. 2018 county crash rates indicate the intersection of US 41 and 53rd Avenue West has the highest crash rate in the county. Due to the continuing expected growth, and high rate of crashes, the intersection of US 41 and 53rd Avenue West is in need of safety and operational improvements. This corridor also provides an alternate east-west route to Cortez Road. Construction of an eastbound right-turn lane at the existing signalized intersection for operation and safety will increase intersection capacity and improve safety by separating conflicts between right turning vehicles and through traffic.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: 59th Street W at Manatee Ave - Turn Lane Improvements
Department: Public Works
Project Mgr: Jerry Varghese
Infra.Sales Tax:
Project #: 6108361 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 3 59th Street W at Manatee Ave W, Bradenton

Description and Scope

Design, permit, and construct an additional southbound left turn lane on 59th Street W, potentially a dedicated southbound right turn lane, and signal improvements to accommodate northbound and southbound dual left turn lanes. The design phase should include evaluating whether to construct a dedicated southbound right turn lane or if the combined through/right turn lane option is preferable. Design to include pedestrian/bicycle and stormwater improvements where applicable. Modification of existing approach lanes, as needed, to accommodate the additional turn lanes. One steel mast arm (single arm) assembly will need to be relocated/replaced. Land acquisition will be required.

Rationale

Turn lane improvements are desired at the 59th Street W and Manatee Ave intersection to improve traffic circulation. This is in addition to and will compliment the 59th St W Cortez to Manatee Ave (CIP Project #6108360) widening project. Project will include signal improvements associated with proposed dual northbound left turn lanes included with the 59th St W Cortez to Manatee Ave project to maximize intersection efficiency. These improvements are expected to improve the level of service at the intersection.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 69th St E at 60th Ave E (Buffalo Rd) Intersection, Palmetto

Description and Scope

This project is for intersection improvements at 60th Ave E (Buffalo Road) and 69th St E. Whereas, Segment 2 includes intersection improvements at 60th Ave E at Mendoza Road.

Rationale

This project will improve the capacity and operational efficiency of 60th Ave E (Buffalo Road) and 69th St E intersection. With the planned connection of 60th Ave E (Buffalo Road) to the south and increased development in the area, the signal and turn lane improvements for the road network to function at the desired level of service. The improvements for this project are currently included in project #6083160 60th Ave E - US 301 / Outlet Mall Entrance. This segment of the existing project will have a different construction schedule thus is being separated out as a standalone project. These improvements are currently referred to as Segment 3 of the 60th Ave E - US 301 / Outlet Mall Entrance project.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: 69th Street E and Erie Road
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax: Y
Project #: 6048461 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 1 69th St E and Erie Rd, Parrish

Description and Scope

Prepare traffic operational analysis to determine the appropriate type of traffic control (Traffic Signal or Roundabout). Design and construct interaction operational and safety improvements at the 69th Street East and Erie Road intersection.

Rationale

69th Street East and Erie Road are both classified as thoroughfare roadways within the County's Comprehensive Plan. Under the existing conditions, the intersection of 69th Street E and Erie Road is stop-controlled for the southbound (69th Street E) approach. During the peak periods, the intersection does not operate efficiently as southbound traffic experiences high delays due to increased traffic volume along the Erie Road. There have been a steady growth of traffic in the area and this growth is expected to continue with the ongoing residential developments and new schools in the area. Staff is proposing to evaluate and install either a traffic signal or roundabout at this location. A traffic operational analysis will determine the most effective form of traffic control at this intersection. The selected traffic control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in the vicinity of the new schools and residential developments.

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: CR 675 at Rye Road Intersection Improvements
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02263 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 CR 675 at Rye Road, Parrish

Description and Scope

Design and construct a span wire traffic signal at the CR 675 and Rye Road intersection, add/lengthen turn lanes, intersection lighting, construct pedestrian ramps and crosswalks. The traffic signal will be a diagonal span wire design and provide wireless communication to connect traffic signal to the County's central signal system software.

Rationale

Under the existing conditions, the intersection of CR 675 and Rye Road is stop-controlled for the northbound and southbound (Rye Road) approaches. There has been a recent increase of angle type crashes at this intersection. As the area continues to develop and experience growth, the side street traffic is expected to experience higher delays due to increased traffic volume along CR 675. Due to traffic operations and safety at this intersection, staff recommends installing a span wire traffic signal with turn lane improvement, intersection lighting along with pedestrian crossing features.

Project #: 6076861 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

Multi-district Cortez Rd-43rd St W, Bradenton

Description and Scope

Construct a separate northbound right turn lane and southbound right turn lane and extend the existing northbound and southbound left turn lane on 43rd St W at Cortez Rd. The funding shown here is the County's matching funds for the State's Transportation Regional Incentive Program project (State FPN 437145-1).

Rationale

This overall project is expected to improve the capacity and operational efficiency of the existing 43rd St W at Cortez Rd signalized intersection.

Infra.Sales Tax: Y
Project #: 6105160 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth, Deficiency

Project Location

District 5 52nd Place E and 73rd St E, Bradenton

Description and Scope

Reconstruct median at the 52nd Place E to restrict the left out movements and construct a roundabout at the 73rd Street E intersection.

Rationale

Creekwood Boulevard at 52nd Place E has a full median opening that serves the shopping center to the east of Creekwood Boulevard. During the peak periods and peak season, traffic has been observed to queue from the SR 70 intersection to the 52nd Place E intersection. Also, traffic is observed to queue on the east leg of 52nd Place E to wait for a gap in the traffic on Creekwood Boulevard. The conflicts create operational and safety concerns at and in the vicinity of this intersection. Due to the proximity of the Creekwood Boulevard and 52nd Place E intersection to the SR 70 intersection, a traffic signal is not feasible. Staff recommends restricting the left out movements at the 52nd Place E intersection and constructing a roundabout at the 73rd Street E intersection. This will allow to separate the conflicting movements at the 52nd Place E intersection and provide a safer alternative to access SR 70 from Creekwood Boulevard.

Project #: 6080560 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 4 Honore Ave at Cooper Creek Blvd

Description and Scope

Install traffic signal with mast arm supports and pedestrian accommodations, provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices and construct exclusive southbound left turn lane, northbound right turn lane and a westbound left turn lane.

Rationale

This intersection was adopted by the Board of County Commissioners as part of the Infrastructure Sales Tax Transportation Intersection Improvements. Traffic Engineering staff conducted a traffic signal warrant study at this intersection. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met. Currently, this intersection operates under stop control for the west approach. Based on the result of the study and field observations, an installation of a traffic signal with pedestrian accommodations, construction of an exclusive southbound left turn lane and northbound right turn lane on Honore Avenue and construction of an exclusive westbound left turn lane on Cooper Creek Boulevard are recommended for the is intersection. The proposed project will also install fiber optic communication and other related infrastructure to connect and monitor the signal from the Regional Traffic Management Center.

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 4 Honore Avenue at Old Farm Road, Bradenton

Description and Scope

Design and construct a roundabout at the Honore Avenue and Old Farm Road intersection.

Rationale

Honore Avenue and Old Farm Road are classified as thoroughfare roads within the County's Comprehensive Plan. Under the existing conditions, the intersection of Honore Avenue and Old Farm Road is controlled by stop signs for all the approaches. During the peak periods, the intersection does not operate efficiently as the traffic entering the intersection has to stop before proceeding. There have been a steady growth of traffic in the area and this growth is expected to continue with the ongoing residential developments in the area. Staff is proposing to install a roundabout at this location which expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists.

Project Location

District 5 Lakewood Ranch Blvd at East Manatee Fire District Station 1, Bradenton

Description and Scope

Design and construct an emergency traffic signal with mast-arm structures and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

Lakewood Ranch Boulevard is a County Thoroughfare. There has been a steady growth of traffic in the area and is expected to continue with the ongoing growth throughout the county. As the area continues to develop and experience growth, gaps in traffic are becoming less adequate to permit the timely entrance of emergency vehicles. Staff recommends installing an emergency-vehicle traffic control signal to allow for direct emergency vehicle access to Lakewood Ranch Boulevard at East Manatee Fire District Station 1 egress only intersection.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Lakewood Ranch Blvd at Water Lily Way/Balmoral Woods Dr, Bradenton

Description and Scope

Install traffic signal with pedestrian accommodations with mast arm supports and Advance Traffic Management System (ATMS) devices. Extend northbound right turn lane and provide pavement markings on eastbound approach for left and right turn lanes.

Rationale

Traffic Engineering staff conducted traffic signal warrant study at this intersection in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met. Currently, this intersection operates under two-way stop control for the east-west approaches. This intersection has experienced a significant increase in traffic since the opening of the Fort Hamer Bridge and overall growth in the east county. Therefore, based on the results of the study and field observations, an installation of a traffic signal with pedestrian accommodations is recommended for this intersection. As part of this project, the northbound right turn lane will be extended to accommodate the existing and expected future traffic and the eastbound approach of Water Lily Way will be restriped to provide left and right turn lanes.

Project Location

District 5 Lakewood Ranch Boulevard at Gatewood Drive, Bradenton

Description and Scope

Design and construct a roundabout at the Lakewood Ranch Boulevard and Gatewood Drive intersection, construct pedestrian ramps, crosswalks with RRFBs on all approaches, resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

With the increase in traffic, a roundabout would provide needed traffic control at this intersection along with implementing a safe systems approach. During the peak periods, the intersection does not operate efficiently as the traffic entering the intersection has to stop before proceeding. There has been a steady growth of traffic in the area and this growth is expected to continue with the ongoing developments in the area. Staff is proposing to install a roundabout at this location which expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Lakewood Ranch Boulevard at Portal Crossing, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structures with pedestrian crossings on all legs, add/lengthen turn lanes, modify median opening north of the intersection, install non-intrusive detection system, CCTV camera, MVDS and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

Access management improvements will consist of construction of raised medians to restrict turning movements within the vicinity of the new traffic signal. Traffic Signal control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area. The proposed project will connect to the existing fiber-optic communication network and provide other Advanced Traffic Management System (ATMS) devices such as a CCTV camera and MVDS to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

With the increase in traffic, a roundabout would provide needed traffic control at this intersection along with implementing a safe systems approach. During the peak periods, the intersection does not operate efficiently as the traffic entering the intersection has to stop before proceeding. There have been a steady growth of traffic in the area and this growth is expected to continue with the ongoing developments in the area. Staff is proposing to install a roundabout at this location which expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: Lockwood Ridge Rd at Shopping Ctr Entrance - Traffic Signal and Turn Lanes
Department: Public Works
Project Mgr: Daniel Garner
Infra.Sales Tax:
Project #: 6099860 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

Multi-district Lockwood Ridge Rd, Bradenton

Description and Scope

Install traffic signal with mast arm supports. Provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices. Includes addition of right turn lane extension in each direction on Lockwood Ridge Road from the new signal at the Shopping Center Entrance in a second phase.

Rationale

Traffic Engineering staff conducted traffic signal warrant study at this intersection (on Lockwood Ridge Road, just south of State Road 70 and at the entrance of Publix/Walmart) in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met due to the reported crashes and traffic volumes. Currently, this intersection operates as a two-way stop control for the shopping center driveways. Based on the result of the study and field observations, an installation of a traffic signal is recommended for this intersection. The proposed project will connect to the existing fiber optic communication and install ATMS related infrastructure to monitor the signal from the Regional Traffic Management Center.

Project #: TR02278 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 4 Lockwood Ridge Road at 61st Ave E, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structures with pedestrian crossings on all legs, add/lengthen turn lanes, install non-intrusive detection system, CCTV camera, MVDS and deploy fiber-optic infrastructure to establish communication with the Traffic Management Center.

Rationale

There has been a steady growth of traffic in the area and is expected to continue with the ongoing growth throughout the county. As the area continues to develop and experience growth, the side street traffic is expected to experience higher delays due to increased traffic volume along Lockwood Ridge Road. Traffic signal control is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area. In addition, this project also includes designing and constructing fiber-optic interconnect communication network from Lockwood Ridge Road along with other Advanced Traffic Management System (ATMS) devices such as a CCTV camera and MVDS to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

Project Title: Player's Drive at Lorraine Road Intersection Improvements and ATMS
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6109060 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Player's Dr at Lorraine Rd, Bradenton

Description and Scope

Design, permit, and construct a multi-lane roundabout at the Lorraine Road/Player's Drive intersection. Roundabout design to include accommodations for pedestrian and bicycle users for all four legs. It is anticipated that land acquisition will be required.

Rationale

Under the existing conditions, the intersection of Player's Drive and Lorraine Road is stop-controlled for the eastbound and westbound (Player's Drive) approaches. There has been a steady growth of traffic in the area and this growth is expected to continue with the ongoing residential developments and new schools in the area. As the area continues to develop and experience growth, the side street traffic is expected to experience higher delays due to increased traffic volume along Lorraine Road. Based on evaluations of different intersection control measures and input from stakeholders, it was determined that a multilane roundabout is warranted. The multilane roundabout is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in this area.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: Port Harbour Parkway at Kay Road
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6104660 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Port Harbour Parkway at Kay Road, Bradenton

Description and Scope

Designed to connect to Kay Road over Cypress Strand Bridge/roundabout at the Port Harbour Parkway and Kay Road intersection, construct pedestrian ramps, crosswalks (with Rectangular Rapid-Flashing Beacons (RRFBs) for a roundabout option), resurface all approach lanes for re-striping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

Port Harbour Parkway and Kay Road are both County thoroughfares. Port Harbour Parkway extension to Upper Manatee River Road was completed recently. With this connection with Upper Manatee River Road, there is more traffic anticipated along Port Harbour Parkway. The intersection of Upper Manatee River Road and Port Harbour Parkway will be signalized soon. Also, as Port Harbour Parkway is going to provide a parallel alternate route to SR 64, it is anticipated to bring more traffic on this corridor. The intersection of Port Harbour Parkway and Kay Road is currently a one-way stop controlled (for Port Harbour Parkway leg). With the anticipated increase in traffic, a traffic signal or a roundabout would provide needed traffic control at this intersection.

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Post Boulevard at 59th Ave E, Bradenton

Description and Scope

Construct a traffic signal with mast-arm structures with pedestrian crossings on all legs, add/lengthen turn lanes, install non-intrusive detection system, CCTV camera, MVDS and deploy fiber-optic infrastructure (from Rangeland Parkway to SR 70) to establish communication with the Traffic Management Center.

Rationale

Surrounded by major generators such as Premier Sports Campus, Lakewood National, Esplanade and other proposed residential and mixed uses such as, East County Library and Aquatic Center, there has been a steady growth of traffic in the area and this growth is expected to continue in the future. Staff is proposing to evaluate and install a traffic signal at this location. The traffic signal is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in the vicinity. In addition, staff recommends including ATMS infrastructure such as fiber, CCTV camera and MVDS to provide connection back to the Traffic Management Center and provide better operational and monitoring capabilities.

Project Title: Rye Road at SR 64 / 158th St E Intersection Improvements
Department: Public Works
Project Mgr: Scott May
Infra.Sales Tax:
Project #: 6115560 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Rye Road at Witt Elementary (158th St E)

Description and Scope

Evaluate, design, permit, and construct a span wire traffic signal at the Rye Road/Witt Elementary intersection and an emergency-vehicle traffic control span wire signal at the fire station utilizing concrete strain poles. Design should have wireless communication with copper interconnection between signals, non-intrusive radar detection system, CCTV camera, Microwave Vehicle Detection System (MVDS), pedestrian improvements, and intersection lighting. Modify the southern school entrance to a right-in/right-out only access and design, permit, and construct as appropriate.

Rationale

The Rye Road/Witt Elementary (158th Street E) intersection is inefficient with the entering traffic. Also, immediately north of the intersection the East Manatee Fire District Station 3 is experiencing less than adequate traffic gaps to take access to Rye Road. Installing a traffic signal control is expected to improve operations and safety for vehicles, pedestrians, and bicyclists. The project will include upgrading the existing emergency warning signs to an emergency vehicle traffic control signal to allow for direct emergency vehicle access to Rye Road.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 SR 64 at 117th Street E, Bradenton

Description and Scope

Design and construct southbound left and right-turn lanes with associated traffic signal upgrades to implement Flashing Yellow Arrow (FYA) for northbound and southbound movements at the SR 64 and 117th Street East intersection. Additional traffic signal indications will be designed to be added to the existing box span wire.

Rationale

SR 64 is one of the major routes within the County and this corridor experiences significant traffic through most part of the year. There has been a steady growth of traffic in the area and this growth is expected to continue with the proposed major developments in the vicinity. Staff recommends upgrading the traffic signal with the recommended capacity enhancements to maximize operations at this intersection.

Project Location

District 5 SR 70 at Uihlein Road, Bradenton

Description and Scope

Design and construct a span wire traffic signal at the SR 70 and Uihlein Road intersection, construct pedestrian ramps, crosswalks. The traffic signal will be a diagonal span wire design and provide wireless communication to connect traffic signal to the County's central signal system software.

Rationale

The Florida Department of Transportation (FDOT) is currently in design of aroundabout at this intersection. County staff had this intersection on a list of a potential traffic signals in the future especially, since Uihlein Road is connected to SR 64. While FDOT staff is formalizing the ultimate roundabout design, County staff have coordinated with FDOT staff and expressed the desire to expedite the installation of a span wire traffic signal to improve traffic operations and safety at this intersection until the ultimate improvements are constructed by FDOT.

Project Title: SR 789 at Broadway - Roundabout

Department: Public Works

Project Mgr: Alex Gonzalez

Infra.Sales Tax:

Project #: 6112260 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 3 SR 789 at Broadway, Longboat Key

Description and Scope

Preliminary engineering has been complete to the point of determining the roundabout is an acceptable and preferred intersection configuration per the Intersection Control Evaluation study. The project includes a single-lane roundabout.

Rationale

Manatee County seeks to provide final design for a roundabout to replace the existing side-street stop-controlled intersection of SR 789 and Broadway in the Town of Longboat Key. Completion of final design will improve the production-readiness of the improvement so the construction phase may favorably compete for funding through Metropolitan Planning Organization processes or for Federal grants.

Project Title: SR70 at Bourneside Blvd Temporary Traffic Signal
Department: Public Works
Project Mgr:
Infra.Sales Tax:
Project #: TR02292 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need:

Project Location

District 5 SR 70 at Bourneside Blvd, Bradenton

Description and Scope

Design and construct a temporary traffic signal at the SR 70 and Bourneside Boulevard intersection, construct pedestrian ramps, crosswalks. Temporary traffic signal will be a diagonal span wire design and provide wireless communication to connect traffic signal to the County's central signal system software.

Rationale

The Florida Department of Transportation (FDOT) is currently in design of a roundabout at this intersection. County staff had this intersection on a list of a potential traffic signals in the future especially, since Bourneside Boulevard is connected to SR 64. While FDOT staff is formalizing the ultimate roundabout design, County staff have coordinated with FDOT staff and expressed the desire to expedite the installation of a temporary traffic signal to improve traffic operations and safety at this intersection until the ultimate improvements are constructed by FDOT.

Project Title: Tuttle Ave at 63rd Ave E (Honore Ave) - Traffic Signal and Intersection Imprv
Department: Public Works
Project Mgr: Tony Russo
Infra.Sales Tax: Y
Project #: 6065961 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 4 Tuttle Ave at 63rd Ave E, Bradenton

Description and Scope

Install traffic signal with mast arm supports, construct northbound, southbound, eastbound and westbound left turn lanes, eastbound and southbound right turn lanes, and extend northbound right turn lane. Provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices.

Rationale

A traffic signal warrant study was conducted at this intersection in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met due to the reported crashes and traffic volumes. Tuttle Avenue extension that was completed recently, now connects University Parkway and SR 70. This new connection between major arterials in the County is adding additional traffic volume through this intersection. Based on the result of the study and field observations, an installation of a traffic signal is recommended for this intersection. As part of this project, left turn lanes will be added on all approaches to accommodate the existing and expected future traffic. The project will also add right turn lanes for the southbound and eastbound approaches and extend northbound right turn lane to accommodate existing and future traffic demands. The proposed project will install fiber optic communication and other related infrastructure to connect and monitor the signal from the Regional Traffic Management Center.

Project Location

District 4 Tuttle Ave at Bridal Falls Ln/Broadway Ave, Sarasota

Description and Scope

Install traffic signal with mast arm supports and pedestrian accommodations and provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices.

Rationale

Traffic Engineering staff conducted a traffic signal warrant study at this intersection in response to direction given at the August 23, 2018 Board of County Commissioners Land Use Meeting for staff to review the intersection for traffic signal warrants. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met. Currently, this intersection operates under two-way stop control for the east-west approaches. Based on the result of the study and field observations, an installation of a traffic signal with pedestrian accommodations is recommended for this intersection. The proposed project will also install fiber optic communication and other related infrastructure to connect and monitor the signal from the Regional Traffic Management Center.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 4 Bradenton

Description and Scope

Design and construct a roundabout at the Tuttle Avenue and Whitfield Avenue intersection, construct pedestrian ramps, crosswalks with Rectangular Rapid Flashing Beacons (RRFBs) on all approaches, resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

Tuttle Avenue Extension project was completed by the County around two years ago. This project added the fourth leg (south leg) to the intersection of Tuttle Avenue and Whitfield Avenue, while connecting residential neighborhoods to the south. There has been an increase in the traffic volume at this intersection since the Tuttle Avenue Extension was completed. This is an intersection of two County thoroughfares currently operating as a four-way stop intersection. There is some crash history at this intersection in the past few years.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: University Parkway at Legacy Blvd/Deer Drive Intersections Improvements
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02287 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need:

Project Location

District 5 University Parkway at Legacy Blvd/Deer Dr, Bradenton

Description and Scope

Construct a traffic signal with upgraded mast-arm structures with pedestrian crossings on all legs, reconfigure intersection to remove negative offset for the eastbound and westbound left-turning traffic, add/lengthen left and right turn lanes on all approaches, upgrade non-intrusive detection system to current County radar detection standard, CCTV camera, and MVDS.

Rationale

University Parkway and Legacy Drive is controlled by a traffic signal. There has been a recent increase in left-turning movement crashes at this intersection. The east-west left-turn lanes have a negative offset restricting driver visibility which may be causing a challenge for the drivers to maneuver. There has been a steady growth of traffic in the area and this growth is expected to continue in the future with planned development further east and south with the recent Waterside development. Staff is proposing to introduce a positive offset for the eastbound and westbound left-turns, add right-turn lanes to the northbound and westbound approaches, and rebuild the existing traffic signal at this location. The geometric improvements and traffic signal rebuild is expected to improve the overall operations and safety of the vehicles, pedestrians, and bicyclists in the vicinity. In addition, staff recommends upgrading the ATMS infrastructure and devices to current standards and maintain connection back to the Traffic Management Center to provide better operational and monitoring capabilities.

Project Location

District 5 Upper Manatee River Rd at Greenfield Plantation/CopperLefe, Bradenton

Description and Scope

Install traffic signal with mast arm supports. Provide fiber optic communication related infrastructure and other Advance Traffic Management System (ATMS) devices.

Rationale

Traffic Engineering staff conducted traffic signal warrant study at this intersection in response to citizen requests. The study included collecting traffic data (volume and crash) and a field review. Pursuant to the Manual on Uniform Traffic Control Devices (MUTCD), the criteria to install a traffic signal were met. Currently, this intersection operates as a two-way stop control and is within a reduced speed school zone for Freedom Elementary and Haile Middle Schools. There is a crossing guard present at this intersection with marked crosswalks. Based on the result of the study and field observations, an installation of a traffic signal is recommended for this intersection. The proposed project will install fiber optic communication and other related infrastructure to connect and monitor the signal from the Regional Traffic Management Center.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth, Deficiency

Project Location

District 1 Verna Bethany Road & SR 70, Bradenton

Description and Scope

Reconstruct Verna-Bethany Rd along a new alignment from SR 70 to the 8200 block of existing Verna Bethany Rd. The new SR 70 connection point will align with Verna Rd on the south side of SR 70. Study is being conducted to determine the most appropriate intersection treatment for the intersection of SR-70 at Verna Bethany Road and/or Verna Road.

Rationale

This project is intended to improve traffic operations for the currently offset intersections of Verna Bethany Rd at SR 70 and Verna Rd at SR 70 in east County. The proposed realignment of Verna Bethany to align with Verna Rd at SR 70 is consistent with the County's adopted Traffic Circulation Plan alignment.

Project #: TR02286 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need:

Project Location

District 5 White Eagle Blvd at Serenity Run/Filmore Run, Bradenton

Description and Scope

Evaluate a traffic signal or a roundabout option, and design and construct a traffic signal/roundabout at the White Eagle Boulevard and Serenity Run/Filmore Run intersection, construct pedestrian ramps, crosswalks (with RRFBs for a roundabout option), resurface all approach lanes for restriping for appropriate lane designation and appropriate signing and pavement markings.

Rationale

White Eagle Boulevard is a County Thoroughfare. The White Eagle Boulevard extension to State Road 64 was recently completed. With this connection with State Road 64, there is more traffic anticipated along White Eagle Boulevard. The intersection of White Eagle Blvd and Serenity Run/Filmore Run is currently stop-controlled for the northbound and southbound (Serenity Run/Filmore Run) approaches. With the anticipated increase in traffic due to the recent connection and as the area continues to develop and experience growth, a traffic signal or a roundabout would provide needed traffic control at this intersection.

Project #: 6113160 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 White Eagle Boulevard at Crossland Trail Intersection, Bradenton

Description and Scope

Design and construct the signalization of White Eagle Boulevard and Crossland Trail intersection, extension of the a southbound right and left turn lane on White Eagle Boulevard, eastbound left turn lane on Crossland Trail and overhead school zone signs as shown in the approved plans. This project has an associated developer's agreement with the terms and conditions related to the reimbursement of 60% of the costs related to these intersection improvements.

Rationale

A new charter school is proposed at northwest corner of White Eagle Boulevard and Crossland Trail and is known as Lakewood Ranch Charter School. Traffic demand is anticipated to increase due to the new school and thus required certain improvements to the intersection. An operational analysis was completed for the school and it was determined that the school's proportionate fair share for the intersection improvements is 38.5%. The County has agreed to participate in 60% of the cost of said improvements with the developer to pay the remaining 40%.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Intersections
Project Title: Wildcat Preserve Roadway
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6054760 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Fort Hamer and Golf Course Rd, Parrish

Description and Scope

Construct left and right turn lanes for the entrances to the Wildcat Preserve development. In addition, a traffic separator for the western most entrance on Golf Course Road, associated stormwater improvements, and pedestrian improvements at the intersection of Ft. Hamer and Golf Course Road will be included. Right-of-way dedication will be paid with impact fee credits.

Rationale

On August 8, 2013, the Board of County Commissioners adopted planning ordinance PDMU-12-18(Z)(P) - Wildcat Parrish, LLC/Wildcat Preserve approving the rezone of approximately 89.72 acres for the Developer to construct 242 single family detached residences and a commercial out parcel for 51,346 square feet of retail and office use. The rezone did not include any transportation stipulations for turn lanes at any access since the traffic impact statement concluded that they were not required as the roadways would continue to operate above the County's adopted level of service. The Final Site Plan was approved on August 1, 2014 without turn lanes based on the traffic impact statement. County staff has determined that turn lanes at each access of the development are now warranted for safety and operational considerations with the increased development in the area. An agreement was negotiated with the Developer to participate in constructing the turn lanes and dedicating the required right-of-way to the County as part of the Wildcat Preserve development project.

Project Mgr: Phil Catalano
Infra.Sales Tax:
Project #: TR02229 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency, Maintenance

Project Location

District 2 27th Street E, Bradenton

Description and Scope

Reconstruct road base and resurface with asphalt from SR 64 to 26th Avenue East. Make sidewalk repairs at selected locations. (1.31 centerline miles).

Rationale

27th St E that connects to SR 64 on the north and 38th Ave E on the south is a heavily travelled road that is in poor condition and services neighborhoods, schools, a golf course, and the Pirate City Spring Training Baseball Complex. The road has deteriorated to an extent that a simple mill & resurface project would not be adequate to rehabilitate the section; therefore, this project encompasses reconstructing the base and then resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road also has sidewalk, the project would make repairs in various locations to cracked and/or shattered slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: 28th Avenue East - US301 to 17th St E
Department: Public Works
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6109260 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 28th Ave E - US301 to 17th St E, Palmetto

Description and Scope

The project plans to relocate the roadway to the east in ROW of the County. The new 24' road will have two different typical sections designated by two phases. Phase 1 from US 301 to the north approx. 800 feet only paving the existing shell roadway and Phase 2 the remaining 1,800 feet north to 17th St E which includes paving, drainage improvements, curb and gutter, and sidewalk. Work will include significant stormwater work to replace road crossings and/or relocate or pipe ditches. This new paved roadway will provide additional access between US 301 and 17th ST E between Canal Rd and Ellenton Gillette Rd.

Rationale

Manatee County intends to relocate and improve a short section of 28th Ave E from US 301 to 17th ST E in the Ellenton/Palmetto area. The existing shell road for half the length of the project lies within the ROW of the FPL railroad. It has been a goal to shift the road to the east for many years. Now, through efforts with new development in the area, the ROW to make this shift to the east has come to fruition. The last piece of the puzzle was the planned location of Manatee County Mosquito Control District facility to this roadway.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 44th Ave E-44th Ave Plaza E - Lakewood Ranch Blvd, Bradenton

Description and Scope

Includes construction of approximately three miles of roadway improvements from 44th Avenue Plaza East to Lakewood Ranch Boulevard. Includes a four-lane divided roadway with sidewalks, bike lanes/multi-use path, and street lighting, an overpass over I-75, and a crossing over a reclaimed water storage lake. This section will include four 11-foot lanes, a 22-foot median, curb and gutter, six-foot bike lanes, a 10-foot multi-use path, and five-foot sidewalks.

Rationale

Provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

Project #: 6086960 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

Multi-district 44th Ave E - 45th St- 44th Ave Plaza E, Bradenton

Description and Scope

Includes construction of 1.3 miles of roadway improvements from 45th Street East to 44th Avenue Plaza East; to include a four-lane divided roadway with sidewalks, bike lanes, and street lighting, and a bridge crossing the Braden River. This section will include four 12-foot lanes, a 22-foot median, curb and gutter, 4-foot bike lanes, and 5-foot sidewalks in each direction. Morgan Johnson Road and Caruso Road will be realigned to connect at a single intersection on 44th Avenue East.

Rationale

To provide an east/west thoroughfare to support anticipated increase in capacity and help maintain the county's adopted levels of service for surrounding roadways including SR 70 and SR 64. This thoroughfare should help alleviate demand at the I-75/SR 64 and I-75/SR 70 interchanges. This project is part of the county's Comprehensive Plan.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 2 51st Ave E - US 301 to 17th St E, Ellenton

Description and Scope

Design and widen 51st Avenue East as a four-lane roadway with closed drainage between US 301 and 17th Street East, including improvements to the existing signalized intersection of 51st Ave E at US 301. The improvement will help achieve and maintain adopted LOS for traffic from existing development and the Ellenton Commerce Park.

Rationale

51st Ave E is an existing component of the planned 49th Ave E collector road spine west of I-75 in north County. Existing operational characteristics and increasing traffic prompt a need to widen 51st Ave E and improve the southbound approach to the 51st Ave E at US 301 signalized intersection.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 53rd Ave W - 14th St W - 43rd St W, Bradenton

Description and Scope

This project encompasses design, bidding and construction of a 5,400 LF of roadway base, asphalt surfacing and repair sidewalks and curbing. This project limit has been changed from 53rd Ave W 14th St W - 43rd St W to 53rd Ave W from 26th St W to 43rd St W. The portion from 14th St W to 26th St W to be constructed under TR01874.

Rationale

Rebase and Resurface 53rd Ave West from 14th Street West to 43rd Street West. Base failures are causing this roadway to fail and cannot be repaired with a typical resurfacing job. This project limit has been changed from 53rd Ave W 14th St W - 43rd St W to 53rd Ave W from 26th St W to 43rd St W. The portion from 14th St W to 26th St W to be constructed under TR01874.

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: 59th St W from Cortez to Manatee Ave
Department: Public Works
Project Mgr: Tony Russo
Infra.Sales Tax:
Project #: 6108360 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 3 59th St W from Cortez to Manatee Ave, Bradenton

Description and Scope

Widen the existing two lane roadway to a four lane roadway with a center left turn lane and/or median from Cortez Road to Manatee Ave (approximately 2.3 miles). The project will also include adding and upgrading pedestrian and bicycle facilities, replacing and upgrading traffic signals as needed to accommodate the widening, and adding lighting. Project will require right-of-way acquisition. Due to right-of-way constraints the improvement will not meet the County's standard typical 4-lane section. This project includes the limits of the former functional improvement project TR01455 (33rd Ave Dr W - Cortez Rd) and the former sidewalk project TR01552 (Sun Chase Apt - Cortez), both of which are no longer needed as their scope is included or made obsolete by the 6108360 project.

Rationale

The road is proposed to be widened from 2 lane to 4 lane to increase capacity. The southern section from 21st Ave to Cortez currently operates below the County's adopted level of service and while the northern sections currently operate above the County's adopted level of service, providing a 4 lane road all the way from Cortez Rd to Manatee Ave will provide improved north south traffic circulation and prepare for future traffic growth.

Project Title: 60th Ave E (Buffalo Road) - Mendoza Road to Buffalo Road Terminus
Department: Public Works
Project Mgr: Jim Shuler
Infra.Sales Tax: Y
Project #: 6083163 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 60th Ave E (Buffalo Rd) - Mendoza Road to Existing Buffalo Rd, Ellenton

Description and Scope

Includes the extension of 60th Ave E (northward) and intersection improvements at Mendoza Rd/60th Ave E. Of the intersection improvements, signalization with lighting and ITS improvements is to be included. Construct the outside two lanes of the future four-lane roadway with bike lanes and sidewalk from Mendoza Rd north to the existing terminus of Buffalo Rd south of 69th St E along with associated stormwater pond siting and improvements. Construct intersection and signal improvements at 60th Ave E (Buffalo Rd) and Mendoza Rd that include: East leg-WB left and right turn lanes; West leg-EB left and right turn lanes, and intersection signalization with lighting and ITS improvements. Project will require land acquisition. Note: engineering costs are not included as the design will be completed under the current project #6083160.

Rationale

Connects Mendoza Rd to 69th St E and signalize the Mendoza Rd intersection which will improve the capacity and operational efficiency of the Mendoza Rd intersection and road network. Improvements are needed for the road network to function at the desired level of service. Improvements for this project are currently under project #6083160 60th Ave E - US301/Outlet Mall Entrance as part of improvements from US301 to 69th St E. This segment of the existing project will have different construction schedule thus is being separated as a standalone project. Improvements are currently referred to as Segment 2 of the 60th Ave E - US301/Outlet Mall Entrance project.

Project Location

District 1 60th Ave E - US 301 to Factory Shop Blvd, Ellenton

Description and Scope

Design and construct additional lanes as required from US 301 to 29th St E with a new signalized intersection at Factory Shops Blvd. Construct additional/missing sidewalks and/or a multi-use path as required from 29th St E to Mendoza Road. This project also includes the design of 2 lanes with bike lanes and sidewalks from Mendoza Road north to the existing terminus coming south from 69th Street East and signalize the intersections of 60th Ave E at Mendoza Road and 69th St E. (Construction of this section will be under separate project numbers.)

Rationale

This project is expected to improve the capacity and operational efficiency of the existing 60th Avenue East at US 301 signalized intersection and 60th Avenue from US 301 to Mendoza Road.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:

LOS/Concurrency: **N** Project Need: Growth, Other Need

Project Location

District 4 63rd Ave E - US 301 to Tuttle , Bradenton

Description and Scope

This roadway widening project will create additional capacity for about 10,000 vehicles per day in a 1.12 mile corridor and help alleviate congestion on parallel sections of SR 70. Although this link is not currently failing, but it is projected to reach capacity in the near future.

Rationale

Manatee county intends to widen this section of 63rd Avenue East to support an anticipated increase in traffic demand and help maintain the county's adopted levels of service for parallel facilities including SR 70. This project is part of the county's Comprehensive Plan Future Traffic Circulation Map and includes construction of approximately 1.12 miles of roadway improvements from US 301 to 39th Street East (Tuttle Avenue). The proposed widening will include a four-lane divided roadway with sidewalks, bike lanes, and street lighting.

Project Title: 75th St W - 20th Ave W to Manatee Ave W
Department: Public Works
Project Mgr: Tony Russo
Infra.Sales Tax:
Project #: 6108260 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 3 75th St W - 20th Ave W to Manatee Ave W, Bradenton

Description and Scope

Widen the existing two lane roadway to a four lane roadway with a center left turn lane and/or median from 20th Ave to Manatee Ave (approximately 1 mile). Add and upgrade pedestrian and bicycle facilities, replace and upgrade traffic signals as needed to accommodate the widening, and add lighting. Project will require right-of-way acquisition. Due to right-of-way constraints the improvement will not meet the County's standard typical 4-lane section.

Rationale

The road is proposed to be widened from 2 lane to 4 lane to increase capacity. The section operates below the County's adopted level of service. The project will tie into the existing 4 lane section at 20th Ave and provide a 4 lane road all the way from Cortez Rd to Manatee Ave which will provide improved north south traffic circulation and prepare for future traffic growth.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: 9th Ave NW - 92nd ST NW - 99th ST NW
Department: Public Works
Project Mgr: Tom Green
Infra.Sales Tax: Y
Project #: 6102460 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 9th Ave NW - 71st St NW - 99th St NW, Bradenton

Description and Scope

This project is to reconstruct the west end of 9th Ave NW from 75th St NW to 99th ST NW and install a multiuse trail on the north side of 9th Ave NW from 99nd ST NW to 75th ST W. The project reconstruction area will include bike lanes, curb, stormwater piping, stormwater ponds and likely wetland mitigation areas and/or flood plain conservation areas. In addition, a five-foot sidewalk will be constructed on the south side of the 9th Ave NW from 75th St NW to 71st St NW, along with drainage improvements to accommodate the installation of the sidewalk.

Rationale

Due to the success of Robinson Preserve and the recent opening of a second access point from 9th Ave NW, the deficiencies of 9th Ave NW from 71st ST NW to 99th ST NW have become glaring. The road in this area is 17-18 feet wide, with no sidewalks and very close ditches on both sides. There is also minimal shoulder between the edge of the road and the ditch. This makes not only access to Robinson Preserve undesirable because the increased traffic has a difficult time passing two cars at a time in this section. Also bike riders and walkers in this area have no extra space or dedicated area to safely use. Sidewalk has been requested by the School Board along 9th Ave NW from 71st St NW to 75th St NW to provide a safe route to school and in response to multiple requests for sidewalks from the general public.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 9th St E - N of US 301, Bradenton

Description and Scope

This project is to work with CSX to replace the traffic wearing surface of the this five lane wide two track crossing just north of US 301.

Rationale

This rail crossing surface has reached the end of its useful life and is degrading rapidly. This crossing is adjacent to the Tropicana processing plant and takes tremendous truck traffic from loaded orange delivery trucks. This route also serves as an easy connection between US 301 and SR 64 for those avoiding the traffic congestion on 1st St. This project is needed soon as experience has shown when rubberized panel crossings such as these show failure they degrade at an alarming rate. This has been shown on the Tallevast Rd crossing repair just last year. It continues to be shown on SR 70 at the Seminole Gulf tracks.

District 1 Buckeye Road, Palmetto

Description and Scope

Conduct preliminary engineering and feasibility analysis related to construction of Buckeye Road as a four lane roadway within constrained right-of-way.

Rationale

This project was identified as a mid- to long range need in the Northwest County Plan to support Tier II development in the Port Manatee area. The project is consistent with the long range need to widen Buckeye Road to four lanes per the County's adopted Traffic Circulation Plan.

Project Title: CR 39 Phase 1 - N of SR 62 to 126th Ct E
Department: Public Works
Project Mgr: Phil Catalano
Infra.Sales Tax:
Project #: TR02234 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need:

Project Location

District 1 County Road 39, Parrish

Description and Scope

Mill & resurface and add shoulders from SR 62 to 126th Ct E. This is Phase 1 of two phases. Phase 2 would be requested in a subsequent year. (2.5 centerline miles).

Rationale

CR 39 is a N/S connecting road which runs from the Hillsborough County line to SR 62. The road is one of only 2 N/S routes in the northeastern rural portion of the county. Traffic consists of both rural (residential) and industrial (mining & steel fabrication plant) traffic. The asphalt in this section is poor, but the base has only localized failures and the roadway is not in need of complete base reconstruction; resurfacing would act as a preventative maintenance treatment in preserving the existing base. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As these sections do not have shoulders, the project would also construct outside shoulders in both directions. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

Multi-district Canal Rd - 17th St E to 37th St E, Palmetto

Description and Scope

Design and construct a functional roadway improvement of Canal Rd from 17th ST E to 37th ST E.

Rationale

The functional improvement will include 11' minimum travel lanes, bike lanes, shoulders, sidewalks and street lighting. To accomplish this scope, significant modifications of the existing ditches and potential installation of storm pipe will be required. This segment is part of an overall Canal Rd improvement, and the exact boundaries may have small sections of overlap depending on the construction order to allow for proper transitions from old to new.

Project Location

Multi-district Canal Rd - 37th St E to 49th St E, Palmetto

Description and Scope

Design and construction of a functional improvement of a segment of Canal Rd generally between 37th ST E and 49th ST E and a realignment of 37th ST E (on the east) north to 39th ST E to form a single intersection.

Rationale

The functional improvement of this segment of Canal Rd from 37th ST E to 49th ST E and the realignment of Mendoza Rd (37th ST E) north to meet 39th ST E at a single intersection with a traffic signal or roundabout. The functional improvements will include minimum 11' travel lanes, shoulders, street lighting and sidewalks and/or a multi-use path on one side in lieu of bike lanes. This segment is part of an overall Canal Rd improvement and the exact boundaries may have small sections of overlap depending on the order of construction to allow for proper transitions from old to new.

Project Location

District 5 SR64 at Lena Road, Bradenton

Description and Scope

Once the acquisition for 160.99 acres of land located at SR64 & Lena Road is completed for the Central County Complex, as part of the Cooperative Agreement, Manatee County will construct the access road and public utilities on the property within three years.

Rationale

Due to increased growth in the Eastern and Northeastern portions of Manatee County's urban service area, the Utilities, Public Works and Sheriff's Departments have experienced increased operating costs and reductions in level of service. All three Departments are experiencing aging infrastructure at their current facilities and have impending need of replacement and expansion. The Central County Complex will provide multiple efficiencies for the three investing Departments.

Project #: TR02230 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency, Maintenance

Project Location

District 1 Clay Gully Road, Myakka

Description and Scope

Reconstruct road base and resurface with asphalt from Communications Tower to Sandy Ct. This is Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year.(2.2 centerline miles).

Rationale

Clay Gulley is the major E/W connector in the southeast portion of the county. The condition of the road has deteriorated to an extent that a simple mill & resurface project would not be adequate to rehabilitate the section; therefore this project encompasses reconstructing the base and then resurfacing with 2" structural asphalt and 1" of friction course asphalt. Several small phases of Clay Gulley have already been reconstructed over the years, and this project would continue that effort. The base reconstruction would also allow the roadway to be widened to allow easier passage of traffic. This estimate includes design, preconstruction service, materials testing, and construction utilizing CMAR.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Duette Rd Bridge over Manatee River, Parrish

Description and Scope

This project begins the process to replace the Duette Rd bridge over the Manatee River. This structure is 60+/- years old. While it is still a very rural road with low traffic volumes, the importance of this road is critical to the economy of the area where the detour is 25 miles or more.

Rationale

The design process must take place first to determine construction as the alignment and construction method will greatly affect the cost. Past discussions and mining permits with Mosaic, there is a potential for a cost share. The design process will include the process to select the alignment and construction method. It must first be determined whether or not to attempt to smooth curve of the road. The process then determines if the road will be closed during construction or if some form of temporary staged construction or route will be used. The results of this project will provide biddable plans and a very accurate construction cost estimate.

Project Location

Multi-district Ellenton Gillette Rd, Palmetto

Description and Scope

Roadway functional improvements to include widening of existing roadway to 24 feet, roadside ditch piping, and shoulder enhancement where necessary. Incorporate ATMS and signal upgrades at Moccasin Wallow Road and 17th Street. Roadway improvements to Ellenton Gillette are to improve traffic capacity that includes signalization and turn lanes at Mendoza Road and bicycle lanes within enlarged roadway area to safely accommodate bicycles for multi-modal transportation.

Rationale

To enhance utilization of existing roadway facility and upgrade to current Florida Department of Transportation (FDOT) design standards.

Infra.Sales Tax: Y
Project #: 6111360 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Erie Rd - 69th St E to Martha Road, Parrish

Description and Scope

Perform a Preliminary Engineering Design to begin land acquisition of Erie Road from 69th St E to Martha Road including a full survey of the corridor, to include the extension of Harrison Ranch Blvd to the north and the Sawgrass Rd connection tie in, to accommodate for future needs of development connections. Project will require right-of-way acquisition and possible eminent domain, therefore, deliverables to include preparation material for legal documentation for eminent domain are to be provided. The Design is to be based on guidance provided in the Florida Department of Transportation (FDOT), as applicable for a non-State roadway. Also, design and construction of roadway improvements from 69th St E to Martha Road based on the preliminary design from the adopted alignment. The project will include widening from two lanes to four lanes, with median, curb and gutter, bike lanes, street lighting and sidewalk along south side of the project.

Rationale

Manatee County intends to widen this section of Erie Road to support anticipated increase in traffic demand, to facilitate traffic operation, vehicular turning movements at Parrish Community High School, to encourage non-motorized mobility options, and help maintain the county's adopted levels of service. This project is part of the county's Comprehensive Plan Future Traffic Circulation Map. The project will include widening from two lanes to four lanes, with median, curb and gutter, bike lanes, street lighting, and sidewalk along the south side of the project corridor limits.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Erie Rd - Martha Rd to US 301, Parrish

Description and Scope

The proposed widening will include four 12-foot lanes, a 22-foot median, curb and gutter, four-foot bike lanes, five-foot sidewalk on the south side, 10-foot multi-use trail on the north side, and street lighting. The intent is to complete this work just before the State College of Florida opens their Parrish Campus at the NW corner of Fort Hamer and Erie Road.

Rationale

Manatee county intends to widen this section of Erie Road along with a multi-use trail to support an anticipated increase in traffic demand, to facilitate traffic operation, vehicular turning movements at Parrish Community High School and to encourage non-motorized mobility options . This project includes construction of approximately 1 mile of roadway improvements from Martha Road to US 301.

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Erie Road - US 301 - 69th Street East - North/South Phase
Department: Public Works
Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6082860 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 Erie Road - US 301 - 69th St E, Parrish

Description and Scope

Roadway functional improvements to include widening to 24', roadside ditch piping, and shoulder enhancement where necessary. The project will include intersection improvements at US 301 and Erie road with an additional through lane proposed southbound and northbound.

Rationale

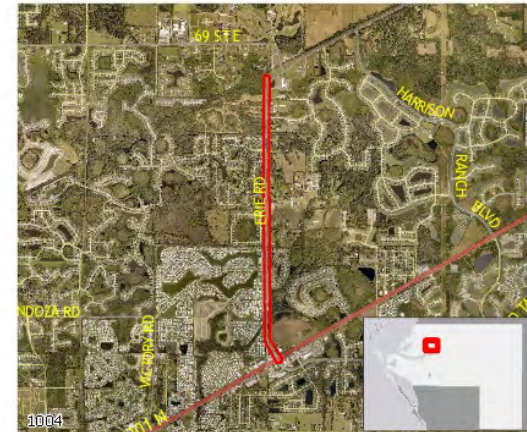

To enhance utilization of existing roadway facility and upgrade to current Florida Department of Transportation (FDOT) design standards.

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Fort Hamer Bridge - 4 Lane
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6118061 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Fort Hamer Bridge, Parrish

Description and Scope

Design and construct a two-lane bridge facility parallel to the existing Fort Hamer Bridge. Design to include pedestrian & bicycle facilities and lighting. It is anticipated that a Project Development & Corridor Study will be completed prior to starting the design.

Rationale

Manatee County intends to construct a two-lane bridge parallel to the existing Fort Hamer Bridge to serve as the southbound lanes for the 4 lanes build out. The existing two-lane bridge currently operates below the County's adopted level of service. The bridge expansion will alleviate existing deficiency as well as provide sufficient capacity to accommodate anticipated traffic growth. The bridge expansion, together with planned and underway roadway widening projects north and south of the existing bridge, will ensure a continuous four lane road from University Parkway to US 301, creating a parallel reliever facility to I-75 and add capacity to a crucial bridge over Manatee River. The State has approved 3 million dollars in design grant funding to support this project.

Project Title: Fort Hamer Rd - Rive Isle / US301 PD & E
Department: Public Works
Project Mgr: Scott May
Infra.Sales Tax:
Project #: 6054768 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Fort Hamer Road (Rive Isle Run to US 301), Parrish

Description and Scope

A Project Development & Corridor Study to expand Ft Hamer Rd from two-lanes to four-lanes. The limits are from Rive Isle Run to US 301. This will include, (1) evaluating left, center, right, and meandering widening options for alignment, (2) evaluating impacts to adjacent properties, (3) determining if the standard typical section or a modified typical section should be used taking into account multi-modal options, stormwater, lighting, and utility needs, (4) construction control line survey/right-of-way map, and (5) additional studies needed to apply for federal grant funding.

Rationale

Widening a section of Ft Hamer Rd to support increased traffic and to improve the level of service. This will consist of construction of about 3.87 miles of roadway improvements from Upper Manatee River Road to US 301 and two more lanes. This is part of the County's Future Traffic Circulation Map and is operating below the adopted level of service. The study will determine the roadway alignment and typical section. Two studies will be completed for the corridor: (1) UMRR to Rive Isle Run and (2) Rive Isle Run to US 301. The project will include additional studies needed to apply for federal grant funding.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Fort Hamer Road - Moccasin Wallow Road to Fort Hamer Bridge - 4 Lane
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6118060 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Fort Hamer Road - Moccasin Wallow Road to Fort Hamer Bridge

Description and Scope

Design and construct the widening of Fort Hamer Road from Moccasin Wallow Road to the Fort Hamer Bridge to create a divided four-lane thoroughfare (approximately 5.2 miles). The typical section will include a grass median, turn lanes (as needed), pedestrian & bicycle facilities, and lighting. Modification of four signalized intersections will be required to accommodate the roadway widening. Project will require right-of-way acquisition.

Rationale

Manatee County intends to widen Fort Hamer Road from two-lanes to four-lanes to support current traffic levels as well as an anticipated increase in traffic demand. The widening limits will be from Moccasin Wallow Road southward to the existing Fort Hamer Bridge, that is planned to be expanded to a four-lane bridge concurrently with this project. The road between Moccasin Wallow Road and 301 was built and designed to accommodate this planned expansion to 4-lanes. This roadway segment is part of the County's Comprehensive Plan Future Traffic Circulation Map. The State has approved 2.5 million dollars in design grant funding to support this project.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Golf Course Rd over Gamble Creek Bridge Replacement
Department: Public Works
Project Mgr: Marcenal Joseph
Infra.Sales Tax:
Project #: 6090960 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Golf Course Rd over Gamble Creek Bridge, Parrish

Description and Scope

Design and construct a new bridge to replace the existing bridge on Golf Course Rd over Gamble Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and providing sidewalks allowing for bicycle and pedestrian traffic to improve safety. The alignment may also shift slightly and the roadway profile will be raised to provide the necessary clearance over the creek for storm elevation. The estimated dimensions of the new bridge are approximately 200 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

This structure on Golf Course Rd is on a main collector route that carries traffic between Ft. Hamer Rd to Rye Rd. Designing and replacing this structure allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance during the early part of anticipated 75 year life of the new structure. The bridge (FDOT# 134021) was constructed in 1965, has a fair sufficiency rating of 71.5 (out of 100), and has past settlement issues. The bridge is also located along a route that is having growth from various developments.

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Kay Rd over Cypress Strand Bridge Replacement
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6109360 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 Kay Rd over Cypress Strand Bridge, Bradenton

Description and Scope

Design and construct a new bridge to replace the existing bridge on Kay Rd over Cypress Strand. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and allow for bicycle and pedestrian traffic to improve safety. Also, will include modifying the roadway profile to decrease overtopping conditions. The estimated dimensions of the new bridge are approximately 45 ft. long x 50 ft. - 8 in. and the design will provide allowances for future widening to accommodate 4 lanes. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

Although the Kay Rd over Cypress Strand is a relatively new bridge, due to the rapid growth in the area, the bridge has become significantly substandard and functionally obsolete. Traffic has increased by about 5000% since about 2006 since Port Harbour pkwy was opened. The bridge has high traffic and pedestrian volume. The bridge was once a dead end location but now has through traffic and is forecast to become a collector route. Designing and replacing this structure allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance with a significant improvement of safety during the early part of anticipated 75 year life of the new structure. The bridge was constructed in 1985, has a fair sufficiency rating of 77.3 (out of 100) but is classified as functionally obsolete. In addition, the bridge is currently classified as a scour critical bridge from the recent unknown foundation scour program.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Lakewood Ranch Boulevard Phase 1 - S of SR 70 to Bullrush Terrace
Department: Public Works
Project Mgr: Phil Catalano
Infra.Sales Tax:
Project #: TR02241 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency, Maintenance

Project Location

District 5 Lakewood Ranch Boulevard, Bradenton

Description and Scope

Mill and resurface roadway with asphalt from S of SR 70 to Bullrush Terrace. Make sidewalk repairs at selected locations. This would be Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year. (2.0 centerline miles).

Rationale

Lakewood Ranch Blvd is a major N/S connector for Manatee County. This section connects the commercial centers of Lakewood Ranch with multiple neighborhoods and major E/W connectors such as SR 70 and University Parkway. The asphalt condition in this section is poor, but the base has only localized failures and the roadway is not in need of complete base reconstruction; resurfacing would act as a preventative maintenance treatment in preserving the existing base for several more years. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road has sidewalk, the project would make repairs in various locations to cracked and/or shatter slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.

Project Title: Lena Road - South of 44th Avenue East to Landfill Rd
Department: Public Works
Project Mgr: Tony Russo
Infra.Sales Tax:
Project #: 6107560 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 5 Lena Rd - S of 44th Ave E to Landfill Rd, Bradenton

Description and Scope

Design and construct Lena Road as a two-lane urban roadway from south of 44th Ave E to Landfill Road. The project is to just make the missing connection and not making improvements to the existing roads to the north and south.

Rationale

This project is a component of the incomplete Lena Rd collector spine east of I-75 in south County. The project is consistent with the long range need to provide a four lane Lena Rd connection between SR 64 and SR 70 per the County's adopted Traffic Circulation Plan. Coupled with the County's programmed project to extend 44th Ave E through this area, completing the Lena Rd connection will improve mobility and accessibility in the I-75 corridor.

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Lockwood Ridge Road Rebase and Resurfacing- 56th Ave Ter E - University Par
Department: Public Works
Project Mgr: Phil Catalano
Infra.Sales Tax:
Project #: 6107960 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 Bradenton

Description and Scope

This project encompasses design, bidding, and construction of a 22,000 LF section of roadway base with asphalt surface, sidewalk and curb repairs, new signage and textured green pavement for motorists and bicycles, and new ITS and traffic signal equipment.

Rationale

Rebase and resurface Lockwood Ridge Road from Publix Shopping Center Entrance (south of SR 70) to University Parkway. Base failures are causing this roadway surface to fail, and it cannot be repaired with a typical resurfacing project. Efforts have been ongoing for several years with making patch repairs at various locations. However, the patch repairs have led to a checkerboard appearance, and it has become apparent that the entire section needs base repair. Included with this base repair and asphalt resurfacing will be pedestrian enhancements (including new signage and textured pavement) and new signalization (including ITS and other upgrades). These pedestrian and signal enhancements and upgrades will enhance safety and reduce maintenance on the signal system.

Project Location

District 5 Lorraine Road, Bradenton

Description and Scope

Mill & resurface from SR 70 to Hidden River Trail. This is Phase 1 of 2 phases. Phase 2 would be requested in a subsequent year. (1.2 centerline miles).

Rationale

Lorraine Rd is a major N/S connector for Manatee County and extends south of the county line into Sarasota County. This section connects the commercial centers of Lakewood Ranch with multiple neighborhoods and major E/W connectors such as SR 70 and University Parkway. Resurfacing would act as a preventative maintenance treatment in preserving the existing base. Prior maintenance projects have resurfaced the road from University Parkway to a point approximately one mile north, and this project would finish the resurfacing effort up to SR 70. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road has a sidewalk, the project would make repairs in various locations to cracked and/or shatter slabs. Pedestrian striping enhancements would also be made. This estimate includes design, preconstruction services, materials testing, and construction utilizing CMAR.

Project Location

District 5 Lorraine Road, Bradenton

Description and Scope

Mill & resurface from Hidden River Trail to 1 mile N of University Pkwy. This is Phase 2 of 2 phases. (0.9 centerline miles).

Rationale

Lorraine Rd is a major N/S connector for Manatee County and extends south of the county line into Sarasota County. This section connects the commercial centers of Lakewood Ranch with multiple neighborhoods and major E/W connectors such as SR 70 and University Parkway. Resurfacing would act as a preventative maintenance treatment in preserving the existing base. Prior maintenance projects have resurfaced the road from University Parkway to a point approximately one mile north, and this project would finish the resurfacing effort up to SR 70. The project encompasses milling and resurfacing with 2" structural asphalt and 1" of friction course asphalt. As this road has a sidewalk, the project would make repairs in various locations to cracked and/or shatter slabs. Pedestrian striping enhancements would also be made. Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Lorraine Rd - SR 64 to 59th Ave E, Bradenton

Description and Scope

This project is part of the county's Comprehensive Plan Future Traffic Circulation Map and includes construction of approximately 2.76 miles of roadway improvements from SR 64 to 59th Avenue East. The proposed widening will include one bridge, four lanes, a median, curb and gutter, bike lanes, sidewalks in each direction, and street lighting.

Rationale

Manatee County intends to widen this section of Lorraine Road to support an anticipated increase in traffic demand and help maintain the county's adopted levels of service for parallel facilities including Lakewood Ranch Boulevard, White Eagle Boulevard, and Uihlein Road.

Project Location

District 1 Moccasin Wallow Road-US 41-Gateway Blvd, Palmetto

Description and Scope

Design and land acquisition for an ultimate build out of a six-lane road. Construct four lanes from US41 to Gillette drive(west of I75), with bike lanes, sidewalks, and street lighting. To realize a cost savings the following two Moccasin Wallow road projects 6093960 (IST TRRI022 - \$6,371,000), and 6094460 (IST TRRI021 - \$7,390,000) have been closed and combined with 6092560.

Rationale

Expand service by improving existing traffic capacity between I-75 and Port Manatee.

Category: Transportation **Subcategory:** Road Improvements
Project Title: Moccasin Wallow Road - Segment 1
Department: Public Works
Project Mgr: Jim Shuler
Infra.Sales Tax: Y
Project #: 6071261 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 1 Moccasin Wallow Road, Palmetto

Description and Scope

This project is Segment 1 of a 3 Segment plan, which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301 and is intended to receive 50% funding from the State of Florida. The roadway enhancement for Segment 1 consists of approximately 5,506 LF from US 301 to 115th Avenue East (Copperstone entrance) on Moccasin Wallow Road to support the County's Long-Range Transportation Plan. This project is intended to collaborate efforts with a partnership of State grant funding of \$7,200,000 for a total project of \$14,400,000. The project, because of cost, is being developed with three segments along the eastern portion of this 4+ mile roadway.

Rationale

Moccasin Wallow is in the very active North County area centered in the northwest of Parrish, wherein thousands of approved single-family homes are under construction. An important east-west connection and evacuation route, this roadway creates an economic opportunity by connecting to the Port of Manatee that will be an important link for Manatee County's economic development. This project leverages a 50% participation by the State of Florida to control the cost to the County. Advancing this project with the outside funds would lay the groundwork for a 4-lane roadway that will act as the backbone for traffic in North County from US41 to US301, similar to University Parkway. This project is not a viable project without the 50% funding participation from the State.

Project #: 6071262 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Moccasin Wallow Road - I-75 - 115th Ave E, Palmetto

Description and Scope

Reconstruct and widen Moccasin Wallow Road to a four-lane divided roadway within a six-lane road right-of-way 115th Ave E to Sawgrass Rd. This will include, 4 travel lanes, bike lanes, sidewalks and street lighting as well as a new signalized intersection at Sawgrass Rd. This project is identified as a concurrency-related improvement, either to mitigate background traffic or project-related traffic impacts, for several developments in the Moccasin Wallow corridor.

Rationale

This project is consistent with the long range need to provide a six lane Moccasin Wallow Rd connection between I-75 and US 301 per the County's adopted Traffic Circulation Plan. Traffic from existing and approved-but-not-yet-built development are expected to exceed the capacity of Moccasin Wallow Rd, and the rural to suburban transition create the need for a multimodal facility. Both of these needs can be addressed by constructing the proposed multi-lane roadway consistent with current County standards.

Project Location

District 1 Moccasin Wallow Road - I-75 - 115th Ave E, Palmetto

Description and Scope

Reconstruct and widen Moccasin Wallow Rd to a four-lane divided roadway within a six-lane road right-of-way from Sawgrass Rd to Buffalo Rd. This includes four travel lanes, bike lanes, sidewalks and street lighting, as well as a new signalized intersection at Carter Rd. This project is identified as a concurrency-related improvement, either to mitigate background traffic or project-related traffic impacts, for several developments in the Moccasin Wallow corridor.

Rationale

This project is consistent with the long range need to provide a six-lane Moccasin Wallow Rd connection between I-75 and US 301 per the County's adopted Traffic Circulation Plan. Traffic from existing and approved-but-not-yet-built development are expected to exceed the capacity of Moccasin Wallow Rd, and the rural to suburban transition create the need for a multimodal facility. Project Title: Moccasin Wallow Road Segment 5 from US 301 to SR 62
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02338 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Moccasin Wallow Road from US 301 to SR 62, Parrish

Description and Scope

Design, permit and construct a four lane section within a six-lane right-of-way for approximately 3,800 L.F. This project will construct the outside two lanes on each side with associated stormwater facilities. The design and permitting should account for the future construction of the inside lane on each side to create a 6 lane facility. The typical section will include a grass median, turn lanes (as needed), pedestrian & bicycle facilities, and lighting. The project will require right-of-way acquisition to accommodate an ultimate 6-lane roadway. This project includes the construction of a 30 +/- acre stormwater storage facility including lake and wetland storage. The stormwater storage facility will be designed to reduce the rate of stormwater discharge to the ditches on the north side of Moccasin Wallow road which convey water to Buffalo Canal.

Rationale

Provide a direct connection from Moccasin Wallow road to SR 62 bypassing US 301 to support anticipated growth. This new roadway segment will help alleviate congestion on US 301. This proposed segment is part of the County's Comprehensive Plan Future Traffic Circulation Map. Currently Map 5 shows this segment as 4 lanes, but it is anticipated that a Map Amendment will update this to a 6 lane segment as it is connecting two 6 lane segments. The associated Buffalo Canal Stormwater Storage will reduce peak flow providing relief to the overall Buffalo Canal conveyance capacity and reduce potential for flooding.

Project #: TR01828 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Countywide Countywide

Description and Scope

The full replacement of curb when the roads are resurfaced.

Rationale

There are a multitude of neighborhoods where the curb is well over 50 years old. This curb is deteriorated to the point that it is no longer able to convey stormwater to inlets. When planning a resurfacing project within a neighborhood, it makes good business sense to incorporate failing curb within the same project since the asphalt is removed to the curb edge. The County would save money by not having to replace asphalt after a curb is removed and replaced.

Project Location

Multi-district County-wide

Description and Scope

This project encompasses paving 53 miles of existing routinely maintained County shell roads with 2" structural asphalt over a 4-year period beginning in FY22. These projects have been identified and will be allocated into individual roadway projects annually as programmed.

Rationale

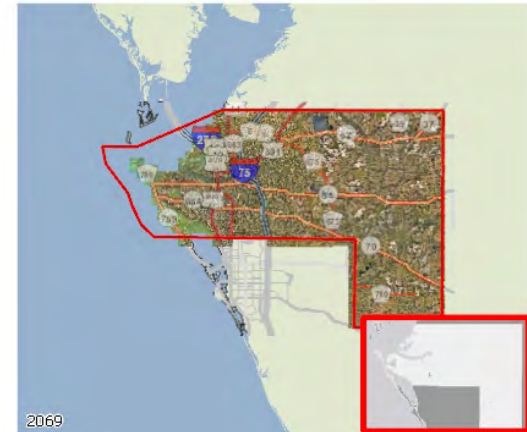

It was requested of Public Works staff to bring back a rural road paving schedule. During discussions, it was determined that public works would prepare a report related to our shell roads maintenance program and the conversion of some, or all, of the existing shell roads to paved roads.

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Saltmeadows - Sand Marsh Ave - Road Improvement
Department: Public Works
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6114960 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct a two-lane boulevard thoroughfare roadway as part of the Saltmeadows development in accordance with the approved construction plans for development. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

A preliminary site plan (PSP) for the Saltmeadows (fka Dakin Property/Crosswind Creek) was approved depicting a local two-lane road bisecting the development property. At the time of construction plan review, staff was in the process of revising the Future Traffic Circulation Maps (Map 5 Series) to include a parallel thoroughfare (NN Road) facility to the east of Spencer Parrish Road from Golf Course Road to State Road 62. The new thoroughfare section requires additional construction costs not attributable or required by the development project. This project is to fund the developer's agreement for the reimbursement of additional construction costs incurred by the developer for the construction of a thoroughfare roadway section instead of a local road.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Summerwoods Roadway Participation Agreement
Department: Public Works
Project Mgr: Brent Stufflebeam
Infra.Sales Tax:
Project #: 6114860 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Moccasin Wallow Road at Sawgrass Road, Parrish

Description and Scope

Design, permit, and construct roadway improvements, with associated stormwater retention, and wetland mitigation that results from the construction of the roadway improvements. Also, design and permit the Army Corps of Engineers permits for the mitigation required for off-site wetland impacts related to Sawgrass Road extending north from Erie Road to the South boundary of the Project. All as described in the agreement.

Rationale

A Local Development Agreement (LDA) with the VK Summerwoods LLC ("Developer") requires certain improvements to be made to address concurrency related to the Summerwoods residential development project ("Project"). The improvements create additional capacity above what is required by the Project and therefore the Developer is eligible for impact fee credits. However, due to the current market conditions, the Developer is unable to utilize all the credits contemplated in the LDA. The LDA requires that the if any impact fee credits are not awarded to the Developer, then the County shall reimburse the cash equivalent not credited for improvements. A roadway participation and reimbursement agreement ("Agreement") is to be used to address the remaining amount of impact fee credits and reimbursement to be provided to the Developer. This Agreement requires the creation of a fully funded capital improvement project to serve as the reimbursement account for the improvements.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Tara Boulevard Complete Street Phase 1 - Stone River Road to Tara Preserve Lane
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02245 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Tara Boulevard - Stone River Road to Tara Preserve Lane, Bradenton

Description and Scope

Construct traffic calming measures which consist of repurposing Tara Boulevard a 4-lane divided roadway from 2 vehicular travel lanes in each direction to 1 vehicular travel lane with a multi-use lane for golf carts and cyclist, separated with raised curb. Intersection improvements constructing two single lane roundabouts at Drewrys Bluff and Tara Preserve Lane and additional traffic control devices provided to enhance pedestrian safety.

Rationale

The existing section of Tara Boulevard from Linger Lodge Road to SR 70 will remain a collector roadway on the Traffic Circulation Plan. Tara Boulevard is designated to be used by golf carts through a County ordinance. This project will accommodate the needs of all road users along Tara Boulevard while preserving the community's character and implement a safe speeds approach with traffic calming measures. These traffic calming measures will consist of repurposing Tara Boulevard from a 4-lane divided roadway, 2 vehicular travel lanes in each direction to 1 vehicular travel lane with separated with raised curb multi-use lane for golf carts and cyclist in each direction from Stone River Road to Tara Preserve Lane.

Description and Scope

Design, permit, land acquisition, and construction of trail projects identified in or consistent with the Trailways Master Plan throughout the County.

Rationale

The County's Trailways Master Plan is anticipated to be completed in the Spring of 2023 and will identify, evaluate, and prioritize a network of proposed trails within the County. This project is for the design, permitting, land acquisition, and construction of the trails identified in the Trailways Master Plan.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Upper Manatee River Road - Mill Creek Bridge 134023
Department: Public Works
Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6030662 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Upper Manatee River Road - Mill Creek Bridge, Bradenton

Description and Scope

Design and construct a new bridge to replace the existing bridge on UMRR at Mill Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths, allow for bicycle traffic and include sidewalks for pedestrian traffic to improve safety. The project will also include modifying/relocating the 42" water main along the south side of the existing bridge. The estimated dimensions of the new bridge are approximately 150 ft. long x 52 ft. - 2 in. Permitting and right-of-way costs will be included as part of the project costs.

Rationale

This area of the County near Upper Manatee River Road (UMRR) continues to experience steady growth and is expected to continue this trend in the future, particularly with the opening of the Ft. Hamer bridge. As part of infrastructure management to improve traffic and pedestrian safety for the roadway, the bridge on UMRR at Mill Creek (Bridge #134023) is to be replaced to accommodate increased vehicular and pedestrian traffic while bringing the structure up to current standards. The bridge currently has a very low Sufficiency Rating of 20.8 (out of 100) and a Health Index Rating of 80.14 (out of 100). In addition, the capacity rating of the bridge is low with the Inventory Rating at 7.9 tons where the rating standard is typically at 36 tons. As such, the bridge requires weight limit posting at 61% of normal legal load.

Project Title: Upper Manatee River Road North of SR 64 to Fort Hamer Bridge
Department: Public Works
Project Mgr: Tony Russo
Infra.Sales Tax:
Project #: 6107760 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 Upper Manatee River Rd N of SR 64 to Ft Hamer Bridge, Bradenton

Description and Scope

Reconstruct and widen Upper Manatee River Road from north of SR 64 to Fort Hamer Bridge from 2 to 4 lanes. This project is identified as a concurrency-related improvement, either to mitigate background traffic or project-related traffic impacts, for several developments in the area.

Rationale

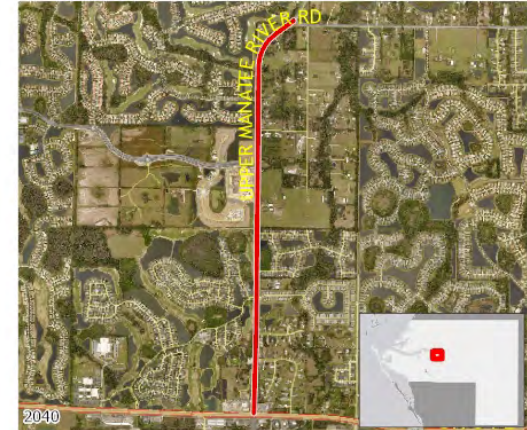

This project is consistent with the long range need to provide a four lane Upper Manatee River Road connection between SR 64 and the Fort Hamer Bridge per the County's adopted Traffic Circulation Plan. Traffic from existing and approved-but-not-yet-built development is expected to exceed the capacity of Upper Manatee River Road. This need can be addressed by constructing the proposed multi-lane roadway consistent with current County standards.

Capital Improvement Plan

FY2024-FY2028

Category: Transportation **Subcategory:** Road Improvements
Project Title: Wauchula Rd Over Young's Creek Bridge Replacement
Department: Public Works Projects
Project Mgr: Jim Shuler
Infra.Sales Tax:
Project #: 6021761 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Wauchula Rd - Young's Creek, Myakka City

Description and Scope

The bridge over Young's Creek on Wauchula Road (FDOT # 134049) was constructed in 1951. Wauchula Road is the easternmost north-south connector between SR 64 and SR 70 in the Myakka area and is integral for local residential, commercial, and agricultural traffic. The detour around the bridge is 18 miles (35 miles when using roads in Manatee County). The structure currently has a low health index rating of 60 (out of 100) and sufficiency rating of 29 (out of 100) Scheduling this structure replacement in the next five years will save on maintenance costs over time and begin to reinvest in the critical infrastructure in the heart of our agriculture business area.

Rationale

This project begins the philosophy of proactive infrastructure management rather than a purely reactive approach. This structure on Wauchula Road is a critical failure point in the road network of the Myakka City area. Designing and replacing this structure prior to an emergency allows all design and engineering cost savings to be applied while still realizing the cost savings from reduced maintenance during the early part of anticipated 50 year life of the new structure.

Project Title: Wauchula Road - Maple Creek Bridge Replacement
Department: Public Works
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: TR02238 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 1 Wauchula Road at Ballard Road, Myakka

Description and Scope

Design, permit, and construct new bridge structure for Wauchula Road over Maple Creek. Project to include modifying existing roadway and bridge profiles above the 100-year floodplain. The estimated dimensions of the new bridge are approximately 60 ft. long x 43 ft. wide. Land acquisition is anticipated.

Rationale

The Wauchula Road Bridge (FDOT# 134054) over Maple Creek, constructed in 1955, is part of the north-south collector thoroughfare (Wauchula Road) between SR 64 and SR 70 in Myakka City and is integral for residential, commercial, and agricultural traffic connectivity. The bridge structure was evaluated to have a low sufficiency and health index ratings of 58 and 56, respectively. Due to the critical bridge rating levels and documented 100-year flood inundation, the bridge is expected to require replacement within the next five years.

Project Mgr: Daniel Garner
Infra.Sales Tax: Y
Project #: 6098660 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 26th Ave E from 27th St E to east of Maple Dr S, Bradenton

Description and Scope

Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation, including a pedestrian bridge across Sugar Creek.

Rationale

The needed sidewalk was a request from the School Board for a safe route to school or multiple requests from the general public or in-fill project within an area that sidewalks already exist.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 26th Ave E near 15 St E, Bradenton

Description and Scope

Funding for an agreement with CSX for CSX to design and construct a new enhanced railroad crossing to improve ride ability and to provide a sidewalk crossing.

Rationale

Manatee County is responsible for costs to improve County roadway crossings over rail road tracks. Based on repeated traffic impacts the crossing degrade with time and certain crossings are identified for improvements as needed. The 26 Avenue East crossing over the CSX railroad is in need of enhancement for rideability and sidewalks. This corridor also serves a school route.

Project Location

District 3 9th Ave NW - 71st St NW - 83rd St NW, Bradenton

Description and Scope

Construct five foot sidewalk along with drainage improvements to accommodate sidewalk installation.

Rationale

Sidewalk has been requested from the School Board for a safe route to school, multiple requests from general public, or infill project within an area that sidewalks already exist.

Project Title: Ballentine Manor Sidewalk and Curb Replacement
Department: Public Works
Project Mgr: Myra Prater
Infra.Sales Tax:
Project #: 6104560 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 Ballentine Manor, Bradenton

Description and Scope

Remove and replace 72,075 square feet of sidewalk and remove and replace 18,127 linear feet of type D curb.

Rationale

Ballentine Manor is one of the oldest sub-divisions in Manatee County at well over 50 years old. The sidewalk throughout the sub-division poses a trip hazard to pedestrians and the curb is beyond repair.

Project #: 6115760 **Status:** Existing

Comprehensive Plan Information

CIE Project: Y Plan Reference:
 LOS/Concurrency: Y Project Need: Growth

Project Location

District 1 Buffalo Road at Bobby Jones Ct, Palmetto

Description and Scope

Design, permit, and construct approximately 4,000 LF of 5' sidewalk along the east side of Buffalo Road from Imperial Cir to Bobby Jones Ct.

Rationale

There is a gap in the sidewalk along the east side of Buffalo Road between Imperial Cir and Bobby Jones Ct. This project will infill the missing sidewalk to improve pedestrian safety and connectivity along the road corridor.

Project Title: Coquina Beach Trail Rehabilitation
Department: Public Works
Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6086365 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Gulf Drive South at Longboat Key Bridge, Bradenton Beach

Description and Scope

Remove the existing trail (approximately 7,500 LF) and reconstruct with 1.5 of asphalt. The scope will include base repair and/or replacement, tree removal where trees are too close to the trail, and installing root barriers to prevent future tree root penetration.

Rationale

The Coquina Beach trail is heavily used by walkers, runners, and beach goers and includes local residents and visitors from around the world. The trail is breaking apart and lifting in areas where the existing tree roots are not contained. The trail conditions are worsening.

Project Title: Erie Road E-W Sidewalk - Phase II
Department: Public Works
Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6108661 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Erie Rd from 69th St E to 113th Ave E, Parrish

Description and Scope

Construct an eight-foot wide sidewalk from 69th St E and 113th Ave E along the north side of Erie Rd with associated stormwater improvements. It is anticipated that a pedestrian bridge/boardwalk will be required in this project.

Rationale

This project is to design and construct eight-foot wide sidewalk along the north side of Erie Road from 69th St E to Copperstone subdivision (113th Ave E), approximately two miles. This project will be Phase II of an eight-foot sidewalk from 69th St E to US 301 along the north side. This phase will provide safe multi-modal connectivity for pedestrians along this corridor.

Category: Transportation **Subcategory:** Sidewalks
Project Title: Samoset Sidewalk Safety Improvements
Department: Public Works
Project Mgr: Andres Hidalgo
Infra.Sales Tax:
Project #: 6043960 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

District 2 Samoset Area, Bradenton

Description and Scope

Repair 30,000 Linear Feet (150,000 square feet) of sidewalk and replace with 5 foot wide sidewalk, raise the elevation of the sidewalk in low lying areas, install ADA ramps at all appropriate locations and install handrail where needed. The project will be completed in seven phases. Phase I - 37th Ave. E. from 9th St. E. to 15th St. E., Phase II - 26th Ave. E. from 1st St. E. to 9th St. E., Phase III - 26th Ave. E. from 9th St. E. to 15th St. E., Phase IV - 26th Ave. E. from 15th St. E. to 27th St. E., Phase V - 30th Ave. E. from 1st St. E. to 9th St. E., Phase VI - 30th Ave. E. from 15th St. E. to U.S. 301, Phase VII 30th Ave. E. from U.S. 301 to 27th St. E..

Rationale

The sidewalks in the Samoset area are obsolete and are in need of safety improvements to include ADA Ramp upgrades and handrail as necessary.

Project Location

District 4 Wilmerling Ave (65th Ave E) from 5th St E to End of Rd, Bradenton

Description and Scope

Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.

Rationale

Sidewalk has been requested from the School Board for a safe route to school, multiple requests from the general public, or infill project within an area that sidewalks already exist.

Enterprise Projects

In the FY24 Enterprise Capital Improvement Plan (CIP) overall projects total \$178,329,823. Total funding for FY24-28 Plan Enterprise projects is \$1,456,729,998, which consists of 66.53% of the total CIP.

Noteworthy highlights in the enterprise section of the CIP consist of the following:

- Potable Water is funded in the amount of \$66,119,448 in FY24, with the remaining funding programmed in the Plan of \$587,638,063. Within the FY24-28 CIP Potable Water consists of 29.86% of total projects. Featured projects include:

- Casa Loma Waterline Replacement project is appropriated for \$1,085,000 with the remaining funding scheduled to be funded in the amount of \$7,233,000 in FY24.
- Gateway East Waterline Replacement project is funded in FY24 in the amount of \$3,683,000 with a total project cost of \$4,214,650 in the Plan.
- Moccasin Wallow Corridor potable water projects are currently funded in the amount of \$15,060,298. \$13,032,000 is planned for FY24. The combined total for the corridor is \$28,092,298.
- Upper Manatee River Road N of SR 64 to Ft Hamer – Potable project was funded in FY23 in the amount of \$396,000 with an additional \$13,908,000 in the FY24 Plan for a total project budget of \$14,304,000.
- Water Treatment Plant Surface Water Chemical Building project for FY24 in the amount of \$1,399,000 and FY25 for \$9,322,000.

- Solid Waste is funded in the amount of \$4,000,000 in FY24, with the remaining funding programmed within the Plan of \$36,799,000. Within the FY24-28 CIP Solid Waste consists of 1.86% of the total projects. Featured projects include:

- New Landfill Site Purchase project is planned to be funded in FY26 in the amount of \$34,110,000.

- Lena Road Stage II Gas Expansion Phase III and Phase IV will be funded in FY24 and FY26 in the amount of \$4,000,000 and \$2,689,000 respectively.

- Stormwater is scheduled for funding in the FY24-28 CIP for .78% of the total projects in the amount of \$17,130,977.

- Bayshore Gardens Community Stormwater Pipe Rehabilitation project is programmed within the FY24-28 CIP in the amount of \$2,772,005.
- Glenn Creek from 15th to Sugar Creek Resort project is appropriated in the amount of \$951,424 with additional funding in FY24 of \$2,171,398.
- Mockingbird Hill / Samoset Canal Improvements at 27th Street East and 34th Ave East project is currently funded for \$650,000 with an additional \$1,270,090 programmed in the FY24 Plan.
- Sunniland and North Palm Lake Pipe Rehabilitation project is appropriated in the amount of \$750,260 with additional funding in FY24 of \$828,000.

- Wastewater is funded in the amount of \$101,086,237 in FY24, with the remaining funding programmed in the Plan of \$643,956,273. Within the FY24-28 CIP Wastewater consists of 34.03% of total projects. Notable projects include:

- 44th Ave E - 44th Ave Plaza E - Lakewood Ranch Blvd - PH 2 Reclaimed and Wastewater projects are programmed in FY24 for \$16,686,860 with current funding of \$9,312,000.
- Southwest Water Reclamation Facility Expansion to 18 MGD project is programmed within the FY24-28 CIP in the amount of \$193,200,000.
- Southwest Water Reclamation Facility SCADA Renewal project will be funded in FY24 and FY25 in the amount of \$1,146,000 and \$7,637,000 respectively.

Category: Potable Water **Subcategory:** Potable Water Distribution
Project Title: 60th Ave W Loop Watermain
Department: Utilities
Project Mgr: Jim Shuler
Infra.Sales Tax:
Project #: 6055571 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 60th Ave W and 34th St W, Bradenton

Description and Scope

This project is to connect 60th Ave W to Bayshore village condo and Vivienda condo. This project needs +/- 639' of 6" water main, 1 fire hydrant assembly, 2 gate valves, and 0 services. Hydrants, services, and valves should be installed to County and Ten State Standards.

Rationale

This project will create a looped system, which will help maintain water quality and improve fire flow. This project was scheduled to be completed within the maintenance plan based on the cost estimate received in 2020. However, with a recent GMP received from the contractor, it has been determined this project is now requiring the move to a CIP project.

Description and Scope

This project needs +/- 850' of 6", +/- 50' of 4" and +/- 50' of 2" water main, 1 fire hydrant assembly, 4 gate valves, and 9 services. Hydrants, services, and valves should be installed to County and Ten State Standards.

Rationale

This Project was listed in the 2012 Water Distribution Master Plan as a recommended improvement to help maintain water quality and improve fire flow. This project was scheduled to be completed within the maintenance plan based on the cost estimate received in 2020. However, with a recent GMP received from the contractor, it has been determined this project is now requiring the move to a CIP project.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth, Maintenance

Project Location

District 1 Erie Rd-Harrison Ranch Blvd-St. Mary's Mission, Parrish

Description and Scope

This project needs approximately 12,000 feet of 24 inch ductile iron pipe water main. Fire hydrants will be installed every 800 feet and in-line valves every 1,600 feet. Hydrants, services and valves will be installed to County and Ten State Standards.

Rationale

Complete a major looped system for Erie Road and Copperstone Phase One.

Project Title: Force Main 11 Replacement - 56th St & Holmes Rd - Potable
Department: Public Works Projects
Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6041570 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 56th St & Holmes Road, Anna Maria Island

Description and Scope

This project is to replace aging water lines, services, valves, fire hydrants, and maintain quality water. This Project needs +/-630 ft. of water main, (4) fire hydrant assembly, (7) gate valve's, (17) tapping valves, and +/- 64 service's. Hydrant's, services and valves should be installed to County and Ten State Standards.

Rationale

The force main is being scheduled for replacement due to age assessment and condition risk with respect to location on Anna Maria Island. During the same time, it was determined that the potable water lines should be replaced due to the age of the infrastructure.

Infra.Sales Tax:
Project #: PW01220 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth

Project Location

Countywide Countywide

Description and Scope

Participate in development of the potable water transmission system infrastructure by oversizing any component to the system to increase capacity above required for a particular development or project when such increase in size supports the Utilities Master Plan for system capacity.

Rationale

It is more effective to increase the size of potable water infrastructure as it is being developed, rather than replacing it with a larger capacity system. The systems will be sized to serve the planned customer population.

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Distribution
Project Title: Saltmeadows - SR62 at SandMarsh Ave - Potable Main Upsize & Extension
Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6114970 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct approximately 1,900 LF of 12" and 300 LF of 16" potable main along SR 62 from Pioneer Dr to Sand Marsh Ave. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The purpose of this project is to efficiently expand the County's potable water distribution system for future development in this area. Staff has requested the developer to oversize the potable water main extension from 10-inches to 12-inches. This project is to fund the developer's agreement for the potable main oversizing with the improvements being constructed as part of the Saltmeadows development project.

Project #: PW01937 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 SR 64 and 66th St Ct E, Bradenton

Description and Scope

Install approximately 1,500 feet of 8 inch water main, 350 feet of casing, four (4) 8inch gate valves, one (1) 36 x 8 tapping saddle, nine (9) potential water services and one (1) hydrant.

Hydrants, services and valves to be installed to County and Ten State Standards.

Rationale

This project will Improve fire flow and maintain water quality.

Project Location

District 2 17th St E and 51st Ave E, Bradenton

Description and Scope

Replace approximately 350 feet of 4 inch water main, 500 feet of 6 inch water main, two (2) fire hydrant assemblies, four (4) gate valves, one (1) Blow off Assembly and 19 possible water services.

Hydrants, services and valves to be installed to County and Ten State Standards.

Rationale

This project will Improve fire flow and maintain water quality.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 51st St E and 43rd Ave E, Bradenton

Description and Scope

This Project is a loop system and needs +/- 1,122 ft of water main according to the water master plan. This will help maintain water quality and improve fire flow: 2 fire hydrant assemblies, 2 gate valves, and 19 services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace existing 4" water main with 6" and create a loop system which will improve fire flow and water quality.

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: 44th Ave E to 38th Ave E & 24th St E - 36" PCCP Replacement
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02277 **Status:** Requested

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 East of 4119 44th Ave E to 38th Ave E to 24th St E

Description and Scope

Replace approximately 2.0 miles (10,560 LF) of 36" PCCP with 36" DIP from just east of 4119 44th Ave East north to 38th Ave East then west to 24th Street East. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Includes new services, hydrants, and valves as needed.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1966 and is one of the oldest pipes in the system. A portion of the PCCP pipe, from the start of this project east to the Elwood 1 booster pump station, was replaced with Ductile Iron Pipe (DIP) as part the 44th Avenue East project. This will replace the remainder of that segment of 1966 installed 36" PCCP pipe.

Project Mgr: Craig Hughes
Infra.Sales Tax:
Project #: 6104170 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **Y** Project Need: Maintenance

Project Location

Multi-district 45th St E, Bradenton

Description and Scope

Install approximately 2,400 linear feet of eight inch High Density Polyethylene (HDPE) water main and 300 linear feet of 6 inch water main, three fire hydrants, six - 6 inch gate valves, nine services, and one blowoff. Services and valves will be installed to County and Ten State Standards.

Rationale

Install water main line to proper depth to meet Utilities Standards and for protection and fire flow. Existing water main has a shallow depth and is 50 years old. There is an increased threat of breakage and there is less resistance to external and internal forces due to pipe material being brittle. Pressure surges from nearby Elwood I Booster Pump Station and water hammer are making issues worse.

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: 59th St Elevated Storage Tank Booster Pump
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02139 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Maintenance

Project Location

District 4 5907 Cortez Road West, Bradenton

Description and Scope

Installation of booster pumps at the 59th St elevated storage tank. To include two (2) pumps, building for pumps and electrical equipment, yard piping, and Supervisory Control And Data Acquisition (SCADA) integration.

Rationale

The 59th St elevated storage tank has historically been difficult to turn over and significant volumes of water are flushed annually to maintain water quality. In addition, when the ground storage tank at the downstream Cortez Booster Station is filling, system pressures between the 59th St tank and that station drop. A booster pumping system will impart the ability to ensure the tank turns over enough to avoid water quality concerns while reducing flushing volumes. This improvement will also help sustain westside system pressures when the ground storage tank is filling.

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district 5th St-63rd Ave W-US 41-69th Ave, Bradenton

Description and Scope

Replacement of aged (1965) failing pipe with approximately 6,600 feet of 12 inch water main, fire hydrants, six inch gates valves, and 12 x 6 tee services interconnecting between 63rd Avenue East to US 41. Hydrants, services and valves will be installed to County and Ten State Standards.

Rationale

The existing lines have aged and are in poor condition. Access and fire protection are limited and water quality suffers.

LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Cortez Rd to 46th Ave W between 87th St Ct W to 86th St W, Bradenton

Description and Scope

This Project is to improve water system (see map attached for location of proposed main). This Project needs +/- 2,505' of 6" water main, +/- 110' of 4" water main and 160' of 2" water main. (5) fire hydrant assemblies, (6) gate valves, (2) Blow off assemblies and 51 services.

Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace 2" water main (of unknown material) built in 1974 in order to ensure replacement prior to end of useful life. Upsizing to 4" and 6" will help maintain water quality and improve fire flow.

Project Location

District 5 SR64 at Lena Road, Bradenton

Description and Scope

Once the acquisition for 160.99 acres of land located at SR64 & Lena Road is completed for the Central County Complex, as part of the Cooperative Agreement, Manatee County will construct the access road and public utilities on the property within three years.

Rationale

Due to increased growth in the Eastern and Northeastern portions of Manatee County's urban service area, the Utilities, Public Works and Sheriff's Departments have experienced increased operating costs and reductions in level of service. All three Departments are experiencing aging infrastructure at their current facilities and have impending need of replacement and expansion. The Central County Complex will provide multiple efficiencies for the three investing Departments.

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Maintenance

Project Location

District 3 11860 Cortez Rd. W, Bradenton

Description and Scope

Replacement of one existing pump with two pumps (one duty and one standby) sized as inline boosters, including minor piping changes and construction of a dedicated fill line to the ground storage tank (GST).

Rationale

Analysis of updated water model and pump data showed that operating existing pumps as inline boosters causes excess wear and tear due to operating out of their suggested operating ranges. Replacing one of the pumps with one duty and one standby pump, both sized as inline booster pumps, will optimize pump efficiency and operations in order to meet 2025 water demands. Installing a dedicated fill line would allow the tanks to simultaneously fill and be pumped from, making system operations less complex.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 4 3647 Cortez Road, Bradenton

Description and Scope

The scope includes the purchase of a 20,806 +/- square foot office building on 3.7 +/- acres in a park-like setting within Wildewood Professional Park. This is a freestanding, building sitting on it's own 3.7 +/- acre parcel with cross access and cross parking easements with the other buildings within Wildewood. The building has recently been painted, re-landscaped, and the parking lot has been replaced.

Rationale

Manatee County Utilities was looking for a centrally located office space. Wildewood Office Park is centrally located on the Cortez Road commercial corridor with easy access to downtown Bradenton, I-75, Lakewood Ranch and the widespread Manatee County Government locations. This is ideal spot to acquire property for Manatee County Utilities.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 62nd St W-40th Ave W, Bradenton

Description and Scope

Replace approximately 2,000 linear feet of 2 inch and 4 inch water mains mostly on easements with poor access and limited fire protection with 6 inch water mains and 42 new services installed from main to meter. Meters will be relocated to front right-of-way with six valves, three fire hydrants, and eliminate mains on easements. All items will be installed to County and Ten State Standards.

Rationale

Increase water quality and fire protection.

 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Palma Sola Blvd to 82nd St W - 43rd Ave W to 43rd Ave Ter W, Bradenton

Description and Scope

This project is a loop system between Cutrona Subdivision and Frank E Kimball Subdivision (see map attached for location of proposed main). This project needs +/- 3,718 ft of water main. This will help maintain water quality and improve fire flow. Three (3) fire hydrant assemblies, five (5) gate valves, and 62 services. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This project will replace existing 3" and 4" water mains with 6" & create a looped water system. This will improve fire protection and water quality.

Description and Scope

This Project is to eliminate existing 2' and 4" mains and install accordingly to the water model. (see map attached for location of proposed main) This Project needs +/- 2461 Ft of 6" water main, 100 Ft 2" water main, (4) fire hydrant assemblies, (9) gate valves, (1) reducer, (14) same side services, (12) road crossing services and (1) blow off assembly.

Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

This system was installed around 1977 / No Fire flow.

Project #: 6097370 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Maintenance

Project Location

District 2 4825 44th Ave E, Bradenton

Description and Scope

Replacement of pumps 1, 6, and 7 with three 3,900 gallons per minute (gpm) @ 145 feet pumps, including yard piping changes, pressure sustaining valve, and electrical instrumentation and controls upgrades. Also, construction of a 36 inch dedicated fill line to the ground storage tank, (GST).

Rationale

Analysis of the updated water model showed that replacement of the existing pipe configuration could be reduced to simplify the inflow and discharge of the GSTs. This simplification of the site will also reduce the long term need for replacement parts and field work. The pumps to be replaced were installed in 1966 and are past their 50 year predicted service life. These will be upgraded to achieve additional pumping indicated by the model as necessary to meet max day demands in 2025.

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Other Need

Project Location

District 2 4825 44th Ave E., Bradenton

Description and Scope

Upgrades to the booster pump station to consist of: voltage conversion of station from 2400V (non-typical) to 480V, new pumps with Variable Frequency Drives (VFDs) to replace inline booster pumps (#2, 3, 4, and 5) sized to meet current and future demands, new building with pump room, electrical room, and office space, instrumentation and control (I&C) and electrical, and associated yard piping. Project will also require a new building.

Rationale

Replacement of the inline booster pumps is recommended to improve water quality, simplify station operations, and meet current and future demands. Conversion from non-typical voltage to standard 480V will improve availability of maintenance parts and skilled technicians, as well as improve safety of employees required to perform maintenance. New building will replace current facility which will be over 60 years old, will allow for continued operation of station during construction, and will be designed to for easier access for maintenance and inspections

Project Location

Countywide Countywide

Description and Scope

Replace older, failing or targeted distribution system lines based on age and predicted service life to be determined by the 2012 Distribution System Master Plan, subsequent KANEW (database software) model runs and field investigations.

Rationale

Utilities will use the model results from the KANEW analysis that Utility Engineering performed in conjunction with the Distribution Master Plan. The KANEW analysis predicts when pipe elements will reach the end of their service lives based on life-expectancy parameters, and identifies those lines that should be replaced, before they fail.

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Harbor Crest and Stevens Subdivision
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02155 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 2nd Ave NW and 43rd St W, Bradenton

Description and Scope

This project is to upgrade old 4" AC water main and add fire protection (see map attached for location of proposed main). This project needs +/- 7,428 ft of 6" water main, 825' of 8" water main, 7 fire hydrant assemblies, 27 gate valves, 97 services & 3 blowoff assemblies. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

Current water mains are thin wall 4" asbestos cement (AC) that were installed in 1966 and have reached the end of their useful life. Upsizing the mains will improve water quality and fire flow in the area.

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Morgan Johnson Rd to 40th Ave E - 36" PCCP Replacement
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02262 **Status:** Requested

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district Morgan Johnson Rd from south of 64 to 40th Ave E

Description and Scope

Replace 1.7 miles (8,976 LF) of 36" PCCP with 36" DIP. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Old pipe is to be removed from the Right-of-Way (ROW) and not abandoned in place. Install 0.7 miles (3,696 LF) of smaller diameter waterline on 40th Ave East from Morgan Johnson Rd to Braden River, along 51st Street East from 44th Ave East to 39th Ave East, and on 39th Ave East to Braden River. Includes new services, hydrants, and valves as needed.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. Due to the consequence of failure of this PCCP pipe, PCCP will be phased out in Manatee County. This project will replace the 36" PCCP along Morgan Johnson Rd south from SR64 to the new 36" Ductile Iron Pipe (DIP) just south of 40th Ave East installed with the 44th Ave East project. Since that project includes a new 36" river crossing and tie-in to the Elwood booster pump station, the old river crossing can be abandoned. New, small diameter, waterline will be installed along 40th Ave East, 39th Avenue East, and 51st East to 44th Ave East sized for appropriate water quality and fire flow.

Capital Improvement Plan

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Northwest Booster Pump Station Upgrades
Department: Public Works Projects
Project Mgr: Craig Hughes
Infra.Sales Tax:
Project #: 6110970 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Maintenance

Project Location

District 3 1525 99th St NW, Bradenton

Description and Scope

Replacement of one existing pump with two 2,600 gallons per minute (gpm) @ 30 feet, 30 horsepower pumps, including electrical instrumentation & controls, pressure sustaining valves and yard piping.

Rationale

Analysis of updated water model and pump data showed that when existing pumps are used as inline boosters, they are not operating within their suggested operating ranges causing excess wear and tear on the pumps. Replacing one of the pumps with one duty and one standby pump both sized as inline booster pumps will optimize pump efficiency and operations in order to meet 2025 water demands.

Project #: PW02149 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 26th Ave. E. and 18th St. E., Bradenton

Description and Scope

This project is improving the Oakwood Subdivision area (see map attached for location of proposed main). This project needs +/- 4,232 feet of 6" water main, (6) fire hydrant assemblies, (7) gate valves and (59) services. This will help maintain water quality and improve fire flow. Hydrants, services and valves should be installed to County and Ten State Standards.

Rationale

There has been constant repairs to existing 4" water main at this location indicating that the pipe has deteriorated to the point of needing replacement. Upsizing to 6" will improve water quality and fire flow.

Project #: 6053370 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Palma Sola Park Blvd-75th St W-Alhambra Dr, Bradenton

Description and Scope

Phased replacement of approximately 31,000 linear feet of existing 3, 4 and 6 inch water lines with new 6 inch water lines and 8 inch water mains.

Rationale

To enhance fire protection and many lines are being relocated from rear lot lines to the front right of way. Existing lines are mostly asbestos cement and are located in easements with very little fire protection.

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Palmetto Elevated Storage Tank Booster Pumps
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02258 **Status:** Requested

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Countywide 201 25th St West, Palmetto

Description and Scope

Installation of booster pumps at the Palmetto elevated storage tank. To include two (2) pumps, building for pumps and electrical equipment, yard piping, and Supervisory Control And Data Acquisition (SCADA) integration.

Rationale

The Palmetto storage tank has historically been difficult to turn over and significant volumes of water are flushed annually to maintain water quality. The Palmetto elevated tank is upstream of an interconnect with the City of Palmetto. A booster pumping system will impart the ability to ensure the tank turns over enough to avoid water quality concerns while reducing flushing volumes. These improvements will also help sustain system pressures when the various ground storage tanks are filling down the line and provide better water quality to the City of Palmetto.

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Replacement of Banner Customer Information & Billing System
Department: Utilities
Project Mgr: Tina Neri
Infra.Sales Tax:
Project #: 6077501 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

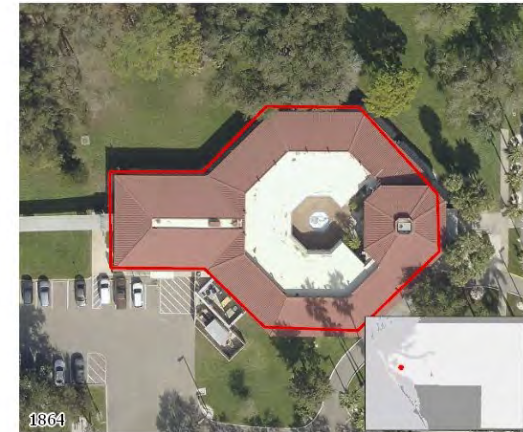

Countywide Utilities Administration Building; 4410 66th St W, Bradenton

Description and Scope

Replace current customer information system with a more robust system that meets current needs for the Utilities Department.

Rationale

The current Banner Customer Information and Billing System was deployed by Manatee County Utilities in 1999 and went live in the year 2000. This software was upgraded to version 4.2.1 in July 2011, and to version 4.4 in June 2017. There are many more robust Customer Information System (CIS) systems on the market that include features such as mobile applications, comprehensive business intelligence, GIS interfaces, bar-coded payment stubs, intuitive customer portals, and many more. Additionally, some of the new CIS systems provide cloud-based platforms which can provide potential cost savings on hardware and upgrade costs. With the vast availability of technology, it seems prudent at this time to initiate a search for a more flexible and responsive system - one that is more "user friendly" and easier for the Call Center Reps to navigate, ultimately providing better customer service to County residents as well as potential cost savings over existing options.

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: Rye Crossing 30" Water Main
Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6113270 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Rye Road (Near Rye Crossing Development), Parrish

Description and Scope

Relocation of approximately 1,100 linear feet of an existing 30" water main to (1) provide required 3' minimum cover and (2) relocate from under existing roadway to a location that does not conflict with the proposed roadway improvements required by the development. Water main to be placed in a location that will accommodate the future build out of Rye Road.

Rationale

It was discovered during subsurface utility exploration (SUE) by the Developer's surveyor for the Rye Crossing development that an existing 30" water main does not meet minimum cover requirements and is located where future roadway improvements are required by the Developer. It is preferred by the Utilities Department Operations staff that the water main be relocated or re-routed such that it is not under any pavement. This project will include participation from the Developer for their proportionate share and a participation agreement will be entered between the Developer and the County.

LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 Between 13th St E and 14th St E from 54th Ave E to 54th Ave Dr E , Bradenton

Description and Scope

This Project has thin wall white PVC with glued fittings and some of the lines that are in the ground are not on our Geographic Information System (GIS) or the as built. Installation of 2,281 feet 6" main / 198 feet 4" main / one (1) blowoff, one (1) Relocated Fire Hydrant, nine (9) 6" Gate valves, (39)services plus (19 undeveloped services), one (1) 4" gate valve, one (1) 6" MJ tee.

Hydrant's, Services and Valves should be installed to County and Ten State Standards.

Rationale

Eliminate PVC with glued fittings and install main out of Road where ever possible and a new easement will be obtained if main is relocated (may have to install with Ductile Iron (DI) and copper services) Tie in connections at 13th and 15th street are 6" main.

Project Location

District 5 SR64 and Lena Rd, Bradenton

Description and Scope

Construction of a new Administration building for the Utilities and County Engineering staff in the central portion of the County on Utility owned property just north of the Lena Road Landfill.

Rationale

Utilities has outgrown the space in our current administration building. With the majority of our Utility Operations within miles of the proposed location and our expanding customer base in the eastern and northern parts of the County, the move will provide several efficiencies. The goal is to better service for our customers by providing a location more central in our service area.

Category: Potable Water **Subcategory:** Potable Water Renewal/Replacement
Project Title: WTP to SR64 - 36" PCCP Replacement
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02260 **Status:** Requested

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 Waterline Rd from WTP to Rye Rd, Rye Rd to SR 64

Description and Scope

Replace 3.1 miles (16,368 LF) of 36" PCCP with 36" Ductile Iron Pipe (DIP). Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Old pipe is to be removed from the Right-of-Way (ROW) and not abandoned in place. Includes new services, hydrants, and valves as needed.

Rationale

This project is one of several to replace aging large diameter Pre-Stressed Cylinder Concrete Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. Also, many of the larger, critical transmission mains in the system are PCCP. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1966, is one of the oldest pipes in the system and is a direct transmission main from the Water Treatment Plant (WTP).

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 17915 Waterline Rd to Rye Road & Upper Manatee River Rd

Description and Scope

Replace approximately 2.0 miles (10,560 LF) of 42" PCCP with 42" Ductile Iron Pipe (DIP) from WTP north to near intersection of Rye Road and Upper Manatee River Road. Sections of the new pipe must be installed and put into service before the similar stretch of old pipe can be removed from service. Includes new services, hydrants, and valves as needed.

Rationale

This project is one of several to replace aging large diameter Prestressed Concrete Cylinder Pipe (PCCP) in the Manatee County distribution system. PCCP pipe failures require specialized repairs, which are costly and time consuming and cannot be handled by in house forces. In addition, many of the larger, critical transmission mains in the system are PCCP. Due to the consequence of failure of this type of pipe, PCCP will be phased out in Manatee County. This segment was constructed in 1995, is one of the largest pipes in the system, and is a direct transmission main from the Water Treatment Plant (WTP). Additional segments of this 42" PCCP pipe will be replaced with future road widening projects along Upper Manatee River Road.

Project Location

District 4 64th Ave E, 64th Ave Dr E, 65th Ave E, Wilmerling Ave, Winter Grden Dr, Brad

Description and Scope

Replace existing water main on easements and relocate to front of property. Install approximately 6,850 linear feet of 6 inch water main and install/replace fire hydrants, gate valves and other services to County and Ten State Standards.

Rationale

This is the end of the service life and is in need of replacement. By replacing the water main, it will increase water quality and fire protection.

Project Mgr: Albert Rosenstein
Infra.Sales Tax:
Project #: 6108870 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Dam Road, Bradenton

Description and Scope

This project will address the filling of voids and geotechnical stabilization below dam features which extend outwards from the length of the dam itself. This includes the upstream approach walls that extend out into the lake and on the downstream side, training walls, spillway and stilling basin. The approach walls are an extremely important component of dam strength and safety and are being significantly bolstered and reinforced. The tainter gates that control the release of water are being rehabilitated with new controls, various mechanical components and monitoring element upgrades. The dam will also be equipped with a new embankment stability monitoring system and long segments of the dam face that have suffered damage from wave action will be refurbished. This is an operational, high hazard dam and cannot be removed from service without an alternate safe method to release water downstream. Therefore, temporary use of the emergency spillway system north of the dam to route floodwaters safely downstream to the Manatee River.

Rationale

The Lake Manatee Dam was built approx. 60 years ago and although it had a clay core which extended down to just below sea level in some areas and was considered sufficient at the time, it lacked the sort of deep seepage barrier that a modern dam would be equipped with today. As a result, invisible seepage called piping and subsequent void formation were taking place far beneath the structure which put it at risk of failure.

Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02251 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton, FL 34212

Description and Scope

This project is the replacement of the current primary and auxiliary dam spillways with structures, designed applying current dam design geotechnical engineering approaches and technology. The new spillway will be located north of the current primary spillway and will release water to the river channel much as it does now. The design will be an approximately 300-foot wide, passive labyrinth style overflow weir with sections of controllable Obermyer gates and/or sluice gates for dynamic release. The current primary and auxiliary spillways will be abandoned, sealed and raised as needed. This project comprises predesign, design, permitting and construction efforts.

Rationale

The existing spillway for the dam does not reflect current geotechnical/structural design standards and approaches for high hazard dams. The existing dam also has remnants of a failed upstream cofferdam and a heaved approach slab that adds significant risk to doing any refurbishment work in those areas. The County has attempted to bid upstream construction repair work without success because of the risk associated with the current design and past, failed repair attempts. With the importance of public safety, water supply, risk, and cost of repair, it's prudent to replace the current spillway using modern standards and approaches.

Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02282 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton, FL 34212

Description and Scope

This project will add a new groundwater treatment capacity (aka Basin D) including chemical feed facilities and air stripping towers. The current C Basin will be modified to be used primarily for surface water with flume and piping modifications to convey settled water to the Ultra Filtration (UF) membranes. The existing C Basin filters will continue to provide settled groundwater filtration and will be paired with the D basin(s). This project will include engineering, design and construction and will include pilot testing onsite of advanced technology, compact footprint, upflow softening contactors.

Rationale

Groundwater treated in Basin C has a capacity of 30 MGD and maximum day demand in the springtime exceeds the firm capacity of our sedimentation basins. During the remainder of the year, it can be difficult to meet daily demands if either of our larger basins are out of service. Since long term rehab projects can last 6-18 months, it is risky to take basins offline for Repair and Rehab (R&R) projects and avoid risk of a water supply shortfall. The Florida Administrative Code (F.A.C.) 62-555.348 requires planning for additional capacity when the maximum day water demands exceed 75% of maximum treatment capacity. We anticipate triggering that requirement by 2024.

Project Title: Potable Water Aquifer Storage & Recovery (ASR) Expansion
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02295 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton, FL 34212

Description and Scope

This project will expand the current potable water aquifer storage and recovery (ASR) system at the Lake Manatee Water Treatment Plant. The current ASR system has six wells and a permitted capacity of 12 Million Gallons per Day (MGD) recharge and 11.44 MGD recovery. The wellfield stores water for use during emergencies of hurricanes and extended droughts. Excess surface water is treated during the rainy season and stored underground. The recovered water is re-treated as groundwater, so this project will include six new ASR Wells, Piping, Air Stripping Towers, Groundwater Filters and additional Transfer Pumping Capacity. (a treatment basin is not included)

Rationale

Four months per year, excess surface water is discharged over the dam and that water is available to be harvested, treated, and stored in potable water ASR wells so it can be harnessed during the dry season. Lake Manatee has an operational volume of 5.9 billion gallons/130 days of supply at current demands. The existing ASR system has an operational volume of 1.8 billion gallons, which adds 40 days of supply for 170 days total. Doubling the ASR System will add another 40 days of system storage and is expected to increase the effective system yield by 3-4 MGD.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 17915 Waterline Rd, Bradenton, FL

Description and Scope

Install new valves to transmission lines leaving the Water Treatment Plant (WTP) to allow for proper isolation of lines. Current valves do not hold. Install two (2) 36" gate valves, one (1) 42" gate valve, and one (1) 54" gate valve. Include required sleeves, Mechanical Joint (MJ) kits, megalugs, and Ductile Iron (DI) pipe.

Rationale

There are several transmission mains leaving the WTP to serve the potable water distribution system. Many of these mains are older Pre-Stressed Cylinder Concrete Pipe (PCCP), difficult to repair. Current valves do not hold and do not allow for proper isolation of the area in the event of a leak or break on one of these mains. Installation of new valves will ensure isolation will be possible in the event of future breaks keeping water service to the County while repairs are performed.

Project Location

Multi-district 44th Ave-45th St-44th Ave Plz E, Bradenton

Description and Scope

Replacement and relocation of current 36 inch water main. The road is being widened from two lanes to four lanes divided with a new bridge over the Braden River. In addition to the utility relocations required due to the roadway expansion, the county has requested a new 36 inch water main to be installed crossing the Braden River.

Rationale

The current water main was installed in 1965, with the addition of 44th Avenue, this water main is necessary and will now cross the Braden River.

Project Location

District 2 Bus US 41 from 17th Street W to Bayshore Road, Palmetto

Description and Scope

Relocation and adjustment of potable water infrastructure to accommodate the Florida Department of Transportation's (FDOT) SR 45 (US Bus 41) from 17th Street to Bayshore Road resurfacing project.

Rationale

FDOT project 444440-1-52-01 involves widening a roadway shoulder, along with moving and regrading an existing drainage ditch. The proposed drainage ditch will reduce the cover over the existing water-main, which requires relocation to provide sufficient cover.

Project Title: Canoe Creek - Oversizing & Extension Agreement
Department: Public Works Projects
Project Mgr: Scott May
Infra.Sales Tax:
Project #: 6113272 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Golf Course Road at Spencer Parrish Rd, Parrish

Description and Scope

Design, permit, install, and construct (i) a sixteen-inch (16") water main extension from Canoe Creek Avenue (127th Ave E) westward to Creekside Park Drive and (ii) install a twelve-inch (12") water main extension from Canoe Creek Avenue eastward to Twin Rivers Trail, totaling in approximately 9,600 linear feet. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The County's potable water master plan requires a 16" and 12" water main to be extended along Golf Course Road, Parrish. This project is to efficiently expand the County's drinking water system for future development in this area. Staff has requested the developer to oversize and extend potable water mains to meet the master plan sizes. Also, this project is to fund the developer's agreement for the water main oversizing with the improvements being constructed as part of the Canoe Creek development project.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 US41 Desoto Bridge crossing

Description and Scope

Work with FDOT to determine if existing watermain is in conflict with bridge replacement. Design, permit, and construct new 16" watermain as appropriate based on bridge replacement.

Rationale

The Florida Department of Transportation (FDOT) wants to replace the US-41 bridge that goes over the Manatee River. The new bridge might go over the existing watermain and interfere with the installation of bridge supports. The County and FDOT will work together to construct a new watermain as appropriate based on the new bridge.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 Erie Rd - Martha Road to - US 301, Parrish

Description and Scope

The Erie Rd E/W Phase for roadway functional improvements is being changed to 2-lane to 4-lane widening from Martha Rd to US301. This project aligns to be the potable water relocations for the transportation project.

Rationale

The Erie Rd E/W Phase for roadway functional improvements is no longer being considered. Instead, the transportation project is changed to 2-lane to 4-lane widening from Martha Rd to US301. The original Erie Rd E/W Phase had associated projects for the utility relocations and this one is being changed to match the new transportation project.

Project #: 6099271 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 4 US 41 from 53rd Ave W. to Cortez Rd, Bradenton

Description and Scope

Replace approximately 5400 LF of 10-inch AC water main with 10-inch Ductile Iron Pipe (DIP). This includes 200 LF of 20-inch water main replacement and 150 LF of 24-inch water main replacement with 3 watermains crossing US 41. Water main, water services, and valves to be installed to County and Ten State Standards.

Rationale

The Florida Department of Transportation (FDOT) is completing a sidewalk and lighting safety project in this corridor. The existing Asbestos Cement (AC) water main is old and brittle concrete that is prone to cracking when installing the new lighting spread footings and sidewalk. The new pipe will be replacing the old main and designed so the County can still maintain and protect their water infrastructure. It will increase fire protection and water quality.

Project Location

District 4 Lockwood Ridge Rd - 56th Ave Terr E - University Pkwy

Description and Scope

The work on this project incorporates new concrete valve pads and valve boxes, iron plug valves, and sleeves.

Rationale

Valves and pipe fittings will be replaced due to their age and wear, and the concrete protective pads will be replaced. This will reduce the current maintenance time & costs and ensure fewer interruption of services for county residents in this area.

Project #: 6099870 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **N** Project Need: Growth

Project Location

Countywide Lockwood Ridge Rd, Bradenton

Description and Scope

Ductile Iron Pipe (DIP) and fittings post restraining (with split restraints) of existing 30" and 36" potable water transmission pipelines due to grade changes associated with the turn lanes resulting in reduced cover over the pipelines. Post-restraining of existing pipelines requires excavation of the existing pipeline joints to allow for the installation of mechanical joint restraints. Enough joints will need to be restrained to provide an overall restrained joint length of pipe to withstand internal pressure forces within the pipelines.

Rationale

Post restraining with split restraints required to protect road where less than 2ft of cover at the Lockwood Ridge Road @ Shopping Center Entrance Intersection (South of State Road 70 - Walmart & Publix). This project is in conjunction with the Transportation Intersection improvement adopted CIP (6099860).

Project Location

District 1 Moccasin Wallow Road - US 301 & 115th Ave East, Palmetto

Description and Scope

As part of the road widening project, the water main along with fire hydrants, valves, fittings, and services along the route will be relocated out of the proposed roadway into the right of way or upgrade to DIP. Construction consists of removal and installation of +/- 6,095 linear feet of 30-inch DIP, +/- 799 linear feet of 24-inch DIP, +/- 124 linear feet of 18-inch Steel Casing, +/- 114 linear feet of 24-inch Steel Casing, +/- 189 linear feet of 42-inch Steel Casing, +/- 40 linear feet of 24-inch PVC, +/- 183 linear feet of 12-inch PVC, and +/- 136 linear feet of 8-inch PVC.

Rationale

This project is Segment 1 of a 3 Segment plan, which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301. The project will relocate water mains as a result of the Moccasin Wallow Road widening project (see transportation project #6071261).

Project Location

District 3 SR684 (Cortez Rd) - Gulf Dr - 123rd St W, Cortez

Description and Scope

Relocate and or adjust the utilities for the Florida Department of Transportation (FDOT) road project.

Rationale

Align utilities with the Florida Department of Transportation (FDOT) road design improvements.

Project Location

District 5 Lorraine Road

Description and Scope

Depending on the Florida Department of Transportation (FDOT) design for the road improvements along SR70 & Lorraine Road, the County will coordinate, design, permit and relocate Manatee County Potable Utilities that conflict with the FDOT project.

Rationale

Coordinate, design, permit and relocate Manatee County Potable Utilities that conflict with the FDOT road widening and Round-a-bout project at SR70 & Lorraine Road. A new watermain will be installed from Lorraine Road to Bourneside Blvd.

Project Location

District 3 SR789 (Gulf Dr N.) From N of 9th St to Ave C, Holmes Beach

Description and Scope

Utility coordination, relocation and/or adjustments of Manatee County utilities (water, wastewater, fiber, etc.) in the project corridor along Gulf Dr. from 9th St. North to the branch at Ave C.

Rationale

Florida Department of Transportation (FDOT) project #446348 is improving the drainage along Gulf Dr and may conflict with existing County utilities. This Capital Improvement Project CIP project will coordinate with FDOT to determine conflicts with utilities and relocate them during construction.

Project #: 6059370 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 4 Tallevast Road at Tuttle Ave, Sarasota

Description and Scope

Replace the existing 16" Ductile Iron (DI) Pipe for the watermain and reconfigure the watermain due to the mast arm traffic signal at the Tallevast Road and Tuttle Ave intersection. The current transportation CIP project has been designed and the necessity for moving the watermain was discovered during this design work.

Rationale

The project is to add north and south bound turn lanes. Due to this scope, the mast arm traffic signal had to be replaced, the existing drainage had to be replaced and the existing watermain was impacted by the drainage.

Project Map

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

Multi-district 69th Ave W to Cortez Rd, Bradenton

Description and Scope

Installation of new sidewalks along both sides of US 41 that do not yet have sidewalks, will impact existing utility mains, primarily potable water, with valve box and cover adjustments.

Rationale

New sidewalk grades will require adjustment of existing valve boxes, covers and fire hydrant assemblies. Approximately 700 Linear Feet of 6 inch Asbestos Cement (A/C) water line and 2,300 Linear Feet of 10 inch A/C water main should be replaced where new sidewalks are proposed as both are more than 50-years old.

Capital Improvement Plan

FY2024-FY2028

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: Buffalo Creek Reverse Osmosis Water Treatment Plant
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6114070 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 8450 69th St E., Palmetto

Description and Scope

This project is to design and construct a 5 million gallon per day (MGD) reverse osmosis water treatment plant (RO WTP), associated wellfield, and concentrate disposal system at the Buffalo Creek site. The plant will treat brackish groundwater supplied by a combination Upper Floridan and Intermediate aquifer wells. Concentrate disposal system to consist of concentrate pump station and piping to connect to injection well located at the North Regional Water Reclamation Facility (NRWRF). Project includes preliminary design, test well drilling, pilot testing, final design, and construction.

Rationale

The Buffalo Creek RO WTP has long represented an important future water supply project for the County to meet growth needs. It was originally conceived nearly two decades ago and included on the County's consolidated water use permit issued in 2012. Current demand projections indicate the need for this additional supply by 2032 with the plant built to 5 MGD. Early preliminary design phase will allow for submission to the SWFWMD for consideration for cooperative funding. Test well and pilot testing is necessary to confirm water quality conditions and inform final design.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Alum Sludge Dewatering System
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6033072 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Mechanical dewatering system for alum sludge at the Water Treatment Plant (WTP) to consist of two decanter centrifuges, two gravity sludge thickeners, three homogenization tanks, centrifuge building, pumping and associated equipment.

Rationale

The WTP currently uses sludge drying beds to receive and dry the alum sludge generated in the surface water treatment process. The current beds do not have enough capacity for the sludge generated at the plant and are a passive dewatering process that is highly dependent on weather conditions and labor intensive. Mechanical dewatering of the alum sludge will ensure the WTP can manage the amount of sludge produced now and into the future in a more efficient and consistent manner. Decant centrifuges were selected as the best technology to meet the needs of the WTP. The system is sized to meet production at the maximum permitted surface water withdrawal.

Project #: PW02017 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Upgrades to the Water Treatment Plant (WTP) standby power system to consist of replacement of the alternators on generators #1 and #2, the electronic modular control panels (EMCPs), and paralleling switchgear. Project includes conduit, wiring, demolition, temporary power, removal and disposal, installation and testing.

Rationale

The Water Treatment Plant (WTP) standby power system provides power to operate the plant during a failure of the utility electrical source from Florida Power & Light (FPL). Over the past several years, there have been frequent issues with the operation of the three generators, switchgear, control system, and failures of the system components. The control system and switchgear are reaching the end of their expected life; parts for the switchgear system have become difficult to obtain. Generators #1 and #2 have a different winding pitch than the newer generator #3; this mismatch is believed to be the root of many problems encountered recently. This project consists of replacement of the switchgear and control system, as well as replacement of the alternators on generators #1 & #2 to match generator #3 to ensure reliable backup power for the WTP.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: WTP Ground Storage High Service Pump Station Expansion
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02294 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 17915 Waterline Road

Description and Scope

Expansion/build out of the high service pump station at the ground storage tanks at the Water Treatment Plant (WTP). Project to include installation of two 8,500 gpm (12.3 MGD) vertical turbine pumps with variable frequency drives (VFDs) as well as all electrical system components and SCADA integration.

Rationale

The WTP Ground Storage High Service Pump Station consists of three vertical turbine pumps with a design capacity of 8,500 gpm each at 231 feet Total Dynamic Head (TDH). This provides a firm station capacity of 24.5 MGD (17,000 gpm). The station capacity with all three pumps running is 36.7 MGD (25,500 gpm). This station pumps water from the two WTP 10.0 Million Gallons (MG) Ground Storage Tanks (total 20 MG) and was designed to be eventually expanded to include five pumps. Due to increased water demands and to maintain redundancy in the high service pumping system, the need exists to add the final two pumps. This will provide a firm capacity of 49.0 MGD (34,000 gpm) or 61.2 MGD (42,500 gpm) with all pumps in service. Pumps will be sized to match existing and will include variable frequency drives (VFD) for operational flexibility.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Design and construct an approximately 10,000 sq ft, high-ceilinged pre-engineered, metal warehouse building with a covered, drive-through unloading bay, rollup doors, and heavy-duty material storage racks. Build an adjacent CMU block structure with a 4,000 sq ft footprint to include a training room, office and breakroom space, and workstations for technicians to repair and rebuild instruments, radios, and other components.

Rationale

The Water Treatment Plant (WTP) maintenance needs have grown due to aging of the facility, new processes coming online, and new staff. The new facility size will accommodate the needs of the growing staff with additional warehouse space to allow for stocking of parts for increased redundancy. The warehouse should include climate-controlled space for storage and inventory control of instruments, sensors, radio telemetry, and other sophisticated electrical components to be securely maintained.

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 17915 Waterline Rd, Bradenton

Description and Scope

Replace the existing sludge collection systems (traveling bridges) in the treatment basins A and C with chain and flight.

Rationale

Two of the treatment basins at the Water Treatment Plant (WTP), A and C, are equipped with travelling bridges for sludge collection. These systems are labor intensive and have frequent outages due to operational and maintenance issues. In addition, the equipment is aging, and some components are no longer manufactured or readily available. Replacement of the bridges is recommended. A different technology, chain and flight, is the preferred choice due to its lower capital and operational costs and higher reliability.

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: Water Treatment Plant Lab Expansion
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: PW02151 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

This project is to design and construct a 2,000 square foot expansion to the current single story lab building to provide additional space for meetings/trainings, storage, and staff work stations. The northern wall will be extended 25 feet from the building's north entrance approximately 80 feet to the new northeast corner of the structure. There are no major underground utilities in this area. This is a single story addition to the part of the building which is also a single story. Floor, ceiling, and roof elevations will be mirrored. Construction of the annex shall be near completion before cutting in internal doorway access from the existing lab.

Rationale

The laboratory at the water treatment plant was constructed in 1999 and the building has significant useful life remaining. However, staffing and analytical needs have grown significantly since it was designed. Increasingly stringent water quality and laboratory certification regulations and a growing distribution system have increased the sampling load and quality assurance program. Accordingly, the lab has increased the number staff as well as expanded its scope of accreditation. The current space is no longer sufficient to meet the needs of the lab. There is inadequate space for storage of reagents and supplies. The sample receiving area is too small and there is no meeting room or dedicated space for staff work stations in the current floorplan. This project will address these deficiencies

Category: Potable Water **Subcategory:** Potable Water Treatment
Project Title: Water Treatment Plant Surface Water Chemical Building
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6116770 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
LOS/Concurrency: **Y** Project Need: Growth, Maintenance

Project Location

District 1 17915 Waterline Road, Bradenton

Description and Scope

Construct a new chemical building for surface water chemicals storage and pumping including feed systems for sodium hypochlorite, ammonium sulfate, phosphate, and surface water polymer. Integrate with plant Supervisory Control And Data Acquisition (SCADA) system. Plumb to injection points. Add additional chemical storage for aluminum sulfate and sodium hypochlorite.

Rationale

The water treatment plant surface water trains supply 2/3 of the County drinking water. There is currently no treatment chemical supply redundancy. The current structure housing the surface water chemical feed systems was built over 50 years ago and cannot be safely retrofitted. This project would construct a new chemical building as well as add additional storage for critical treatment chemicals, increasing resiliency during emergencies and supply chain issues.

Project #: 6008207 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3333 Lena Rd., Bradenton

Description and Scope

Stage II Phase II Installation of new landfill gas collection infrastructure, including additional horizontal and vertical gas collection. Extension of the primary vacuum header pipe northward in Stage II and interconnection of manholes for early gas collection. Required system maintenance including replacement extraction wells and condensate management systems on existing gas collection system in Stages I and III.

Rationale

As buried refuse deteriorates, the gas collection system collects and controls the emission of methane into the piping system, which reroutes the gas to be used as energy. This eliminates odor and keeps the landfill in compliance with Title V air permit requirements.

Project #: SW02156 **Status:** Existing

Project Map

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Deficiency

Project Location

Countywide To Be Determined (TBD)

Description and Scope

With site selection and BOCC approval, staff to negotiate and purchase new landfill site property location. Scope to include: Utilize property criteria evaluation report to select a site or sites to enter into negotiations for their purchase. This project will utilize the site assessment criteria evaluations, appraisals, survey and legal descriptions, legal assistance, property acquisition assistance, engineering due diligence for prospect properties as well as public relations efforts to select the top site for the future landfill site to be located. With BOCC approval, County shall enter into negotiations for purchase under the scope of this work.

Rationale

The landfill began accepting Municipal solid waste in the early 1970's. In 1983, the 1,200 acre site was permitted as a Class 1 waste facility and began filling stage 1 of it's the three permitted stages. As of April 2016, the last permitted stage available was opened for operations. This last stage is currently scheduled to be completely filled in 20 years ending September 2039. In September of 2019, a plan was presented to the BOCC proposing to begin the process of searching for a new landfill site location ranging in size from approximately 1,000 to 3,000 acres. The estimated time frame to locate a site, purchase the property, design, permit, and construct the new facility is approximately 20 years. With BOCC approval, staff has evaluated potential sites under a developed and established criteria providing for 5 top locations in Manatee County.

Description and Scope

Line approximately 1425' of corrugated metal pipe (24" - 66") using cured-in-place pipe (CIPP) lining.

Rationale

Existing corrugated metal storm pipe along 43rd St W and Sandpoint Dr. is in poor condition and needs to be repaired to handle large rain events.

Project Location

District 2 59th Ave Dr W, Bradenton

Description and Scope

This project encompasses design, permitting, and installation of 350 ft of new storm drain pipe from 5th St W to outfall reestablishing flow and relieving downstream street flooding. Pipe line runs under two non-inhabited structures in back yards and has no established easement.

Rationale

This storm drain has collapsed in multiple locations from 5th St W to its outfall into Swan Lake Canal.

Project #: 6113900 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 87th St Ct NW, Bradenton

Description and Scope

This project will replace 975 feet of failing 24 inch storm water conveyance pipe and associated drainage infrastructure. The pipeline runs between thirteen homes and has numerous trees and fences over the pipe that need to be removed.

Rationale

This failing pipe line is a candidate for replacement due to severe root intrusion and collapsed sections of conveyance. This line conveys storm water off of 9th Ave NW south to the bay.

Project #: ST02000 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 Bayshore Gardens, Bradenton

Description and Scope

This project encompasses design, permitting, and installation of cure in place lining rehabilitation and/ or full replacement of pipes of various sizes on eleven streets in the Bayshore Gardens community and/or the select addition of inlets in problem areas.

Rationale

This community has corrugated metal drainage pipe that has surpassed its lifespan and is starting to fail. When these pipe lines fail either by collapsing or rotting through stormwater conveyance is compromised causing street and property flooding to occur.

Project #: 6106300 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 Bowlees Creek, Bradenton

Description and Scope

Design and construction. Removal of two weirs. Addition of automated weirs in Bowlees Creek and extend reclaimed water to Sara Bay Golf Course. Addition of nutrient baffle box for water quality treatment. Dredging portions of Bowlees Creek.

Rationale

Bowlees Creek is a flood prone watershed. A Watershed Study and Flood Mitigation Alternatives Analysis is underway through the cooperative agreement with the SWFWMD. This study identified flood mitigation alternatives which included this project for flood reduction. This flood mitigation alternative was identified at the work session held October 31, 2019 to the BOCC.

Capital Improvement Plan

FY2024-FY2028

Category: Stormwater **Subcategory:**
Project Title: Coquina Beach Drainage Improvements
Department: Public Works
Project Mgr: Mike Sturm
Infra.Sales Tax:
Project #: 6005719 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Coquina Beach

Description and Scope

Identify site specific flood alleviation alternatives and water quality best management practices within the Coquina Beach public parking areas. The project extends from the landward side of Longboat Pass to north of the beach restroom facility parking area (approximately 4,200 feet), with location specific internal site improvements to be determined during the conceptual design alternatives evaluation.

Rationale

The Coquina Beach public parking areas gradually drain south toward Longboat Pass, but periodically flood to depths of 6 inch to 18 inches during prolonged or high intensity rainfalls. This creates a nuisance to the public utilizing the beach and associated facilities, creates additional maintenance issues due to shell parking wash-outs, reduces access to available parking spaces and creates unsightly conditions.

Project Title: Cortez Village and Sunny Shores Pipe Replacement
Department: Public Works
Project Mgr: Eddy Zappacosta
Infra.Sales Tax:
Project #: 6114200 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Cortez Village - Sunny Shores, Bradenton

Description and Scope

This project encompasses design, permitting, and installation of stormwater drainage infrastructure or rehabilitation of pipes of various sizes on ten streets in the Cortez Village community and eleven streets in the Sunny Shores Community.

Rationale

These two communities have drainage infrastructure that is extremely old and is plagued by chronic failures. There are numerous sections of small diameter clay and non reinforced drainage pipe that continuously collapse and causes street flooding. Both communities stormwater conveyance systems are easily overwhelmed and could benefit from redesign, pipe upsizing, and some pipe rehab. The pipe upsizing would need property acquisition and engineering involvement and is outside the scope of regular maintenance.

Project Title: Design and Construction of Stormwater Operations Facility
Department: Public Works
Project Mgr: Myra Prater
Infra.Sales Tax:
Project #: ST02313 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 5511 39th St E, Bradenton

Description and Scope

This provides funding for design and construction of a new administration building at the 5511 39th ST E, Stormwater Operations facility. The current building does not provide enough space for the 50+ employees working from this location. It was originally intended for roughly 30 employees. The structure is also antiquated and not storm ready. This facility is one of the main dispatch points of our rapid response teams during weather emergencies. The teams cannot stay at this location due to the unsteady nature of the facility and must stay at another location, then return to the yard for their equipment to respond following events.

Rationale

This project will provide a building sufficient for the Stormwater Operations crew for the next 20+ years. It will also add another County facility that can be occupied during weather events so crews are available the fastest response possible.

Project #: ST01955 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 Florida Blvd, Bradenton

Description and Scope

Design and construction. Add inlets and piping (19 inch by 30 inch and up to 38 inch by 60 inch pipe). Approximately 1300 ft of pipe and 26 inlets at Florida Boulevard, American Way, at the Marina, and New York Avenue.

Rationale

This project is to improve local street flooding and flooding of the Trailer Estates area. County requires roadways to be designed to the 10 year 24 hour storm event. The existing drainage system does not meet County requirements for the 10 year storm resulting in high water (overtopping of crown of road) at various locations.

Project #: 6114400 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 15th St to Sugar Creek, Bradenton

Description and Scope

Design and construction. Construction of a 20 ac-ft flood mitigation pond on east side of 15th, additional dual 100 L.F. of 48 inch RCP at 15th and additional equivalent 7 ft RCP (approx. 100 L.F. at 27th), and additional equivalent 7 ft RCP in Sugar Creek Resort.

Rationale

This project is to lower flood stages in Glenn Creek from the Tropicana Area on 15th to Sugar Creek Resort. This project will lower the flood stages in this system up to the 100 year 24 hour storm event. This will be accomplished with widening of existing conveyances on 15th, 27th, and within the Sugar Creek Resort area and will also include a flood mitigation pond.

Project #: 6096800 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 Hawthorn Park, Bradenton

Description and Scope

The designed capture structure will make a location that captures the material before it gets to the open ditch and the cross pipe. While the structure will require frequent cleaning, the net annual amount of effort will still be less. The capture structure will be cleaned easily with existing equipment.

Rationale

The purpose of this project is to proactively capture sediment that continually comes through this open drainage system. Crews must annually clean the ditch and pipe crossing just down stream of this location because of the large rate of deposition. The designed capture structure will make a location that captures the material before it gets to the open ditch and the cross pipe. The capture structure will be cleaned easily with existing equipment.

Project Location

District 2 53rd Ave E at 37th St E, Bradenton

Description and Scope

This project encompasses two stormwater pipe line replacements in the Gap Creek basin. The line discharging through John Marble Park is a corrugated metal pipe that has deteriorated to the point of failure and will start to limit capacity as it collapses. This outfall is the sole discharge for Manatee Oaks Community as well as John Marble Park. The stormwater line crossing 39th St E just south of SR 70 is also failing and will eventually impact the road and Gateway East community.

Rationale

This project encompasses design, permitting, and installation of cure in place lining rehabilitation and/ or full replacement of pipes of various sizes in John Marble Park and the Gap Creek cross pipe under 39th St E .

Description and Scope

This project provides the funding and services need to purchase the additional land needed to construct a new administration building at the 5511 39th ST E facility. The land in question is the 3 acres directly to the north of the facility that is currently undeveloped. It will provide a proper location for the administration building in the long term and allow the construction to proceed while the crew still occupies the existing building.

Rationale

This small addition of land to the already established and accepted neighborhood yard is much more desirable and economical compared to searching for a new site to locate the entire operation. The surrounding neighborhoods were built with this facility in place and have accepted its operation as the norm for the area.

Project #: 6106400 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 9th St E, Bradenton

Description and Scope

Design and construction. Construction of dual 48 inch pipes from the main storm sewer trunkline on Pennsylvania Avenue west 2660 feet to the Pittsburgh Drain.

Rationale

This project is to lower flood stages in Meadors Subdivision and Pennsylvania Avenue area. This project will lower the flood stages and remove 9 of 18 structures from the 100 year 24 hour floodplain. This will be accomplished with construction of dual 48 inch pipes from the main stormsewer trunkline on Pennsylvania Avenue west 2660 feet to the Pittsburgh Drain.

Bowlees Creek is a flood prone watershed. A Watershed Study and Flood Mitigation Alternatives Analysis is underway through the cooperative agreement with the SWFWMD. This study identified flood mitigation alternatives which included this project for flood reduction.

Project Title: Mockingbird Hill/Samoset Canal Improvements at 27th St E/34th Ave E
Department: Public Works
Project Mgr: Daniel Garner
Infra.Sales Tax:
Project #: 6101900 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 2 27th St E at the Mockingbird Hill canal, Bradenton

Description and Scope

This project will design and construct a conveyance system to transport storm water under 27th ST E. This will replace an existing system that has been put together in pieces and parts over the last 40 years of development.

Rationale

Mockingbird Hill canal culvert crossing rehab. This is the location of the Mockingbird Hill canal where it must cross 27th ST E. The way it crosses is very inefficient because it is not a direct path for the water to flow. The canal is offset by over 200 feet from the west to east side of the road. During this distance the water must make two 90 degree turns and pass through several structures. The City of Bradenton watershed study showed the water to back up over two feet from east to west because of this situation. This project will design a more efficient conveyance process at this location.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 Molokai Dr between 5th St W and the Pittsburg Canal, Bradenton

Description and Scope

This project will replace a highly deteriorated 66 inches metal pipe between 5th St W and the Pittsburg drain between Molokai Dr and 65th Ave W.

Rationale

This project is for the replacement of a failing storm water pipe south of Molokai Dr. between 5th St W and the Pittsburg Canal. This 66 inch pipe is the outfall point for areas east of US 41/ 14th ST W, south of 63rd Ave W, and north of Bowlees Creek. This metal pipe is well past its typical 30 year lifespan, and holes are developing along the entire section of pipe that require annual repairs. If not replaced a full pipe collapse could occur and cause the potential for extensive flooding in the surrounding areas. Replacing with concrete storm drain will not only increase the systems useful life to approximately 50 years or more, the change from corrugated metal to smooth walled concrete makes the drainage system more efficient.

Project #: ST01957 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 Lockwood Ridge - Honore, Bradenton

Description and Scope

Design and construction. This project will lower the flood stages for communities along Rattlesnake Slough in the immediate area between Lockwood Ridge Road and the crossing at Honore Avenue. This will be accomplished with construction of a 50 ac-ft flood mitigation pond.

Rationale

This project is to lower flood stages in Rattlesnake Slough for up to the 100 year 24 hour storm event. This will be accomplished with construction of 50 ac-ft of pond storage (flood mitigation) located between Lockwood Ridge Road and the crossing at Honore Avenue.

Rattlesnake Slough is a flood prone watershed. A Watershed Study has been completed for this area and flood reduction can be realized with additional storage provided by this project.

Project Title: Sunniland Stormwater Outfall Replacement
Department: Public Works
Project Mgr: Andres Hidalgo
Infra.Sales Tax:
Project #: 6095500 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 4th St E and the pond west of 3rd St E, Bradenton

Description and Scope

Replace a 560 foot section of failing storm pipe running between four homes at the border of Sunniland and Kirkland subdivisions. The project is complicated by very limited space between the homes and questionable existing easements, and several large trees.

Rationale

This project is for the replacement of failing storm water pipe between 4th St E and the pond west of 3rd St E. This aging pipe is the outfall point for areas in Sunniland, Kirkhaven, and the north side of Palm Lake. There are multiple problems with this section of the drainage system. First, varying pipe sizes make it impossible to run a root cutter through the entire system. It also causes restrictions in flow due to reductions in size. Additionally, there are numerous trees growing over the pipe. If not replaced a full pipe collapse could occur and cause the potential for extensive flooding in the surrounding areas. The project would encompass removing the trees over the pipe and replacing the drainage system with reinforced concrete pipe, which should yield a 50+ year lifespan. Replacing the pipe in this section of the system would also create uniformity in pipe size, yielding more efficient flow.

Project Location

District 4 Tallevast Rd, Sarasota

Description and Scope

Complete a detailed subsurface investigation, storm pipe inspection and rehabilitation of 2,400 linear feet of 60 inch storm drain on Tallevast Road from Prospect to the terminus of the pipe.

Rationale

This section of four lane road is served by a 60 inch diameter storm pipe running the length of the roadway on the south side of the road. Since construction, settlement and/or leaking pipe joints have caused voids under the road surface and issues with the integrity of the road surface. This project will investigate the settlement of the pipe, integrity of the pipe joints and soil, voids existing under the road, and identify repair options. Repair methods may include removal and replacement of storm pipe, point repair of joints and/or lining of the pipe.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 Woods of Whitfield, Bradenton

Description and Scope

This project encompasses design, permitting, surveying and installation of cure in place lining rehabilitation and/ or full replacement of pipes of various sizes on multiple streets in the Woods of Whitfield community.

Rationale

This community has corrugated metal and pebble rock drainage pipe that has surpassed its lifespan and is starting to fail. When these pipe lines fail either by collapsing or rotting through, stormwater conveyance is compromised causing street and property flooding to occur.

Schedule of Activities				Annual Operating Budget Impacts

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: 20A Force Main Replacement (RTU 433)
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02144 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 5932 12th Street East, Bradenton

Description and Scope

Replace approximately 1,420 linear feet of 8-inch diameter pipe from the flange inside the valve vault at lift station RTU # 433 20A to the termination point at the existing manhole # 12614. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout, fill, and abandon in place the old force main.

Rationale

Recommendation in Package 8 from the Wastewater Force Main & Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 5503 12th Street East, Bradenton

Description and Scope

Replace approximately 1,265 linear feet of 8-inch diameter pipe from the flange inside the valve vault at lift station RTU # 432 21A to the intersection of 57th Avenue East and 12th Street East. Reconnect to the existing PVC pipe at the intersection. Grout, fill, and abandon in place the old force main. Line the inside of the manhole and the next two manholes downstream.

Rationale

Recommendation from Package 7 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 1560 60th Avenue Drive E, Bradenton

Description and Scope

Replace approximately 750 linear feet of 6-inch diameter pipe from the flange inside the valve vault at lift station RTU # 431 42A to the termination point at the existing manhole # 5677. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout fill and abandon in place the old force main. This project will also require a new jack and bore casing under 15th Street East approximately 75 linear feet.

Rationale

Recommendation from Package 6 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Description and Scope

Replace approximately 630 linear feet of 6-inch diameter pipe from the inline valve #45675 at 1220 51st Ave. East to the termination point at the existing manhole # 13127. Install a p-trap (dip in the Force Main) and connect to the existing manhole. Line the inside of the manhole and the next two manholes downstream. Grout fill and abandon in place the old force main.

Rationale

Recommendation from Package 5 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain an operable utility system. If not replaced, the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Colony Cove Pipeline Replacement Plan and Phase 1 Replacements
Department: Utilities
Project Mgr: Albert Rosenstein
Infra.Sales Tax:
Project #: 6005685 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 101 Amsterdam Avenue, Ellenton, FL 34222

Description and Scope

Due to the magnitude of the project, the construction will be funded and completed in phases. The first task in the project is to conduct a study of the area and to develop a phased Colony Cove Pipeline Replacement Plan and Preliminary Design Report. After the Plan and Preliminary Design are complete, Phase I will be designed and constructed. It is anticipated that there will be additional future phased construction packages.

Rationale

The Colony Cove neighborhood is served by the County's wastewater collection system. Currently, the County has ten lift stations that serve Colony Cove. Some of the lift station pumps are not meeting their firm capacity requirements based on evaluations in the Collection System Master Plan. The system is also aging and experiences infiltration from the high groundwater table. In addition, access to the infrastructure is becoming difficult and existing mains and manholes are being covered or crowded by mobile homes.

Project #: WW02160 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Cortez Road and Coral Blvd Intersection, Bradenton

Description and Scope

Install a new carrier casing under Cortez Road and replace approximately 120 linear feet of 6-inch diameter pipe in the new casing. Tie into existing force main pipe at the valve on the South side of the road and install p-trap and connect into existing termination manhole # 19580 on the north side. Line the inside of manhole and the next two manholes downstream. Grout fill and abandon in place the old force main.

Rationale

Recommended from the Wastewater Force main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 2007 Bay Dr - 34th St - 60th Ave W, Bradenton

Description and Scope

Replacement of approximately 10,300 linear feet of 20 inch ductile iron pipe to 24 inch high density polyethylene force main.

Rationale

Replacement is needed due to the advanced age of this force main. The force main is corroded and has previously blown out at the joint. This force main, located by Sarasota Bay, does not have a large holding capacity and does not have valves to stop the flow in an emergency.

Infra.Sales Tax:
Project #: 6097880 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 26th St W to 38th Ave W, Bradenton

Description and Scope

Replacement of force main from lift station 33A and force main from lift station 36A. Force main replacement for lift station 33A will terminate at the manhole at 3633 26th St. West and the force main replacement for lift station 36A will terminate at lift station 34A on 24th St. West. The scope of services will also include survey of potential locations for proposed lift station replacements or improvements at lift station 33A, 36A and the lift station at Lake Bayshore Condominiums.

Rationale

Force main installed in 1976 to be replaced by 2026 as recommended in Project Packages 5A and 5B in the Force Main and Valve Asset Management Plan (2014). This force main is being scheduled for replacement due to age assessment and condition risk with respect to location approximate location to the bay and criticality.

Project Title: Harbor Hills Force Main Replacement
Department: Utilities
Project Mgr: Craig Hughes
Infra.Sales Tax:
Project #: 6104271 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 Harbor Road and 6th Ave NW

Description and Scope

Replace Approximately 2,302 Linear Feet (LF) of existing 4" force main pumping from Lift Station #232, running along Harbor Road and 6th Ave NW, and connecting to an 8" force main along 59th street NW.

Rationale

Replacement due to age (installed in approximately 1976) as recommended in Project Packages 3A through 3E in the 'Force Main and Valve Asset Management Plan (2014)'. This portion of 2,302 linear feet (LF) was originally planned as part of the CIP Project #6089781-Southwest Area D Force main Replacement. The location of this project is also adjacent to the Harbor Hills Waterline Replacement Project # 6104270 which includes water main replacement along Harbor Road as well. For planning and construction purposes it is practical to run the water main replacement project and this portion of force main replacement project concurrently.

Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6097980 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 7477 41 St Ave E to Under I-75, Bradenton

Description and Scope

Project includes installing approximately 670 linear feet of 20 inch diameter force main downstream of 428 Booster Station (RTU 666), under I-75, where a hydraulic bottleneck exists. Also, due to the size of the force main and extensive depth needing to drill under the interstate the design calls for a switch from the directional drill method to jack and bore method of installation of the force main.

Rationale

To correct existing capacity deficiency. Recommended Project SE-5 from the Southeast Wastewater Collection System Master Plan Update (2017) and to coordinate with Florida Department of Transportation (FDOT) project timing.

Project #: WW02164 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 708 Key Royale Drive, Anna Maria Island

Description and Scope

Replace Key Royale (RTU#61) force main (approximately 1,165 linear feet of 4-inch diameter pipe). Replace from the flange in the valve vault to the existing termination manhole #5132. Install p-trap (dip in the Force Main) and line the inside of the manhole and the next two downstream. Grout fill and abandon the existing force main in place.

Rationale

Recommended from the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

Project Mgr: Jerry Varghese
Infra.Sales Tax:
Project #: 6100880 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

Multi-district 902 Whitfield Ave to 112 63rd Ave E, Bradenton

Description and Scope

Replace Lift Station 14-A force main and extend the force main to 6,700 linear feet to the master lift station 13-A wetwell.

Rationale

The Lift Station 14-A force main currently terminates into a manhole on 63rd Avenue East. The receiving manhole has exhibited severe corrosion due to hydrogen sulfide gases from the force main discharge. The project will extend the Lift Station 14-A force main to the MLS 13-A wetwell to prevent further gravity system corrosion. This project will also prevent projected future capacity issues in the gravity system on 63rd Avenue East. The gravity main upsizing recommended in the Master Plan can be avoided by extending this force main.

District 4 Southwest Service Area, Bradenton

Description and Scope

Replace approximately 765 linear feet (LF) of 4- and 6-inch force main at Lift Station 15-A (RTU 402) with new 6-inch pipe and approximately 1,295 LF of 3-inch force main at Palm Aire 6 Lift Station (RTU 446) with new 4-inch pipe. Includes lining of receiving manhole and the first two downstream manholes for each force main. Grout, fill, and abandon in place the old force main.

Rationale

Replace due to age as recommended in Project Packages 6E and 7C in the Force Main and Valve Asset Management Plan (2014).

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Lift Station 6A and 7A Force Main Replacements and Lift Station 6A Wetwell Exp
Department: Public Works Projects
Project Mgr: Marcenal Joseph
Infra.Sales Tax:
Project #: 6097881 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 4 7678 W Moreland Dr to 8448 Uplands Blvd, Bradenton

Description and Scope

Replace Lift Station 7A (RTU 137) force main (approximately 1,615 linear feet (LF) of 6-inch force main replaced with 8-inch) and Lift Station 6A (RTU 136) force main (approximately 1,900 LF of 8-inch pipe with 12-inch). Remove existing wetwell and install an upsized wetwell at Lift Station 6A, proper size to be determined by the EOR on this project based on storage capacity requirements. Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

The force main upsize at Lift Station 7A is to accommodate additional flows from the USF/Airport areas and prevent high velocities in the force main. The upsize at Lift Station 6A is to prevent high velocities in the force main and prevent surcharging in the upstream gravity system. Recommended Projects SW-5 and SW-6 from the Southwest Wastewater Collection System Master Plan Update (2016). The current Lift Station 6A does not meet the required wetwell capacity (approximately 4 times the pumping capacity).

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 4150 Gulf Dr to 8720 44th Ave E, Bradenton

Description and Scope

Extend MLS #5 (RTU 071) 20 inch force main along Cortez Road to MLS 1M (RTU 203) a total of 10,113 linear feet.

Rationale

To relieve capacity issues in the 24 inch gravity main on Cortez Road (upstream of MLS 1M). Simulations of current and future conditions have shown that during wet weather this pipe is consistently surcharged (at maximum capacity) and has a high risk of causing overflows, preventing MLS 1M from collecting the wastewater flow from MLS #5 and other tributary areas. Recommended Project SW-3 from the Southwest Wastewater Collection System Master Plan Update (2016).

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: MLS 1-D, 27-A, and 13-A Inflow and Infiltration Improvements
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW01924 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district Southwest Service Area, Bradenton

Description and Scope

Conduct smoke testing within the Master Lift Station (MLS) 1-D, 27-A, and 13-A basins, including all upstream lift station basins. Based on reports from the smoke testing contractor, develop a bid package of necessary repairs for the identified defects.

Rationale

The County has identified the Southwest Service Area has having high infiltration and inflow. Smoke testing identifies defects that contribute to inflow including broken clean-out caps, connections to storm drains, and manholes in need of an inflow dish to prevent stormwater from entering the sanitary sewer. This project will identify and remedy these defects within these master lift station basins, including all upstream lift station basins.

Project #: 6101080 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 8720 44th Ave W, Bradenton

Description and Scope

Evaluate the MLS-203 (1-M) collection system basin for infiltration and inflow. Design and construct a sequence of improvements to decrease infiltration and inflow occurring within this system. First phase should include a chloride monitoring study to narrow the areas to receive rehabilitation. Project should include cleaning and inspections of sewer system including laterals, mainlines, and manholes to provide cost estimates, recommendations for improvements, and scope required to complete the work.

Rationale

The 1-M mini-basin (the gravity area that flows directly to MLS 1-M) was one of the highest ranked priority areas for infiltration rehabilitation per the Engineer of Record's Inflow and Infiltration Study Report. Main line gravity pipes, manholes and laterals will be evaluated.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district 2301 Ave C to 2819 Ave C, Bradenton Beach and Manatee Woods, Bradenton

Description and Scope

Evaluate the following collection system basins for infiltration and inflow: Manatee Woods Lift Station (RTU 319), Lift Station 3-C (RTU 058), and Lift Station 2-C (RTU 057). Design and construct a sequence of improvements to decrease infiltration and inflow occurring within these collection system basins. First phase should include a chloride monitoring study for Lift Station 2-C and inspections including smoke testing for Manatee Woods and Lift Station 3-C to narrow the areas to receive rehabilitation. Project includes cleaning and inspections of sewer system including laterals, mainlines, and manholes to provide cost estimates, recommendations for improvements, and scope required to complete the work. Project also includes design of improvements, preparation of bid documents, and services during construction.

Rationale

The Manatee Woods lift station, Lift Station 2-C, and Lift Station 3-C were identified as high priority areas for rehabilitation in the County's Inflow and Infiltration Study. Improvements will decrease inflow and infiltration to the collection system and treatment plant.

Project Title: Nancy Gamble Lane Force Main Extension
Department: Utilities
Project Mgr: Eddy Zappacosta
Infra.Sales Tax:
Project #: 6112880 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 1112 Nancy Gamble Lane

Description and Scope

Install approximately 950' of 4" force main pipe from existing discharge manhole GIS#18377 to existing manhole GIS#3748. . Right now the existing force main discharges into manhole #18377. This project will divert discharge into manhole # 3748.

Rationale

The County has identified this area as having high infiltration and inflow (I&I) during wet weather events. This new force main will redirect the point of discharge to prevent future overflowing of Lift Station #538 during high wet weather events causing Sanitary Sewer Overflow (SSO's). Smoke testing identified defects in a privately owned sewer system that contributes to inflow of the County sewer system. This project will eliminate the already full capacity of the small sewer system and divert the flow into a larger capacity system down stream.

Description and Scope

Upsize discharge force mains for the following Lift Stations: RTU 539 (approximately 900 linear feet(LF) of 4 inch diameter), 557 (approximately 500 LF of 6 inch diameter), 501 (approximately 500 LF of 6 inch diameter), 583 (approximately 50 LF of 10 inch diameter), and 546 (approximately 120 LF of 12 inches diameter).

Rationale

The discharge force mains need to be upsized to meet capacity requirements at these lift stations. Recommended Project NC-3 from the North Wastewater Collection System Master Plan Update (2016).

Project Title: Perico Island Force Main Replacement (RTU 207)
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02166 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 1203 51st Ave Drive W., Bradenton

Description and Scope

Replace approximately 1,800 linear feet of 6-inch diameter pipe and approximately 500 linear feet of 8-inch diameter High-Density Polyethylene (HDPE) pipe subaqueous directional drill under Perico Bay (Total combined pipe replacement of approximately 2,300 linear feet) from the flange inside the valve vault at lift station RTU # 207 to the termination point Lift station RTU # 208. Grout fill and abandon in place the old force main. Approximately 75 linear feet of the 6-inch diameter pipe shall be installed by jack and bore. Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

Recommended from the Wastewater Force main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 (Bayshore Gardens) Southwest Service Area, Bradenton

Description and Scope

Inspect and replace or rehabilitate as required +/- 60,691 linear feet (LF) gravity sewer main, 311 manholes, 690 sewer laterals. Project includes +/- 10 LF of 4" pipe, +/- 38 LF of 6" pipe, +/- 43,418 LF of 8" pipe, +/- 633 LF of 10" pipe, +/- 783 LF of 12" pipe, +/-11,706 LF of 16" pipe, and +/- 4,104 LF of 24" pipe.

Rationale

Recommendation from Manatee County Gravity Collection System Desktop Evaluation, Repair and Rehabilitate (R&R) Prioritization, and Asset Management Plan" (2020), Section 7.2: Priority Group No. 2, Project Package 2-B (Appendix B). Many of these pipelines and infrastructure are past their useful life. They are located adjacent to Sarasota Bay an environmentally sensitive area. Failure to this sewer system could impact the bay and the County could face fines from Florida Department of Environmental Protection (FDEP). Also these proactive actions will reduce inflow and infiltration (I & I) into the system reducing the potential sewer spills. This also will reduce the treatment cost at the Southwest Water Reclamation Facility (SWWRF).

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Priority Group 2-F Gravity Sewer
Department: Public Works Projects
Project Mgr: Jim Shuler
Infra.Sales Tax:
Project #: 6089784 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district North Service Area, Bradenton

Description and Scope

Inspect and replace or rehabilitate as required +/- 15,257 LF gravity sewer main, 68 manholes, 123 sewer laterals. Project includes +/- 1,321 LF of 6" pipe, +/- 13,366 LF of 8" pipe, and +/- 570 LF of 10" pipe.

Rationale

Recommendation from Manatee County Gravity Collection System Desktop Evaluation, Repair and Rehabilitation (R&R) Prioritization, and Asset Management Plan" (2020), Section 7.2: Priority Group No. 2, Project Package 2-F (Appendix B). Many of these pipelines and infrastructure are past their useful life. Additionally, many of these pipelines are located adjacent to environmentally sensitive areas. Failure to this sewer system could impact the bay and the County could face fines from Florida Department Environmental Protection (FDEP). Also these proactive actions will reduce inflow & infiltration (I & I) into the system reducing the potential sewer spills. This could also potentially reduce the treatment cost at the North Regional Water Reclamation Facility (NRWRF).

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: RTU 457 & 430 Force Main Replacements
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02167 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district 8519 Whitfield Industrial Park and 2821 62nd Ave, Bradenton

Description and Scope

Replace approximately 2,335 linear feet of 4-inch diameter pipe (combined). RTU # 457 1,085 linear feet & RTU # 430 1,250 linear feet of 4-inch diameter pipe. Each force main will require a jack & bore: RTU # 457 approximately 100 LF under the Seminole Gulf Railway and RTU # 430 approximately 75 LF under 63rd Avenue East. RTU # 430 new force main will be installed down the roadway right of way along 628th St E or 29th St E (to be determined by design engineer), abandoning the easement the current force main is on. RTU #457 terminates in manhole # 16450; line the inside of the manhole and the next two downstream. Grout fill and abandon both the old force mains in place.

Rationale

Recommendation from Package 9 of the Wastewater Force Main and Valve Asset Management program updated in 2020. The force main is at the end of its service life and is in need of replacement. The force main line replacement is necessary to maintain a operable utility system. If not replaced the line is at risk of failing and causing a sanitary sewer overflow. Failure to this sewer system could impact the bay and the County could face fines from the Florida Department of Environmental Protection (FDEP).

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Sewer Screening System for Detention Center
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6101280 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 14470 Harlee Rd, Palmetto

Description and Scope

Replace the existing sewer screening system at Manatee County's Detention Center. The existing structure will be retrofitted to replace the existing 12.75 inch bar screen with a new 18 inch screening system including new screening structural and electrical components. Install a new above ground Magmeter. Clean and inspect existing wetwell fiberglass liner, and repair as needed. Clean, prepare, and make any needed repairs to concrete structure before application of new liner. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage, and remove and replace as necessary.

Rationale

The existing screen has problems handling the debris coming from the Detention Center, particularly large objects such as clothing, bed sheets, shoes, and other objects that are being put in the collection system. These objects cause the clogging of the current screen, which causes bypassing of the screening system and avoids the capture of these objects. When the objects bypass the screen they cause clogging issues with the lift station pumps and force main system. The existing wetwell requires rehabilitation due to age and replacement of internal components where necessary. A flow meter will provide better understanding of flows discharged to the collection system from the Detention Center.

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: South Bradenton Beach Gravity System Relocation
Department: Utilities
Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6105280 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 6th St S to just south of 13th St S, Bradenton Beach

Description and Scope

Relocate a portion of the gravity collection system in South Bradenton Beach to new locations located within public right-of-way. Install approximately 2,400 linear feet of 10-inch and 2,628 linear feet of 8-inch gravity main and approximately 21 manholes. Install approximately 100 new 6-inch lateral with connections. Remove existing gravity pipelines. Provide paving repair and road restoration.

Rationale

The current County-owned gravity collection system is on private property including portions through homeowner yards. Project will relocate areas of this neighborhood gravity collection system to be within the street right-of-way.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 5820 Riverview Blvd to 5116 Harbor Dr NW, Bradenton

Description and Scope

Replace approximately 3,655 (Linear Feet) LF of 8 inch force main at Lift Station 7D (RTU 230), approximately 625 (LF) of 6 inch force main at Lift Station 22D (RTU 224), approximately 279 LF (250 LF by jack and bore and 29 LF open cut) of 4 inch force main at Lift Station 21D (RTU 229), approximately 875 LF of 4 inch force main at Lift Station 4D (RTU 231). Includes lining of receiving manhole and the first two downstream manholes for each force main.

Rationale

Replace due to age as recommended in Project Packages 3A through 3E in the Force Main and Valve Asset Management Plan (2014).

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Collections
Project Title: Tidevue Estates Inflow and Infiltration Improvements
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6110281 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

Multi-district 1355 41st Ave E, Ellenton

Description and Scope

Evaluate the Tidevue Estates portion of the Tidevue Master Lift Station collection system basin for infiltration and inflow (I&I), including an I&I study with potential flow monitoring, smoke testing, and closed-circuit television (CCTV). This includes the gravity collection system within Tidevue Estates upstream of lift station RTU 503. Design and construct a sequence of improvements to decrease infiltration and inflow occurring within these collection system basins. Project to include cleaning and inspections of sewer system including laterals, mainlines, and manholes, recommendations for improvements, and scope of the recommended improvements. Project also includes design of improvements, preparation of bid documents, and services during construction.

Rationale

The Tidevue Master Lift Station service area has been identified by County staff to have high inflow and/or infiltration. This project will include an I&I study evaluation to determine the locations of high I&I and subsequent improvements in the most problematic areas identified in the study.

Project #: 6018082 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 Canada Blvd, Bradenton

Description and Scope

Design phase one (I) and two (II) in Fiscal Year (FY) 23 and replacement construction in FY24. Also planned and funding identified in the Utilities long term plan; FY30 design Phases three (III) and four (IV) and replacement construction in FY31. Then FY37 design of the last phase five and construction in FY38. This will complete the total replacement of Trailer Estates.

Rationale

From the Trailer Estates Inflow and Infiltration (I&I) Final Report Summary, it was recommended to replace the aging sewer system from the rear easements to the front roadway. The current system is experiencing a high infiltration rate.

Project #: 6111580 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Erie Road from Fort Hamer Road to 69th St E - Parrish

Description and Scope

Reimbursement for the design and permitting of approximately 15,000 LF of force main along Buffalo Canal from Ft. Hamer Road to the North County Wastewater Treatment Plant as described in the Stantec Professional Services Agreement with Neal Land & Neighborhoods, LLC.

Rationale

The current wastewater master plan shows three force mains (16", 20", and 24") along the Erie Road East-West corridor. In an effort to reduce the amount of utilities in this corridor and ease future maintenance the County Engineer proposed an alternative route along Buffalo Canal for the future 20" force main. The master plan will be updated to reflect this and the needed size will be re-evaluated (likely a 16" based on current projections). To expedite the design of the force main, an agreement between the County and the landowner (Haval Farms, LLC and North Manatee Investment, LLC) will be entered for the reimbursement of the design and permitting costs.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 5 SR64 at Lena Road, Bradenton

Description and Scope

Once the acquisition for 160.99 acres of land located at SR64 & Lena Road is completed for the Central County Complex, as part of the Cooperative Agreement, Manatee County will construct the access road and public utilities on the property within three years.

Rationale

Due to increased growth in the Eastern and Northeastern portions of Manatee County's urban service area, the Utilities, Public Works and Sheriff's Departments have experienced increased operating costs and reductions in level of service. All three Departments are experiencing aging infrastructure at their current facilities and have impending need of replacement and expansion. The Central County Complex will provide multiple efficiencies for the three investing Departments.

Project Title: Creekside Commons Sanitary Sewer Relocation
Department: Utilities
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6112080 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

Countywide Erie Road N/S and US 301, Parrish

Description and Scope

Reroute approximately 3012 feet of an exiting 24 inch sewer gravity main from its current location onto the Creekside Commons commercial property. This project is a result of a developer's agreement in which the County will reimburse the Developer their cost to reroute the sewer gravity main.

Rationale

Approximately 3012 feet of 24 inch sewer gravity main exists from the north side of US 301 to the east side of Erie Road near the US 301/Erie Road intersection (NE quadrant). Due to the location of the sewer main, it is difficult for County staff to access and maintain this portion of the sewer collection system. This project will reroute the sewer main onto a commercial development (Creekside Commons/Benderson) located to the east of Creekside Preserve to provide better access for County staff to maintain the County's sewer collection system.

Project #: 6115280 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Bud Rhoden Road at Moccasin Wallow Road

Description and Scope

Design, permit, install, and construct approximately 4,620 LF of 10" force main along Bud Rhoden Road, from Moccasin Wallow Road to the Mandarin Grove development. Review, approve, and process the monthly pay applications for completed work and reimburse the developer based on terms of the agreement.

Rationale

The County's wastewater master plan requires an extension of a 10" sewer force main along Bud Rhoden Road from Moccasin Wallow Road to the Mandarin Grove development. The purpose of this project is to efficiently expand the County's sewer collection system for future development in this area. Staff have requested the developer to oversize the force main extension to meet the master plan size. Also, this project is to fund the developer's agreement for the force main oversizing with the improvements being constructed as part of the Mandarin Grove development project.

Project Location

District 5 SR 70 - East of Lorraine Road, Lakewood Ranch

Description and Scope

Design, permit, and construct approximately 7,014 LF of 12" force main along SR 70 from Lorraine Road to Polo Trail and approximately 1,765 LF of 10" force main along Uihlein Blvd from SR 70 northward.

Rationale

Lakewood National and Polo Run (fka Bridgewater East) developments connected to the County's wastewater collection system by means of an alternative force main connection. Since the construction of these alternative connections, the County's Wastewater Collection System Master Plan has been revised to include these improvements. The County Attorney's Office has commented that the developer is entitled to refund of facility investment fees (line capacity fees) paid since the improvements are now part of the County's Wastewater Collection System Master Plan. This project is to fund the developer's agreement to reimburse the developer line capacity fees paid or costs to construct the improvements, whichever is less.

Project Title: Moccasin Wallow Force Main Extension from Bud Rhoden Rd to Artisan Lakes MI
Department: Public Works Projects
Project Mgr: Daniel Garner
Infra.Sales Tax:
Project #: 6066181 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Bud Rhoden Rd to Artisan Lakes Master Lift Station, Palmetto

Description and Scope

Install approximately 7,615 Linear Feet (LF) extension of 12 inch Moccasin Wallow road force main from Bud Rhoden Road to Artisan Lakes Master Lift Station, and upsize the force main at Ellenton-Gillette Road per Developer Agreement.

Rationale

The County is constructing a 12 inch force main along Moccasin Wallow Road to relieve capacity of the Master Lift Station N1B by diverting flow from the N1H force main along US 41 to the Artisan Lakes MLS. The County is installing the portion of the force main from US 41 to Bud Rhoden Road under a separate CIP project (#6066180). A developer participation agreement has been executed to construct the remaining portion from Bud Rhoden Road to Artisan Lakes MLS. The County will participate in this project in order to upsize the force main from 6 inch to 12 inch diameter. The costs shown reflect the County's portion.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 1 Moccasin Wallow Road - US 301 & 115th Avenue East, Palmetto

Description and Scope

As part of the road widening project, the reclaim main along with fire hydrants, valves, fittings, and services along the route will be relocated out of the proposed roadway into the right of way or upgrade to DIP. Construction consists of removal and installation +/- 3,223 linear feet of 30-inch DIP, +/- 242 linear feet of 24-inch DIP, +/- 15 linear feet of 8-inch PVC, +/- 15 linear feet of 6-inch PVC, +/- 31 linear feet of 4-inch PVC, +/- 107 linear feet of 42-inch Steel Casing, +/- 107 linear feet of 30-inch Steel Casing, +/- 114 linear feet of 8-inch Casing.

Rationale

This project is Segment 1 of a 3 Segment plan, which will widen Moccasin Wallow Road from the east end of the I-75 off ramp area (approximately 75th Street E) east to US 301. The project will relocate reclaim mains as a result of the Moccasin Wallow Road widening project (see transportation project #6071261).

Category: Wastewater **Subcategory:** Wastewater Growth Related
Project Title: North Rye Road at Golf Course Rd - Sewer
Department: Utilities
Project Mgr: Scott May
Infra.Sales Tax:
Project #: 6115480 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 North Rye Road at Golf Course Road, Parrish

Description and Scope

Engineer, design, survey, permit, construct, construction manage approximately 7,200 linear feet of 12" sanitary sewer force main from the southernmost connection point adjacent to the Rye Ranch development, north to the existing connection point at the intersection of Golf Course Road. Process payment requests in accordance with the LDA and developer's agreement.

Rationale

Rye Ranch, LLC (Rye Ranch) entered into a Local Development Agreement (LDA) with Manatee County on 10/26/2021. Section 7.(C) of the LDA, requires Rye Ranch to design, permit, and construct a 12-inch sanitary sewer force main within the Rye Road right-of-way from the southernmost connection point adjacent to the Rye Ranch development, north to the existing connection point at the intersection of Golf Course Road. Rye Ranch is to into an agreement for the reimbursement of construction costs for the force main extension (as defined) less the amount of facility investment fee credits granted pursuant to the LDA. This project is to fund the reimbursement portion of the associated developer's agreement.

Project #: 6087681 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Parrish Commercial Village (Near Parrish MLS), Parrish

Description and Scope

Construction of a gravity sewer infrastructure by the developer of Crosswind Point (fka Parrish Plantation) in accordance with the approved construction plans for Parrish Plantation Offsite Utilities (PLN1912-0096) and the executed agreement between the developer and the County.

Rationale

The County has requested, the developer of the Crosswind Point (fka Parrish Plantation) development, located along SR 62 and US 301 in Parrish, to design and construct certain sanitary sewer main improvements to reduce design and construction costs to the County. These improvements will make available sanitary sewer service to a portion of the Parrish Commercial Village area. This project is part of a developer's agreement in which subject to reimbursement the developer will design and construct the sanitary sewer improvements for the County.

Project Title: Saltmeadows - SR62 at SandMarsh Ave - Force Main Upsize & Extension
Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6114980 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct: (1) approximately 1,900 LF of 18" and 300 LF of 20" force main along SR 62 from Pioneer Dr to Sand Marsh Ave and (2) approximately 4,350 LF of 16" force main along Sand Marsh Ave from SR 62 to CR 675. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The County's wastewater master plan requires an extension of a 18" sewer force main along SR 62 from Pioneer Dr to Sand Marsh Ave and a 16" force main along Sand Marsh Ave from SR 62 to CR 675. The purpose of this project is to efficiently expand the County's sewer collection system for future development in this area. Staff have requested the developer to oversize the force main extensions to meet the master plan sizes. This project funds the developer's agreement for the force main oversizing with the improvements being constructed as part of the Saltmeadows development project.

Project Location

District 1 Parrish Village, Parrish

Description and Scope

Design and construct approximately 3,200 LF of 4-inch force main and approximately 250 feet of gravity sewer. The 4-inch force main runs will be installed in the ROW to allow for commercial properties to connect private lifts stations to the County's system. A railroad permit and easement for the force main or sanitary sewer may be needed.

Rationale

Installation of force mains and gravity sewer lines for the economic improvement and development for the potential commercial development area located within the Parrish Commercial Village Overlay.

Project #: 6101480 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 2007 Bay Dr, Bradenton

Description and Scope

Replace existing motor control center (MCC) and service entrance breaker, remove transformer, remove distribution center, remove lighting panel, remove the equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring the MCC and other electrical components up to current electrical standards. Improve electrical area to be an air conditioned space or install a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The MCC needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 112 63rd Ave E, Bradenton

Description and Scope

Remove existing fiberglass liner, make repairs to concrete structure where applicable, apply new liner, repair or replace platform/grating/stairs/handrail where applicable, replace stop gate channels and inspect aluminum stop gates, install new LED lighting system, inspect Muffin Monster for wear and replace if needed.

Rationale

Due to the heavily corrosive atmosphere, the existing fiberglass liner is beginning to delaminate from the concrete structure allowing hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The stop gate channels are becoming inoperable and need to be replaced to allow for isolation of the flow channels. The lighting system is subpar and needs to be upgraded to make work within the confined space safer and easier.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: 39A Motor Control Center Rehabilitation
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6017984 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5621 39th St E, Bradenton

Description and Scope

Replace existing motor control center (MCC) and service entrance breaker, remove transformer, distribution center, lighting panel, equipment room lighting, and the drywell lighting. Replace and upgrade all equipment as needed to bring the MCC and other electrical components up to current electrical standards. Improve electrical area to be an air conditioned space or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The motor control center (MCC) sections needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects.

Project Title: Artisan Lakes Master Lift Station Rehabilitation
Department: Public Works Projects
Project Mgr: Craig Hughes
Infra.Sales Tax:
Project #: 6110280 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 9760 Gillette Rd, Palmetto

Description and Scope

Install new above ground flow through Magmeter. Clean and inspect existing wetwell fiberglass liner, repair as needed. Clean prep and make any needed repairs to concrete structure before application of liner repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage, remove and replace as necessary. Remove and replace submersible pumps. Evaluate and replace Heating Ventilation and Air Conditioning (HVAC) system for climate control inside the station. Install new crane assembly above wetwell to facilitate raising pumps.

Rationale

The flow meter at this station regularly requires maintenance and needs replaced. Due to the heavily corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks which would allow hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The hardware needs to be inspected for corrosion damage before catastrophic failure could occur. Pipe restraints are beginning to corrode and need to be replaced with 316SS restraint system. At the time of this project the pumps will have reached their useful life. Currently this master lift station (MLS) does not have a crane and it is difficult to remove pumps for inspection and service.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Bayshore Yacht Basin (RTU 101) Relocation and Force Main Replacement
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6097484 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 6735 26th St W, Bradenton

Description and Scope

Construct new master lift station (MLS) for the Bayshore Yacht Basin located adjacent to the existing station. Convert the station to a MLS, comprised of three pumps, wetwell, VFDs, building or enclosure for electrical components, back-up power generator or auxiliary pump, flow meter, and all piping and valving necessary to transfer service to the new MLS. Demolish existing lift station. Replace existing force main with a new alignment from the new MLS to the tie-in with the MLS 12-A force main. Design engineer shall review historical flow data to appropriately size the pump station and forcemain. Recent collection system rehabilitation has decreased flows to this station, and this may warrant decreased sizing from what was estimated in the Master Plan.

Rationale

The existing station is located within a private gated area. Site location limits require it to remain within this area. The station is undersized for current peak wet weather flows and needs additional capacity. This station serves a large area and can be considered a MLS and should have permanent stand-by power. The force main is also undersized and needs to be upsized to increase transmission capacity. In conjunction with this project, the County should conduct gravity system inspection (CCTV, smoke testing, etc.) within the RTU 101 gravity system basin to determine priority areas for sewer rehabilitation. Master Plan project SW-1.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Braden Woods Lift Station (RTU 326) Rehabilitation and New Force Main
Department: Public Works Projects
Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6067781 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 6555 99th Street East, Bradenton

Description and Scope

Convert the Braden Woods Lift Station (RTU 326) to a Master Lift Station. Install a new lined wetwell, convert the existing wetwell to a manhole, install new pumps, Variable Frequency Drives (VFDs), and electrical equipment associated with the improvements. Replace piping and valving associated with the wetwell and valve assembly and install a flow meter. Install a new forcemain from the River Club 2 Lift Station (RTU 495) directly to the RTU 326 wetwell to bypass the upstream gravity main.

Rationale

The existing service area gravity system is showing potential for surcharge during extreme flow/rain events based on collection system analysis. The flow rate and velocities in the gravity system upstream of Braden Woods Lift Station (RTU 326) exceed the design criteria when more than one upstream lift station is pumping. The addition of a forcemain from the upstream River Club 2 Lift Station (RTU 495) directly to the RTU 326 wetwell will reduce the potential for surcharge. The addition of Variable Frequency Drives (VFDs) will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. Installation of a flow meter will assist with more accurately tracking flows.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Colony Cove 6 Lift Station RTU 522
Department: Utilities
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6005686 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 162 Colony Dr N, Ellenton

Description and Scope

Rehabilitating existing Colony Cove 6 Lift Station. Convert the existing station to a Master Lift Station (MLS), including: installation of three new pumps, new Variable Frequency Drive (VFD's). Building or enclosure for new electrical components, new flow meter, and replacement piping and valving associated with the wet well and valve assembly. Rehabilitation of wet well shall include: cleaning and inspecting the existing liner and making repairs as necessary. inspection of the drop pipe and support brackets and repair or replacement as necessary, inspection of floor and bench for signs of corrosion, and repairs to the concrete where needed. Install a stand-by auxiliary pump with diesel engine with sizing appropriate for the new VFD's. Existing generator shall be saved for relocation to a different station or trailer mounting, for backup.

Rationale

The existing station is beginning to fail internally due to age and corrosion. The station serves a large area and should be considered an MLS. It is considered a high-risk station due to the flow volume and location. The addition of the Variable Frequency Drives (VFD's) will require an electrical building or enclosure for protection from the elements. By adding the VFD's, there will be a savings in power consumption and reduced wear on the pumps. This station currently has an inoperable flow meter. Installation of a new flow meter will assist with more accurately tracking flows.

Project #: 6089783 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 1801 55th Ave. W., Bradenton

Description and Scope

Construct new Lift Station (LS) 29A located 50 feet north of the existing LS. Furnish and install two new 10 hp submersible pumps, new 12 ft diameter, 20 ft deep lined wet well, new piping and valving associated with the wet well and valve assembly, new electrical instrumentation and control components including 80 kw emergency generator, and all piping and valving necessary to transfer service to the new LS. Remove existing LS and construct new manhole adjacent, first three upstream manholes will be polymer concrete. ARC flash study required since this is a new lift station. Need to purchase land for at least an 40' x 40' in size in Fiscal Year 2023.

Rationale

Relocating the lift station 50 feet north will improve access to the site and safety to the lift station. The current lift station is on the edge of the roadway. This creates a risk of being damaged by vehicular traffic. The current lift station was installed in 1976. By constructing a new lift station to the North. We can gain access, upgrading the station to newer technologies.

Project Location

District 4 1160 Rome Ave, Bradenton

Description and Scope

Rehabilitate and upsize Lift Station 9-A (RTU 436). Install a new lined wet well, install new pumps (approximately 40 horsepower), and electrical equipment associated with improvements; replace piping and valving associated with the wetwell and valve assembly; and install a new flow meter. Install new force main (approximately 6,060 feet) of 12-inch pipe. Evaluation of pump design point and wet well size should be evaluated by project design engineer. Cost estimate based on a 12-foot diameter wet well.

Rationale

Improvements are needed at this lift station to correct capacity deficiencies. Master Plan project # Southwest-2.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 Vicinity of 26th St W and 38th Ave W, Bradenton

Description and Scope

Furnish and install approximately 2,100 linear feet (LF) of new 21-inch and 24-inch influent gravity main into Lift Station 36A. Sizing to be confirmed by design engineer based on latest flow projections considering site redevelopment. Install new connections as needed. Replace Lift Station 36A in a new location with upsized and lined wetwell, new pumps, and all necessary electrical and instrumentation components per the County's standards. Apply wetwell liner and replace wetwell top slab at Lift Station 33A. Replace the Bayshore on the Lakes Lift Station in a new location including upsized and lined wetwell, new pumps, upsized 8-inch discharge piping, and all necessary electrical and instrumentation components per the County's standards. First three upstream manholes will be polymer concrete for 36A and Bayshore on the Lakes. Install the Data Flow System (DFS) bubbler level control systems at all three locations. Conduct ARC Flash study for all three lift stations.

Rationale

Improvements based on Project SW-7 from the Southwest Wastewater Collection Master Plan to address capacity issues at 36A and Bayshore on the Lakes and corrosion issues at Lift Station 33A.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 18th Ave - 51st St, Bradenton

Description and Scope

Upgrade existing service entrance breaker, remove transformer; distribution center, lighting panel, equipment room lighting, and the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Remove and replace existing 185 horsepower (hp) pumps and piping, fitting and supports as needed for installation of new pumps. Upgraded to submersible in FY 30.

Rationale

Replacement recommended from the Master Lift Station (MLS) Condition Assessment Report and Asset Replacement Plan completed in 2020. Current pumps are reaching the end of their useful life and are in need of replacement.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: MLS 27A Pumps and Variable Frequency Dr Replacement
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6097480 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 2484 53rd Ave W, Bradenton

Description and Scope

Remove and replace existing pumps and variable frequency drives (VFDs). Project includes evaluation of hydraulic conditions and selection of appropriate pump design point. Capacity and performance of existing pumps should be evaluated with a pump test.

Rationale

Current equipment reaching end of predicted life span are in need of replacement. Pumps are showing signs of wear and aging due to the corrosive atmosphere.

Schedule of Activities				Annual Operating Budget Impacts		
Activity	Start	End	Amount	Category	Fiscal Year	Amount

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: MLS 39A Emergency Generator Replacement
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6017983 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5621 39th St E, Bradenton

Description and Scope

Remove existing emergency generator from inside the lift station building, install new, larger generator outside with sound attenuating enclosure, and replace the automatic transfer switch. Convert existing generator into a mobile backup generator by mounting it on a trailer.

Rationale

Current generator is reaching life expectancy, and replacement is needed to prevent downtime due to catastrophic failure. Portable emergency generators would not be able to power all three pumps in this lift station, which could cause a sanitary sewage overflow. The generator also needs to be moved outside to reduce excessive heat in the building where electronics and control equipment are located.

Infra.Sales Tax:
Project #: 6097482 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 4300 Gulf Dr, Holmes Beach

Description and Scope

Upgrade existing service entrance breaker, remove transformer; distribution center, lighting panel, equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection and Association (NFPA-70E).

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Infra.Sales Tax:
Project #: 6097581 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 11600 Clubhouse Dr, Bradenton

Description and Scope

Replace existing motor control center (MCC) and service entrance breaker, remove transformer, distribution center, lighting panel, and equipment room lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Replace generator, or install a stand-by auxiliary pump with diesel engine, with sizing appropriate for the recently replaced VFDs and new electrical improvements. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. The new electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA-70E).

Rationale

The MCC and main breaker need to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. The generator needs to be replaced with a newer appropriately sized unit, or with an auxiliary pump with diesel engine that can provide reliable backup pumping during electrical outages. The project should include an evaluation of the feasibility, costs, advantages, and disadvantages of using an auxiliary pump versus a standby generator. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6097580 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 11600 Clubhouse Dr, Bradenton

Description and Scope

Install new above ground flow through Magmeter. Remove and replace existing liner. Clean prep and make any needed repairs to concrete structure before application of new liner system. Install new in-line grinder system. Replace discharge piping, guide rails, pipe bracing, base ells, and/or mounting plates. Also replace the influent force main pipe restraints.

Rationale

Current strap-on flow meter is not functional. Due to the heavily corrosive atmosphere, the existing fiberglass liner is beginning to delaminate from the concrete structure allowing hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The base elbows are worn and need replaced to prevent leaks or blow by from developing and causing additional damage. The old pipe is C900 PVC and needs to be replaced with our current Utility Standard DR11 High Density polyethylene (HDPE). Pipe restraints are corroded and need to be replaced with 316SS restraint system.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: MLS N1-B Pumps, VFD Replacement, and Wetwell Rehabilitation
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6022388 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 1 2903 69th St E, Palmetto

Description and Scope

Remove and replace existing Flygt pumps and ABB Variable Frequency Drives (VFDs). Pump hydraulic conditions should be evaluated to account for projected flows from the Wastewater Collection System Master Plan and hydraulic model, including diversion of Lift Station N1-H flows away from MLS N1-B (flows diverted to Artisan Lakes MLS). Install new flow-through mag-meter in appropriate location. Clean and inspect existing wetwell liner and repair as needed. Clean, prepare, and make any needed repairs to concrete structure before application of new liner or repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and mounting plates for corrosion damage, and replace as necessary. Install new comminuter pump.

Rationale

Current pumps and VFDs are reaching their life span and are in need of replacement. Pumps are showing signs of wear and aging due to the corrosive atmosphere. In addition, the hydraulic conditions of the station will change resulting from diversion of Lift Station N1-H flows to a different MLS (flows at N1-B expected to decrease). Current flow meter has reached its life expectancy and is in need of replacement with high repair costs. Wetwell lining repairs or replacement is anticipated to be needed by this time.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Master Lift Station #5 Generator Upgrade
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02248 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 4150 Gulf Drive, Holmes Beach

Description and Scope

Remove the existing generator, enclosure, and fuel tank. Supply new generator with enclosure and subbase fuel tank. Construct a new elevated concrete platform to 13.00 feet for the new generator with the subbase fuel tank. Reroute electrical and alarm signal conduits and conductors to a new platform. Relocate the generator docking station to a new elevated platform. Provide stairs to a new platform to access equipment.

Rationale

The existing generator and fuel tank is currently installed at ground level (roughly 6.00 feet above sea level), making this equipment vulnerable to flooding. Flooding could lead to equipment failure, fuel tank leaks, and/or a Sanitary Sewer Overflow (SSO) which would have a detrimental impact to the environment. This generator was installed in 2009 but is in poor condition caused by sewer gas and saltwater in the air and it is reaching the end of its usable life. By installing a new generator and fuel tank on an elevated platform, this will protect the equipment from flood waters during a storm or coastal flooding event.

Project #: WW02165 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 4150 Gulf Drive, Holmes Beach

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove grinder system, lighting fixtures, and all fiberglass platform and railings from wetwell and demo the above ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Utilize the open structure to construct a new 20x20x25 concrete lined wetwell. Redirect gravity flow to the newly constructed and lined wetwell. First three upstream manholes will be polymer concrete. Install discharge piping, guide rails, pipe bracing, base ells and riser piping. Install above ground valve assembly with new flow through Mag meter, install new gantry crane system over the wetwell, and install new security fencing around the new lift station site. Upgrade electrical, instrumentation, and control components as required and conduct ARC Flash study. Repair/replace driveway as needed. Generator upgrade and associated improvements are planned in FY28.

Rationale

This station and structure is nearing the end of its useful life. A project to move the motor control center (MCC) out into its own climate-controlled building on an elevated platform is in process. Converting this station to a submersible application, will increase the safety of our operation by eliminating the requirement of routine entry into a permit required confined space. Other improvements will be easier interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wet well.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Master Lift Station 1D Upgrade
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02027 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 1806 51st St W, Bradenton

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove grinder system, lighting fixtures, and all fiberglass platform and railings from wetwell and demo the above ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Construct a new 20x20x25 concrete wetwell within that open cavity and backfill remaining voids. Redirect gravity flow to the new lined wetwell. First three upstream manholes will be polymer concrete. Pumps in 1D MLS are reaching the end of useful life. Install new pumps, discharge piping, guide rails, pipe bracing, base ells. Install above ground valve assembly with new flow through Magnetic flow meter, install new gantry crane system over the wetwell, and install security fencing around the lift station. Install Variable Frequency Drives (VFDs) and upgrade electrical, instrumentation, and control components as required and conduct ARC Flash study. Repair/replace driveway as needed.

Rationale

This project would be the final stage of bringing Master Lift Station (MLS) 1D into the current design standards for master lift stations. In addition, by converting this station to a submersible application and eliminating the wetwell/drywell configuration, this will increase the safety of the operation and eliminate routine entry into a permit required confined space to do weekly checks. Other improvements will be easier interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wetwell.

Project Location

Multi-district Various MLS locations

Description and Scope

Install new crane assemblies above wet wells to facilitate raising pumps at Heritage Harbour (RTU 640), Lakewood Ranch (RTU 362), Rye Road (RTU 892) Master Lift Stations.

Rationale

Master Lift Stations (MLS) located at: Heritage Harbour (RTU 640), Lakewood Ranch (RTU 362), Rye Road (RTU 892), do not have cranes and it is difficult to remove pumps for inspection and service.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Master Lift Station# 39A Upgrade
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02249 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5621 39th Street East, Bradenton

Description and Scope

Remove pumps, piping, and appurtenances from the drywell, remove the grinder system, lighting, and all fiberglass platform and railings from wetwell and demo the above-ground level and the concrete dividing wall between wetwell and drywell to create one open concrete pit. Construct a new 20x20x25 concrete wetwell within that open cavity and backfill the remaining voids. Redirect gravity flow to the new wetwell. The first three upstream manholes will be polymer concrete. Install discharge piping, guide rails, pipe bracing, base ells and riser piping per the current Manatee County Detail converting this station to a submersible configuration. Install a new gantry crane system over the wetwell, install new security fencing around the new lift station site and conduct ARC Flash study. Repair/replace driveway as needed.

Rationale

The Department has two projects; one, to move the motor control center (MCC) into its own climate-controlled building on an elevated platform, and two, to move the generator outside of the control room. This Master Lift Station upgrade project would bring MLS #39A to current design standards. Converting this station will increase safety by eliminating the requirement of weekly entry into a permit required confined space. Other improvements: interchange of spare pumps, elimination of the grinder system, and the improved efficiency when cleaning the wetwell.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Memphis Road Lift Station RTU 534
Department: Utilities
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6061082 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 2 1721 17th St E, Palmetto

Description and Scope

Rehabilitate existing Lift Station Memphis Road. Convert the existing station to a Master Lift Station (MLS), including installation of three new pumps, new Variable Frequency Drive (VFDs), building of enclosure for and valving associated with the wet well and valve assembly. Rehabilitation of wet well shall include: cleaning and inspecting the existing liner and making repairs as necessary, inspection of the drop pipe and support brackets and repair or replacement as necessary, inspection of floor and bench for signs of corrosion, and repairs to the concrete where needed. This station has an existing backup generator and will remain in service.

Rationale

The existing station is beginning to fail internally due to age and corrosion. This station serves a large area and should be considered an MLS. It is considered a high risk station due to the flow volume and location. The addition of the Variable Frequency Drives (DFD's) will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. This station currently has an inoperable flow meter. Installation of a new flow meter will assist with more accurately tracking flows.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Missionary Village Lift Station Rehabilitation
Department: Public Works Projects
Project Mgr: Brett Gocka
Infra.Sales Tax:
Project #: 6022386 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 SR64 and 117 St E, Bradenton

Description and Scope

Evaluate and upsize wet well and pumps at Missionary Village lift station (RTU 329) due to known capacity issues. Convert the station to a Master Lift Station (MLS) by installing three new pumps, Variable Frequency Drive (VFDs), a building or enclosure for electrical components, back-up power generator or auxiliary pump, flow meter, and new piping and valving associated with the wetwell and valve assembly. Convert the existing generator into a mobile backup generator by mounting it on a trailer. Wetwell sizing and configuration and pump sizing should be determined by project design engineer.

Rationale

Improvements are needed at this lift station to correct existing capacity deficiency. The station is undersized for current peak wet weather flows and needs additional capacity. This station serves a large area and can be considered a Master Lift Station (MLS) and should have permanent stand-by power. The addition of the Variable Frequency Drives (VFDs) will require an electrical building or enclosure for protection from the elements. By adding the VFDs, there will be a savings in power consumption and reduced wear on the pumps. This station currently has no flow meter. Installation of a flow meter will assist with more accurately tracking flows. Master Plan project Southeast-3.

Category: Wastewater **Subcategory:** Wastewater Lift Stations
Project Title: Pope Road Master Lift Station Rehabilitation
Department: Public Works Projects
Project Mgr: Craig Hughes
Infra.Sales Tax:
Project #: 6110380 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 12405 44th Ave E, Bradenton

Description and Scope

Install new above ground flow through Magmeter. Clean and inspect existing wetwell fiberglass liner, repair as needed. Clean prep and make any needed repairs to concrete structure before application of liner repairs. Inspect discharge piping, guide rails, pipe bracing, base ells, influent force main brackets, and/or mounting plates for corrosion damage, remove and replace as necessary. Remove and replace submersible pumps. Evaluate and replace HVAC system. Install new crane assembly above wetwell. Engineer should evaluate addition of 4500 single-family units from outside of current service area to this master lift station (MLS). Perform analysis to determine what improvements to MLS pumps, wetwell, etc. and foremain are necessary for this additional service, including downstream.

Rationale

The flow meter at this station regularly requires maintenance and needs to be replaced. Due to the heavily corrosive atmosphere, the existing fiberglass liner should be inspected for delamination and leaks which would allow hydrogen sulfide to deteriorate the concrete behind it. Extensive damage to concrete can cause the structure to become unsafe. The hardware needs to be inspected for corrosion damage before catastrophic failure could occur. Pipe restraints are beginning to corrode and need to be replaced with 316SS restraint system. Currently this MLS does not have a crane. The area served by this MLS is experiencing new residential construction.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Maintenance

Project Location

District 1 1355 41st Ave E, Ellenton

Description and Scope

Upgrade existing service entrance breaker, remove transformer; distribution center, lighting panel, equipment room lighting, and remove the drywell lighting. Replace and upgrade all equipment as needed to bring electrical components up to current electrical standards. Improve the electrical area to be an air conditioned space, or construct a new electrical building or enclosure. Also, the new design and electrical system configuration will include arc flash electrical safety improvements for compliance with Occupational Safety and Health Administration (OSHA) and National Fire Protection and Association (NFPA-70E). Install new above-ground flow meter.

Rationale

The main breaker needs to be upgraded and brought up to proper National Electrical Code standard and upgraded to proper safety code. Many of the electrical components are obsolete and are no longer serviceable. There are several components that are no longer in use as other equipment has been upgraded during previous projects. Electrical gear needs to be enclosed in a climate-controlled space for long-term reliability. The project will include a feasibility study to determine the options and costs to improve the electrical area to be air conditioned or to construct a new electrical building or enclosure.

Project #: 6117680 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 1010 Upper Manatee River Road, Bradenton, FL

Description and Scope

Remove existing electrical equipment and piping associated with the wet well. Remove riser pipes and bases from wet well. Remove and replace wet well lid and hatches. Remove underground valve vault. Remove existing liner and install new liner in wet well. Install new bases, riser pipes, and pipe supports. Install new valve assembly and flow meter above ground. Install new electrical service, transfer switch, and control panel. Existing generator is to be reused. Reroute conduits to new locations and install new conductors. Rework fencing and driveway to accommodate new design.

Rationale

This Lift Station is located on a main road that is scheduled for a road widening project. The equipment and structure at this location has reached its expected life span and is due for rehabilitation. Repairing this structure and replacing equipment will ensure proper and reliable operation. Creating a thoroughfare driveway at this site will allow staff to safely access the site and avoid additional traffic on this roadway.

Description and Scope

Reimburse Developer for the design, permit, and construct a new master lift station with associated easements.

Rationale

The existing lift station (RTU545) on 60th Avenue East in Ellenton is located in an area such that expansion of the existing wet well or the addition of a secondary wet well is not feasible. The Developer for the Watermark at Ellenton Development (fka Springs at Ellenton) has agreed to design, permit, and construct a new master lift station on their site to serve their development, currently developed areas, and future developments. The developer will provide the County with needed easements for the new master lift station.

Category: Wastewater **Subcategory:** Wastewater Master Reuse System
Project Title: 11th Ave W and 75th St W Reclaimed Water Main Improvements
Department: Public Works Projects
Project Mgr: Jerry Varghese
Infra.Sales Tax:
Project #: 6002294 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 11th Ave W and 75th St W, Bradenton

Description and Scope

Upsize existing 10" reclaimed water main along 11th Ave W from 68th Street W to 75th St W continuing north along 75th St. W from 11th Ave to Manatee Avenue and then on the north side of Manatee Avenue for approximately 70 ft by removing the existing 10" and furnishing and installing a total of approximately 4,600 LF of new 12" reclaimed water main. There is an existing section of 12" under Manatee Ave that can remain.

Rationale

An increase in pipe size is necessary for the 10" reclaimed water mains along 11th Ave W from 68th Street West to 75th Street West and along 75th Street West from 11th Avenue West to Manatee Avenue to decrease velocities in excess of 6 feet per second (fps) and resulting high head loss within the existing pipelines. The high head loss is causing low pressures in the Palma Sola and Wisteria Park area that is served by the existing 10" and 12" mains along 75th St W and 11th Ave W. Increasing the diameter of these pipelines to 12" will decrease the velocity and head loss, resulting in increased pressure for customers.

Project Title: 18th Place East - Reclaimed Water Main Upgrades
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02140 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 18th Place East on the SE side of Rye Rd E, Bradenton

Description and Scope

Upsize the existing 6" and 4" segments of reclaimed water main along 18th Pl E from Rye Rd E, by removing approximately 1,400 LF of existing reclaimed water main and furnishing and installing approximately 1,400 LF of new 8" reclaimed water main.

Rationale

The Mill Creek subdivision is served reclaimed water off of a 30" main along Rye Rd E through approximately 100 LF of 6" followed by approximately 1,300 LF of 4" which connects to the existing 8" along 18th Pl E. This section of 6" and 4" is undersized compared to the downstream 8" and results in high velocities, high head loss, and pressures downstream based on the Reclaimed Water Master Plan model evaluations. The upsized main will eliminate the bottle neck, reduce the velocities, and increase the downstream pressure above the minimum 40 psi.

Project Location

District 4 66th St W - SWRWFR to 53rd Ave W and E to 65th St W, Bradenton

Description and Scope

Install approximately 3,900 LF of new 24" reclaimed water main along 66th Street West from existing 42" reclaimed water main from Southwest Water Reclamation Facility (SWWRF) south to 53rd Avenue West and east to existing northern 24" reclaimed water main along 53rd Ave W at the intersection with 65th St West.

Rationale

The existing 24" reclaimed water main along 66th Ave from SWWRF will be limited in capacity and as a result will experience high velocities and head loss in the future based on the Reclaimed Water Master Plan model evaluations. The new parallel main from just outside of SWWRF will connect to the existing parallel main on 53rd Ave W and provide additional capacity for transferring reclaimed water to the Southeast Regional Water Reclamation Facility (SERWRF) and North Regional Water Reclamation Facility (NRWRF) service areas in the future while maintaining a minimum pressure of 40 pounds per second (psi) in the Manatee County Master Reuse System (MCMRS).

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 3 88th Ct NW - 17th Ave NW and 17th Ave Cir NW, Bradenton

Description and Scope

Install a new 4-inch reclaimed water main to parallel the existing 4" reclaimed water main along 88th Ct NW from 17th Ave NW to 17th Ave Cir NW, by furnishing and installing approximately 200 LF of new 4" reclaimed water main.

Rationale

The existing 4" reclaimed water main serving Wisteria Park is limited in capacity and as a result experiences high velocity, high head loss, pressures below 40 pounds per square inch (psi) downstream based on the Reclaimed Water Master Plan model evaluations. The parallel main will increase the capacity, reduce the velocity below 8 feet per second (fps), and help to increase downstream pressure.

District 4 Bollettieri Blvd W - 53rd Ave W, Bradenton

Description and Scope

Upsize existing 10" reclaimed water main to 16" along west side of Bollettieri Blvd W from the existing 14" (ending approximately 1,300 LF from 53rd Ave W) south for approximately 1,200 LF to IMG Academies Park, by removing the existing 10" reclaimed water main and furnishing and installing approximately 1,200 LF of new 16" reclaimed water main. Will need to acquire easement from IMG Academy.

Rationale

The existing 10" reclaimed water main west of Bollettieri Blvd W is limited in capacity and as a result experiences high velocities and head loss in the based on Reclaimed Water Master Plan model evaluations. An increase in the pipe size is necessary to reduce the velocities and resulting head loss to maintain pressures above 40 pounds per square inch (psi) minimum along the southern portion of Bollettieri Blvd W/ 47th Ave W and El Conquistador Pkwy.

Project #: 6111390 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 1 Erie Rd - 69th St E to Martha Road, Parrish

Description and Scope

Install reclaimed water line to complete a major looped system for Erie Road and Copperstone. This project was originally part of Project #6085590 but was separated due to the Martha to US301 transportation project. This will be for the remaining portion to complete the major looped system from Martha Rd to Harrison Ranch Blvd and will be constructed along with the related Erie Road E/W Roadway widening project from 69th St E to Martha Road.

Rationale

Construct reclaim water line from Martha Rd to Harrison Ranch Boulevard using approximately 9,350 liner feet of 16 inch ductile iron pipe. The project includes miscellaneous relocations/adjustment of existing reclaimed water infrastructure from 69th to Harrison Ranch Blvd as needed to accommodate proposed roadway improvements. Design and construction to run concurrent with the related roadway project from 69th St E to Martha Rd.

Project Location

District 1 Erie Rd - Martha Road to US 301, Parrish

Description and Scope

Install approximately 4,900 linear feet of 16" DIP reclaim water line from Martha Rd to US301.

Rationale

With the modification of the Erie Rd E/W transportation project, it was determined to separate this project into two portions. First being the 16" DIP reclaim water line from Martha Rd to US301 to align with the transportation project. The remaining segment from Martha Rd to Harrison Ranch Blvd will be become a Project of Record until funding is available.

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 Golf Course Road (near Ft. Hamer Road), Parrish

Description and Scope

Design, permit, and construct a 24" reclaimed water main from the existing stub at 127th Ave E to the western boundary of the Windwater residential development. Reimburse developer based on monthly invoices submitted in accordance with the agreement with the developer. The design and construction of this improvement has been approved under the construction plans for the Windwater (fka Wildcat Preserve) development (PLN2109-0030, as revised).

Rationale

To further expand the County's reclaimed water system infrastructure to provide more availability to communities in accordance with the adopted reclaimed water master plan. This project has an associated developer's agreement with terms and conditions related to the funding of this project.

Category: Wastewater **Subcategory:** Wastewater Master Reuse System
Project Title: Harrison Ranch Blvd Main Improvements - RC
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02161 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 Harrison Ranch Blvd, Parrish

Description and Scope

Upsize the existing 10" and 8" segments of reclaimed water main along Harrison Ranch Blvd from the northwest corner of the intersection with 60th Ln East; southeast to the intersection with 55th Ln East; by removing approximately 2,600 LF of existing reclaimed water main and furnishing and installing approximately 2,600 LF of new 12" reclaimed water main.

Rationale

The Reclaimed Water Master Plan hydraulic model evaluations identified high velocities and head loss through the 10" and 8" segments which resulted in pressures below 40 pounds per square inch (psi) during the maximum day demand simulations. The upsized 12" pipe will reduce velocities and head loss while increasing downstream pressures above the recommended 40 psi minimum.

Project Title: Saltmeadows - SR62 at SandMarsh Ave - Reclaimed Main Upsize & Extension
Department: Public Works Projects
Project Mgr: Derek O'Sullivan
Infra.Sales Tax:
Project #: 6114990 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 SR 62 at Sand Marsh Ave, Parrish

Description and Scope

Design, permit, install, and construct approximately 1,900 LF of 12" and 300 LF of 16" reclaimed main along SR 62 from Spencer Parrish Road to Sand Marsh Ave. Review, approve, and process the final pay application for completed work and reimburse the developer based on terms of the agreement.

Rationale

The purpose of this project is to efficiently expand the County's reclaimed water availability for future development in this area. Staff has requested the developer to oversize the reclaimed extension from an 8" to 12" along SR 62. This project is to fund the developer's agreement for the reclaimed main oversizing with the improvements being constructed as part of the Saltmeadows development project.

Project #: 6086990 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 44th Ave E - 45th St - 44th Ave Plz E, Bradenton

Description and Scope

Extend existing reclaimed water system stubs located at Caruso Road, 62nd Street East, and 65th Street East.

Rationale

Project will relocate current water main stub extensions to the point of future connections, which are located outside of the proposed improvements.

Project Location

Multi-district 44th Ave E - 45th St - 44th Ave Plz E, Bradenton

Description and Scope

Addition of 8 inch Ductile Iron Pipe (DIP) and PVC wastewater force main along 44th Avenue East from 45th Street East to Morgan Johnson Road with force main stubs for future connections at 45th Street East and 51st Street East. The dry force main will be placed on the deck of the proposed bridge over the Braden River. Caruso Road will be realigned to intersect with 44th Avenue East at the existing intersection with Morgan Johnson Road. At this location, the existing active force main on Morgan Johnson Road will be reconstructed to connect to a proposed force main that will connect to an existing active force main at the intersection of the existing Caruso Road. In addition, a new DIP force main stub will be constructed to the north under 44th Avenue East at 65th Street East, a new dry DIP force main will be constructed under Caruso Road adjacent to the existing force main from the Dude Ranch lift station, and gravity wastewater mains will be constructed to extend the existing active gravity system along the east side of Caruso Road.

Rationale

Project will extend wastewater service in the area.

Project Location

District 1 Erie Rd - Martha Road to US 301, Parrish

Description and Scope

The Erie Rd E/W Phase for roadway functional improvements is being changed to 2-lane to 4-lane widening from Martha Rd to US301. This project aligns to be the wastewater lines relocations for the transportation project.

Rationale

The Erie Rd E/W Phase for roadway functional improvements is no longer being considered. Instead, the transportation project is now 2-lane to 4-lane widening from Martha Rd to US301. The original Erie Rd E/W Phase had associated projects for the utility relocations and this one is being changed to match the new transportation project.

Project Title: Factory Shops Apartments - Gravity Sewer Reroute
Department: Public Works Projects
Project Mgr: Scott May
Infra.Sales Tax:
Project #: 6116280 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 1 60th Avenue East at Factory Shops Blvd, Ellenton

Description and Scope

Design, engineer, permit, install, construct, and provide required utility easement for approximately 564 linear feet of 10-inch gravity sewer main from sewer manhole (SMH015848) northward, through the development's property, connecting to sewer infrastructure located on the Springs at Ellenton's property in accordance with the construction plans for the Factory Shops Apartments. Process payment requests in accordance with the developer's agreement.

Rationale

An existing gravity sewer main is located within the limits of a capital improvement project for the widening of 60th Ave East (#6083160) in Ellenton. The County has requested the developer of the Factory Shops Apartments project (PLN2208-0057) to reroute the existing gravity main through their development outside the limits of the capital project and upsize the main to accommodate existing flows in the area. This project has an associated developer's agreement with terms and conditions related to the funding of the improvements.

 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 5 State Road 70 - Lorraine Road to Bourneside Blvd

Description and Scope

Depending on the Florida Department of Transportation (FDOT) design for the road improvements along SR70 & Lorraine Road, the County will coordinate, design, permit and relocate Manatee County Wastewater Utilities that conflict with the FDOT project.

Rationale

Coordinate, design, permit and relocate Manatee County Wastewater Utilities that conflict with the FDOT road widening and Round-a-bout project at SR70 & Lorraine Road. A new force main will be installed from Lorraine Road to Bourneside Blvd.

Description and Scope

Projects to be identified as associated with the Florida Department of Transportation (FDOT) road improvement efforts that involve the moving of utility infrastructure (sewer lines) that are in the FDOT right of way.

Rationale

Manatee County is required by state statute to relocate county-owned infrastructure in the FDOT right of way when necessary.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: NRWRF Electrical System Improvement & MCC Replacement
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW01931 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 8500 69th St E, Palmetto

Description and Scope

Replace existing Motor Control Centers (MCC) and other electrical components per the Electrical Master Plan at the North Regional Water Reclamation Facility (NRWRF). Replacing original existing panelboards, transformers, lighting, and wiring/conduits throughout the Plant. Consider Cable Trays instead of underground conduit replacement. Take into consideration the electrical loads to be added in the future by adding an additional Florida Power and Light transformer. Expand the main electrical room west to enable new construction with existing loads in place. Make provisions for switch gear expansion to handle future loads such as the new maintenance building, administration building, and drain station. Rebuild both generators. Replace the main electrical building heating, ventilation, and air conditioning. Replace SP-1 of the Supervisory Control And Data Acquisition (SCADA) system and relocate inside expansion. Ensure there is space and capacity for the future 10 MG (million gallon) reclaimed storage tank and High Service Pump Station project. Provide Lightning Protection and Transient Voltage Surge Suppressor (TVSS).

Rationale

The original electrical equipment is at the end of its useful life and due for replacement. The condition of existing MCC line-up in Main Electrical Building is showing signs of excessive heat buildup due to age. The possibility of MCC failure increases each year due to large motor loads on old terminals and devices that are degraded by age and the corrosive atmosphere at the Plant.

MANATEE COUNTY GOVERNMENT

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: North Regional Water Reclamation Facility Expansion 12.5 MGD
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02247 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 1 North Regional WRF 8494 69th St E Palmetto, FL 34221

Description and Scope

This project is a 5 MGD expansion to the NRWRF. The north service area has a comp plan level of service of 80 gpd/capita. With recent census, occupancy for Manatee County was found to be about 2.5 people per household; that translates to 200 gpd per Equipment Residential Unit (ERU). Since the NRWRF has about 2.5 MGD of capacity unused, it can support another 12,500 ERUs before reaching capacity. The developments approved in this service area collectively will exceed that capability if no additional treatment capacity is brought online. Adding 5 MGD extends the facility by another 25,000 ERUs.

Rationale

The North Regional Water Reclamation Facility (NRWRF) has a permitted capacity of 7.5 million gallons per day (MGD) based on the 3-month, rolling average flow. Recent flows have exceeded 5 MGD based on the 3-month rolling average, so we are closing in on 70% of capacity. And except for the City of Palmetto service area, this facility provides for all of the wastewater treatment needs north of the Manatee River. This wastewater collection area includes the fast-developing Parrish area between I-75 and US 301 and bounded by Erie Rd to the south and Buckeye Rd to the north. This project will expand the rated capacity of the facility to 12.5 MGD to accommodate growth.

Description and Scope

Design shall include Supervisory Control and Data Acquisition (SCADA) hardware and networking equipment in the administration building. SCADA improvements including replacement of legacy Programmable Logic Controller (PLC) systems with associated networking hardware and operator interface terminals, and addition of fiber optic cable runs.

Rationale

Supervisory Control and Data Acquisition (SCADA) improvements will upgrade obsolete equipment, standardize Programmable Logic Controller (PLC) systems, add resiliency to the fiber optic network, and standardize PLC programming platform and applications.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: North Regional Water Reclamation Facility Second Plant Drain Station
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6110881 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 1 8500 69th St E, Palmetto

Description and Scope

Add second drain station and appurtenances. The drain station shall include a cross-tie to existing drain station. It shall also include separate piping capable of discharging either to the splitter box or Equalization (EQ) tanks. Add piping to separate the existing drain station from the Return Activated Sludge (RAS) system and to discharge to the EQ tanks. Replace RAS pumps with pumps sized for current and future plant flow. Install grit pad similar to SWWRF and SEWRF. Flow measurement and Supervisory Control And Data Acquisition (SCADA) programming shall be included. Route lake filter backwash to East Lake. Add a new sampling station and an electrical room with new MCC.

Rationale

The existing drain station has been stressed with the confluence of by certain events and will become more stressed with continuing growth increasing plant flow. The drain station should be separated from the Return Activated Sludge for optimum process control. The option of going to the EQ equalization tank with plant drain station effluent may be preferable for some hauled wastes. Current RAS pumps are inadequate for current plant flow. Trucking water and grit out of the service area is not an efficient operation. Retreatment of filter backwash is not necessary an unnecessary plant load.

Project Location

District 1 8500 69th St E, Palmetto

Description and Scope

Build a 58 feet x 38 feet metal maintenance building where the existing concrete slab is that was used for the Everfilt filters adjacent to the existing maintenance building. The building is to be outfitted to be used as a mechanical and electrical shop.

Rationale

With the expansion of the North Water Reclamation Facility (NWRf) and all the new equipment being added, there is a need for a bigger work shop for the electrical team and mechanical team. There is also an expanding inventory with the growth of NWRf. The existing 42 feet x 32 feet parts, tool, electrical and mechanical shop is getting crowded and in need of a bigger work shop.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: North Water Reclamation Facility Deep Injection Well
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6079480 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **N** Project Need: Growth

Project Location

District 1 Buffalo Creek Golf Course - Erie Rd, Parrish

Description and Scope

Construction of a Class I Deep Injection Well system for the disposal of excess reclaimed water during wet weather seasons, and for brine concentrate from the future Reverse Osmosis facility. Includes permitting, design, and construction of injection wells and associated monitoring wells, piping, valves, flow meters, and connection to existing Supervisory Control and Data Acquisition (SCADA) system, and all other required appurtenances. The scope includes installation of reclaimed water pipeline, wellhead piping, instrumentation and controls at each well, electrical systems, and SCADA programming to integrate the system into the NWRF plant's existing network.

Rationale

During wet weather seasons, supply of reclaimed water exceeds demand. Without additional disposal options during these circumstances, unauthorized discharge to surface bodies of water is the only strategy that can be utilized to avoid damage to existing infrastructure (lake berms, etc.). Unauthorized discharges put the county at risk for enforcement actions by regulatory agencies that can include consent orders, fines, etc.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SERWRF - New Central Laboratory
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW01934 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

New Wastewater Central Laboratory of approximately 12,000 square feet. The new laboratory shall include copy supply room, Uninterrupted Power System (UPS) and utilities room, data storage room, network room, four regular offices, a fiscal specialist office near main entrance, office area for eight others, conference room, lockers and bathrooms, break/lunch room, sample receiving and cooler room, and Deionized (DI) water and supply room. Additionally, it will include areas for wet chemistry, microbiology, metals digestion, metals instrumentation, Biochemical Oxygen Demand (BOD), general analytical (nutrients), nutrient digestion, oil and grease, volatiles, semi-volatiles, and spare analytical area. Facility shall also include a parking area, an emergency generator, vacuum pumps and hazardous waste storage.

Rationale

A new laboratory is required as the existing one is not large enough to handle all samples that it is getting. This will only get worse from continued growth, requiring additional sample storage presumably outside the existing laboratory. It will also require more use of contract laboratory work.

Project #: 6106080 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

Removal of settled "grit" in all three (3) carousel oxidation basins, including anoxic zones, in-situ while basins are in service. Replace the anoxic mixers and aerators in Basins 1, 2 and 3. Perform a structural inspection of Basin 3. Replace the fiberglass cover and repair/replace existing return mixed liquor gate on Basin 3. Consider improved mixed liquor recycle transport. Install new Oxidation ditch, head-works and repair/replace the existing splitter box. Make electrical changes to support the new equipment. Add new aeration controls with Dissolved Oxygen (DO) probes along with Supervisory Control and Data Acquisition (SCADA) programming. Install new anoxic basins upstream of oxidation ditches to increase anoxic volume (zone 1). Install new anoxic basins downstream of oxidation ditches (zone 2) and new reaeration zones downstream of anoxic zone 2.

Rationale

Based upon a contracted survey that was performed on the basins which showed the high level of grit accumulation, along with the expected timing of the new basin completion, it is vital that grit is removed from the basins that are currently online in order to maintain water quality compliance.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SERWRF Dryer Building Improvements
Department: Public Works Projects
Project Mgr: Tom Yarger
Infra.Sales Tax:
Project #: 6114180 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Add additional space onto the north side of the dryer building to accommodate an operations room, administration office, supply room and employee shower. Include new Heating, Ventilation, and Air Conditioning (HVAC) in the Motor Control Center (MCC) room.

Rationale

More space is needed at the Biosolids Dryer. Currently, operating supplies are stored in its Motor Control Center (MCC). The facility also lacks shower facilities. Space needs to be added to the Dryer as the Southeast Regional Water Reclamation Facility (SERWRF) Administration Building is already fully utilized, and the SERWRF Maintenance Building is remote from the Dryer, and not always manned concurrent with the Dryer. Additionally, the Dryer MCC needs a new HVAC unit.

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

Install Biomix system mixing to both Equalization (EQ) tanks at the Southeast Regional Water Reclamation Facility (SERWRF). Remove old coarse air and recycle pump mixing and their appurtenances. Installation includes 1 master control panel, 2 valve modules, 3 compressors, and other appurtenances. Cost estimate includes the demolition of existing coarse air system and appurtenances.

Rationale

Past mixing schemes have been ineffective requiring tank clean-outs. Biomix was installed and has been effective at the North Regional Water Reclamation Facility (NRWRF). A Biomix system is energy efficient as compared to other methods of mixing and requires little infrastructure in the tank.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SERWRF Third Sludge Holding Tank & Gravity Belt Thickener
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6041982 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Construction of a third sludge holding tank with associated aeration, sludge transfer capability, polymer system and other appurtenances. The repair/replacement of two existing gravity belt thickeners (GBT) is also included. Piping and controls shall also be added, so more than one GBT can operate at a time. Includes demolition of existing mixing/aeration systems in the existing two sludge holding tanks, and removal and disposal of solids from existing tanks. Alternate mixing/aeration is to be considered for the three tanks. Supervisory Control And Data Acquisition (SCADA) programming shall also be included.

Rationale

The Southeast Regional Water Reclamation Facility (SERWRF) service area continues to grow requiring additional sludge processing capability. Additionally, another sludge tank and Gravity Belt Thickener would allow for greater operational flexibility that is needed for maintenance, supplying the Biosolids Dryer and possibly deferring capital expense (by allowing operation at lower sludge ages decreasing oxygen requirements in the aeration basins).

Project #: WW02237 **Status:** Requested

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 5 3331 Lena Road, Bradenton

Description and Scope

Replacement of 1989-90 original 480V Electrical Switchgear M1 and M2 with new Switchgear at the Southeast Regional Water Reclamation Facility (SERWRF). Incorporate the Feeder Breakers into the M3 and M4 Switchgear lineup that were installed in 2000. Incorporate the Occupational Safety and Health Administration (OSHA) Arc Flash safety requirements into design.

Rationale

The original electrical equipment installed in 1989-90 is at the end of its useful life and is due for replacement per the Electrical Master Plan. There have also been numerous issues surfacing with the power distribution at the Plant because of the Tie Breaker that is obsolete. Capital Improvement Projects are more difficult to perform due to their connection to this obsolete and unsafe equipment.

Project Title: SEWRF Septage Receiving Station Phase 2
Department: Utilities
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6083481 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 SR 64 and Lena Road, Bradenton

Description and Scope

This project includes the removal of existing grease screen and washer/compactor. Installation of higher-capacity grease screen and washer/compactor. Existing grease pump and piping reconfiguration. Removal of existing grease holding tank mixers. Installation of new pump and nozzle mix system. Installation of landfill gas-heated water heater and distribution system for maintenance and cleaning of screen, pumps, tanks, and piping. Heat tracing and insulation of existing grease storage tanks. Associated structural, electrical and instrumentation and controls improvements. Miscellaneous civil work including new spill containment trench and pavement repair details.

Rationale

New screening is needed for grease as it can be unloaded faster than it can be processed and requires surveillance by maintenance personnel. The grease tanks are being fouled. Heat trace, insulation and more robust mixing will solve this issue. More hot water is needed for grease screening and house-keeping. A containment trench will improve house-keeping.

Capital Improvement Plan

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SEWRf Storage Lakes & Pump Back Station Improvements
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6088380 **Status:** Existing

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Reduce slope on the east and south lake II to 3:1 where necessary. Cut back berm overgrowth on all storage lakes, provide erosion control at existing pump stations and install pump stations outside of berms. Increase pump back capacity on each lake to 15 million gallons per day. Install new energy dissipating inlets on both lakes, and install outfall structures. Install solar bees for lake recirculation and algae control. Included with this project would be all necessary electrical and Supervisory Control and Data acquisition (SCADA) work.

Rationale

Increase output capacity in moving water from storage lakes to keep up with growing reclaim demand. Removing land area between the east lake sections increases lake storage capacity. On previous Florida Department of Environmental Protection (FDEP) reports it has been noted about our responsibility in preventing the berms from overgrowth of Brazilian pepper trees.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Replace/upgrade electrical distribution components to include air conditioning for electrical rooms, remove substations 1, 2, 9 & 10 replace motor control centers E1 & E2, replace switchboards 11 & 12, and replace main 5 kV switch gear, wiring, breakers and controls.

Rationale

Much of the equipment at the Southwest Water Reclamation Facility (SWWRF) is more than 25 years old, some is obsolete, and most is nearing the end of its useful life. Each of these factors make the whole system inefficient and unreliable, and this rehabilitation will increase the safety and productivity at the SWWRF.

Description and Scope

Demolish the gravity thickeners, septage station, gravity thickener pump pit and its appurtenances. Landscape/sod after removal of all structures. Remove/demo the liquid ring compressors and heat exchangers. Make needed repairs to interior and exterior walls and appurtenances of the Digester Building. Paint interior and exterior of building. Replace roof of building. Replace all lighting with LEDs.

Rationale

The gravity thickeners, septage station, gravity thickener pumping pit, liquid ring compressors, heat exchangers, generator and its appurtenances are no longer in use mainly as a result of the nitrogen removal project., deteriorating, and are becoming a hazard to staff working around these structures.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SWWRF Chlorine Contact Chamber Rehab & DIW Booster Station
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6091780 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 3 11900 Cortez Rd W, Bradenton

Description and Scope

Install booster station with redundant pumps to deliver maximum flow at maximum pressure as permitted. All appurtenances are to be included such as flow metering, pressure monitoring, Supervisory Control and Data Acquisition (SCADA) telemetry/control, and surge valve control. Baffles or piping shall be added to stop lake water from short circuiting to the well. Remove old, unused gates and replace Chlorine Contact Chamber influent and effluent gates. Eliminate bypass channel and install pump system to drain Chlorine Contact Chambers for cleaning and maintenance. Inspect structures and walkways and repair as required. Build new Motor Control Center and Chlorine Contact Chamber mixing blower building close to the CCC/wetwell and demolish old buildings.

Rationale

Reclaimed water disposal may be increased in the rainy season. Maintenance events such as well acidation may be minimized. With more reliable reclaimed water disposal, may be able to dispose of less reclaimed water as it will be less risky to maintain higher inventories. Energy savings may occur due to not maintaining the whole reclaimed water system to a high pressure water disposal.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: SWWRF Equalization System Rehabilitation & Cover Addition
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6071781 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

The project will include rehabilitation of the existing EQ tank. The rehabilitation will consist of performing structural improvements and a new interior coating system, replacing the pump recirculation system, and installing a new floating cover. It is anticipated that the air compressors for the new recirculation system can be located within the existing DAF Blower Building. Modifications to DAF building to house the new air compressors. Replace the existing return pump station with a new station including a permanent hoist for removing pumps. Supervisory Controls and Data Acquisition (SCADA) programming should also be included.

Rationale

The Flow Equalization (FEQ) tank receives and stores raw influent during the day and returns it to the plant at night to equalize the incoming flow. The FEQ tank cover is near the end of its life span, and it has proven difficult to keep the top of the cover clear of vegetation; settling solids are also an issue. A mixing system is required to keep solids in suspension, making it easier to pump them back to the plant. The existing FEQ return pump station has been in constant use for over 25 years and needs numerous upgrades or replacements. Also, the wet well for the pump station was modified for prior construction causing one of the pumps to be blocked from retrieval or repair. Power should be supplied per the electrical master plan to facilitate installation reliability and minimize possible rework.

Infra.Sales Tax:
Project #: WW01706 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Inspect the structures for Lake stations #1, #3 and the North Lake. Demo station #2 and grout fill piping as needed. Evaluate pump curves and sizes for the current use and demand of the lake return system, including individual station lake recirculations. Replace all electrical components, panels, and add variable frequency drives to the station pumps and pest deterrents to the electrical enclosures. Add magnetic flow meters and ensure good communication with the SCADA system. Modify existing piping to redirect lake filter backwash to the 54 inch line between the wetwell and Middle Lake. SCADA programming shall be included in the project.

Rationale

These stations were built around 2000 and the equipment is showing its age. In addition to the age the stations were engineered and built to be used in a different way with a different process. Re-evaluating its current use and demand may change how many stations we need and what they are designed to do. The lake filter effluent may be put directly in the 10 MG storage tanks, which may potentially simplify operation of the recharge well. Sending backwash back to the lake minimizes plant throughput.

Project Location

District 4 5101 65th St. W, Bradenton

Description and Scope

Replace the secondary clarifier confluence box "The Missile", at the Southwest Water Reclamation Facility (SWWRF). All required bypassing shall be included.

Rationale

The existing confluence box needs to be replaced to eliminate operational risk. Some years ago it had to be weighed down with supplemental concrete. Its underground condition is unknown and its inspection is problematic. Its above ground appurtenances are degraded.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Completely rehab belt press #2. Installation of additional belt press (#4). Addition of dry polymer mixing system and two new storage tanks. Relocation of booster pumps and water heater. Replacement of sludge feed piping. Modify and rehabilitate the existing sludge conveyor and truck load-out system. A sludge pumping system is preferred to replace augers.

Rationale

These original control panels were installed in 1989 and are deteriorating, become obsolete. The rehab of belt press #2, the addition of a belt press, and the addition of polymer mixing and storage systems are to address deficiencies and the ability to have redundancy in the system. The booster pumps and water heater relocation are to move them to a more protected environment.

 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Clarifiers 1 and 2: Re-grout clarifier floors. Replace rakes, sludge box and draft tubes with spiral rake systems. Additionally, replace weirs, stilling baffle, stilling well and skimmers. Install stamford baffles. Re-coat interior clarifier parts and structure. Paint exterior.

Rationale

Some of this equipment will be thirty plus years old. Replacing it will minimize unplanned failure necessitating unplanned spending and possible avoidance of Florida Department of Environmental Protection (FDEP) noncompliance. Stamford baffles will improve clarifier performance, which will improve filter/plant performance.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southeast Regional Water Reclamation Facility Slide/Sluice Gates Replacement
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6110180 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Remove and replace all sluice and slide gates (including all actuators and handles) at the Chlorine Contact Chambers (CCCs) and the mixing/flocculation basins. The gate locations are as follows: seven slide gates and three sluice gates at CCC #1 & #2, five slide gates and three sluice gates at CCC #3 & #4, and six slide gates at the mixing/flocculation basin. Replace the mixing system for the CCCs. Add fiberglass covers to CCCs. Provide carrier pipe or concrete conduit system for protection of underground PVC chlorine feed lines. Recoat interior of CCCs and perform structural repairs.

Rationale

These sluice gates and slide gates were installed in 1989 or before and have exceeded their life expectancy. They are difficult if not impossible to exercise without breaking. These gates are necessary to allow operations to direct the flow of water to the appropriate system for treatment and to allow maintenance to direct the flow away from an area where they would need to work. They are critical to the operation and require ongoing maintenance.

Project #: 6097680 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Replace nine disconnects to either a National Electrical Manufacturers Association(NEMA) 4X or NEMA 1 rating if appropriate, and replace Motor Control Center (MCC) 9 & 10 at the Southeast Water Reclamation Facility (SEWRF). Install a breaker between Florida Power and Light's transformer and the Biosolids Dryer MCC to mitigate arc flash hazard at the Biosolids Dryer MCC. The MCCs and breaker shall be specified for minimal arc flash hazard.

Rationale

This work was identified in a study done by our engineer of record to comply with National Fire Protection Association(NFPA)70E and must be done to minimize arc flash hazard to personnel and equipment. This electrical equipment is critical to the operation and requires ongoing maintenance.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southeast Water Reclamation Facility Cloth Media Automatic Backwash Filters
Department: Public Works Projects
Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6101781 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 5 3331 Lena Rd, Bradenton

Description and Scope

Retrofit the existing automatic backwash filters #3 and #4 with cloth filters. This includes removal of the filter media, washwater troughs, porous plates and air diffusers for the existing filters and will also include demolition of existing internal equipment, piping, etc. along with miscellaneous rehabilitation and coatings for filter structures. Miscellaneous piping modifications, including those necessary to adequately distribute flow between Nos. 1 & 2, and Nos. 3 & 4 ABWs will be done. All electronics, instrumentation, control and SCADA programming are included. Rehabilitate the adjacent grit pad. Installation of gates for isolation of Nos. 1 and 2 Filters are also to be included.

Rationale

To increase filter capacity per the Engineer of Record's recommendation in the Utility Master Plan while maintaining Ten States Standard's reliability.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southwest Water Reclamation Facility - Second Drain Station
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW02031 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

Design and construct a new plant drain station and associated piping. Near the existing station with interconnection between the old and new station. Replace/upsized piping from the drain stations to the headworks and provide for energy dissipation of flow emanating from the filter backwash. Project includes all necessary electrical instrument and control work.

Rationale

This will add reliability of Southwest Water Reclamation Facility (SWWRF) drain station function and decrease the probability of sanitary sewer overflows during storm events. The drain station piping to the headworks needs replacement for age and capacity. Filter backwash into the existing drain station causes station wear.

Project Title: Southwest Water Reclamation Facility Expansion to 18 MGD
Department: Utilities
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: 6110783 **Status:** Requested

Comprehensive Plan Information

CIE Project: **Y** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

Design and construct expansion of the Southwest Water Reclamation Facility (SWWRF) to 18 MGD AADF. Replacement of splitter box. No. 1, construction of (2) more 0.5375 Million Gallons anoxic basins, construction of new Splitter Box No. 3, construction of (2) more 1.0 MG aeration basins, expansion of existing blower capacity, upsizing/expansion of existing process air distribution piping, expansion/replacement of the existing diffuser grids in each aeration basin, upsizing the common Return Activated Sludge and Return Mixed Liquor piping to splitter box No. 1, construction of (1) more 125-ft diameter secondary clarifier, construction of (1) more RAS/ Waste Activated Sludge pump station to serve new clarifier No. 6, replacement of existing WAS pumps serving clarifier Nos. 1 and 2, relocation of AquaDiamond filter No. 1 to existing Automatic Backwash filter No. 3, retrofit of existing ABW filters Nos. 4 and 5 with AquaDiamond cloth media filters, demolition of existing filters Nos. 1 and 2, construction of new sodium hypochlorite storage and feed facility, retrofit of each Chlorine Contact Chamber with effluent finger weirs.

Rationale

Influent flows and loadings have increased at an accelerated rate over the past several years and the Southwest Water Reclamation Facility (SWWRF) is nearing its Average Annual Daily Flow (AADF) capacity. The expansion will provide the necessary improvements to expand facility capacity to 18 Million Gallons per Day (MGD) AADF.

FY2024-FY2028

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southwest Water Reclamation Facility New Headworks
Department: Public Works Projects
Project Mgr: Anthony Benitez
Infra.Sales Tax:
Project #: 6083381 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Demolish old headworks, and construct a new headworks including piping, flow meters, mechanical screens, grit removal, scum screening/pumping, and odor control. Size grit removal system to handle peak grit loads during heavy rain events. Include an influent sampling system to eliminate side stream influences and allow sample collection without fouling the intake. Provide pH and temperature analyzers, and construct new motor control center and Supervisory control and data acquisition panels at remote area from H2S gas. This includes new 5kV feeders for the aeration blowers and intercepting the 5kV feeders at the existing area and extending to the transformers for the anoxic basins.

Rationale

The headworks structure is over 25 years old and deteriorating due to concrete corrosion by hydrogen sulfide and water intrusion. The grit system is undersized and becomes clogged during heavy rain. Scum requires screening to remove floatable objects and prevent fouling of jet aeration mixing system in sludge holding tanks. Power for the headworks may be interconnected with electrical equipment at the anoxic basins electrical room.

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Other Need

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Modify existing Co-generation building where generator is housed for use as a new oil and waste oil storage area. Construct a new 30 feet x 40 feet metal building on north side of Co-generation building. Demolish existing oil storage and equipment storage areas adjacent to existing maintenance facility. Construct an approximately 60 feet x 40 feet pole barn with concrete floor next to maintenance facility after existing oil storage area and equipment storage area are demolished. Installation of two electric roll up garage doors on South side of Maintenance Building, replacing the current tall hinged doors (similar to roll up doors on Southeast Maintenance Building).

Rationale

To protect equipment from the elements. Current oil storage area and disposal station has poor cover, poor containment, and poor drainage.

Category: Wastewater **Subcategory:** Wastewater Treatment
Project Title: Southwest Water Reclamation Facility Second Cloth Filter
Department: Public Works Projects
Project Mgr: Alex Gonzalez
Infra.Sales Tax:
Project #: 6110780 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **Y** Project Need: Growth, Deficiency

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Convert one existing sand filter to a cloth filter. This will include demolition of the existing sand filter components, installation of the equipment needed for the new cloth filter, and any modifications in piping and channels to ensure proper distribution of water between filters and chlorine contact chambers. Supervisory Control and Data Acquisition (SCADA) modifications will be included. Provide canopy over Automatic Back Wash filters including hoists and trolleys for removal of filter equipment. The filters shall be able to be drained through connection to the plant drain.

Rationale

The County's engineer of record in the wastewater plant's master planning effort identified a deficit in the plant's effluent filtering capacity. Basically, with the existing cloth filter down there is not enough filter capacity to handle wet weather peaks, which is not compatible with Class 1 Reliability, which is a condition of our Florida Department of Environmental Protection (FDEP) operating permit. Replacing a sand filter with a cloth filter will increase filtering capacity, which will make the plant Class 1 Reliable, will minimize risk of contaminating the reclaimed water storage lakes, and will minimize risk of possible off specification effluent discharge. In addition, Filters #1 and #2 are not capable of being fully drained. This project is necessary for permitting the plant to 18 million gallons a day (mgd), annual average daily flow.

Project #: 6036085 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Maintenance

Project Location

District 4 5101 65th St W, Bradenton

Description and Scope

Re-establish plant yard and swales to historical grades or grade per new design to convey stormwater to existing or new stormwater features for treatment and/or conveyance off site. Rehabilitate stormwater piping, inlets and outlets. Re-establish stormwater pond volumes, littoral zones and banks to historical or new permit conditions. Eliminate ponding in roads, yard and parking lots. Inspect North Lake toe drain and recommend maintenance. The boundaries of the project are the area inside and adjacent to the SWWRF fence including the Wastewater Laboratory. All permitting and modifications to the SWPPP are to be included.

Rationale

Over years of SWWRF operation numerous projects, traffic and natural weathering have changed the stormwater system, making it not as functional as it could be. This project is needed to restore the system's functionality, especially for summer weather events.

Project Title: Southwest Water Reclamation Facility Transfer Pumps
Department: Public Works Projects
Project Mgr: Jeff Streitmatter
Infra.Sales Tax:
Project #: WW01936 **Status:** Existing

Comprehensive Plan Information

CIE Project: **N** Plan Reference:
 LOS/Concurrency: **N** Project Need: Deficiency

Project Location

District 4 5101 65th Street West, Bradenton

Description and Scope

Replace digester sludge transfer pumps and piping in the digester building. Remove old piping that is no longer in use. Remove recirculation pumps as they are no longer in use. Replace room ventilation fans. Replace all lighting with Low Energy Downlights (LEDs). Make needed repairs to walls, ceiling, and floor in this room. Paint walls, ceiling and floor. Paint and label piping. Replace current auger system at the belt filter presses with a pumping system. Replace Motor Control Center (MCC's) D1 and D2, and air condition them. Replace associated panel boards and transformer. Replace street lighting in the area. Supervisory Control And Data Acquisition (SCADA) programming is to be included.

Rationale

The digester sludge transfer pumps are due for replacement. Their pump efficiency has diminished over the years. The recirculation pumps are no longer in use and therefore no longer needed. The current auger system for the belt filter press has many moving parts which fail often and require a lot of maintenance. A pumping system would eliminate some of the issues and allow for a better, more uniform filling of the trailers. MCCs D1 and D2 are not in a climate controlled room and are difficult to make any improvements or changes to due to them being upstairs. Moving them downstairs and installing climate control will allow better operation ability and upgradability for future installations, as well as improve maintenance and the life cycle of the equipment.

Appendix I - Projects of Record

Buildings/Renovations			
1	Bayfront Park Lifeguard Expansion	The population of the county grows and the tourist industry is vibrant in our coastal communities. We actively protect 3 of the 4 county parks on Anna Maria Island. Bayfront Park is currently unprotected. As our current lifeguarded beaches continue to reach capacity it pushes our visitors and locals to this park, leaving them to swim at their own risk. Research will be completed over the new few years to help determine the number of visitors to Bayfront Park and how they increase year over year. With that information in hand the building of the lifeguard towers could take place in FY26.	400,000
2	Emergency Management Storage	Emergency Management Storage and Vehicle Building Addition - Project is for the construction of a pre-fab building size 24'x36' metal building with 2 bay doors, main door, concrete slab, climate control units, HVAC system, and electrical, to be used for additional EM supplies and/or vehicles.	250,000
3	Fleet Main Workshop Facility and Administration Office Renovation	This project will provide for a full renovation / replacement of the main Fleet Maintenance Facility and Fleet Administration Offices located at 1100 26th Ave East, Bradenton Florida, 34208. The original building built in the 1960's requires substantial repairs and upgrades to modernize the aging / failing structural, electrical, plumbing, and fire protection. All the equipment lift, hoists, environmental recovery systems, and safety systems are at the end of useful life cycle. The building was evaluated by an engineer August 20, 2020 and the report indicated the building is in poor condition and will require complete renovation within 2 years. The current building has no space to expand work areas to provide a higher level of customer service, and the space required to diagnose and repair modern equipment. Pricing opinion includes complete replacement of the current 10 bays, with the addition of 10 bays to expand asset service repair work and maintenance, fleet administration offices, and to be built in parallel with the current building so we do not have any service level interruptions.	10,000,000
4	Health Department - Old Morgue Renovation	Remodel the old morgue into a usable functional space for Health Department operations.	950,000
5	Judicial Center LED Lighting Retrofit	Converting the lighting to super efficient mercury free LED bulbs will reduce energy consumption and curb maintenance costs.	900,000
6	Parking Garage at Premier	Design and construct multi level parking garage with crosswalk. Will include approximately 300 parking spaces, elevators, security lighting, fire protection, lightning protection, solar panels, battery storage, and all appurtenances required for a functional facility.	12,240,000
7	PSC Building Mechanical and Electrical System Redundancy	Critical need for redundancy and reliability of heating, ventilation, and air conditioning in the Public Safety Complex Critical Data Rooms.	925,000
8	Public Works Foreman's lean to/warehouse/maintenance area replacement	Replace the existing facility located behind the foreman's section of the Public Works administration building complex.	1,187,000
9	Public Works Storage Shed Replacement 26th Avenue East	Total replacement of the Field Maintenance storage shed. Asset is beyond useful life and is uneconomical to repair.	750,000
10	Public Works Supply Warehouse and Fuel Administration Office	This project will provide for a full renovation / replacement of the Public Works Supply Warehouse and Fuel Services offices located at 2908 12th Street Court, Bradenton Florida, 34208. The original building built in the 1980's requires substantial repairs and upgrades to modernize the aging / failing structural, electrical, plumbing, and fire protection. All the equipment and safety systems are at the end of useful life cycle. The building was evaluated by an engineer August 20, 2020 and the report indicated the building is in poor condition and will require complete renovation or will soon be non-occupiable. The current building has no space to expand work areas to provide a higher level of customer service. Pricing opinion includes complete replacement of the current building.	2,500,000

Buildings/Renovations			
11	Public Works tile Yard Replacement Building	Replacement of the road maintenance storage shed at 26th Ave E. The storage facility incurred damaged from the no name storm in 2017.	200,000
12	Tax Collector Harden Computer Room	Construct a 20 feet x 25 feet hardened room attached to current building for storm and fire protection for the data center.	500,000
13	Telecommunicators Training Room	The Emergency Communication Center (ECC) training room does not currently meet the needs for telecommunicator training. The size of ECC's current training room has limited space for equipment and employees. A larger space would allow the ECC to train a larger number of people at one time and allow adequate room for social distancing. ECC and MSO have agreed to expand MSO's current training room in order to combine our training programs. Both agencies use many of the same training materials and courses required for Telecommunicator certifications. The new training room will be approximately double the size of our current training room. The project includes new workstations so that it can serve as additional 9-1-1 positions for mass emergency situations such as hurricanes, storm events, and other instances requiring additional staff.	500,000
Libraries			
1	Second Floor Buildout at Lakewood Ranch Library	23,000 +/- sq foot build out on the second floor to include offices, conference rooms, restrooms, break rooms, flooring, ceiling, electrical, plumbing, and all related appurtenances and FF&E for a functional facility.	5,948,000
2	South County Library	Lighting upgrade to reading level needs and a new roof. Fence added along south side which hides mess behind convenient store. Lighting of exterior staff door (possibly add motion sensors). Update exterior signs near facility and in parking area. Improve workflow in staff work room. Switch floor plan to move collections, shelving, furniture, etc., (carpeting and paint will need to follow). This will help with ADA compliance and line of sight for security issues. Spackle needed areas and repaint. Install gutters where missing. Remove blinds on windows to improve lighting. Wash windows to improve opportunity for natural light.	250,000
Parks Projects			
1	Bennett Park Improvements	The Park Master Plan has identified the need for additional facilities at Bennett Park. The Trust for Public Lands grant stipulations also requires the development of recreation facilities in high growth areas of the county. Development of a Master Plan update specifically for Bennett Park will create a structured plan to create the amenities to be accomplished. Design and construct multi-purpose sports fields, concession stands, tennis pickle ball courts, restroom, parking, picnic pavilions and lighting to the existing sand volleyball courts.	2,500,000
2	Boardwalk & Trails Enhancements at Robinson	Restore Act funding for project.	300,000
3	Coquina Beach South Improvements	Build an additional concession/restroom and pavilion/Tiki Hut facility at the south end of Coquina Beach to accommodate the increase of beachgoers at this location.	5,700,000
4	County Road 675 Soccer Fields	Work with the County Attorney's office to prepare an agreement between Manatee County and a developer who will oversee the design and construction of the six soccer fields with lights, parking, restroom facilities, concessions and other amenities. Manatee County would be expected to maintain and operate the six soccer fields once completed.	3,000,000
5	Curiosity Creek Soccer Fields & Amenities	Design, permit and construct +/- 15 soccer fields with irrigation, parking lot, concessions/restrooms, shade structures, playground, pavilions, bleachers, lighting, landscaping, storm water ponds, trail, maintenance building, trash cans, FF&E and other appurtenances and amenities as fit.	30,766,540

Parks Projects

6	Duette Bridge Replacement	Scope for phase I design only. Phase II will be construction. 1.) Determine approach for extending deck to 12' and fitting to existing substructure vehicular bridge 80'x12' on trail 14 at the North Fork of the Manatee River 2.) Remove and replace pedestrian suspension bridge 150' x 4' over the Manatee River at Petericks historic youth camp. 3.) Substantial replacement of components of metal catwalk bridge along waterpipe on trail 14 and the East fork of the Manatee River 4.) Remove and replace washed out culvert crossings with small pedestrian bridges(x2) approx. 25' x 8' 5.) Replace historic bridge at trail 12 across East Fork of Manatee River	357,000
7	Duette Pedrick Campground	Construction of primitive group campground.	250,000
8	Environmental Protection Lab	Construct a new hurricane hardened lab and office complex at Quattlebaum house location to replace current structure.	1,500,000
9	Fort Hamer Boat Ramp Expansion	Expand the Ft Hamer boat ramp by an additional 2 launch lanes to the west of the current lanes.	750,000
10	G.T. Bray Park Aquatic Center	Center installation of submersible bulkheads in the 50 meter pool.	1,003,750
11	G.T. Bray Park Destination Playground	Add a destination ADA playground to include fitness element.	250,000
12	G.T. Bray Park Improve Trail System	Add outdoor lighting along the trail path of GT Bray as well as signage and fixed exercise equipment.	250,000
13	G.T. Bray Park Relocate Outdoor Basketball Court with Light	The new basketball court will be located adjacent to the new skate park. This will allow us to utilize the existing slab. We will construct one full sized basketball court, with fencing and lights that will be open, free to the public.	156,079
14	GT Bray Park Renovate T-Ball & Add Baseball Fields	Renovate and expand the two t-ball fields into little league fields to accommodate more users. Cost TBD.	TBD
15	G.T. Bray Park Security Lighting	G.T. Bray Park Security Lighting: Add security lighting along the access roads to the softball complex and baseball complex.	20,000
16	Gateway Greenway - Segment 2	Construct an asphalt trail 12' wide, cement treated base, compacted subgrade from the SR64 to Chance Preserve. Initial trail construction may consist of compacted shell.	2,108,000
17	Greenbrook Park Parking Lot Install	Install parking lot.	100,000
18	John H. Marble Park Tennis Courts	Replace current tennis courts, fencing and lighting that will be demolished during construction of the new gymnasium.	915,700
19	Lakewood Ranch Park Improved Turf Conditions	The north half of multipurpose fields #8 and #9 is crab grass turf, considered to be unplayable turf for soccer competitions and should be replaced. Remove existing sod and replace with a more durable Bermuda type turf.	100,000
20	Lakewood Ranch Park Restroom and Water Fountain for Pickleball/Tennis	Construction of an ADA restroom facility, including sufficiently sized male, female and family facility and a chilled water fountain, within the LWR Tennis/Pickleball area. Investigation into factory built and delivered modular rest-room facilities should be investigated for cost savings.	749,000
21	Larry Borden Reef Habitat Enhancement	2020-2025; Reef Drop Grant CIP amounts dedicated to matching grant funding.	150,000
22	Neal Preserve Boardwalks Replacement	Reconstruct and/or replace boardwalk and bridge elements and stabilize existing structure.	150,000
23	New Boat Ramp - North River Boat Ramp #1	Construction of a boat ramp and associated amenities.	5,500,000
24	Palma Sola Park - Splash Pad	Design and Construct a splash pad (approximately 4,000 sq. ft) with features and appropriate utilities run throughout the site. Lighting, seating and landscaping will also be needed.	500,000
25	Palma Sola Park Parking Lot Drainage Pipe	Improve drainage. Constant issue with high rain amounts.	100,000

Parks Projects

26	Palmetto Green Bridge Fishing Pier	Demolition of current fishing pier. Design, engineer and construct a brand new stabilized fishing pier to a sound and safe condition and include a water taxi launch point providing access to the City of Palmetto and Communities North of the Manatee River. This project will have multiple funding components: RESTORE Act (\$4,100,000). FY 2023-2026. Estimated that the total cost will be \$7.5M, \$5M which will be funded.	3,400,000
27	Palmetto Trails Connectivity and Mobility Project (PTCMP)	The Florida Department of Transportation (FDOT) will use the Federal grant funds awarded (2.9 million dollars) and state funding to hire a design team and manage construction which will result in; construction of 3.6 miles of local trail network; rehabilitation of the historic tunnel under US 41; addition of four major connectivity improvements, including one grade-separated crossing, one trail underpass; construction of 14 transit stop improvements; Improvement of nine trail/pedestrian crossings; construction of buffered bike lanes/complete street and trail connection to the existing transit station; introduction of 65 new streetlights, landscaping, intersection, and traffic calming treatments; create seven multimodal connections between local schools, parks, and community activity centers. Manatee County's matching funds for this grant is estimated at \$700,000.	700,000
28	Perico Preserve	Trailhead Facilities.	500,000
29	Perico Preserve Boardwalks & Bridges Replacement	Reconstruct and/or replace boardwalk and bridge elements and stabilize existing structure.	85,000
30	Premier - Amphitheater	An amphitheater at the Premier Sports Complex to accommodate tournament style events, concerts, etc.	7,095,000
31	Premier - Clay Tennis Courts	Build clay tennis courts including subsurface irrigation, lighting, fencing, seating, sidewalks, water fountains, landscaping, FFE. Construct a practice wall and maintenance shed.	4,736,000
32	Premier - Hard Tennis Courts	Build hard covered tennis courts with lighting, fencing, seating, sidewalks, water fountains, landscaping and FF&E. The shade structure should include lighting and fans.	1,832,500
33	Premier Sports Recreation Administration Building and Gymnasium	Construct up to a 5 court gymnasium, hardened for hurricane protection. Include restrooms, locker rooms, showers, IT support, office capable of holding up to 10 staff members, basketball hoops, score boards, generators - all dependent on the stipulations for the hurricane grant.	35,900,000
34	Premier Sports Skate Park	Construct a Skate park at Premier.	300,000
35	Pride Park	Trail Expansion.	200,000
36	Skyway Boat Ramp	Construct a regional boat ramp on the south side of I-75 adjacent to the sunshine skyway fishing pier. Construction of boat ramp improvements would occur atop a fully stabilized 10-15 acer fill pad created by Army Corps of Engineers construction associated with Tampa Harbor maintenance dredge material, estimated to take place in 2030. This area would accommodate up to 200 trailer spaces, 40 additional car spaces and 8-10 launch lanes. Construction costs will include restrooms and pay stations, lighting, utilities, sewer, garbage receptacles, landscaping. Construction costs support should be sought from neighboring Hillsborough County and possibly Pinellas County whose residence would likely share this boat ramp. Paid trailer and automobile parking would also be implemented at this location.	5,000,000
37	Ungarelli Preserve Recreational Improvements	Construct a boardwalk and trail system. Kayak launch, parking areas, signage, and a pavilion. Cost and funding source park impact fees, grants, and WCIND (Kayak Launch).	TBD
38	Urban Park Stormwater Improvement Utility Funding	At Magelton/Whitfield Park; SBEP for design; RESTORE Act for construction, NRD funds 831, and storm water funds for improvements.	1,500,000
39	Vertical Lift Pad at Premier	Design and construct a vertical lift pad for use.	517,500

Public Safety			
1	MCSO New Location - District 1	20,000 square feet addition to Desoto Center.	3,296,250
2	MCSO New Location - District 2	Demolish and rebuild 20,000 square feet of building.	3,296,250
3	MCSO - District 3 Substation	The growth in the eastern and northern portions of Manatee County has been non-stop and calls for service in these areas continue to rise on a yearly basis due to said growth. The MCSO presently have no hardened buildings that are hurricane rated that can be occupied safely by personnel who are required to work during a hurricane event. The building of a 20,000 sq ft substation in the Parrish area will be of great service to the citizens who reside and work in that area of the county. A new hardened office location in that area of the county would provide a safe haven during a hurricane event as well. This scope also includes all FF&E and appurtenances for the project.	16,025,250
4	Old Jail Remodel	To design/renovate/construct for transitional VA housing.	2,000,000
Technology Projects			
1	Tech Refresh (Data Center and Unified Communications)	Address refresh of the data center equipment, evaluate the additional growth in the environment and research new technological advances to enable MC's platform for the best possible solutions to meet MC's needs and advance cyber security as needed. Refresh cycle to begin FY27 (research and design) with implementation in FY28.	3,800,000
Transportation			
1	1st Ave E from 17th St E to North DE	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	547,000
2	14th St W - 26th Ave W to 39th Ave W	Construct pedestrian crossings.	130,000
3	15th St E - 38th Ave E	Construct signal and turn lane improvements.	385,418
4	15th St E (301 Blvd) - Tallevast Rd to 1st St (US 41)	Construct a three lane roadway with bike lanes and sidewalks.	63,000,000
5	17th Avenue NW Complete Street - 99th St NW to 83rd St NW	Construct two mini-roundabouts at 83rd Street NW and 91st Street NW, provide raised pedestrian crossings at critical locations, and completing the sidewalk network on 17th Avenue NW.	6,445,000
6	18th St W - Cortez Rd to 38th Ave	Construct sidewalk on east side.	36,900
7	21st St W & E from 4th Ave W to US 41	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	319,000
8	24th Ave - US 301 to 29th St	Construct a new two lane road.	12,182,882
9	26 St W @ Bayshore Gardens Pkwy	Add turn lane(s).	654,000
10	26th Ave E - 15th St E to 45th St E	Widen roadway to 24 feet and resurface over entire width. Construct closed drainage and re-grade to provide 8 feet shoulders.	3,500,000
11	26th St W - 9th Ave W	Extend left turn lanes and add right turn lanes.	1,242,246
12	26th St W at 57th Ave W	Upgrade to mast-arm supports and add turn lane(s).	1,599,000
13	26th St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.	3,293,708

Transportation

14	26th St W over Cedar Hammock Canal Bridge Replacement	Design and construct a new bridge to replace the existing bridge on 26th St W over Cedar Hammock Canal (Wares Creek). The current 4 lane bridge will maintain 4 lanes while improving shoulder widths, allow for bicycle traffic and include sidewalks for pedestrian traffic to improve safety. The project will also include modifying/relocating the 18" force main and the 6" water main along the east side of the existing bridge. The estimated dimensions of the new bridge are approximately 40 ft. long x 70 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.	2,497,564
15	27th St E - 13th Ave E to 26th Ave E	Reconstruct and widen from 2 lanes to 4 lanes.	16,748,517
16	27th St E - 9th Ave E	Construct separate left-turn lane on all approaches.	523,617
17	27th St E - SR 64 - 20th Ave E Rebase and Resurfacing	This project encompasses design, bidding and construction of a 5,300 LF of roadway base, asphalt surfacing and repair sidewalks and curbing.	1,223,500
18	301 Blvd from Tallevast Rd to University Pkwy	Add sidewalk on west side. Complete sidewalk gaps on east side.	643,000
19	30th Ave E from 9th St E to 15th St E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	5,189,000
20	35th St W from 9th Ave W to 13th Ave W	Add sidewalk on one side.	103,000
21	37th Street E (Mendoza Rd) - 69th St E to Victory Road Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	576,800
22	43rd St W @ 9 Ave W	Upgrade to mast-arm supports and add right turn lane.	449,000
23	43rd St W from 36th Ave W to 9th Ave W	To meet current design standards for thoroughfare roadways. Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	15,876,000
24	43rd St W from Cortez Rd to 53 Ave W	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	11,207,000
25	45 St E from 44 Ave E to 26 Ave E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	10,377,000
26	45th St E from 4th Ave E to End of Street	Road drainage and add sidewalk on one side.	173,000
27	49th St E (Experimental Farm Rd) over Terra Ceia Creek Bridge Replacement	Design and construct a new bridge to replace the existing bridge on Experimental Farms Rd (49th St E) over Terra Ceia Creek. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and providing sidewalks allowing for bicycle and pedestrian traffic to improve safety. The alignment is also to be adjusted north to maintain the parallel channel to the south. The estimated dimensions of the new bridge are approximately 40 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.	2,836,355
28	4th Ave E from 45th St E to 49th St E	Road drainage and add sidewalk on one side.	200,000
29	51 AV E from US 301 to 33 ST E	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	5,500,000
30	51st St W - 53rd Ave W	Construct southbound left turn lane.	543,300
31	51st St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The analysis should include FDOT coordination/ICE, pedestrian movements and safety, and future growth from anticipated developments. Evaluate additional left turn lanes (dual left turn lanes) and right turn lanes for both northbound and southbound. Improving the offset for the east-west left turns should also be evaluated. Turn lane length and signal timing should also be considered. Design, permit, and construct the recommended improvements. Replace/update traffic signal as needed to accommodate the improvements. Project will likely require right-of-way acquisition.	3,517,865

Transportation

32	51st St W from 32nd Ave Dr W to 26th Ave W	Add sidewalk on one side.	163,000
33	51st St W from 47th Ave W to Cortez Rd	Add sidewalk on one side.	143,000
34	53 Ave W from 26 ST W to 30 ST W	Upgrade road to current standards for travel lanes, sidewalks, bike lanes (or trail), and lighting.	3,743,000
35	53rd Ave W - 20th St W	Upgrade to mast arm support and construct right-turn lane on westbound approach.	533,996
36	53rd Ave W at 34 St W	Upgrade to mast arm support, construct right-turn lane on westbound approach, and left turn lane on eastbound approach.	1,645,000
37	53rd Ave W from 25th St W to US 41	Add sidewalk on one side.	282,000
38	55th Ave W from 26th St W to US 41	Road drainage and add sidewalk on one side.	556,000
39	5th Street E - 32nd Ave E to 22nd Terrace E Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	333,200
40	61st E Palmview from Country Lakes Blvd to Bayshore Road Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps.	286,800
41	61st St E from Bayshore Rd to 16th Ave E	Construct five foot sidewalk along with drainage improvement to accommodate sidewalk installation.	759,486
42	63rd Avenue E from Tuttle Avenue to Lockwood Ridge Rd	widen from 2 to 4 lanes with bike lane, sidewalks and lighting (1.1mi).	11,000,000
43	69th Ave E (Whitfield Ave) over Pearce Canal Bridge Replacement	Design and construct a new bridge to replace the existing bridge on Whitfield Ave (69th Ave E) over Pearce Canal. The current 2 lane bridge will maintain 2 lanes while improving shoulder widths and allow for bicycle and pedestrian traffic to improve safety. The estimated dimensions of the new bridge are approximately 60 ft. long x 50 ft. - 8 in. wide. Permitting and right-of-way costs will be included as part of the project costs.	2,497,564
44	69th Ave West (Bay Dr.) from American Way to US 41 Sidewalk	Design and construct a sidewalk including drainage, driveways and ADA curb ramps. The project may be constructed in phases due to potential utility conflicts and permitting on the west side of the project.	280,000
45	69th St - Erie Rd - US 41 to US 301	Widen from two lanes to four lanes.	54,584,453
46	69th St E from Ellenton-Gillette to I-75	Reconstruct existing two lane road to include standard lane widths, pedestrian & bicycle facilities, and lighting.	8,405,000
47	69th St E from US 41 to Ellenton-Gillette	Reconstruct existing two lane road to include standard lane widths, pedestrian and bicycle facilities, and lighting.	9,754,000
48	75th St W at Cortez Ave Intersection Improvement Project	Analyze the intersection and determine the recommended improvements for the intersection. The	2,829,735
49	80th Ave Cir E from 55th St E to 55th St E	Add sidewalk on one side.	112,000
50	9th Ave W - 51st St W Intersection	Install traffic signal.	250,000
51	9th St E - 37th Ave E Intersection	Install traffic signal.	328,358
52	9th St E - US 301	Construct a new sidewalk.	-
53	9th St E @ 30 Ave E	Upgrade to mast-arm supports and add right turn lanes on all four approaches.	2,000,000
54	9th St W - Cortez Rd to 301 Blvd	Construct a sidewalk on east side.	102,200
55	9th St W @ 30 Ave W	Upgrade to mast-arm supports and add turn lanes on all four approaches.	2,500,000
56	9th Street East Rebase and Resurfacing CIP	Re-base large sections of 9th Street East from US 301 to 9th Ave East.	1,870,348
57	Advanced Traffic Management System(ATMS) Countywide	Countywide construction of ATMS infrastructure.	500,000/year
58	Baywalk Trail from USF/Crosley	Construct trail from USF to Crosley, (North/South).	150,000
59	Bicycle System Improvements Countywide	Placing of bike racks and route signs throughout the county where needed.	100,000/year
60	Buckeye Road - US 41 to US 301	Widen from two lanes to four lanes.	33,543,026
61	Buffalo Rd - 69th St E to Moccasin Wallow Rd	Reconstruct and widen from 2 lanes to 4 lanes.	55,828,389

Transportation

62	Carter Rd - Erie Rd to Buckeye Rd	Widen from two lanes to four lanes.	16,023,178
63	Chip Seal Paving Fund	This project encompasses designing and constructing 4 miles a year of a Double Chip with Fog Seal, completing all 13 miles over a 5 year period to eliminate the need for rebasing under developed roads.	1,387,775
64	Clay Gulley Rd Repaving	Repave two lane road - 10 miles.	2,320,000
65	Clay Gully Road Rebase and Resurfacing	This project encompasses design, bidding and construction of a 27,000 LF of roadway base, asphalt surfacing and reworking shoulders.	3,918,115
66	Complete Streets Tuttle Avenue Phase I - INTERSECTIONS	Design and construct a single-lane roundabout with pedestrian crossing features at the Tuttle Avenue and 72nd Avenue East intersection.	1,047,000
67	Complete Streets Tuttle Avenue Phase II - INTERSECTIONS	Design and construct a roundabout with pedestrian crossing features at the Tuttle Avenue and 72nd Avenue East intersection.	1,191,000
68	CR 39 - Hillsborough Countyline - SR 62 Rebase and Resurfacing	This project encompasses design, bidding and construction of a 20,000 LF of roadway base, asphalt surfacing and reworking shoulders.	3,870,390
69	CR 39 Hillsborough Co Line to SR 62	Re-base sections of CR 39 from SR 62 to Hillsborough County Line.	3,964,759
70	CR 675 - US 301 to Rye Rd	Widen from two lanes to four lanes.	35,215,776
71	Desoto and Green Bridge Dynamic Message Signs	Provide electronic signs on bridges to provide traffic and emergency information.	990,000
72	Dynamic Message Sign Replacements	Design and construct 4 new dynamic message signs to include foundation, structures, sign, control, power and communication connections.	1,340,500
73	Ellenton Gillette Rd - US 301 to Moccasin Wallow Rd	Construct four lane roadway with five feet sidewalk, curb and gutter.	49,709,130
74	Ellenton-Gillette Rd at Mendoza Rd	Installation of mast arm signalized intersection to include left turn lanes on all four legs of intersection.	484,000
75	Experimental Farm Rd Bridge Replacement (134005)	Replace aging steel structure.	1,000,000
76	Fort Hamer Rd - U.S. 301 to Golf Course Rd	Reconstruct and widen from 2 lanes to 4 lanes.	16,748,517
77	Fort Hamer Road Extension from FF Road to IA Manatee southern boundary	The project will involve construction of the east pair of lanes of a future north-south four-lane road with 11-foot wide travel lanes, 4-foot wide bicycle lanes, west side 10-foot wide multi-use trail, and east side 5-foot wide sidewalk.	563,530
78	Golf Course Rd from Fort Hamer Rd to Twin Rivers Trail	Construct five feet sidewalk with drainage improvements.	3,421,000
79	Greenbrook Blvd from Lorraine Rd to Royal Turn Cir	Add sidewalk on north side.	115,000
80	Harbor Woods Curb Replacement	Remove and replace 50,000 linear feet of Type "D" curb. Phase I - from 55th St. W. to 51st St. W., Manatee Ave. to 1st Ave. W. Phase II - from 51st St. W. to 43rd St. W., Manatee Ave. to 1st Ave. W.	1,541,000
81	Harrison Ranch Blvd - US 301 to Erie Rd	Widen from two lanes to four lanes.	16,727,493
82	Harrison Ranch Blvd Intersection Improvement	Design and construct intersection operations safety improvements.	2,785,000
83	Honore Ave from 83 Ave E to Cooper Creek Blvd	Add two lanes to existing two lane roadway.	4,277,000
84	Lakewood Ranch Blvd - Rangeland Pkwy to SR 64	Widen from four lanes to six lanes.	33,933,230
85	Lakewood Ranch Blvd - River Club Blvd - SR 70 Rebase and Resurfacing	This project encompasses design, bidding and construction of a 2.3 mile section of Lakewood Ranch Blvd for base repairs in selected locations, resurfacing, and rework of shoulders.	3,149,000
86	Lena Rd - SR 64 to SR 70	Widen from two lanes to four lanes.	45,678,660
87	Lockwood Ridge Rd at Whitfield Ext	Add turn lane(s).	1,307,000
88	Lorraine Road - SR 70 - Players Dr Rebase and Resurfacing	This project encompasses design, bidding and construction of a 1.6 mile section of roadway, repair areas of base, resurface, rework shoulders.	2,681,000
89	Manatee County- Lincoln Park Pedestrian Overpass over US 41	The project will involve the design and construction of a 12-foot wide multi-use pedestrian overpass over US 41.	6,687,500
90	Mendoza Rd - US 19 to Victory Rd	Widen from two lanes to four lanes.	39,265,590
91	Mendoza Rd from Ellenton-Gillette to I-75	Widen from two lanes to four lanes.	10,999,000

Transportation

92	Morgan Johnson - Caruso Rd - SR 70 to SR 64	Widen roadway to 24 feet and resurface over entire width. Construct closed drainage and re-grade to provide eight feet shoulders.	7,200,000
93	Mulholland Road Extension	Design and construct a two-lane thoroughfare from the existing eastern terminus of Mulholland Road to Rye Road. Evaluate the most appropriate design considering the County's typical divided section versus the existing undivided section of Mulholland Road. Evaluate and design appropriate pedestrian and bicycle connectivity (bike lanes and sidewalk versus multiuse path), considering potential future upgrades to the existing 24' undivided Mulholland section.	5,777,700
94	"NEXT SIGNAL" Guidesigns at Major County Intersections	Design and install 50 multi-post Advance Intersection Guide Signs on approaches to 20 major intersections in the County (see location map).	590,000
95	Old Tampa Road from 89 Ave E to Chin Rd	Add sidewalks to both sides of the road.	811,000
96	Permanent Speed Feedback Signs - Countywide	Design and install 46 Permanent Speed Feedback Signs at 14 throughfare corridors in the County (see location map). These solar powered units shall display a static speed limit sign on the top and a radar driven LED sign showing real-time speed feedback under the static sign.	662,000
97	Piney Point Rd Ext. (Port Connector) - US 41 to I-75	Construct four lane limited access roadway.	57,865,692
98	Preliminary Engineering Studies	This project is a program that is expected to support scoping and feasibility analysis for several future capital projects that may or may not be concurrency-related.	1,337,500
99	Red Rooster Rd from US 301 to Major Turner Run	Road drainage and add sidewalk on one side.	350,000
100	Sawgrass Rd - Erie Road to Il Rd	Widen from two lanes to four lanes.	26,816,877
101	School Drive from Lakewood Ranch Blvd to Mustang Alley	Add sidewalk on one side.	161,000
102	Sidewalk Improvements Countywide	Sidewalk improvements as needed - countywide.	300,000/year
103	Spencer Parrish Rd from 57th St E to Golf Course Rd	Widen from two lanes to four lanes.	19,762,636
104	Spencer Parrish Rd from 57th St E to Golf Course Rd	Construct sidewalk.	870,000
105	SR 64 - 27th St E to Carlton Arms	Construct sidewalks.	144,578
106	SR 64 - Lakewood Ranch Blvd to Lorraine Rd	Widen from four lanes to six lanes.	19,898,702
107	SR 70 - 30th St E intersection	Construct northbound & southbound dual left turn lanes and separate right turn lane.	575,000
108	SR 70 - 33rd St E	Traffic signal upgrades.	400,000
109	SR 70 - Caruso Rd	Traffic signal upgrades.	400,000
110	Tallevast Rd - US 41 to 301 Blvd	Widen from two lanes to four lanes.	12,766,852
111	Tara Boulevard Complete Street Phase II - Tara Preserve Lane to Linger Lodge Road	Construct traffic calming measures with intersection improvements constructing two single lane roundabouts at Tailfeather Way and Linger Load Road and incorporate street lights, and additional traffic control devices to enhance pedestrian safety.	3,605,000
112	Tropical Harbour Curb Replacement	Remove and replace 5,000 Linear Feet (10,000 square feet) of Miami Curb.	636,656
113	Upper Manatee River Rd from Ft Hamer Bridge to Rye Rd	The existing two lane road will be reconstructed to include standard lane widths, pedestrian and bicycle facilities, and lighting.	21,000,000
114	University Parkway - Lakewood Ranch Blvd - Lake Club Blvd Rebase and Resurfacing	This project encompasses design, bidding and construction of a 15,000 LF of roadway base, asphalt surfacing, repair sidewalks, rework shoulders and repair curbing.	5,957,000
115	University Parkway Lakewood Ranch Blvd to Lake Club Circle	Re-base large sections of University Parkway from Lakewood Ranch Blvd to Lake Club Blvd.	6,391,600

Transportation

116	US 301 - 41st Ave E to 51st Ave E	Construct sidewalk.	460,000
117	US 301 - 60th Ave to Moccasin Wallow Rd	Widen from four lanes to six lanes.	68,850,033
118	US 301 - Haben Blvd Intersection	Construct intersection.	703,410
119	US 301 - Moccasin Wallow Rd N to County Line	Widen from two lanes to four lanes.	33,779,559
120	US 301 - University Parkway to 1st St	Widen from four lanes to six lanes.	74,751,464
121	US 301 / Silverleaf Avenue to Ft. Hamer Road	Road drainage and add sidewalks on both sides.	265,000
122	US 41 - 49th Ave W	Upgrade to mast arm support, construct right-turn lane all approaches, and left-turn lane on westbound approach.	1,389,691
123	US 41 - Bayshore Gardens Pkwy	Construct traffic separator on south leg of intersection.	326,000
124	US 41 - Edwards Dr to Braden Ave	Construct pedestrian crossings.	130,000
125	US 41 - Florida Blvd	Upgrade to mast arm support, and construct right-turn lane on all approaches.	87,600
126	US 41 - Orlando Ave	Upgrade to mast arm support, and construct right turn lane on all approaches.	917,992
127	US 41 - US 301 to 69th St	Widen from four lanes to six lanes.	45,244,397
128	Victory Rd from Mendoza to US 301	Upgrade road to current standards for travel lanes, sidewalks, bike lanes (or trail), and lighting.	8,094,000
129	Waterline Rd from Rye Rd to Dam Rd	Add sidewalk on one side.	1,028,000
130	Wauchula Rd over Long Creek Bridge Replacement	The bridge over Long Creek on Wauchula Road (FDOT# 134053) was constructed in 1955. Wauchula Road is the easternmost north-south connector between SR 64 and SR 70 in the Myakka area and is integral for local residential, commercial, and agricultural traffic. The detour around the bridge is 14 miles (35 miles when using roads in Manatee County). This structure is posted for loads that are 65% of the normal legal load. The structure currently has a low health index rating of 60 (out of 100) and sufficiency rating of 29 (out of 100) Scheduling this structure replacement in the next 5 years will save on maintenance costs over time and begin to reinvest in the critical infrastructure in the heart of our agriculture business area. The project will also include modifying the roadway profile since frequent overtopping occurs. The estimated dimensions of the new bridge are approximately 120 ft. long x 43 ft. wide. Permitting and right-of-way costs will be included as part of the project costs.	3,329,998
131	Whitfield Avenue Complete Street - University Parkway to Lockwood Ridge Road	Construct traffic calming measures which consist of repurposing Whitfield Avenue to provide 1 vehicular travel lane with a multi-use lane for golf carts and cyclist, separated with raised curb, in each direction from University Parkway to Lockwood Ridge Road. Intersection improvements consist of constructing five single lane roundabouts at West Country Club Lane, West Country Club Drive N, Country Club Way, Palm Aire Drive and Timber Lake Drive with additional traffic control devices provided to enhance pedestrian safety.	12,265,000
132	Willow Ellenton Greenway	Construct multi-use trail (Regional).	2,700,000

Potable Water

1	Fixed Based Automated Meter Reading	Conversion to Advanced Metering Infrastructure (AMI) meter reading system.	20,000,000
2	Lake Manatee - East County Wellfield Expansion (NEW) - FIF's	Add 10.2 miles of 36" Ductile Iron Pipe (DIP) from the Water Treatment Plant (WTP) east past Lake Manatee along US 64 to a point about 1.8 miles beyond Kibler Branch Road, to near the wells on the east bank of the Manatee River." 10.2 miles at \$450/ LF (5,280 LF = 1 Mile) 10.2 Miles x 5,280 LF = 53,856 53,856 x \$450 = ~ \$24M	24,200,000
3	Peace River Manasota Regional Water Supply Authority Regional Integrated Loop Phase 3C and 3C Extension Pipelines (PW02009) FIF's	The 3C and 3C extension pipelines will complete a 66 mile linkage between the PRMRWSA's facility and Manatee County. They will bolster flows between Sarasota and Manatee Counties and provide operational resilience and flexibility in serving growth in the region. Based on current demand projections, Manatee County will begin purchasing water from the PRMRWSA around the year 2038. Manatee County must also pay \$65M to purchase hydraulic capacity in earlier pipelines. That has been included in the total cost of 88.6M.	88,600,000
4	US 41 Manatee River Crossing Water Main Replacement	Replace existing 16-inch water main.	4,000,000
5	Utilities East County Operations Campus	Construct new operation buildings for Utilities.	26,000,000
6	Lake Manatee WTP Repurpose Lab for Ops & Admin Use (NEW)	Lake Manatee WTP Repurpose Lab for Ops & Admin Use (NEW).	1,200,000
7	WTP to Port Pipe Replacement - Leg 1 WTP to 675 (NEW)	29,000 feet of 30" watermain replacement.	12,325,000
8	WTP to Port Pipe Replacement - Leg 2 Foxbrook to US 301 (NEW)	23,000 feet of 30" watermain replacement.	9,775,000
9	WTP to Port Pipe Replacement - Leg 3 US 301 to I75 (NEW)	24,000 feet of 30" watermain replacement.	10,200,000
10	WTP to Port Pipe Replacement - Leg 4 I-75 to Port Manatee (NEW)	23,000 feet of 30" watermain replacement.	9,775,000
11	Cortez Road Pipe Replacement (NEW)	31,000 feet of 24" watermain replacement.	10,850,000
12	PTSW at East Lake Manatee (NEW)	Implementation of an Aquifer Recharge Project on the east end of Lake Manatee near the fish camp, this is mutually exclusive to the project below, we would only do one, not both.	37,500,000
13	PTSW ASR at Lake Manatee WTP (NEW)	Conversion of ASR from Potable to Partially Treated Surface Water, this is mutually exclusive to the project above, we would only do one, not both.	30,000,000
14	Third Party Provider Water Supply Project (NEW)	This represents the Capital Investment required to take advantage of a 3rd Party Wholesale Agreement with a Private Entity who Approached the County Offering to Sell Potable Water.	20,000,000
15	Central County Field Operations Depot	Construct office space, warehousing, pipe laydown areas and materials stockpiles east of I-75 to serve growth.	2,700,000
16	AMI Meters	Strategically replace all remaining direct read meters with Advance Meter Infrastructure (AMI ~50,000 units).	20,000,000

Solid Waste

1	Lena Road Landfill Gas Electric Generation - Phase II	Construct gas electric facility so the landfill can utilize available methane gas using additional gas electric generators.	6,000,000
2	New Landfill Design, Permitting and Construction Costs (NEW)	Costs for constructing new landfill facilities, utilities, site work and construction for first 20 acres +/- cell, along with all other associated upfront costs to develop the initial site.	15,000,000

Stormwater

1	Bowlees Creek - Regional Flood Mitigation Project	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. This project consists of modification of existing stormwater facilities along the mainline system of Bowlees Creek and secondary systems.	5,000,000
2	Bowlees Creek Regional Flood Mitigation Design Permitting	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed.	1,000,000
3	Bowlees Creek Regional Flood Mitigation Facilities	This project consists of acquisition of properties and utilization of existing county property to construct flood storage facilities.	7,750,000
4	Centre Lake Flood Mitigation	Design and construction. Wall construction (approx. 3,500 ft, 5 ft). Raised access road to Centre Lake. Pump Station. Lower existing outfall structures at Rio Mar, Pearce Business Center, Barrington Ridge, Palm Lakes and Trent Building Systems. Addition of two nutrient baffle boxes for water quality enhancement.	9,829,186
5	Construction of Bay Drive storm pipe improvements, sidewalks, and utility adjustments	Construct drainage improvements, sidewalk, driveways and ADA curb ramps. The project may be constructed in phases due to potential utility conflicts and permitting on the west side of the project.	2,485,118
6	Cow Pen Slough Drainage Improvements, Segment 1 of 3	The first segment begins at the County line just east of Lorraine Rd. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the Concession subdivision at University Parkway to the east side of the Concession. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,837
7	Cow Pen Slough Drainage Improvements - Segment 2 of 3	The second segment begins at the County line just east of the Concession. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the east side of the Concession to SR 70. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,836
8	Cow Pen Slough Drainage Improvements - Segment 3 of 3	The first segment begins at the north side of SR 70. The work includes evaluate, design, permit, and construct approximately 3 miles of natural drainage system improvements for the Cow Pen Slough from the north side of SR 70 north to 65th Ave E. There will be two phases for each segment. Phase 1: mapping and land/easement acquisition; Phase 2: land clearing and flowline improvements. Improvements to include but not limited to vegetation removal, drain widening, sediment removal, channel straightening, and upsizing culverts. Obtain necessary drainage/access easement required for the improvements.	9,155,836
9	Design of Bay Drive storm pipe improvements sidewalks and utility adjustments	Design and permit drainage improvements, sidewalk, driveways and ADA curb ramps.	425,453
10	Easement Acquisition Countywide	Identify and obtain necessary easements for our stormwater canal and pipe systems throughout Manatee County.	1,462,500

Stormwater

11	Glen Creek Stormwater Pipe Relocation	Evaluate, design, permit, and construct approximately 700 LF of 36" RCP storm drain, collection boxes, headwall, and bank revetment. Obtain necessary easement(s) required for access and maintenance of the pipe at its new location. Abandoned or remove stormwater infrastructure in conflict with the City of Bradenton project. Replacement to be of like size with no modification in flow capacity.	821,925
12	Longbay Area Drainage Improvements	This project will replace 7,000 feet of aging storm water conveyance pipe and associated drainage infrastructure. The project would include Bernard Ave, Somerset Ave, Suwanee Ave, Hernando Ave, and Braden Ave.	12,696,909
13	Palmetto Point Drainage Improvements	Evaluate, design and permit the reconstruct/improvement of the existing drainage system. This includes approximately 17 miles of roadside ditches and associated stormwater infrastructure including but not limited to, upsizing culverts, installing mitered end section at driveway crossings, and outfall modifications. Obtain necessary drainage easement needed for the improvements or existing infrastructure. A wetland or water quality permit element is anticipated with this project in the modern permitting era, that will add additional cost for additional pond sites or a wetland mitigation credits.	5,747,500
14	Pearce Drain - North Regional Flood Mitigation	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. The project limits are 63rd Avenue East northward (downstream) to the confluence with the Braden River.	5,000,000
15	Pearce Drain - Phase 2 Regional Stormwater Improvements	Phase 2 project would consist of replacement or improvements to existing culvert crossings and/or bridges within Pearce Drain Watershed to create additional conveyance capacity within primary and secondary drainage systems. This project would follow installation of Automated Outfall Structures throughout the watershed and regional flood mitigation facilities.	5,000,000
16	Pearce Drain - South Regional Flood Mitigation	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. The project limits are Manatee-Sarasota County Line northward (downstream) to 63rd Avenue East.	5,000,000
17	Pearce Drain Phase 1 Regional Flood Mitigation Design Permitting	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. Create additional floodplain mitigation by directly-connecting stormwater/floodplain mitigation facilities to primary drainage systems by the removal of berms and/or embankments or the installation of spillways or equalization culverts. Phase 2 replacement/improvements to existing culvert-crossings and/or bridges to improvement conveyance capacity of primary and secondary drainage systems throughout the watershed.	1,000,000
18	Pearce Drain Regional Flood Mitigation Facilities	Modification of existing stormwater/floodplain mitigation facilities to primary drainage systems by the removal of berms and/or embankments or the installation of spillways or equalization culverts.	2,000,000

Stormwater

19	Pittsburg Drain - Regional Flood Mitigation Project	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. Improvements to downstream outfall systems may be required to effectively drawdown stormwater facilities. Pumps may also be considered where the existing downstream outfall is relatively high to prevent effective drawdown of stages. This project consists of modification of existing stormwater facilities along the mainline system of Pittsburg Drain and secondary systems.	5,350,000
20	Poinsettia Avenue Drainage Improvements	Evaluate, design, permit, and construct approximately 1,200 LF of Type A curb & gutter along east side of Poinsettia Avenue with associated collection box, and outfall pipe. Acquisition of access/maintenance easement will be required.	1,096,875
21	Rattlesnake Slough - Canal Maintenance Establishment	Acquire access easements as needed, clear and grub access and canal banks, remove blockages, establish appropriate flow line elevations.	1,812,850
22	Rattlesnake Slough Regional Storage Design and Permitting	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed. An existing County floodplain mitigation facility would be designed and permitted for modification and excavation to create additional flood storage volume. A proposed channel/culvert system would connect Rattlesnake Slough to the existing County floodplain mitigation area under Honore Avenue, though the existing County Floodplain Mitigation Area to the Evers Reservoir. Automated Outfall Structures would be utilized in this system to prevent backflow from Evers Reservoir. In addition, design and permitting would be included for flood storage areas along Rattlesnake Slough on private property and City of Bradenton property.	700,000
23	Regional Storage Drainage Improvements - Bowlees Creek	Design and construction. This project will lower the flood stages and remove 91 structures from the 100 year floodplain. This will be accomplished with construction of 41.5 ac of ponds, modification of existing weirs and modifying neighboring pond control structures for additional storage.	7,405,003
24	Slaughter Drain Segment 1 - Canal Maintenance Establishment	Acquire access easements as needed, clear and grub access and canal banks, remove blockages, establish appropriate flow line elevations.	1,457,425
25	Slaughter Drain Segment 2 - Canal Maintenance Establishment	Acquire access easements as needed, clear and grub access and canal banks, remove blockages, establish appropriate flow line elevations.	711,274
26	Storm Pipe Asset Mapping	Map our current storm pipe system and identify GIS locations, pipe type and diameter and any associated structures.	638,500

Stormwater

27	Sylvan Oaks/Carr Drain Stormwater Improvement Design and Permitting	Preemptive drawdown of stages of existing stormwater facilities throughout the watershed in times of emergency activation or issuance of Flood Watch products by the National Weather Service in advance a forecasted storm/flood event to create additional stormwater/floodplain storage through the utilization of Automated Outfall Structures (AOS) and other modification/improvements with the watershed.	500,000
28	Terra Ceia Bay Stormwater Improvement	This project will consist of construction of a new stormwater conveyance system from 64th Street Court East to Terra Ceia Bay. This proposed conveyance system will consist of either an open drainage ditch or a stormwater pipeline. Acquisition of a drainage easement through private property will be necessary for construction of the proposed stormwater conveyance system and perpetual maintenance. A drainage-maintenance access easement will also need to be acquired for maintenance vehicle access to an open drainage ditch option. Design and permitting associated with the proposed stormwater conveyance system. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvement where possible.	907,569
29	Trailer Estates - Area A - Rear swale improvements, inlet repairs, and pipe upsizings	Construction of rear yard swale improvements, inlet repairs, and pipe upsizing.	292,500
30	Trailer Estates - Area B - Rear swale improvements inlet repairs and pipe upsizings	Construct rear yard swale improvements, inlet repairs, and pipe upsizing, increase of outfall capacity as well as CMP pipe replacement on Bay Drive west of Canada Blvd.	479,700
31	Trailer Estates - Area C - Rear swale improvements inlet repairs and pipe upsizings	Construct rear yard swale improvements, inlet repairs, pipe upsizing, and increase of outfall capacity.	659,880
32	Whitfield Estates sidewalk, curb and drainage improvements	Remove and replace sidewalk and curb and tree removal causing damage to both, drainage improvements including utility adjustments and resurfacing for Wee Burn, Chevy Chase, St. Andrews, McArthur, and Meadowbrook.	6,432,646
33	Willis Road, Palmetto	This project will consist of construction of a new stormwater conveyance system from Willis Road south to Buffalo Canal. This proposed conveyance system will consist of either an open drainage ditch or a stormwater pipeline. Acquisition of a drainage easement through private property will be necessary for construction of the proposed stormwater conveyance system and perpetual maintenance. A drainage-maintenance access easement will also need to be acquired for maintenance vehicle access to an open drainage ditch option. Design and permitting associated with the proposed stormwater conveyance system. Water quality Best Management Practices (BMP) to be utilized during construction and incorporated into the stormwater improvement where possible.	1,313,208

Wastewater

1	69th Ave Parallel Force Main (6097780)	Project completed Design @ 60% - on hold pending the construction of the other Developer projects in the area within the next 10 years.	900,000
2	CR 675 Force Main	Install new force main per master plan along C.R. 657	1,225,000
3	Erie Rd - Martha Rd to Harrison Ranch - MARS	Construct reclaim water line from Harrison Ranch Boulevard to Copperstone Phase 1 using approximately 7,800 linear feet of 16 inch ductile iron pipe.	4,500,000
4	Harrison Ranch Force Main	Install new force main per master plan along Harrison Ranch Blvd.	1,305,000
5	MCMRS Booster Pump Station Improvement	Replacement of Pumps at the MRS Booster Pump Stations.	5,700,000
6	North Regional Water Reclamation Facility Administration & Maintenance Bldg. (WW01852)	Replace the Administration Bldg. and add a Maintenance Bldg. to accommodate the NR Water Reclamation Facility Management staff offices.	5,700,000
7	North Regional Water Reclamation Facility Expansion	Expand NWRf treatment processes.	20,000,000
8	North Regional Water Reclamation Facility Reclaimed Water Storage Lake Improvements (WW01421)	Reduce slope to 3.1 where necessary on the Golf Course Lake. Remove all peninsulas in the Golf Lake Course.	8,000,000
9	North Regional Water Reclamation Facility 10 MG Reclaimed Water Storage Tank & HSPS (WW01422)	Installation of a 10 million gallon reclaimed storage tank with a new high service pump station.	25,400,000
10	Rye Rd BPS to Spencer Parrish Rd PS Parallel Water Main Improvements (NEW)	Construct 16" reclaimed water main to parallel the existing 30" reclaimed water main along Rye Rd E from Rye Rd Bypass (BPS) north to Golf Course Rd, northwest along Golf Course Rd to Spencer Parrish Rd continuing to Spencer Parrish Pump Station (PS), by furnishing and installing approximately 49,000 LF of new 16" reclaimed water main.	29,000,000
11	Rye Road Reclaimed Pump Station Upgrade (NEW)	Remove three existing pumps and furnish and install three 150 hp and one 75 hp horizontal split-case pumps and required electrical upgrades. Inspect discharge piping, pipe bracing, base ells, influent main brackets, and mounting plates for corrosion damage and replace as necessary.	2,800,000
12	SERWRF to Rye Road BPS Parallel Reclaimed Water Main Improvements (NEW)	Construct 24" reclaimed water main to parallel the existing 30" reclaimed water main from the south end of 81st Ct E outside of Southeast Regional Water Reclamation Facility (SERWRF) north to State Road 64 east to Rye Rd E and along Rye Rd E to the Rye Rd BPS, by furnishing and installing approximately 28,000 LF of new 24" reclaimed water main.	21,000,000
13	Southeast Regional Water Reclamation Facility Administration Building (WW01622)	Replace the Administration building to accommodate the SER Water Reclamation Facility management staff offices.	1,700,000
14	Southeast Regional Water Reclamation Facility Second 10 MG Reclaimed Water GST and MCMRS Chlorination System	Construction of a second 10 million gallon reclaimed water storage tank and addition of a Manatee County Master Reuse System chlorination system.	6,200,000
15	Southwest Water Reclamation Facility ASR New Piping (NEW)	Design and install new piping for the Aquifer Storage and Recovery (ASR) well.	3,600,000
16	Southwest Water Reclamation Facility New Administration Building (WW01856)	Site and build a new 2 story administration bldg. with vital components above projected storm event water levels.	3,000,000
17	Spencer-Parrish Reclaimed Pump Station Upgrade (WW02029)	Remove three existing pumps and furnish and install four 200 horse power (HP) horizontal split-case pumps. Inspect piping, pipe bracing, pedestals, and other appurtenances for corrosion damage and replace as necessary. Install four Variable Frequency Devices (VFDs) and complete necessary power, electrical, and Supervisory Control And Data Acquisition (SCADA) improvements. Project cost includes a new electrical building. Design engineer to confirm need for a new building.	4,500,000
18	Trailer Estates R&R Phase V (NEW - 601808x).	Design phase for Utilities long term plan; FY37 design phase five and replacement construction in FY38. This last phase will complete the total replacement to the aging system in Trailer Estates.	7,200,000
19	Trailer Estates R&R Phases III - IV (NEW - 601808x).	Design phase for Utilities long term plan; FY30 design phase three and four and replacement construction in FY31. These phases will bring us closer to the total replacement to the aging system in Trailer Estates.	17,000,000

Adopted FY24-28 CIP - Wastewater \$ 1,099,564,560

Infrastructure Sales Tax Fiscal Years 2024 - 2028

Program Summary

Manatee County Board of County Commissioners recognized that it would be in the best interest of Manatee County to provide for safer neighborhoods, reduce traffic congestion, and improve roadways and public facilities as authorized by law, and to levy and collect a half cent sales surtax to pay the cost thereof. Wherein, Ordinance 16-35 provided for a levy, imposition, and setting of a Discretionary Local Government Infrastructure Sales Tax (IST), at a rate of one-half percent for a period of fifteen years pursuant to section 212.055(2), Florida Statutes, subject to approval by the electors of the County in a referendum which was held and passed by Manatee County voters in the general election on November 8, 2016 and became effective January 1, 2017. Unless extended by voters in a lawful referendum, the Infrastructure Sales Tax shall sunset and expire on December 31, 2031.

Infrastructure Sales Tax proceeds are collected by the Florida Department of Revenue and distributed to the County and the municipalities within the boundaries of the County and shall be used to finance, plan, and construct infrastructure (as defined in Section 212.055(2), Florida Statutes), which shall be limited to the following types of projects and equipment: roadways, sidewalks, intersections, street lights, infrastructure for law enforcement, emergency response, libraries, parks, waterways, public buildings and stormwater. In addition, all expenditures of Infrastructure Sales Tax proceeds, and any interest or investment earnings thereon, shall comply with the limitations imposed by Section 212.055(2), Florida Statutes.

Established by Ordinance 16-35 are restrictions on the use of the Infrastructure Sales Tax. These provisions are for the collection and distribution of the Infrastructure Sales Tax and providing for citizen oversight with the establishment of a Citizens Oversight Committee for Infrastructure Sales Tax Advisory Board.

The Citizens Oversight Committee was established with Resolution R-16-128 as amended and restated by Resolution R-18-130 and provides for citizen review of its expenditures of Infrastructure Sales Tax proceeds and serves as an advisory and reporting body to the County. The resolution establishes how the Infrastructure Sales Tax proceeds for Manatee County will be spent in accordance with two items: an "Infrastructure Sales Tax Funding Categories List" establishing subcategories and percentages for expenditure of sales tax proceeds. Which further defines that future changes to the categories or percentages requires an amendment to the resolution to be adopted at a Public Hearing and creates an "Infrastructure Sales Tax Project and Equipment List" for projects and equipment to be funded by the sales tax proceeds. Future changes of projects and equipment on the list must be made through the County's Five-Year Capital Improvement Plan (CIP) or by amendment to the resolution at a Public Hearing. The seven-member Committee is appointed by the Board of County Commissioners and shall provide an annual report to the County on the expenditure of Infrastructure Sales Tax proceeds by the County no later than December 31st of each calendar year in which Infrastructure Sales Tax proceeds are expended. The Committee, its members and all its proceedings shall be governed by and comply with all applicable laws, including without limitation (1) the Florida Government in the Sunshine Law, Chapter 286, Florida Statutes, (2) the Florida Public Records Law, Chapter 119, Florida Statutes, and (3) the Florida Public Ethics Code, Chapter 112, Florida Statutes.

Infrastructure Sales Tax Projects of Record

Athletic Fields

1	NR02065	County Road 675 Soccer Fields - Work with the County Attorney's office to prepare an agreement between Manatee County and a developer who will oversee the design and construction of the six soccer fields with lights, parking, restroom facilities, concessions and other amenities. Manatee County would be expected to maintain and operate the six soccer fields once completed.	TTL \$3,000,000 IST Amount of \$500,000
---	---------	--	--

District Parks & Aquatic Facilities

1	FY21-25 Request	G.T. Bray Park Aquatic installation of submersible bulkheads - Center installation of submersible bulkheads in the 50 meter pool.	1,003,750
2	FY21-25 Request	G.T. Bray Park Improve Trail System - Add outdoor lighting along the trail path of GT Bray as well as signage and fixed exercise equipment.	250,000
3	FY21-25 Request	G.T. Bray Park Security Lighting: Add security lighting along the access roads to the softball complex and baseball complex.	20,000

Recreation Buildings & Playgrounds

1	FY21-25 Request	G.T. Bray Park Relocate Outdoor Basketball Court with Light - The new basketball court will be located adjacent to the new skate park. This will allow us to utilize the existing slab. We will construct one full sized basketball court, with fencing and lights that will be open, free to the public.	156,079
2	FY21-25 Request	Lakewood Ranch Park Paved Parking Lots - Pave northeast corner of soccer parking lot and northwest corner of softball field parking lot and along Malachite Dr.	1,000,000

Law Enforcement Facilities & Equipment

1	PSLE002	MCSO -Sheriff's Dist. 1 Office - 20,000 square feet addition to Desoto Center.	3,296,250
2	PSLE003	Sheriff's Dist. 2 Office - Demolish and rebuild 20,000 square feet of building.	3,296,250

Criminal Justice & Public Safety Facility Improvements

1	FY22-26 Request	Bayfront Park Lifeguard Expansion - The population of the county grows and the tourist industry is vibrant in our coastal communities. We actively protect 3 of the 4 county parks on Anna Maria Island. Bayfront Park is currently unprotected. As our current lifeguarded beaches continue to reach capacity it pushes our visitors and locals to this park, leaving them to swim at their own risk. Research will be completed over the next few years to help determine the number of visitors to Bayfront Park and how they increase year over year. With that information in hand the building of the lifeguard towers could take place in FY26.	TBD - TTL \$400,000
2	FY22-26 Request	Telecommunicators Training Room - The Emergency Communication Center (ECC) training room does not currently meet the needs for telecommunicator training. The size of ECC's current training room has limited space for equipment and employees. A larger space would allow the ECC to train a larger number of people at one time and allow adequate room for social distancing. ECC and MSO have agreed to expand MSO's current training room in order to combine our training programs. Both agencies use many of the same training materials and courses required for Telecommunicator certifications. The new training room will be approximately double the size of our current training room. The project includes new workstations so that it can serve as additional 9-1-1 positions for mass emergency situations such as hurricanes, storm events, and other instances requiring additional staff.	TBD - TTL \$500,000
3	FY22-26 Request	Emergency Management Storage and Vehicle Building Addition - Project is for the construction of a pre-fab building size 24'x36' metal building with 2 bay doors, main door, concrete slab, climate control units, HVAC system, and electrical, to be used for additional EM supplies and/or vehicles.	TBD - TTL \$250,000

Glossary

Appropriation

Legal authorization given by the County Commission to make expenditures and incur obligations using county funds.

Arterial Road

A route providing service which is relatively continuous and of relatively high traffic volume, long average trip length, high operating speed and high mobility importance. The primary purpose of arterials is to provide service to major traffic movements; access to abutting property is a subordinate purpose.

Beginning Fund Balance

The Ending Fund Balance of the previous period. (See Ending Fund Balance)

Bond

Written evidence of the issuer's obligation to repay a specified principal amount on a certain date (maturity date), together with interest at a stated rate, or according to a formula for determining that rate. Bonds are sometimes used as a source of financing for large scale or expensive projects to allow projects to proceed rather than wait until the funds can be accumulated.

Capital Budget

Financial plan of capital project expenditures for the fiscal year beginning October 1. It incorporates anticipated revenues and appropriations included in the first year of the five-year Capital Improvement Plan (CIP), and any anticipated unspent appropriation balances from the previous fiscal year. The capital budget is adopted by the Board of county Commissioners as a part of the annual county budget.

Capital Improvement

Physical assets constructed or purchased to provide, improve or replace a public facility, and which are large scale and high in cost. The cost of a capital improvement is generally nonrecurring and may require multi-year financing.

Physical assets which have been identified as existing or projected needs in the individual Comprehensive Plan elements shall be considered capital improvements.

Capital Improvement Element (CIE)

The Capital Improvement Element of the Comprehensive Plan identifies projects and financing for projects that are required to provide services to the areas of the county where growth is occurring in order to maintain levels of service that are required by the Comprehensive Plan.

Capital Improvement Plan (CIP)

A proposed plan, covering each year of a fixed period of years, for financing long-term work projects that lead to the physical development of county infrastructure. Manatee County develops a five-year CIP.

Capital Project

A non-recurring expenditure of \$250,000 or more for the construction, installation, or acquisition of capital facilities, or the acquisition of interests in land.

Capitalized

Term used to classify assets which have a useful life greater than one reporting period.

Comprehensive Plan

A document adopted by the Board of County Commissioners that sets forth goals, objectives and policies for future land use, and establishes level of service standards that will be needed to meet the infrastructure needs of the county.

Collector Road

A route providing service which is of relatively moderate average traffic volume, moderately average trip length, and moderately average operating speed. Traffic movement is a priority but there is a higher degree of land access than with an arterial road, allowing such a route to collect and distribute traffic between local roads or arterial roads and serve as a linkage between land access and mobility needs.

Concurrency

Level of service that is required to meet the specified level of service required by the Comprehensive Plan.

Contingency Funds

Monies set aside, consistent with statutory authority, which subsequently can be appropriated to meet unexpected needs.

Community Redevelopment Areas (CRAs)

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Tax Increment Funds (TIFs).

Current Year Appropriation

The current year adopted budget adjusted to reflect any budget amendments done during the current fiscal year.

Debt Service

Payment of interest and principal on an obligation resulting from the issuance of bonds.

Deficit

Excess of expenditures over revenues.

Department

Manatee County's organizational structure groups programs or divisions into departments by functional similarities. Departments report to the County Administrator.

Designated Funds

Funds that are set apart for a specific purpose to fund on-going or one-time expenditures. Examples are bond proceeds, reserves or "pay-as-you-go" reserves for future facility renewal and replacement projects found mostly in the Enterprise Funds.

Division

Divisions are the units of government which provide services directly to the public and other agencies. Divisions are organized within departments by functional similarity.

Ending Fund Balance

Funds carried over at the end of the fiscal year. Within the fund, the revenue on hand at the beginning of the fiscal year, plus revenues received during the year, less expenses equals ending fund balance. The Ending Fund Balance becomes the Beginning Fund Balance in the next fiscal year.

Enterprise Fund

A fund which pays for its cost of operations from user fees

and does not generally receive property tax or general revenue support. County Enterprise Funds include Manatee County Public Utilities, Landfill, Golf Course, Civic Center, Port Authority, Stormwater Utilities, and Mass Transit.

Expenditure

Decrease in net financial resources. Expenditures include current operating expenses which require the current or future use of net current assets, debt service and capital outlay.

Fiscal Year

A twelve-month period (October 1 through September 30) at the beginning of which the county implements a new budget based on expected revenues and expenditures, and at the end of which the county determines its financial position and the results of its operations.

Fixed Assets

Accounting classification of assets such as property, plant, and equipment which are capitalized.

Fund

A self-balancing set of accounts designated and accounted for separately for the purpose of restricting specific revenues that are then spent for specific activities.

Fund Balance

Amount available within a fund at the close of a fiscal period which can be carried over as non-recurring revenue for the upcoming fiscal period.

Funding Sources

Type or origination of funds to finance ongoing or one-time

expenditures. Examples of CIP funding sources include, but are limited to, user fees, general revenues, gas taxes, grants, impact fees, contributions and bonds.

Generally Accepted Accounting Principles (GAAP)

Uniform minimum standards and guidelines for financial accounting and reporting as authorized by the Governmental Accounting Standards Board (GASB). The standards and guidelines include details practices and procedures and broad guidelines of general application.

General Revenue

The revenues of a government other than those derived from and retained in a proprietary, special revenue, or trust and agency fund. In Manatee County, the majority of general revenues come from ad valorem taxes.

Governmental Funds

Funds used to account for the acquisition, use and balances of expendable financial resources and the related current liabilities – except those accounted for in proprietary funds and fiduciary funds.

Impact Fees

Impact fees are a fee that is imposed by the County on new or proposed development projects to pay for all or a portion of the costs of providing public services to the new development. Impact fees are a charge on new development to help fund and pay for the construction or needed expansion of offsite capital improvements. These fees are implemented to help reduce the economic burden on the County associated with population growth within the area.

Infrastructure Sales Tax (IST)

The levy and collection of a one half-cent sales surtax collected by the Florida Department of Revenue and distributed to the County and the municipalities within the boundaries of the County, used to finance, plan, and construct infrastructure (as defined in Section 212.055(2), Florida Statutes), and limited to the following types of projects and equipment: roadways, sidewalks, intersections, street lights, infrastructure for law enforcement, emergency response, libraries, parks, waterways, public buildings and stormwater.

Interfund Transfers

Transfers of cash between funds without requirement for repayment.

Intergovernmental Revenues

Revenues received from other governments including the federal, state, and other local governmental entities.

Level of Service

An indicator of extent or degree of service which is, or will be, provided by a facility. Level of service standards, as used in the comprehensive plan, are targets or objective with which compliance is required. Levels of service are established using one or more infrastructure standards and may also include use of one or more performance standards.

Local Road

A roadway providing service which is of relatively low traffic volume, short average trip length or minimal through traffic movements and high-volume land access for abutting property.

Mandate

A requirement imposed by a legal act of the federal, state or local government.

Mass Transit

Passenger services provided by public, private or non-profit entities such as the following surface transit modes: commuter rail, rapid rail transit, light rail transit, light guideway transit, express bus and local fixed route or demand-response bus.

Operating Budget Impacts

Expenditures directly related to the cost of operating and/or maintaining the capital improvement upon completion of the project.

Paratransit

Transit service, including ridesharing, car or van pools, demand responsive buses, and other public transit services, which are characterized by their nonscheduled, non-fixed route nature.

Personal Services Expenditures

Expenditures for county employees including regular wages, overtime, contributions to the State Retirement System, Social Security, health and worker's compensation insurance premiums, and unemployment compensation costs.

Potable Water

Water which is satisfactory for drinking, culinary, and domestic purposes and which meets the appropriate requirements of the Florida Department of Environmental Regulation.

Potable Water Facilities

A system of structures designed, constructed or used to collect, treat or distribute potable water, which includes water wells, treatment plants, reservoirs, and distribution mains.

Preserve

Resource based preserve operated by the county for the primary purpose of environmental preservation and public enjoyment of environmentally sensitive lands.

Prior Year Appropriation

Includes funds budgeted for projects in prior years or through a budget amendment done during the current year prior to the date of the Proposed CIP.

Project

See Capital Project.

Property (Ad Valorem) Taxes

Revenue which is collected on the basis of a tax rate applied to the taxable valuation of real property.

Proposed Budget

The budget submitted by the County Administrator to the Board of County Commissioners within 15 days after the certification of the ad valorem tax roll by the Property Appraiser.

Proprietary Fund

A set of segregated revenue and expenditure accounts set up for the purpose of showing net income, financial position, and changes in financial position. Enterprise funds and internal service funds are proprietary funds.

Reserves

Included in this category are funds required to meet both anticipated and unanticipated needs; the balance of anticipated earmarked revenues not required for operation in the budget year; those required to be set aside by bond covenants, and accumulated funds set aside to finance capital construction on a pay-as-you-go basis.

Revenue

Taxes, fees, charges, special assessments, grants, and other funds collected and received by the county to support the services provided.

Right of Way

Land in which the state, county or municipality owns the fee simple title or has an easement dedicated or required for a transportation, utility or other use.

Solid Waste

Sludge from a waste treatment works, water supply treatment plant or air pollution control facility; or garbage, rubbish, refuse or other discarded material, including solid, liquid semisolid, or contained gaseous material resulting from domestic, industrial, commercial, mining, agricultural or governmental operations.

Solid Waste Facilities

Structures or systems designed for the collection, processing or disposal of solid wastes, including hazardous wastes, and which includes transfer stations, processing plants, recycling plants and disposal systems.

Special Revenue Fund

A fund used to account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditures for specified purposes.

Stormwater

The flow of water which results from a rainfall event.

Stormwater Runoff

Portion of precipitation, which is not passed into the soil by infiltration, evaporated into the atmosphere, or entrapped by small surface depressions and vegetation, and which flows over the land surface during, and for a short duration following any rainfall.

Surplus

Excess of revenues over expenditures.

Taxes

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit. Does not include user fees or special assessments.

Tax Increment Fund (TIF)

Means of financing activities from the anticipated incremental increase in tax revenues resulting from the redevelopment of an area. Also known as Community Redevelopment Areas (CRAs).

Tourist Development Tax

A tax collected on hotel rooms and other lodging rentals of six months or less. In Manatee County, one penny of the five cents collected is reserved for beach renourishment and

beach improvement projects. Tourist tax monies other than this cent may be used for other tourist related projects or facilities.

Transfer

A movement of monies from one fund to another fund for the purpose of accurately accounting for expenditures. Transfers are expenditures to the fund they are being transferred from and revenues to the receiving fund. Because transfers are again budgeted as expenditures in the receiving fund, they are not included in the net budget to avoid counting the monies as expended twice.

User Fees

The payment of a fee for direct receipt of a public service by the person benefiting from the service.

Unincorporated Municipal Services Taxing Unit (UMSTU)

Unincorporated areas within Manatee County are within the Unincorporated Municipal Services Taxing Unit. Residents of the district are assessed a millage rate by the county to provide services which would be provided by a municipality if the areas were incorporated.

Voted Millage

Property tax levies authorized by voters within a taxing authority. Bond issues that are backed by property taxes are a common form of voted millage in the State of Florida. Such issues are called general obligation bonds and may be used to finance large capital projects.
